• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

Exclude the hours costs and volumes (where applicable) associated with the

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, scheduling, residency program. (Laboratory Services)
• Albumin, plasma protein fraction, Rh Immune Globulin, Anti Thrombin, Varicella Zoster Immune Globulin, and other specialty plasma products
• Bench teaching of students (non-department employees)
• Blood and blood product costs
• Blood Bank and Donor Center services
• Clinical Engineer and/or Biomedical Technician
• Cost of hemophilia factors
• Hospital-based School of Medical Technology

• Lab Courier Service (Courier services specific to lab specimens only e.g. in house runners, external - remote pickup)

• Medical records transcription, e.g., lines produced internally or outsources (Laboratory). This includes transcription from dictation capture to document distribution and storage, including associate transcription.

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Patient reception, e.g., greeting, checking in of patients, answering phone calls (Laboratory)

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Laboratory)

• Repair and Maintenance of Clinical Equipment/Rooms

• Support activities for department Information System, e.g., clinical table updates (Laboratory)

• Tumor Registry - the activities involved in capturing history, diagnosis, treatment and health status for tumor patients

• Administration and Support activites for a Laboratory Residency Program

• Autopsies

• Didactic Teaching for phlebotomy (Providing Collection Manager (PDA's and Printers and training) for nursing services doing arterial line draws)

03371, Laboratory Services: Clinical Operations Core Lab Only

This department includes clinical laboratory departments typically considered testing areas in a central core lab, specifically Chemistry, Hematology with Coagulation, Urinalysis, and Immunology. It also includes phlebotomy, specimen receiving/processing, and reference lab sendouts. Do not include administration and support functions supporting these clinical laboratory departments, anatomic pathology, or blood bank functions.

Laboratory Services: Clinical Operations Mapping Guidelines
If your cost center includes the functions defined along with specialty lab functions (Microbiology/Virology, Molecular Genetics, Flow Cytometry, Reproductive Medicine), another option might be the 03370 Lab Services: Clinical Operations Combined or the 03372 Lab Services: Clinical Ops Specialty Labs Only department. If you have separate and distinct cost centers for all of the specific classification of tests, map them to the more detailed departments in the series.

**Laboratory Services: Clinical Operations Workload Volumes**

### Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review the Guiding Principles section in the DRM for more information.

### Billed Tests Sent To Reference Lab

Total billed tests sent out to another lab (reference lab) for processing. According to CMS, the definition of a reference lab is a Medicare-enrolled laboratory that receives a specimen from another, referring laboratory for testing and that actually performs the test.

This is a component of Total Billed Tests.

### Chemistry Billed Tests Performed

Total billed tests performed under the chemistry classification. Chemistry tests are typically billed under the CPT code range 80047-80439 and 82000-84999. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a component of Total Billed Tests.

### Complete Blood Count (CBC) Tests Performed

Total billed tests performed for Complete Blood Count (CBC) tests, including automated only (CPT Code 85027) and automated differential WBC count (CPT code 85025) only. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a subset of Hematology Billed Tests.

### Days of Operation per Week

Total number of days the department is open for operation during the week.

The maximum number that can be reported is 7.
Hematology Billed Tests Performed

Total billed tests performed under the hematology classification. Hematology tests are typically billed under the CPT code range 85000-85999. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a component of Total Billed Tests.

Hours of Operation per Week

Total number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

Immunology Billed Tests Performed

Total billed tests performed under the immunology classification. Immunology tests are typically billed under the CPT code range 86000-86849. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a component of Total Billed Tests.

Inpatient Billed Tests Performed

Total billed tests performed in support of facility inpatients. This includes only inpatient (i.e., patients who occupied or are expected to occupy a bed overnight) billed tests. Refer to the Laboratory Services Subset Worksheet found on the Support Page for assistance in reporting this value.

This is a subset of Total Billed Tests.

Lab Analyzers

Total number of Lab Analysis Machines this department has in operation. A Lab Analysis Machine is a lab machine/instrument that provides automated lab results.

Non Hospital Patient Billed Tests

Total billed tests performed on non-hospital patient specimens. According to CMS, a "non-patient" is defined as a person that is neither an inpatient nor an outpatient of a hospital, but that has a specimen that is submitted for analysis to a hospital and the person is not physically present at the hospital. (All hospitals bill non-patient lab tests on TOB 14X)

This is a subset of Total Billed Tests.
Point of Care Analyzers Used by the POCT Program

Total number of Point of Care Testing analyzers supported by the department. Point of Care Testing analyzers allows the analysis of samples or specimens to be performed close to the patient such as at the bedside, ambulatory clinic, nursing unit, emergency room, operating room, or wherever medical care may be necessary.

Point of Care Billed Tests

Total CPT codes billed by the patient billing system(s) for Point of Care Billed tests. Point of Care testing (POCT) defined as testing performed at the patients side. The testing site is usually close to the patient such as at the bedside, ambulatory clinic, nursing unit, emergency room, operating room, or wherever medical care may be necessary. A physician, nurse, or other health care professional attending the patient obtains the specimen, performs the analysis, and records the test result. Refer to the Laboratory Services Subset Worksheet found on the Support Page for assistance with reporting this value.

This is a component of Total Billed Tests.

Point of Care Billed Tests Not Performed by Lab Staff

Total CPT codes billed by the patient billing system(s) for Point of Care Billed tests performed by staff in another department. Point of Care testing (POCT) is defined as testing performed at the patient's side. The testing site is usually close to the patient such as at the bedside, ambulatory clinic, nursing unit, emergency room, operating room or wherever medical care may be necessary. A physician, nurse, or other health care professional attending the patient obtains the specimen, performs the analysis, and records the test result. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a subset of Point of Care Billed Tests.

Point of Care Sites Supported

Total number of Point of Care Testing sites supported by the department. Point of Care testing (POCT) is defined as testing performed at the patients side. The testing site is usually close to the patient such as at the bedside, ambulatory clinic, nursing unit, emergency room, operating room, or wherever medical care may be necessary.

Remote Testing Laboratories Supported

Total discrete satellite testing laboratories located away from the main laboratory, open eight or more hours per day, and staffed with department personnel. This includes any satellite testing laboratory within or outside the facility (more than 100 yards from the main laboratory) staffed by division personnel and open eight or more hours per day.
Total Billed Tests

Total CPT codes billed by the patient billing system(s) for tests, including billed tests performed on units of blood and billed tests sent to reference labs. Exclude STAT fees, phlebotomy charges, and blood/blood product handling fees. Automated multichannel test panels should be given a count of 1. Refer to the Laboratory Services Subset Worksheet found on the Support Page for assistance in reporting this value.

Unbundled Tests

Total count of tests as reflected on the laboratory's revenue/usage report. Count each CPT code separately, i.e., the tests listed within each panel should be counted separately.

Laboratory Services: Clinical Operations Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.
**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Technical**

Total worked hours by lab technicians or lab assistants involved in the analytic phase of testing only. Do not include hours for technologists, lab scientists, phlebotomists or support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Phlebotomist**

Total hours worked by Phlebotomists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) Including but not limited to time spent providing patient care services.
This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Technologist**

Total hours worked by Registered Medical Technologists or equivalent. Exclude management / supervisors.

This is a subset of Worked Hours: Staff.

**Worked Hours: Transcriptionist**

Total hours worked by medical transcriptionist staff.

This is a subset of Worked Hours: Staff.

**Laboratory Services: Clinical Operations Expense Elements**

**Contract Service Expense**

Total expense for services (e.g. collections, transcription) provided by outside contractors.

**Equipment Repair And Maintenance Expense**

Total expense to repair and maintain technical devices charged to this department. Include fee-for-service labor and parts expense, service contract costs, and other related costs.

This is a subset of Other Direct Operating Expense.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.
**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Other Direct Operating Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

**Operating Lease Expense**

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense that includes professional fees, department supplies, equipment rental fees, operating leases for equipment, dues, travel and small (non-capitalized) equipment. Exclude depreciation, building rent expense, capitalized lease costs.

**Outreach Direct Operating Expense**

Total operating expenses (labor and non-labor) exclusively related to the support of all Laboratory Outreach functions and activities (e.g., vehicle maintenance, dedicated phlebotomy, marketing and billing personnel, etc.). These expenses may also be included in other Hours and Expense categories.
Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Other Direct Operating Expense

Purchased Blood and Blood Products Expense

Report the sum of purchased blood and blood products, including aphaeresis and autologous transfusions. Do not include hemophilia factor expense.

This is a subset of Medical Supply Expense.

Referral Testing Service Expense

Total expense for outside laboratories for testing services not performed on site.

This is a subset of Other Direct Operating Expense.

Laboratory Services: Clinical Operations Mandatory Elements

The following data elements are mandatory for this department:

• Inpatient Billed Tests Performed
• Non Medical Supply Expense
• Total Billed Tests

Laboratory Services: Clinical Operations Normalizations

Include the hours, costs and volumes (where applicable) associated with the

• Bench teaching of department employees
• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

Exclude the hours costs and volumes (where applicable) associated with the

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, scheduling, residency program. (Laboratory Services)

• Albumin, plasma protein fraction, Rh Immune Globulin, Anti Thrombin, Varicella Zoster Immune Globulin, and other specialty plasma products

• Blood and blood product costs

• Blood Bank and Donor Center services

• Clinical Engineer and/or Biomedical Technician

• Cost of hemophilia factors

• Lab Specimen Registration

• Administration and Support activities for a Laboratory Residency Program

• Autopsies

• Didactic Teaching for phlebotomy (Providing Collection Manager (PDA's and Printers and training) for nursing services doing arterial line draws)

• Lab Specimen Registration

• Lab Courier Service (Courier services specific to lab specimens only e.g. in house runners, external - remote pickup)

• Lab Courier Service (only Courier service specific to the laboratory)

• Medical records transcription, e.g., lines produced internally or outsources (Laboratory). This includes transcription from dictation capture to document distribution and storage, including associate transcription.

• Medical records transcription, e.g., lines produced internally or outsources (Laboratory)

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Patient reception, e.g., greeting, checking in of patients, answering phone calls (Laboratory)

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Laboratory)
- Repair and Maintenance of Clinical Equipment/Rooms
- Support activities for department Information System, e.g., clinical table updates (Laboratory)
- Bench teaching of students (non-department employees)
- Hospital-based School of Medical Technology

**03372, Laboratory Services: Clinical Operations - Specialty Labs Only**

This department includes clinical departments typically considered testing areas in a specialty lab, specifically Microbiology/Virology, Molecular Genetics, Flow Cytometry, and Reproductive Medicine (Andrology). It also includes specimen receiving and processing. Do not include administration and support functions supporting the laboratory, anatomic pathology and/or blood bank functions.

**03372, Laboratory Services: Clinical Operations - Specialty Labs Only Mandatory Elements**

The following data elements are mandatory for this department:

- Inpatient Billed Tests Performed
- Non Medical Supply Expense
- Total Billed Tests
- Labor Expense
- Labor Expense: Physician Provider
- Non Medical Supply Expense
- Other Direct Operating Expense
- Physician Provider Professional Fee Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
• Worked Hours: Physician Provider
• Worked Hours: Staff
• Inpatient Billed Tests Performed
• Total Billed Tests

03372, Laboratory Services: Clinical Operations - Specialty Labs Only
Expense Elements

Contract Service Expense
Total expense for services (e.g. collections, transcription) provided by outside contractors.

Equipment Repair And Maintenance Expense
Total expense to repair and maintain technical devices charged to this department. Include fee-for-service labor and parts expense, service contract costs, and other related costs.

This is a subset of Other Direct Operating Expense.

Labor Expense
Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider
Total payroll expense corresponding to hours paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense
Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.
This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense
Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

Operating Lease Expense
Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense
Total other direct operating expense that includes professional fees, department supplies, equipment rental fees, operating leases for equipment, dues, travel and small (non-capitalized) equipment. Exclude depreciation, building rent expense, capitalized lease costs.

Outreach Direct Operating Expense
Total operating expenses (labor and non-labor) exclusively related to the support of all Laboratory Outreach functions and activities (e.g., vehicle maintenance, dedicated phlebotomy, marketing and billing personnel, etc.). These expenses may also be included in other Hours and Expense categories.

Overtime Salary Expense
Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense
Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Other Direct Operating Expense
**Purchased Blood and Blood Products Expense**

Report the sum of purchased blood and blood products, including aphaeresis and autologous transfusions. Do not include hemophilia factor expense.

This is a subset of Medical Supply Expense.

**Referral Testing Service Expense**

Total expense for outside laboratories for testing services not performed on site.

This is a subset of Other Direct Operating Expense.

**03372, Laboratory Services: Clinical Operations - Specialty Labs Only**

**Department Hour Elements**

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Paid Hours: Physician Provider**

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time-off hours. Exclude on-call or standby time.
Physician Provider Worked Hours

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: RN

Total hours worked by RN (Registered Nurse) Including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Technical

Total worked hours by lab technicians or lab assistants involved in the analytic phase of testing only. Do not include hours for technologists, lab scientists, phlebotomists or support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Overtime is the total worked hours paid for overtime. Include hours worked on an overtime basis during orientation or for educational purposes. Exclude premium hours, non-worked hours, or callback hours for which an employee is reimbursed at a regular pay rate based on shift differential or scheduling needs. Also report overtime hours worked in the appropriate skill mix categories.
This is a subset of Worked Hours: Staff.

**Worked Hours: Phlebotomist**

Total hours worked by Phlebotomists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Technologist**

Total hours worked by Registered Medical Technologists or equivalent. Exclude management / supervisors.

This is a subset of Worked Hours: Staff.

**Worked Hours: Transcriptionist**

Total hours worked by medical transcriptionist staff.

This is a subset of Worked Hours: Staff.
03372, Laboratory Services: Clinical Operations - Specialty Labs Only

Workload Volumes

Adjusted Discharges Supported
Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review the Guiding Principles section in the DRM for more information.

Billed Tests Sent To Reference Lab
Total billed tests sent out to another lab (reference lab) for processing. According to CMS, the definition of a reference lab is a Medicare-enrolled laboratory that receives a specimen from another, referring laboratory for testing and that actually performs the test.

This is a component of Total Billed Tests.

Days of Operation per Week
Total number of days the department is open for operation during the week.

The maximum number that can be reported is 7.

Flow Cytometry Tests Performed
Total billed tests performed for Flow Cytometry tests, typically billed under CPT codes 88182-88189. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a component of Total Billed Tests.

HLA Tests Performed
Total billed tests performed for Human leukocyte antigen (HLA) testing, typically billed under the CPT code range 81370-81383. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a component of Total Billed Tests.
**Hours of Operation per Week**

Total number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

**Inpatient Billed Tests Performed**

Total billed tests performed in support of facility inpatients. This includes only inpatient (i.e., patients who occupied or are expected to occupy a bed overnight) billed tests. Refer to the Laboratory Services Subset Worksheet found on the Support Page for assistance in reporting this value.

This is a subset of Total Billed Tests.

**Lab Analyzers**

Total number of Lab Analysis Machines this department has in operation. A Lab Analysis Machine is a lab machine/instrument that provides automated lab results.

**Microbiology Billed Tests**

The total cases managed by department staff. This includes both inpatient, outpatient and observation cases. An inpatient case must include at least one of the following: telephonic review, pre admission planning, care plan coordination with physicians, patient and family education, coordination with hospital staff to avoid delays, and discharge planning. Multiple Encounters may occur within one Case Managed. Count each patient admission as one case even if case management activities are performed in different settings such as pre admission, inpatient, and transitional care units.

This is a component of Total Billed Tests.

**Non Hospital Patient Billed Tests**

Total billed tests performed on non-hospital patient specimens. According to CMS, a "non-patient" is defined as a person that is neither an inpatient nor an outpatient of a hospital, but that has a specimen that is submitted for analysis to a hospital and the person is not physically present at the hospital. (All hospitals bill non-patient lab tests on TOB 14X)

This is a subset of Total Billed Tests.

**Point of Care Billed Tests**

Total CPT codes billed by the patient billing system(s) for Point of Care Billed tests. Point of Care testing (POCT) defined as testing performed at the patients side. The testing site is usually close to the patient such as at the bedside, ambulatory clinic, nursing unit, emergency room, operating room, or wherever medical care may be necessary. A physician, nurse, or other health care professional attending the patient obtains the specimen, performs the analysis, and records the test result. Refer to the Laboratory Services Subset Worksheet found on the Support Page for assistance with reporting this value.
This is a component of Total Billed Tests.

**Point of Care Billed Tests Not Performed by Lab Staff**

Total CPT codes billed by the patient billing system(s) for Point of Care Billed tests performed by staff in another department. Point of Care testing (POCT) is defined as testing performed at the patient's side. The testing site is usually close to the patient such as at the bedside, ambulatory clinic, nursing unit, emergency room, operating room or wherever medical care may be necessary. A physician, nurse, or other health care professional attending the patient obtains the specimen, performs the analysis, and records the test result. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a subset of Point of Care Billed Tests.

**Remote Testing Laboratories Supported**

Total discrete satellite testing laboratories located away from the main laboratory, open eight or more hours per day, and staffed with department personnel. This includes any satellite testing laboratory within or outside the facility (more than 100 yards from the main laboratory) staffed by division personnel and open eight or more hours per day.

**Total Billed Tests**

Total CPT codes billed by the patient billing system(s) for tests, including billed tests performed on units of blood and billed tests sent to reference labs. Exclude STAT fees, phlebotomy charges, and blood/blood product handling fees. Automated multichannel test panels should be given a count of 1. Refer to the Laboratory Services Subset Worksheet found on the Support Page for assistance in reporting this value.

**Total number of days the department is open for operation during the week.**

**Unbundled Tests**

Total count of tests as reflected on the laboratory's revenue/usage report. Count each CPT code separately, i.e., the tests listed within each panel should be counted separately.

**03372, Laboratory Services: Clinical Operations - Specialty Labs Only Mapping Guidelines**

If your cost center includes the functions defined along with central core lab (Chemistry, Hematology with Coagulation, Urinalysis, and Immunology), another option might be the 03370 Lab Services: Clinical Operations Combined department. If you have separate and distinct cost centers for all of the specific classification of tests, map them to the more detailed departments in the series.
03372, Laboratory Services: Clinical Operations - Specialty Labs Only

Normalizations

Include the hours, costs and volumes (where applicable) associated with the

• Bench teaching of department employees

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Laboratory)

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

Exclude the hours costs and volumes (where applicable) associated with the

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, scheduling, residency program. (Laboratory Services)

• Albumin, plasma protein fraction, Rh Immune Globulin, Anti Thrombin, Varicella Zoster Immune Globulin, and other specialty plasma products

• Autopsies

• Blood Bank and Donor Center services

• Blood and blood product costs

• Cost of hemophilia factors

• Clinical Engineer and/or Biomedical Technician

• Administration and Support activities for a Laboratory Residency Program

• Didactic Teaching for phlebotomy (Providing Collection Manager (PDA’s and Printers and training) for nursing services doing arterial line draws)

• Lab Specimen Registration

• Bench teaching of students (non-department employees)

• Lab Courier Service (Courier services specific to lab specimens only e.g. in house runners, external - remote pickup)

• Lab Courier Service (only Courier service specific to the laboratory)
• Medical records transcription, e.g., lines produced internally or outsources (Laboratory). This includes transcription from dictation capture to document distribution and storage, including associate transcription.

• Medical records transcription, e.g., lines produced internally or outsources (Laboratory)

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Hospital-based School of Medical Technology

• Patient reception, e.g., greeting, checking in of patients, answering phone calls (Laboratory)

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Laboratory)

• Repair and Maintenance of Clinical Equipment/Roome

• Support activities for department Information System, e.g., clinical table updates (Laboratory)

• Tumor Registry - the activities involved in capturing history, diagnosis, treatment and health status for tumor patients

03380, Laboratory Services: Anatomic Pathology

This department includes functions related to the gross and microscopic analysis of cell structure and composition in one or more of the following areas: anatomical pathology, histology, cytopathology, electromicroscopy, cytogenetics, or autopsy services. This department also includes functions including accession, examination and reporting of tissue submitted for individual and separate attention, requiring individual examination and pathologic diagnosis. (Includes 88000 - 88399 - Postmortem Examination, Cytopathology, Cytogenetics, Surgical Pathology.) Do not include administration and support functions supporting the anatomical pathology laboratory and/or clinical operations.

Laboratory Services: Anatomic Pathology Mapping Guidelines

If your cost center includes the functions defined along with a central core lab (Chemistry, Hematology with Coagulation, Urinalysis, and Immunology) and/or specialty labs (Microbiology, Molecular Genetics, Flow Cytometry), do not map to this profile. Another option might be the G3000 Other Laboratory Services department.

Laboratory Services: Anatomic Pathology Workload Volumes
Adjusted Discharges Supported
Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review the Guiding Principles section in the DRM for more information.

This is a component of Total Billed Tests.

Autopsies Performed
Total number of autopsies performed for this reporting period.

Billed Tests Sent to Reference Lab
Total billed tests sent out to another lab (reference lab) for processing. According to CMS, the definition of a reference lab is a Medicare-enrolled laboratory that receives a specimen from another, referring laboratory for testing and that actually performs the test.

This is a component of Total Billed Tests.

Cytogenetics Billed Tests Performed
Total billed tests performed under the cytogenetics classification. Cytogenetics tests are typically billed under the CPT code range 88200-88299. Refer to the Laboratory Services Subset Worksheet found on the Support Page for assistance with reporting this value.

This is a component of Total Billed Tests.

Days of Operation per Week
Total number of days the department is open for operation during the week.

The max number that can be reported is 7.

Genomic Sequence Tests Performed
Total billed tests performed for Genomic Sequence testing, typically billed under the CPT code range 81410-81471. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a component of Total Billed Tests.
**HLA Tests Performed**

Total billed tests performed for Human leukocyte antigen (HLA) testing, typically billed under the CPT code range 81370-81383. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a component of Total Billed Tests.

**Hours of Operation per Week**

Total number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

**Inpatient Billed Tests Performed**

Total billed tests performed in support of facility inpatients. This includes only inpatient (i.e., patients who occupied or are expected to occupy a bed overnight) billed tests. Refer to the Laboratory Services Subset Worksheet found on the Support Page for assistance in reporting this value.

This is a subset of Total Billed Tests.

**Lab Analyzers**

Total number of Lab Analysis Machines this department has in operation. A Lab Analysis Machine is a lab machine/instrument that provides automated lab results.

**Molecular Pathology Billed Tests**

Total Billed Tests performed in a molecular pathology setting. Molecular Pathology is the study and cause of molecular diseases.

This is a component of Total Billed Tests.

**Non Hospital Patient Billed Tests**

Total billed tests performed on non-hospital patient specimens. According to CMS, a "non-patient" is defined as a person that is neither an inpatient nor an outpatient of a hospital, but that has a specimen that is submitted for analysis to a hospital and the person is not physically present at the hospital. (All hospitals bill non-patient lab tests on TOB 14X)

**Number of Remote Testing Laboratories**

Total discrete satellite testing laboratories located away from the main laboratory, open eight or more hours per day, and staffed with department personnel. This includes any satellite testing laboratory within or outside the facility (more than 100 yards from the main laboratory) staffed by division personnel and open eight or more hours per day.
Special Stains Group I Tests Performed
Total billed tests performed by the department under CPT code 88312 "Special stain including interpretation and report; Group I for microorganisms (e.g., acid fast, methenamine silver)" for the reporting period.

This is a component of Total Billed Tests.

Special Stains Group II Tests Performed
Total billed tests performed by the department under CPT code 88313 "Special stain including interpretation and report; Group II, all other (e.g., iron, trichrome), except stain for microorganisms, stains for enzyme constituents, or immunocytochemistry and immunohistochemistry" for the reporting period.

This is a component of Total Billed Tests.

Total Billed Tests
Total CPT codes billed by the patient billing system(s) for tests, including billed tests performed on units of blood and billed tests sent to reference labs. Exclude STAT fees, phlebotomy charges, and blood/blood product handling fees. Automated multichannel test panels should be given a count of 1. Refer to the Laboratory Services Subset Worksheet found on the Support Page for assistance in reporting this value.

Unbundled Tests
Total count of tests as reflected on the laboratory's revenue/usage report. Count each CPT code separately, i.e., the tests listed within each panel should be counted separately.

Laboratory Services: Anatomic Pathology Department Hours Elements

Paid Hours: Contract Labor
Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Worked Hours: Cytogenetic Technologist
Total hours worked by Registered Medical Technologists or equivalent dedicated to Cytogenetics. Exclude management / supervisors.

This is a subset of Worked Hours: Staff.

Worked Hours: Transcriptionist
Total hours worked by medical transcriptionist staff.
This is a subset of Worked Hours: Staff.

Worked Hours: RN
Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

Paid Hours: Physician Provider
Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff
Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management
Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff
Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Technical
Total worked hours by lab technicians or lab assistants involved in the analytic phase of testing only. Do not include hours for technologists, lab scientists, phlebotomists or support staff.

This is a subset of Worked Hours: Staff.
**Worked Hours: Overtime**

Represents the sum of non-physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Technologist**

Total hours worked by Registered Medical Technologists or equivalent. Include licensed Cytologists and Histologists. Exclude management / supervisors.

This is a subset of Worked Hours: Staff.

**Laboratory Services: Anatomic Pathology Expense Elements**

**Contract Service Expense**

Total expense for services (e.g. collections, transcription) provided by outside contractors.

**Purchased Blood and Blood Products Expense**

Report the sum of purchased blood and blood products, including aphaeresis and autologous transfusions. Do not include hemophilia factor expense.

This is a subset of Medical Supply Expense.
**Equipment Repair And Maintenance Expense**

Total expense to repair and maintain major equipment charged to this department. Include fee-for-service labor and parts expense, service contract costs, and other related costs.

This is a subset of Other Direct Operating Expense.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical and or surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

**Operating Lease Expense**

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.
Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Outreach Direct Operating Expense

Total operating expenses (labor and non-labor) exclusively related to the support of all Laboratory Outreach functions and activities (e.g., vehicle maintenance, dedicated phlebotomy, marketing and billing personnel, etc.). These expenses may also be included in other Hours and Expense categories.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Referral Testing Service Expense

Total expense for outside laboratories for testing services not performed on site.

This is a subset of Other Direct Operating Expense.

Laboratory Services: Anatomic Pathology Mandatory Elements

The following data elements are mandatory for this department:

- Inpatient Billed Tests Performed
- Labor Expense
- Labor Expense: Physician Provider
- Non Medical Supply Expense
- Other Direct Operating Expense
• Paid Hours: Contract Labor

• Paid Hours: Physician Provider

• Paid Hours: Staff

• Physician Provider Professional Fee Expense

• Total Billed Tests

• Worked Hours: Physician Provider

• Worked Hours: Staff

• Cytogenetics Billed Tests Performed

Laboratory Services: Anatomic Pathology Normalizations

Include the hours, costs and volumes (where applicable) associated with the

• Bench teaching of department employees

• Autopsies

Exclude the hours costs and volumes (where applicable) associated with the

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, scheduling, residency program. (Laboratory Services)

• Bench teaching of students (non-department employees)

• Blood and blood product costs

• Blood Bank and Donor Center services

• Clinical Engineer and/or Biomedical Technician

• Didactic Teaching for phlebotomy (Providing Collection Manager (PDA's and Printers and training) for nursing services doing arterial line draws)

• Lab Specimen Registration

• Hospital-based School of Medical Technology

• Lab Courier Service (Courier services specific to lab specimens only e.g. in house runners, external - remote pickup)
• Administration and Support activities for a Laboratory Residency Program

• Medical records transcription, e.g., lines produced internally or outsources (Laboratory). This includes transcription from dictation capture to document distribution and storage, including associate transcription.

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Patient reception, e.g., greeting, checking in of patients, answering phone calls (Laboratory)

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Laboratory)

• Repair and Maintenance of Clinical Equipment/Rooms

• Support activities for department Information System, e.g., clinical table updates (Laboratory)

• Tumor Registry - the activities involved in capturing history, diagnosis, treatment and health status for tumor patients

03390, Laboratory Services: Blood Bank

This department includes functions related to the acquisition (collection), processing (typing and antibody detection and titration), storage, control, and disbursement of blood and blood products/components. Functions such as transfusion and directed donor services are also included if performed here. This department should include both labor and material costs. (Includes 86850 - 86999: Transfusion Medicine)

Laboratory Services: Blood Bank Mapping Guidelines

If your cost center includes Clinical Operations, another option might be the 03350 Lab Services: Clinical Operations & Blood Bank Combined department.

Laboratory Services: Blood Bank Workload Volumes

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review the Guiding Principles section in the DRM for more information.
This is a component of Total Billed Tests.

**Billed Tests Sent to Reference Lab**

Total billed tests sent out to another lab (reference lab) for processing. According to CMS, the definition of a reference lab is a Medicare-enrolled laboratory that receives a specimen from another, referring laboratory for testing and that actually performs the test.

This is a component of Total Billed Tests.

**Blood Draws Performed by Lab**

Total number of blood draws performed by Lab for this reporting period.

This is a subset of Blood Draws Performed.

**Days of Operation per Week**

Total number of days the department is open for operation during the week.

The max number that can be reported is 7.

**Hematopoietic Cells (HPC) Collected**

Total number of Hematopoietic Cells (blood-forming stem cells) collected for this reporting period.

**Hours of Operation per Week**

Total number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

**Inpatient Billed Tests Performed**

Total billed tests performed in support of facility inpatients. This includes only inpatient (i.e., patients who occupied or are expected to occupy a bed overnight) billed tests. Refer to the Laboratory Services Subset Worksheet found on the Support Page for assistance in reporting this value.

This is a subset of Total Billed Tests.

**Inpatient Blood Draws Performed by Lab**

Total number of blood draws performed on inpatients by Lab staff during the reporting period.

This is a subset of Blood Draws Performed by Lab
Lab Analyzers

Total number of Lab Analysis Machines this department has in operation. A Lab Analysis Machine is a lab machine/instrument that provides automated lab results.

Non Hospital Patient Billed Tests

Total billed tests performed on non-hospital patient specimens. According to CMS, a "non-patient" is defined as a person that is neither an inpatient nor an outpatient of a hospital, but that has a specimen that is submitted for analysis to a hospital and the person is not physically present at the hospital. (All hospitals bill non-patient lab tests on TOB 14X)

This is a subset of Total Billed Tests.

Number of Remote Testing Laboratories

Total discrete satellite testing laboratories located away from the main laboratory, open eight or more hours per day, and staffed with department personnel. This includes any satellite testing laboratory within or outside the facility (more than 100 yards from the main laboratory) staffed by division personnel and open eight or more hours per day.

Specimen Draw Stations Staffed by Lab

Total discrete specimen draw stations, open eight or more hours per day, and staffed with department personnel. This includes any draw station within or outside the facility (more than 100 yards from the main laboratory) staffed by division personnel.

Tissue Products Dispensed

Total number of Tissue Products dispensed for this reporting period.

This is a subset of Tissue Products Received.

Tissue Products Received

Total number of Tissue Products received in this reporting period. Tissue Products contain tissue that is human and non-human in origin and includes but is not limited to tissue used for transplants.

Tissue Products Transplanted

Total number of Tissue Products human in origin transplanted for this reporting period.

This is a subset of Tissue Products Dispensed.
Total Billed Tests

Total CPT codes billed by the patient billing system(s) for tests, including billed tests performed on units of blood and billed tests sent to reference labs. Exclude STAT fees, phlebotomy charges, and blood/blood product handling fees. Automated multichannel test panels should be given a count of 1. Refer to the Laboratory Services Subset Worksheet found on the Support Page for assistance in reporting this value.

Total Blood Draws Performed

Total number of blood draws performed by both lab and non lab staff for the reporting period.

Total Donor Units Drawn

Total number of donor units of blood drawn by Lab staff during the reporting period.

Unbundled Tests

Total count of tests as reflected on the laboratory’s revenue/usage report. Count each CPT code separately, i.e., the tests listed within each panel should be counted separately.

Units of blood or blood products purchased

Total number of blood units or blood product units purchased by this department for the reporting period.

Units of Blood or Blood Products Received

Total number of blood units or blood product units received. Count all blood units or blood product received by this department for the reporting period.

Units of Dispensed Blood or Blood Products

Total number of blood units or blood product units dispensed in this reporting period. Count all blood units or blood product issued or distributed.

This is a subset of Units of Blood or Blood Products Received.

Units of Transfused Blood or Blood Products

Total number of blood units or blood product units transfused in this reporting period. A transfusion is the act of transferring blood or blood products to an individual.

This is a subset of Units of Dispensed Blood or Blood Products.
Laboratory Services: Blood Bank Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Technical

Total worked hours by lab technicians or lab assistants involved in the analytic phase of testing only. Do not include hours for technologists, lab scientists, phlebotomists or support staff.
This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee’s normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Phlebotomist**

Total hours worked by Phlebotomists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Technologist**

Total hours worked by Registered Medical Technologists or equivalent. Exclude management / supervisors.

This is a subset of Worked Hours: Staff.
**Worked Hours: Transcriptionist**

Total hours worked by medical transcriptionist staff.

This is a subset of Worked Hours: Staff.

**Laboratory Services: Blood Bank Expense Elements**

**Blood and Immune System Modifiers Expense**

Total Darbepotin, Epoetin, Filgrastim, Pegfilgrastim, Sargramostim, Adalimumab, Alfacept, Aldesleukine, Omalizumab, Interferons all variations, Anticoagulants, Thrombolytic, Hemophilia and Hemophilia factor expense.

This is a subset of Medical Supply Expense.

**Outreach Direct Operating Expense**

Total operating expenses (labor and non-labor) exclusively related to the support of all Laboratory Outreach functions and activities (e.g., vehicle maintenance, dedicated phlebotomy, marketing and billing personnel, etc.). These expenses may also be included in other Hours and Expense categories.

**Contract Service Expense**

Total expense for services (e.g. collections, transcription) provided by outside contractors.

**Equipment Repair And Maintenance Expense**

Total expense to repair and maintain major equipment charged to this department. Include fee-for-service labor and parts expense, service contract costs, and other related costs.

This is a subset of Other Direct Operating Expense.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.
**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical and or surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

**Operating Lease Expense**

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.
This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Purchased Blood and Blood Products Expense**

Report the sum of purchased blood and blood products, including aphaeresis and autologous transfusions. Do not include hemophilia factor expense.

This is a subset of Medical Supply Expense.

**Referral Testing Service Expense**

Total expense for outside laboratories for testing services not performed on site.

This is a subset of Other Direct Operating Expense.

**Wastage Expense**

Wastage expense includes blood products that are thawed, pooled, prepared and then not used, as well as products that outdate due to over stocked inventory.

This is a component of Other Direct Operating Expense.

**Laboratory Services: Blood Bank Mandatory Elements**

The following data elements are mandatory for this department:

- Inpatient Billed Tests Performed
- Labor Expense
- Labor Expense: Physician Provider
- Non Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
Laboratory Services: Blood Bank Normalizations

Include the hours, costs and volumes (where applicable) associated with the

- Bench teaching of department employees
- Blood and blood product costs
- Blood Bank and Donor Center services

Exclude the hours, costs and volumes (where applicable) associated with the

- Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, scheduling, residency program. (Laboratory Services)
- Albumin, plasma protein fraction, Rh Immune Globulin, Anti Thrombin, Varicella Zoster Immune Globulin, and other specialty plasma products
- Bench teaching of students (non-department employees)
- Clinical Engineer and/or Biomedical Technician
- Cost of hemophilia factors
- Hospital-based School of Medical Technology
- Lab Courier Service (Courier services specific to lab specimens only e.g. in house runners, external - remote pickup)
- Medical records transcription, e.g., lines produced internally or outsources (Laboratory). This includes transcription from dictation capture to document distribution and storage, including associate transcription.
• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Patient reception, e.g., greeting, checking in of patients, answering phone calls (Laboratory)

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Laboratory)

• Repair and Maintenance of Clinical Equipment/Rooms

• Stem Cell Bank, Tissue Lab, Apheresis and Hemapheresis

• Support activities for department Information System, e.g., clinical table updates (Laboratory)

• Tumor Registry - the activities involved in capturing history, diagnosis, treatment and health status for tumor patients

• Administration and Support activities for a Laboratory Residency Program

• Didactic Teaching for phlebotomy (Providing Collection Manager (PDA's and Printers and training) for nursing services doing arterial line draws)

• Lab Specimen Registration

03399, Laboratory Services Administration

This department performs the overall administrative and general support tasks for the entire Laboratory Services series. These tasks and functions include but are not limited to: couriers, lab transcription services, and outreach support (i.e. specimen registration, business analysts, biller/coders, client service reps, and marketing staff) functions. Do not include staff responsible for the processing of lab specimens and/or phlebotomy.

Laboratory Services Administration Mapping Guidelines

If the staff and/or expenses in your cost center includes processing specimens and/or performing phlebotomy, this profile is not the appropriate choice. Another option might be the G3300 Lab Services: Other Laboratory Services department.
Laboratory Services Administration Workload Volumes

Adjusted Discharges Supported
Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review the Guiding Principles section in the DRM for more information.

This is a component of Total Billed Tests.

Billed Tests Sent to Reference Lab Supported
Total billed tests sent out to another lab (reference lab) for processing supported by the department. According to CMS, the definition of a reference lab is a Medicare-enrolled laboratory that receives a specimen from another, referring laboratory for testing and that actually performs the test. Refer to the Laboratory Services Subset Worksheet found on the Support Page for assistance in reporting this value.

This is a subset of Billed Tests Supported.

Billed Tests Supported
Total CPT codes billed by the patient billing system(s) for tests and handling fees by all departments within the laboratory services series supported by this department. Exclude STAT fees, phlebotomy charges, and blood / blood product charges. Automated, multichannel test panels should be given a count of 1.

Inpatient Billed Tests Supported
Total billed tests performed in support of facility inpatients. This includes only inpatient (i.e., patients who occupied or are expected to occupy a bed overnight) billed tests. This number should include the total inpatient billed tests, performed by all departments within the laboratory services series that this department supports.

This is a subset of Billed Tests Supported.
Lines of Transcription Provided

The total lines of transcription provided (either produced by dept staff and/or purchased thru contracted service) during the reporting period. Pathology transcription spans from dictation capture to document distribution and storage, including associate transcription. If for externally purchased transcription only dollars are available, obtain the average dollar per line rate charged by the contract source to estimate the number of transcribed lines (charged dollars / average rate = lines). If the department produces and purchases transcription and one of the values cannot be provided, leave this field blank. If keystrokes are maintained, divide by 65 to convert to lines of transcription.

Non Hospital Patient Billed Tests Supported

Total billed tests performed on non-hospital patient specimens supported by the department. According to CMS, a "non-patient" is defined as a person that is neither an inpatient nor an outpatient of a hospital, but that has a specimen that is submitted for.

This is a subset of Billed Tests Supported.

Number of Remote Testing Laboratories

Total discrete satellite testing laboratories located away from the main laboratory, open eight or more hours per day, and staffed with department personnel. This includes any satellite testing laboratory within or outside the facility (more than 100 yards from the main laboratory) staffed by division personnel and open eight or more hours per day.

Point of Care Testing Analyzers Supported

Total number of Point of Care Testing analyzers supported by the department. Point of Care Testing analyzers allows the analysis of samples or specimens to be performed close to the patient such as at the bedside, ambulatory clinic, nursing unit, emergency room, operating room, or wherever medical care may be necessary.

Point of Care Testing Sites Supported

Total number of Point of Care Testing sites supported by the department. Point of Care testing (POCT) is defined as testing performed at the patients side. The testing site is usually close to the patient such as at the bedside, ambulatory clinic, nursing unit, emergency room, operating room, or wherever medical care may be necessary.

Laboratory Services Administration Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.
**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

**Worked Hours: Transcriptionist**

Total hours worked by medical transcriptionist staff.

This is a subset of Worked Hours: Staff.

**Paid Hours: Physician Provider**

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
**Worked Hours: Other Technical**

Total worked hours by lab technicians or lab assistants involved in the analytic phase of testing only. Do not include hours for technologists, lab scientists, phlebotomists or support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Technologist**

Total hours worked by Registered Medical Technologists or equivalent. Exclude management / supervisors.

This is a subset of Worked Hours: Staff.

**Laboratory Services Administration Expense Elements**

**Equipment Repair And Maintenance Expense**

Total expense to repair and maintain major equipment charged to this department. Include fee-for-service labor and parts expense, service contract costs, and other related costs.
This is a subset of Other Direct Operating Expense.

**Contract Service Expense**

Total expense for services (e.g. collections, transcription) provided by outside contractors.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

**Operating Lease Expense**

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.
Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Outreach Direct Operating Expense

Total operating expenses (labor and non-labor) exclusively related to the support of all Laboratory Outreach functions and activities (e.g., vehicle maintenance, dedicated phlebotomy, marketing and billing personnel, etc.). These expenses may also be included in other Hours and Expense categories.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Referral Testing Service Expense

Total expense for outside laboratories for testing services not performed on site.

This is a subset of Other Direct Operating Expense.

Wastage Expense

Wastage expense includes blood products that are thawed, pooled, prepared and then not used, as well as products that outdate due to over stocked inventory.

This is a component of Other Direct Operating Expense.

Laboratory Services Administration Mandatory Elements

The following data elements are mandatory for this department:

- Billed Tests Supported
• Inpatient Billed Tests Supported

• Labor Expense

• Labor Expense: Physician Provider

• Medical Supply Expense

• Non Medical Supply Expense

• Other Direct Operating Expense

• Paid Hours: Contract Labor

• Paid Hours: Physician Provider

• Paid Hours: Staff

• Physician Provider Professional Fee Expense

• Worked Hours: Physician Provider

• Worked Hours: Staff

**Laboratory Services Administration Normalizations**

Include the hours, costs and volumes (where applicable) associated with the

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, scheduling, residency program. (Laboratory Services)

• Administration and Support activities for a Laboratory Residency Program

• Lab Courier Service (Courier services specific to lab specimens only e.g. in house runners, external - remote pickup)

• Medical records transcription, e.g., lines produced internally or outsources (Laboratory). This includes transcription from dictation capture to document distribution and storage, including associate transcription.

• Patient reception, e.g., greeting, checking in of patients, answering phone calls (Laboratory)

• Lab Specimen Registration

• Results library (Laboratory)
• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Laboratory)

• Sales and marketing activities for a Laboratory Outreach program

• Support activities for department Information System, e.g., clinical table updates (Laboratory)

Exclude the hours costs and volumes (where applicable) associated with the

• Didactic Teaching for phlebotomy (Providing Collection Manager (PDA’s and Printers and training) for nursing services doing arterial line draws)

• Lab Informatics (focusing on the application of information through a platform of instruments, software, and data mgmt tools that allow scientific data to be captured, migrated, processed, and interpreted for immediate use)

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Repair and Maintenance of Clinical Equipment/Rooms

**F3300, Laboratory Services Functional Rollup Department**

The Laboratory Services Functional Rollup department includes all cost centers mapped to the individual department profiles in this series. It includes administration and support, clinical laboratory, anatomic pathology laboratory, and blood bank functions regardless of reporting relationships. This department is automatically created when department mapping is finalized.

**Laboratory Services Functional Rollup Department Mapping Guidelines**

This is a functional rollup department that automatically rolls up to combine data for all departments within the Laboratory Services series. It includes all cost centers, regardless of reporting relationship, reported on laboratory departments in the series such as the clinical lab, anatomic pathology, and blood bank.

**Laboratory Services Functional Rollup Department Workload Volumes**

**Adjusted Discharges Supported**

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review the Guiding Principles section in the DRM for more information.
This is a component of Total Billed Tests.

**Autopsies Performed**

Total number of autopsies performed for this reporting period.

**Billed Tests Sent to Reference Lab**

Total billed tests sent out to another lab (reference lab) for processing. According to CMS, the definition of a reference lab is a Medicare-enrolled laboratory that receives a specimen from another, referring laboratory for testing and that actually performs the test.

This is a component of Total Billed Tests.

**Blood Draws Performed by Lab**

Total number of blood draws performed by Lab for this reporting period.

This is a subset of Blood Draws Performed.

**Chemistry Billed Tests Performed**

Total billed tests performed under the chemistry classification. Chemistry tests are typically billed under the CPT code range 80047-80439 and 82000-84999. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a component of Total Billed Tests.

**Complete Blood Count (CBC) Tests Performed**

Total billed tests performed for Complete Blood Count (CBC) tests, including automated only (CPT Code 85027) and automated differential WBC count (CPT code 85025) only. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a subset of Hematology Billed Tests.

**Cytogenetics Billed Tests Performed**

Total billed tests performed under the cytogenetics classification. Cytogenetics tests are typically billed under the CPT code range 88200-88299. Refer to the Laboratory Services Subset Worksheet found on the Support Page for assistance with reporting this value.

This is a component of Total Billed Tests.
Flow Cytometry Tests Performed
Total billed tests performed for Flow Cytometry tests, typically billed under CPT codes 88182-88189. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a component of Total Billed Tests.

Genomic Sequence Tests Performed
Total billed tests performed for Genomic Sequence testing, typically billed under the CPT code range 81410-81471. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a component of Total Billed Tests.

Hematology Billed Tests Performed
Total billed tests performed under the hematology classification. Hematology tests are typically billed under the CPT code range 85000-85999. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a component of Total Billed Tests.

Hematopoietic Cells (HPC) Collected
Total number of Hematopoietic Cells (blood-forming stem cells) collected for this reporting period.

HLA Tests Performed
Total billed tests performed for Human leukocyte antigen (HLA) testing, typically billed under the CPT code range 81370-81383. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a component of Total Billed Tests.

Immunology Billed Tests Performed
Total billed tests performed under the immunology classification. Immunology tests are typically billed under the CPT code range 86000-86849. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a component of Total Billed Tests.
Inpatient Billed Tests Performed

Total billed tests performed in support of facility inpatients. This includes only inpatient (i.e., patients who occupied or are expected to occupy a bed overnight) billed tests. Refer to the Laboratory Services Subset Worksheet found on the Support Page for assistance in reporting this value.

This is a subset of Total Billed Tests.

Inpatient Blood Draws Performed by Lab

Total number of blood draws performed on inpatients by Lab staff during the reporting period.

This is a subset of Blood Draws Performed by Lab

Lab Analyzers

Total number of Lab Analysis Machines this department has in operation. A Lab Analysis Machine is a lab machine/instrument that provides automated lab results.

Lines of Transcription Provided

The total lines of transcription provided (either produced by dept staff and/or purchased thru contracted service) during the reporting period. Pathology transcription spans from dictation capture to document distribution and storage, including associate transcription. If for externally purchased transcription only dollars are available, obtain the average dollar per line rate charged by the contract source to estimate the number of transcribed lines (charged dollars / average rate = lines). If the department produces and purchases transcription and one of the values cannot be provided, leave this field blank. If keystrokes are maintained, divide by 65 to convert to lines of transcription.

Microbiology Billed Tests

Total billed tests performed in a microbiology setting. Microbiology tests are tests used to identify microorganisms and typically are billed under the CPT code range 87000-87899. Refer to the Laboratory Services Subset Worksheet found on the Support Page for assistance with reporting this value.

This is a component of Total Billed Tests.

Molecular Pathology Billed Tests

Total Billed Tests performed in a molecular pathology setting. Molecular Pathology is the study and cause of molecular diseases.

This is a component of Total Billed Tests.
**Non Hospital Patient Billed Tests**

Total billed tests performed on non-hospital patient specimens. According to CMS, a "non-patient" is defined as a person that is neither an inpatient nor an outpatient of a hospital, but that has a specimen that is submitted for analysis to a hospital and the person is not physically present at the hospital. (All hospitals bill non-patient lab tests on TOB 14X)

**Number of Remote Testing Laboratories**

Total discrete satellite testing laboratories located away from the main laboratory, open eight or more hours per day, and staffed with department personnel. This includes any satellite testing laboratory within or outside the facility (more than 100 yards from the main laboratory) staffed by division personnel and open eight or more hours per day.

**Physician Provider Professional Fee Expense: Anatomic Pathology**

Physician Provider Professional Fee as reported on the Anatomic Pathology department.

**Point of Care Billed Tests**

Total CPT codes billed by the patient billing system(s) for Point of Care Billed tests. Point of Care testing (POCT) defined as testing performed at the patients side. The testing site is usually close to the patient such as at the bedside, ambulatory clinic, nursing unit, emergency room, operating room, or wherever medical care may be necessary. A physician, nurse, or other health care professional attending the patient obtains the specimen, performs the analysis, and records the test result. Refer to the Laboratory Services Subset Worksheet found on the Support Page for assistance with reporting this value.

**Point of Care Billed Tests Not Performed by Lab Staff**

Total CPT codes billed by the patient billing system(s) for Point of Care Billed tests performed by staff in another department. Point of Care testing (POCT) is defined as testing performed at the patient's side. The testing site is usually close to the patient such as at the bedside, ambulatory clinic, nursing unit, emergency room, operating room or wherever medical care may be necessary. A physician, nurse, or other health care professional attending the patient obtains the specimen, performs the analysis, and records the test result. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a subset of Point of Care Billed Tests.

**Point of Care Testing Analyzers Supported**

Total number of Point of Care Testing analyzers supported by the department. Point of Care Testing analyzers allows the analysis of samples or specimens to be performed close to the patient such as at the bedside, ambulatory clinic, nursing unit, emergency room, operating room, or wherever medical care may be necessary.
Point of Care Testing Sites Supported

Total number of Point of Care Testing sites supported by the department. Point of Care testing (POCT) is defined as testing performed at the patients side. The testing site is usually close to the patient such as at the bedside, ambulatory clinic, nursing unit, emergency room, operating room, or wherever medical care may be necessary.

Special Stains Group I Tests Performed

Total billed tests performed by the department under CPT code 88312 "Special stain including interpretation and report; Group I for microorganisms (e.g., acid fast, methenamine silver)" for the reporting period.

This is a component of Total Billed Tests.

Special Stains Group II Tests Performed

Total billed tests performed by the department under CPT code 88313 "Special stain including interpretation and report; Group II, all other (e.g., iron, trichrome), except stain for microorganisms, stains for enzyme constituents, or immunocytochemistry and immunohistochemistry" for the reporting period.

This is a component of Total Billed Tests.

STAT Billable Tests

Total number of STAT tests performed to inpatients or outpatients. STAT tests are performed when immediate test results are needed.

This is a component of Total Billed Tests.

Tissue Products Dispensed

Total number of Tissue Products dispensed for this reporting period.

This is a subset of Tissue Products Received.

Tissue Products Received

Total number of Tissue Products received in this reporting period. Tissue Products contain tissue that is human and non-human in origin and includes but is not limited to tissue used for transplants.

Tissue Products Transplanted

Total number of Tissue Products human in origin transplanted for this reporting period.

This is a subset of Tissue Products Dispensed.
Total Billed Tests

Total CPT codes billed by the patient billing system(s) for tests, including billed tests performed on units of blood and billed tests sent to reference labs. Exclude STAT fees, phlebotomy charges, and blood/blood product handling fees. Automated multichannel test panels should be given a count of 1. Refer to the Laboratory Services Subset Worksheet found on the Support Page for assistance in reporting this value.

Total Blood Draws Performed

Total number of blood draws performed by both Lab and Non Lab staff for the reporting period.

Total Donor Units Drawn

Total number of donor units of blood drawn by Lab staff during the reporting period.

Unbundled Tests

Total count of tests as reflected on the laboratory’s revenue/usage report. Count each CPT code separately, i.e., the tests listed within each panel should be counted separately.

Units of blood or blood products purchased

Total number of blood units or blood product units purchased by this department for the reporting period.

Units of Blood or Blood Products Received

Total number of blood units or blood product units received. Count all blood units or blood product received by this department for the reporting period.

Units of Dispensed Blood or Blood Products

Total number of blood units or blood product units dispensed in this reporting period. Count all blood units or blood product issued or distributed.

This is a subset of Units of Blood or Blood Products Received.

Units of Transfused Blood or Blood Products

Total number of blood units or blood product units transfused in this reporting period. A transfusion is the act of transferring blood or blood products to an individual.

This is a subset of Units of Dispensed Blood or Blood Products.
Laboratory Services Functional Rollup Department - Department Hours Elements

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Paid Hours: Physician Provider**

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: Cytogenetic Technologist**

Total hours worked by Registered Medical Technologists or equivalent dedicated to Cytogenetics. Exclude management / supervisors.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
**Worked Hours: Other Technical**

Total worked hours by lab technicians or lab assistants involved in the analytic phase of testing only. Do not include hours for technologists, lab scientists, phlebotomists or support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Overtime is the total worked hours paid for overtime. Include hours worked on an overtime basis during orientation or for educational purposes. Exclude premium hours, non-worked hours, or callback hours for which an employee is reimbursed at a regular pay rate based on shift differential or scheduling needs.

This is a subset of Worked Hours: Staff.

**Worked Hours: Phlebotomist**

Total hours worked by Phlebotomists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) Including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.
Worked Hours: Technologist
   Total hours worked by Registered Medical Technologists or equivalent. Exclude management / supervisors.

   This is a subset of Worked Hours: Staff.

Worked Hours: Transcriptionist
   Total hours worked by medical transcriptionist staff.

   This is a subset of Worked Hours: Staff.

Laboratory Services Functional Rollup Department Expense Elements

Blood and Immune System Modifiers Expense
   Total Darbepotin, Epoetin, Filgrastim, Pegfilgrastim, Sargramostim, Adalimumab, Alafacept, Aldesleukine, Omalizumab, Interferons all variations, Anticoagulants, Thrombolytic, Hemophilia and Hemophilia factor expense.

   This is a subset of Medical Supply Expense.

Contract Service Expense
   Total expense for services (e.g. collections, transcription) provided by outside contractors.

Equipment Repair And Maintenance Expense
   Total expense to repair and maintain major equipment charged to this department. Include fee-for-service labor and parts expense, service contract costs, and other related costs.

   This is a subset of Other Direct Operating Expense.

Labor Expense
   Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense Physician Provider: Anatomic Pathology
   Labor Expense: Physician Provider as reported on the Anatomic Pathology department.
**Labor Expense: Anatomic Pathology**

Labor Expense as reported on the Anatomic Pathology department.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical and or surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

**Medical Supply Expense: Anatomic Pathology**

Medical Supply Expense as reported on the Anatomic Pathology department.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense: Anatomic Pathology**

Non Medical Supply Expense as reported on the Anatomic Pathology department.

**Operating Lease Expense**

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.
This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Other Direct Operating Expense: Anatomic Pathology**

Other Direct Operating Expense as reported on the Anatomic Pathology department.

**Outreach Direct Operating Expense**

Total operating expenses (labor and non-labor) exclusively related to the support of all Laboratory Outreach functions and activities (e.g., vehicle maintenance, dedicated phlebotomy, marketing and billing personnel, etc.). These expenses may also be included in other Hours and Expense categories.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Purchased Blood and Blood Products Expense**

Report the sum of purchased blood and blood products, including aphaeresis and autologous transfusions. Do not include hemophilia factor expense.

This is a subset of Medical Supply Expense.

**Referral Testing Service Expense**

Total expense for outside laboratories for testing services not performed on site.

This is a subset of Other Direct Operating Expense.
Wastage Expense

Wastage expense includes blood products that are thawed, pooled, prepared and then not used, as well as products that outdate due to over stocked inventory.

This is a component of Other Direct Operating Expense.

Laboratory Services Functional Rollup Department Mandatory Elements

The following data elements are mandatory for this department:

- Inpatient Billed Tests Performed
- Labor Expense
- Labor Expense: Anatomic Pathology
- Labor Expense: Physician Provider
- Non Medical Supply Expense
- Other Direct Operating Expense
- Other Direct Operating Expense: Anatomic Pathology
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Total Billed Tests
- Worked Hours: Physician Provider
- Worked Hours: Staff

G3300, Other Laboratory Services

This generic department includes all cost centers belonging to Laboratory Services that cannot be mapped to individual laboratory services departments.
Other Laboratory Services Workload Volumes

Adjusted Discharges Supported
Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review the Guiding Principles section in the DRM for more information.

This is a component of Total Billed Tests.

Autopsies Performed
Total number of autopsies performed for this reporting period.

Billed Tests Sent to Reference Lab
Total billed tests sent out to another lab (reference lab) for processing. According to CMS, the definition of a reference lab is a Medicare-enrolled laboratory that receives a specimen from another, referring laboratory for testing and that actually performs the test.

This is a component of Total Billed Tests.

Blood Draws Performed by Lab
Total number of blood draws performed by Lab for this reporting period.

This is a subset of Blood Draws Performed.

Chemistry Billed Tests Performed
Total billed tests performed under the chemistry classification. Chemistry tests are typically billed under the CPT code range 80047-80439 and 82000-84999. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a component of Total Billed Tests.

Complete Blood Count (CBC) Tests Performed
Total billed tests performed for Complete Blood Count (CBC) tests, including automated only (CPT Code 85027) and automated differential WBC count (CPT code 85025) only. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a subset of Hematology Billed Tests.
Cytogenetics Billed Tests Performed

Total billed tests performed under the cytogenetics classification. Cytogenetics tests are typically billed under the CPT code range 88200-88299. Refer to the Laboratory Services Subset Worksheet found on the Support Page for assistance with reporting this value.

This is a component of Total Billed Tests.

Days of Operation per Week

Total number of days the department is open for operation during the week.

The maximum number that can be reported is 7.

Flow Cytometry Tests Performed

Total billed tests performed for Flow Cytometry tests, typically billed under CPT codes 88182-88189. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a component of Total Billed Tests.

Genomic Sequence Tests Performed

Total billed tests performed for Genomic Sequence testing, typically billed under the CPT code range 81410-81471. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a component of Total Billed Tests.

Hematology Billed Tests Performed

Total billed tests performed under the hematology classification. Hematology tests are typically billed under the CPT code range 85000-85999. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a component of Total Billed Tests.

Hematopoietic Cells (HPC) Collected

Total number of Hematopoietic Cells (blood-forming stem cells) collected for this reporting period.

HLA Tests Performed

Total billed tests performed for Human leukocyte antigen (HLA) testing, typically billed under the CPT code range 81370-81383. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.
This is a component of Total Billed Tests.

**Hours of Operation per Week**

Total number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

**Immunology Billed Tests Performed**

Total billed tests performed under the immunology classification. Immunology tests are typically billed under the CPT code range 86000-86849. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a component of Total Billed Tests.

**Infectious Disease Billed Test**

Total number of Infectious Disease tests billed for in this reporting period. Infectious Diseases are diseases that can be spread or transmitted from one person to another.

This is a component of Total Billed Tests.

**Inpatient Billed Tests Performed**

Total billed tests performed in support of facility inpatients. This includes only inpatient (i.e., patients who occupied or are expected to occupy a bed overnight) billed tests. Refer to the Laboratory Services Subset Worksheet found on the Support Page for assistance in reporting this value.

This is a subset of Total Billed Tests.

**Inpatient Blood Draws Performed by Lab**

Total number of blood draws performed on inpatients by Lab staff during the reporting period.

This is a subset of Blood Draws Performed by Lab

**Lab Analyzers**

Total number of Lab Analysis Machines this department has in operation. A Lab Analysis Machine is a lab machine/instrument that provides automated lab results.
**Microbiology Billed Tests**

Total billed tests performed in a microbiology setting. Microbiology tests are tests used to identify microorganisms and typically are billed under the CPT code range 87000-87899. Refer to the Laboratory Services Subset Worksheet found on the Support Page for assistance with reporting this value.

This is a component of Total Billed Tests.

**Molecular Pathology Billed Tests**

Total Billed Tests performed in a molecular pathology setting. Molecular Pathology is the study and cause of molecular diseases.

This is a component of Total Billed Tests.

**Non Hospital Patient Billed Tests**

Total billed tests performed on non-hospital patient specimens. According to CMS, a "non-patient" is defined as a person that is neither an inpatient nor an outpatient of a hospital, but that has a specimen that is submitted for analysis to a hospital and the person is not physically present at the hospital. (All hospitals bill non-patient lab tests on TOB 14X)

**Number of Remote Testing Laboratories**

Total discrete satellite testing laboratories located away from the main laboratory, open eight or more hours per day, and staffed with department personnel. This includes any satellite testing laboratory within or outside the facility (more than 100 yards from the main laboratory) staffed by division personnel and open eight or more hours per day.

**Point of Care Billed Tests**

Total CPT codes billed by the patient billing system(s) for Point of Care Billed tests. Point of Care testing (POCT) defined as testing performed at the patient's side. The testing site is usually close to the patient such as at the bedside, ambulatory clinic, nursing unit, emergency room, operating room, or wherever medical care may be necessary. A physician, nurse, or other health care professional attending the patient obtains the specimen, performs the analysis, and records the test result. Refer to the Laboratory Services Subset Worksheet found on the Support Page for assistance with reporting this value.

**Point of Care Billed Tests Not Performed by Lab Staff**

Total CPT codes billed by the patient billing system(s) for Point of Care Billed tests performed by staff in another department. Point of Care testing (POCT) is defined as testing performed at the patient's side. The testing site is usually close to the patient such as at the bedside, ambulatory clinic, nursing unit, emergency room, operating room or wherever medical care may be necessary. A physician, nurse, or other health care professional attending the patient obtains the specimen, performs the analysis, and records the test result. Refer to the department workload worksheet found on the Support Page for assistance with reporting this value.

This is a subset of Point of Care Billed Tests.
Point of Care Testing Analyzers Supported

Total number of Point of Care Testing analyzers supported by the department. Point of Care Testing analyzers allows the analysis of samples or specimens to be performed close to the patient such as at the bedside, ambulatory clinic, nursing unit, emergency room, operating room, or wherever medical care may be necessary.

Point of Care Testing Sites Supported

Total number of Point of Care Testing sites supported by the department. Point of Care testing (POCT) is defined as testing performed at the patient’s side. The testing site is usually close to the patient such as at the bedside, ambulatory clinic, nursing unit, emergency room, operating room, or wherever medical care may be necessary.

Special Stains Group I Tests Performed

Total billed tests performed by the department under CPT code 88312 "Special stain including interpretation and report; Group I for microorganisms (e.g., acid fast, methenamine silver)“ for the reporting period.

This is a component of Total Billed Tests.

Special Stains Group II Tests Performed

Total billed tests performed by the department under CPT code 88313 "Special stain including interpretation and report; Group II, all other (e.g., iron, trichrome), except stain for microorganisms, stains for enzyme constituents, or immunocytochemistry and immunohistochemistry“ for the reporting period.

This is a component of Total Billed Tests.

Specimen Draw Stations Staffed by Lab

Total discrete specimen draw stations, open eight or more hours per day, and staffed with department personnel. This includes any draw station within or outside the facility (more than 100 yards from the main laboratory) staffed by division personnel.

Tissue Products Dispensed

Total number of Tissue Products dispensed for this reporting period.

This is a subset of Tissue Products Received.

Tissue Products Received

Total number of Tissue Products received in this reporting period. Tissue Products contain tissue that is human and non-human in origin and includes but is not limited to tissue used for transplants.
**Tissue Products Transplanted**

Total number of Tissue Products human in origin transplanted for this reporting period.

This is a subset of Tissue Products Dispensed.

**Total Billed Tests**

Total CPT codes billed by the patient billing system(s) for tests, including billed tests performed on units of blood and billed tests sent to reference labs. Exclude STAT fees, phlebotomy charges, and blood/blood product handling fees. Automated multichannel test panels should be given a count of 1. Refer to the Laboratory Services Subset Worksheet found on the Support Page for assistance in reporting this value.

**Total Blood Draws Performed**

Total number of blood draws performed by both Lab and Non Lab staff for the reporting period.

**Total Donor Units Drawn**

Total number of donor units of blood drawn by Lab staff during the reporting period.

**Unbundled Tests**

Total count of tests as reflected on the laboratory's revenue/usage report. Count each CPT code separately, i.e., the tests listed within each panel should be counted separately.

**Units of blood or blood products purchased**

Total number of blood units or blood product units purchased by this department for the reporting period.

**Units of Blood or Blood Products Received**

Total number of blood units or blood product units received. Count all blood units or blood product received by this department for the reporting period.

**Units of Dispensed Blood or Blood Products**

Total number of blood units or blood product units dispensed in this reporting period. Count all blood units or blood product issued or distributed.

This is a subset of Units of Blood or Blood Products Received.

**Units of Transfused Blood or Blood Products**

Total number of blood units or blood product units transfused in this reporting period. A transfusion is the act of transferring blood or blood products to an individual.
This is a subset of Units of Dispensed Blood or Blood Products.

**Other Laboratory Services Department Hours Elements**

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

**Worked Hours: Transcriptionist**

Total hours worked by medical transcriptionist staff.

This is a subset of Worked Hours: Staff.

**Paid Hours: Physician Provider**

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.
This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Technical**

Total worked hours by lab technicians or lab assistants involved in the analytic phase of testing only. Do not include hours for technologists, lab scientists, phlebotomists or support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Phlebotomist**

Total hours worked by Phlebotomists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.
**Worked Hours: Technologist**

Total hours worked by Registered Medical Technologists or equivalent. Exclude management / supervisors.

This is a subset of Worked Hours: Staff.

---

**Other Laboratory Services Expense Elements**

**Blood and Immune System Modifiers Expense**

Total Darbepotin, Epoetin, Filgrastim, Pegfilgrastim, Sargramostim, Adalimumab, Alafacept, Aldesleukine, Omalizumab, Interferons all variations, Anticoagulants, Thrombolytic, Hemophilia and Hemophilia factor expense.

This is a subset of Medical Supply Expense.

**Contract Service Expense**

Total expense for services (e.g. collections, transcription) provided by outside contractors.

**Equipment Repair And Maintenance Expense**

Total expense to repair and maintain major equipment charged to this department. Include fee-for-service labor and parts expense, service contract costs, and other related costs.

This is a subset of Other Direct Operating Expense.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).
This is a subset of Labor Expense.

**Medical Supply Expense**
Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical and or surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**
Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

**Operating Lease Expense**
Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**
Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Outreach Direct Operating Expense**
Total operating expenses (labor and non-labor) exclusively related to the support of all Laboratory Outreach functions and activities (e.g., vehicle maintenance, dedicated phlebotomy, marketing and billing personnel, etc.). These expenses may also be included in other Hours and Expense categories.

**Overtime Salary Expense**
Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.
**Physician Provider Professional Fee Expense**

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Purchased Blood and Blood Products Expense**

Report the sum of purchased blood and blood products, including aphaeresis and autologous transfusions. Do not include hemophilia factor expense.

This is a subset of Medical Supply Expense.

**Referral Testing Service Expense**

Total expense for outside laboratories for testing services not performed on site.

This is a subset of Other Direct Operating Expense.

**Wastage Expense**

Wastage expense includes blood products that are thawed, pooled, prepared and then not used, as well as products that outdate due to over stocked inventory.

This is a component of Other Direct Operating Expense.

**Other Laboratory Services Mandatory Elements**

The following data elements are mandatory for this department:

- Inpatient Billed Tests Performed
- Labor Expense
- Labor Expense: Physician Provider
- Non Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
• Physician Provider Professional Fee Expense
• Purchased Blood Product Expense
• Total Billed Tests
• Worked Hours: Physician Provider
• Worked Hours: Staff

**Other Laboratory Services Normalizations**

Include the hours, costs and volumes (where applicable) associated with the

• Bench teaching of department employees
• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
• Stem Cell Bank, Tissue Lab, Apheresis and Hemapheresis

Exclude the hours costs and volumes (where applicable) associated with the

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, scheduling, residency program. (Laboratory Services)
• Autopsies
• Administration and Support activities for a Laboratory Residency Program
• Albumin, plasma protein fraction, Rh Immune Globulin, Anti Thrombin, Varicella Zoster Immune Globulin, and other specialty plasma products
• Bench teaching of students (non-department employees)
• Clinical Engineer and/or Biomedical Technician
• Cost of hemophilia factors
• Didactic Teaching for phlebotomy (Providing Collection Manager (PDA’s and Printers and training) for nursing services doing arterial line draws)
• Hospital-based School of Medical Technology
• Lab Specimen Registration
• Lab Courier Service (only Courier service specific to the laboratory)

• Medical records transcription, e.g., lines produced internally or outsources (Laboratory). This includes transcription from dictation capture to document distribution and storage, including associate transcription.

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Patient reception, e.g., greeting, checking in of patients, answering phone calls (Laboratory)

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Laboratory)

• Repair and Maintenance of Clinical Equipment/Rooms

• Tumor Registry - the activities involved in capturing history, diagnosis, treatment and health status for tumor patients
Chapter 24. Marketing, Communications, Strategic Planning, Public and Community Relations

This chapter includes the following sections:

- 06110, Combined Marketing, Communications, Strategic Planning and Public/Comm Relations 1148
- 06120, Marketing 1156
- 06130, Internal Communications 1162
- 06140, Public Relations 1167
- 06150, Community Relations 1172
- 06160, Strategic Planning and Business Development 1176
- F6100, Marketing, Communications, Strat Plan, Public/Comm Relations Functional Rollup 1182
- G6100, Other Marketing, Communications, Strategic Planning and Public/Comm Relations 1188

**06110, Combined Marketing, Communications, Strategic Planning and Public/Comm Relations**

This department combines the marketing, communications, strategic planning, public relations and community relations functions. The department analyzes and develops program offerings, strategic market planning, and hospital image strategies as a means of marketing hospital services. This department also manages media relations, advertising, internal and external communication, and public relations.

**Combined Marketing, Communications, Strategic Planning and Public/Comm Relations Mapping Guidelines**

If you have separate cost centers for Marketing, Communications, Public Relations, Community Relations, and Strategic Planning, you may want to map them individually to the more detailed department. If you map to this department profile as a primary instance, you should not map to the other department profiles as primary instances also.
Combined Marketing, Communications, Strategic Planning and Public/Comm Relations Workload Volumes

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Adjusted Patient Days Supported

The total number of Adjusted Patient Days supported by this department for the reporting period. This value is intended for a department which provides support to more than one hospital within a health system. Sum the number of Adjusted Patient Days for each entity supported and report the value here. The value may exceed the value in the General Facility Department (00100).

Advertisements

The number of discrete advertisements created for all media by the department during the reporting period. This would include all advertisements placed in newspapers, magazines, and other media in digital and non-digital format. The total number of different advertisements composed should be counted, not the number of copies run, the number of newspapers it ran in, or other multiple counts. Do not include press releases in this count.

This is a subset of Promotional Activities.

Average Ad Placement Cost

Enter the average cost to place an advertisement in all media formats. Enter the value in dollars and cents (e.g. 50.00). This would include newspaper, radio, TV, web display, search engine marketing, Facebook ads, Promoted Twitter ads, YouTube ads, etc.

Business Development Plans

The number of formal business development plans prepared or developed by the department during the reporting period. These plans address development of new business activities, including mergers and acquisitions, and/or development of a new service (staging the addition of staff, identifying space requirements, physical relocation of existing services, and projecting patient utilization and revenues). If a plan development straddles reporting periods, count the plan in the reporting period that it is 50 percent completed. If you have reported a plan as being developed in a prior reporting period, do not include it in the current reporting period.

This is a subset of Strategic and Supplement Plans.
Covered Lives

Enter the number of covered lives during the reporting period. For ActionOI purposes, Covered Lives are consumers covered under the health system insurance plan.

Direct Marketing Contacts

The total number of telephone calls and mail/email contacts to potential or existing customers during the reporting period.

Internal Communications

The total number of communications created and delivered to internal 'customers' during the reporting period. Examples include but are not limited to: newsletters, emails, posters, and videos.

Market Studies

The number of formal market research studies prepared and conducted by the department during the reporting period. Studies typically include analyzing payer class, demographics, competing facility, facility strengths/weaknesses, and public attitude for the past, present, or future. The study may focus on current or projected market position.

Marketing Plans

The number of formal market plans developed by the department during the reporting period. For comprehensive plans (annual or otherwise) that contain several sub-plans, count each sub-plan as equivalent to one plan.

This is a subset of Strategic and Supplement Plans.

Organizational Strategic Plans

The number of formal organizational strategic plans developed by the department during the reporting period. Strategic plans address the strategy for existing business and organizational processes. For comprehensive plans (annual or otherwise) that contain several sub-plans, count each sub-plan as equivalent to one plan. If a plan development straddles reporting periods, count the plan in the reporting period that it is 50 percent completed. If you have reported a plan as being developed in a prior reporting period, do not include it in the current reporting period.

This is a subset of Strategic and Supplement Plans.

Other Promotional Activities

The total other promotional activities (sales calls, telemarketing campaigns, etc.) coordinated.

This is a subset of Promotional Activities.
Payment Contract Proposals

The total reimbursement contract proposals prepared. Reimbursement contract proposals prepared may take the form of Capitated, Case Based, Discounted Payment or Per Diem reimbursement and may be with HMOs or PPOs or other government agencies. The proposal may or may not have resulted in a contractual agreement. Do not count the number of times the proposal may have been reworked, just the final proposal.

Note: HMO and PPO proposals may use different reimbursement schemes. Be sure to count the proposal here and in the appropriate reimbursement method category (i.e., capitated, case based, discounted payment, per diem).

Place-based Marketing Advertisements

Total number of discrete place-based advertisements created by the department during the reporting period. Place-based advertising encompasses a wide variety of formats (digital and non-digital) that are specially located where particular groups congregate for a variety of purposes. This includes, but is not limited to, individual billboards, bus/taxi/railway signs, stadiums and arenas, shopping malls, etc.

This is a subset of Advertisements.

Press Releases

The total number of press releases created and deployed by the department during the reporting period. Press releases are a written or recorded communication directed at members of the news media for the purpose of announcing something newsworthy. Typically, they are sent to assignment editors at newspapers, magazines, radio stations, television stations, or television networks. Press releases can announce a range of news items, such as scheduled events, personal promotions, awards, new products and services, etc.

This is a subset of Promotional Activities.

Promotional Activities

The number of new promotional activities prepared, coordinated, and/or conducted by the department during the reporting period. Include discrete advertisements created for print media, advertisements or shows aired on radio or television, special events, and other promotional activities. Promotional activities can be delivered via a variety of media's: print media which includes newspaper and magazines, electronic media which includes radio and television, digital media which includes internet, social networking and social media sites and lastly, outdoor media which includes banner ads, billboards, etc.

Public Relations Plans

The number of formal public relations plans developed by the department during the reporting period. These address a general image issue or focus on public attitudes toward a specific issue. The plan will usually address the composition of materials to present to the public, the selection of appropriate media to use for presentation, and follow-up on the effectiveness of the plan.
Radio and Television Features

The number of promotional activities or shows aired on radio or television by the department during the reporting period. This would include all features and shows (e.g., infomercials, telethons, etc.) aired only on radio or television. The total number of different features or shows should be counted, not the number of times the feature or show ran.

This is a subset of Promotional Activities.

Social Media Encounters

Enter the total number of social media encounters during the reporting period. Encounters would include such things as number of website page hits, number of Facebook fans, number of Twitter followers and YouTube video views.

Special Events

The number of special events coordinated by the department during the reporting period. This would include events such as health screenings, health fairs, lectures, etc. with the purpose of promoting the organization. The organization must participate in the event and it may be one of several other facilities present. The length/duration of the event does not impact the total count. For example, presence at a two day event, a one day event, a one hour event, or a four hour event all count as one event.

This is a subset of Promotional Activities.

Strategic and Supplement Plans

The number of formal strategic and individual supplement plans developed by the department during the reporting period. This may include: market plans, public relations plans, organizational strategic plans and business development plans. For comprehensive plans (annual or otherwise) that contain several sub-plans, count each sub-plan as equivalent to one plan. For example, a market plan includes several sub-plans each addressing a different image campaign, count each sub-plan as one plan. If the plan development straddles reporting periods, count the plan in the reporting period that it is 50 percent completed. If you have reported a plan as being developed in a prior reporting period, do not include it in the current reporting period.

Combined Marketing, Communications, Strategic Planning and Public/Comm Relations Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.
**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Overtime is the total worked hours paid for overtime. Include hours worked on an overtime basis during orientation or for educational purposes. Exclude premium hours, non-worked hours, or callback hours for which an employee is reimbursed at a regular pay rate based on shift differential or scheduling needs.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Combined Marketing, Communications, Strategic Planning and Public/Comm Relations Mandatory Elements**

The following data elements are mandatory for this department:

- Market Studies
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Strategic And Supplement Plans
• Worked Hours: Staff

Combined Marketing, Communications, Strategic Planning and Public/Comm Relations Expense Elements

Advertising Expense
Total expense for advertising and marketing for the facility.
This is a subset of Other Direct Operating Expense.

Contract Advertising Expense
Total contract expense for advertising and marketing for the facility.
This is a subset of Contract Service Expense.

Contract Service Expense
Total expense for services (e.g., graphic design, printing) provided by outside contractors.
This is a subset of Other Direct Operating Expense.

Labor Expense
Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor.
Include on call or standby expense. Exclude benefits such as FICA.

Other Direct Operating Expense
Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense
Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.
This is a subset of Labor Expense.

Professional Fee Expense
Total expense for professional fees (e.g., consultants).
This is a subset of Other Direct Operating Expense.

**Supply Expense**

Total expense for department operating supplies.

This is a subset of Other Direct Operating Expense.

**Combined Marketing, Communications, Strategic Planning and Public/Comm Relations Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Brand development and management
- Business development
- Community relations, e.g., collaborates with community leaders for the community health needs assessment, plans community health events, gathers and reports benefits to the community
- External Website content management
- Internal communications
- Internal Website content management
- Marketing, e.g., promoting and advertising of Physician Practice services
- Patient Relations
- Physician liaison (staff acting as a point of contact between Physician / Providers and Hospital Administration)
- Physician referral call center
- Public Relations
- Strategic Planning and Facilitation

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Conferences and/or Educational events (clinical or leadership)
- Costs for promotional materials for Educational Services Series department sponsored events
- Costs for subscriptions and license fees to databases
• Fund raising activities

• Patient Satisfaction, including the survey process and analysis of the results

06120, Marketing

This department is a strategic business arm to the organization that provides all aspects of marketing functions to the organization. The department forms the communication link between the services offered and physicians, employees, payers, and the community served. Functions include, but are not limited to: market development, marketing strategy development and implementation, brand development and management, primary market research and analytics, advertising and media buys, external digital media strategies and placement, digital and social media management, external internet/public website management, direct marketing (including consumer Physician referral call center), database marketing, community marketing, external publications, physician liaison, service line marketing, and international marketing.

Marketing Mapping Guidelines

If your cost center(s) is less than 80% Marketing (per the department definition), this is not an appropriate choice. Another option is the Combined Marketing, Communications, Strategic Planning, and Public/Community Relations department (06110).

Marketing Workload Volumes

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Adjusted Patient Days Supported

The total number of Adjusted Patient Days supported by this department. This reported value is intended for a department providing support to more than one entity within a health system. Add and report the number of Adjusted Patient Days for each entity.
Advertisements

The number of discrete advertisements created for all media by the department during the reporting period. This would include all advertisements placed in newspapers, magazines, and other media in digital and non-digital format. The total number of different advertisements composed should be counted, not the number of copies run, the number of newspapers it ran in, or other multiple counts. Do not include press releases in this count.

This is a subset of Promotional Activities.

Average Ad Placement Cost

Enter the average cost to place an advertisement in all media formats. Enter the value in dollars and cents (e.g. 50.00). This would include newspaper, radio, TV, web display, search engine marketing, Facebook ads, Promoted Twitter ads, YouTube ads, etc.

Covered Lives

Enter the number of covered lives during the reporting period. For ActionOI purposes, Covered Lives are consumers covered under the health system insurance plan.

Direct Marketing Contacts

The total number of telephone calls and mail/email contacts to potential or existing customers during the reporting period.

Market Studies

The total market research studies prepared. This refers to formal market research studies during the reporting period. Studies typically include analyzing payer class, demographics, competing facility, facility strengths/weaknesses, and public attitude for the past, present, or future. The study may focus on current or projected market position.

Note: If a market study covers multiple data periods, report the study in the period containing the majority of the work, i.e. report the study in the period containing 50 percent or more of the work.

Marketing Plans

The number of formal market plans developed by the department during the reporting period. For comprehensive plans (annual or otherwise) that contain several sub-plans, count each sub-plan as equivalent to one plan.

This is a subset of Strategic and Supplement Plans.

Other Promotional Activities

The total other promotional activities (sales calls, telemarketing campaigns, etc.) coordinated.
This is a subset of Promotional Activities.

**Payment Contract Proposals**

The total reimbursement contract proposals prepared. Reimbursement contract proposals prepared may take the form of Capitated, Case Based, Discounted Payment or Per Diem reimbursement and may be with HMOs or PPOs or other government agencies. The proposal may or may not have resulted in a contractual agreement. Do not count the number of times the proposal may have been reworked, just the final proposal.

**Note:** HMO and PPO proposals may use different reimbursement schemes. Be sure to count the proposal here and in the appropriate reimbursement method category (i.e., capitated, case based, discounted payment, per diem).

**Place-based Marketing Advertisements**

Total number of discrete place-based advertisements created by the department during the reporting period. Place-based advertising encompasses a wide variety of formats (digital and non-digital) that are specially located where particular groups congregate for a variety of purposes. This includes, but is not limited to, individual billboards, bus/taxi/railway signs, stadiums and arenas, shopping malls, etc.

This is a subset of Advertisements.

**Press Releases**

The total number of press releases created and deployed by the department during the reporting period. Press releases are a written or recorded communication directed at members of the news media for the purpose of announcing something newsworthy. Typically, they are sent to assignment editors at newspapers, magazines, radio stations, television stations, or television networks. Press releases can announce a range of news items, such as scheduled events, personal promotions, awards, new products and services, etc.

This is a subset of Promotional Activities.

**Promotional Activities**

The number of new promotional activities prepared, coordinated, and/or conducted by the department during the reporting period. Include discrete advertisements created for print media, advertisements or shows aired on radio or television, special events, and other promotional activities. Promotional activities can be delivered via a variety of media's: print media which includes newspaper and magazines, electronic media which includes radio and television, digital media which includes internet, social networking and social media sites and lastly, outdoor media which includes banner ads, billboards, etc.
Radio and Television Features

The number of promotional activities or shows aired on radio or television by the department during the reporting period. This would include all features and shows (e.g., infomercials, telethons, etc.) aired only on radio or television. The total number of different features or shows should be counted, not the number of times the feature or show ran.

This is a subset of Promotional Activities.

Social Media Encounters

Enter the total number of social media encounters during the reporting period. Encounters would include such things as number of website page hits, number of Facebook fans, number of Twitter followers and YouTube video views.

Special Events

The number of special events coordinated by the department during the reporting period. This would include events such as health screenings, health fairs, lectures, etc. with the purpose of promoting the organization. The organization must participate in the event and it may be one of several other facilities present. The length/duration of the event does not impact the total count. For example, presence at a two day event, a one day event, a one hour event, or a four hour event all count as one event.

This is a subset of Promotional Activities.

Strategic and Supplement Plans

The number of formal strategic and individual supplement plans developed by the department during the reporting period. This may include: market plans, public relations plans, organizational strategic plans and business development plans. For comprehensive plans (annual or otherwise) that contain several sub-plans, count each sub-plan as equivalent to one plan. For example, a market plan includes several sub-plans each addressing a different image campaign, count each sub-plan as one plan. If the plan development straddles reporting periods, count the plan in the reporting period that it is 50 percent completed. If you have reported a plan as being developed in a prior reporting period, do not include it in the current reporting period.

Marketing Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.
Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Overtime is the total worked hours paid for overtime. Include hours worked on an overtime basis during orientation or for educational purposes. Exclude premium hours, non-worked hours, or callback hours for which an employee is reimbursed at a regular pay rate based on shift differential or scheduling needs. Also report overtime hours worked in the appropriate skill mix categories.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Marketing Expense Elements

Advertising Expense

Total expense for advertising and marketing for the facility.

This is a subset of Other Direct Operating Expense.

Contract Service Expense

Total expense for services (e.g., graphic design, printing) provided by outside contractors.

This is a subset of Other Direct Operating Expense.

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.
Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Professional Fee Expense

Total expense for professional fees (e.g., consultants).

This is a subset of Other Direct Operating Expense.

Supply Expense

Total expense for department operating supplies.

This is a subset of Other Direct Operating Expense.

Marketing Mandatory Elements

The following data elements are mandatory for this department:

- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Worked Hours: Staff

Marketing Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Brand development and management
• External Website content management
• Marketing, e.g., promoting and advertising of Physician Practice services
• Physician liaison (staff acting as a point of contact between Physician / Providers and Hospital Administration)
• Physician referral call center

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Business development
• Community relations, e.g., collaborates with community leaders for the community health needs assessment, plans community health events, gathers and reports benefits to the community
• Costs for promotional materials for Educational Services Series department sponsored events
• Costs for subscriptions and license fees to databases
• Fund raising activities
• Internal communications
• Internal Website content management
• Patient Relations
• Patient Satisfaction, including the survey process and analysis of the results
• Public Relations
• Strategic Planning and Facilitation, e.g., business development, portfolio management, strategic partnerships and alliances, strategic performance, development of overall organizational strategies, researching industry trends and forecasts

06130, Internal Communications

This department provides all aspects of internal communication functions for the organization. Functions include, but are not limited to: development and implementation of communications strategies for internal audiences; writing, editing and publishing newsletters, magazines, annual reports, specialty and routine publications in both print and online (visual production); presentation development (internal and external); designs, develops content and manages internal intranet; and internal digital and social media management.
Internal Communications Mapping Guidelines

If your cost center(s) is less than 80% Internal Communications (per the department definition), this is not an appropriate choice. Another option is the 06110, Combined Marketing, Communications, Strategic Planning, and Public/Community Relations department.

Internal Communications Workload Volumes

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Adjusted Patient Days Supported

The total number of Adjusted Patient Days supported by this department. This reported value is intended for a department providing support to more than one entity within a health system. Add and report the number of Adjusted Patient Days for each entity.

Internal Communications

The total number of communications created and delivered to internal 'customers' during the reporting period. Examples include but are not limited to: newsletters, emails, posters, and videos.

Other Promotional Activities

The total other promotional activities (sales calls, telemarketing campaigns, etc.) coordinated.

This is a subset of Promotional Activities.

Promotional Activities

The number of new promotional activities prepared, coordinated, and/or conducted by the department during the reporting period. Include discrete advertisements created for print media, advertisements or shows aired on radio or television, special events, and other promotional activities. Promotional activities can be delivered via a variety of media's: print media which includes newspaper and magazines, electronic media which includes radio and television, digital media which includes internet, social networking and social media sites and lastly, outdoor media which includes banner ads, billboards, etc.
Social Media Encounters

Enter the total number of social media encounters during the reporting period. Encounters would include such things as number of website page hits, number of Facebook fans, number of Twitter followers and YouTube video views.

Special Events

The number of special events coordinated by the department during the reporting period. This would include events such as health screenings, health fairs, lectures, etc. with the purpose of promoting the organization. The organization must participate in the event and it may be one of several other facilities present. The length/duration of the event does not impact the total count. For example, presence at a two day event, a one day event, a one hour event, or a four hour event all count as one event.

This is a subset of Promotional Activities.

Internal Communication Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
Worked Hours: Overtime

Overtime is the total worked hours paid for overtime. Include hours worked on an overtime basis during orientation or for educational purposes. Exclude premium hours, non-worked hours, or callback hours for which an employee is reimbursed at a regular pay rate based on shift differential or scheduling needs. Also report overtime hours worked in the appropriate skill mix categories.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Internal Communications Expense Elements

Contract Service Expense

Total expense for services (e.g., graphic design, printing) provided by outside contractors.

This is a subset of Other Direct Operating Expense.

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Professional Fee Expense

Total expense for professional fees (e.g., consultants).

This is a subset of Other Direct Operating Expense.
Supply Expense

Total expense for department operating supplies.

This is a subset of Other Direct Operating Expense.

Internal Communications Mandatory Elements

The following data elements are mandatory for this department:

- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Worked Hours: Staff

Internal Communications Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Internal Website content management

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Brand development and management
- Business development
- Community relations, e.g., collaborates with community leaders for the community health needs assessment, plans community health events, gathers and reports benefits to the community
- Costs for promotional materials for Educational Services Series department sponsored events
- Costs for subscriptions and license fees to databases
- External Website content management
- Fund raising activities
- Marketing, e.g., promoting and advertising of Physician Practice services
• Patient Relations

• Patient Satisfaction, including the survey process and analysis of the results

• Physician liaison (staff acting as a point of contact between Physician / Providers and Hospital Administration)

• Physician referral call center

• Public Relations

• Strategic Planning and Facilitation, e.g., business development, portfolio management, strategic partnerships and alliances, strategic performance, development of overall organizational strategies, researching industry trends and forecasts

06140, Public Relations

This department provides all aspects of public and media relations functions for the organization. Functions include, but are not limited to: respond to media requests for interviews and information; news bureau; public affairs, and government relations.

Public Relations Mapping Guidelines

If your cost center(s) is less than 80% Public Relations (per the department definition), this is not an appropriate choice. Another option is the 06110, Combined Marketing, Communications, Strategic Planning, and Public/Community Relations department.

Public Relations Workload Volumes

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Adjusted Patient Days Supported

The total number of Adjusted Patient Days supported by this department. This reported value is intended for a department providing support to more than one entity within a health system. Add and report the number of Adjusted Patient Days for each entity.
Covered Lives

Enter the number of covered lives during the reporting period. For ActionOI purposes, Covered Lives are consumers covered under the health system insurance plan.

Other Promotional Activities

The total other promotional activities (sales calls, telemarketing campaigns, etc.) coordinated.

This is a subset of Promotional Activities.

Press Releases

The total number of press releases created and deployed by the department during the reporting period. Press releases are a written or recorded communication directed at members of the news media for the purpose of announcing something newsworthy. Typically, they are sent to assignment editors at newspapers, magazines, radio stations, television stations, or television networks. Press releases can announce a range of news items, such as scheduled events, personal promotions, awards, new products and services, etc.

This is a subset of Promotional Activities.

Promotional Activities

The number of new promotional activities prepared, coordinated, and/or conducted by the department during the reporting period. Include discrete advertisements created for print media, advertisements or shows aired on radio or television, special events, and other promotional activities. Promotional activities can be delivered via a variety of media's: print media which includes newspaper and magazines, electronic media which includes radio and television, digital media which includes internet, social networking and social media sites and lastly, outdoor media which includes banner ads, billboards, etc.

Public Relations Plans

The number of formal public relations plans developed by the department during the reporting period. These address a general image issue or focus on public attitudes toward a specific issue. The plan will usually address the composition of materials to present to the public, the selection of appropriate media to use for presentation, and follow-up on the effectiveness of the plan.

Radio and Television Features

The number of promotional activities or shows aired on radio or television by the department during the reporting period. This would include all features and shows (e.g., infomercials, telethons, etc.) aired only on radio or television. The total number of different features or shows should be counted, not the number of times the feature or show ran.

This is a subset of Promotional Activities.
Social Media Encounters

Enter the total number of social media encounters during the reporting period. Encounters would include such things as number of website page hits, number of Facebook fans, number of Twitter followers and YouTube video views.

Special Events

The number of special events coordinated by the department during the reporting period. This would include events such as health screenings, health fairs, lectures, etc. with the purpose of promoting the organization. The organization must participate in the event and it may be one of several other facilities present. The length/duration of the event does not impact the total count. For example, presence at a two day event, a one day event, a one hour event, or a four hour event all count as one event.

This is a subset of Promotional Activities.

Public Relations Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
Worked Hours: Overtime

Overtime is the total worked hours paid for overtime. Include hours worked on an overtime basis during orientation or for educational purposes. Exclude premium hours, non-worked hours, or callback hours for which an employee is reimbursed at a regular pay rate based on shift differential or scheduling needs. Also report overtime hours worked in the appropriate skill mix categories.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Public Relations Expense Elements

Contract Service Expense

Total expense for services (e.g., graphic design, printing) provided by outside contractors.

This is a subset of Other Direct Operating Expense.

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Professional Fee Expense

Total expense for professional fees (e.g., consultants).

This is a subset of Other Direct Operating Expense.
Supply Expense

Total expense for department operating supplies.

This is a subset of Other Direct Operating Expense.

Public Relations Mandatory Elements

The following data elements are mandatory for this department:

- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Worked Hours: Staff

Public Relations Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Patient Relations
- Public Relations

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

Community Relations Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.
This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Overtime is the total worked hours paid for overtime. Include hours worked on an overtime basis during orientation or for educational purposes. Exclude premium hours, non-worked hours, or callback hours for which an employee is reimbursed at a regular pay rate based on shift differential or scheduling needs. Also report overtime hours worked in the appropriate skill mix categories.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Community Relations Expense Elements**

**Contract Service Expense**

Total expense for services (e.g., graphic design, printing) provided by outside contractors.

This is a subset of Other Direct Operating Expense.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.
Overtime Salary Expense
Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Professional Fee Expense
Total expense for professional fees (e.g., consultants).

This is a subset of Other Direct Operating Expense.

Supply Expense
Total expense for department operating supplies.

This is a subset of Other Direct Operating Expense.

Community Relations Mandatory Elements
The following data elements are mandatory for this department:

- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Worked Hours: Staff

Community Relations Normalizations
Include the hours, costs and volumes (where applicable) associated with the following functions:

- Community relations, e.g., collaborates with community leaders for the community health needs assessment, plans community health events, gathers and reports benefits to the community

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Brand development and management
• Business development
• Costs for promotional materials for Educational Services Series department sponsored events
• Costs for subscriptions and license fees to databases
• External Website content management
• Fund raising activities
• Internal communications
• Internal Website content management
• Marketing, e.g., promoting and advertising of Physician Practice services
• Patient Relations
• Patient Satisfaction, including the survey process and analysis of the results
• Physician liaison (staff acting as a point of contact between Physician / Providers and Hospital Administration)
• Physician referral call center
• Public Relations
• Strategic Planning and Facilitation, e.g., business development, portfolio management, strategic partnerships and alliances, strategic performance, development of overall organizational strategies, researching industry trends and forecasts

06160, Strategic Planning and Business Development

This department establishes the vision, develops and supports the creation of strategic plans/goals and initiatives to improve the organization's long term competitive performance. Functions include, but are not limited to: strategic planning, business development, portfolio management, strategic partnerships and alliances, strategic performance, development of overall organizational strategies, and researches industry trends and forecasts (secondary market research and analytics). Outputs include, but are not limited to: Strategic Vision, strategic plans, organizational goals, strategic priorities, product portfolio strategies, and market expansion strategies (i.e. mergers and acquisitions).

Strategic Planning and Business Development Mapping Guidelines

If your cost center(s) is less than 80% Strategic Planning and Business Development (per the department definition), this is not an appropriate choice. Another option is the 06110, Combined Marketing, Communications, Strategic Planning, and Public/Community Relations department.
Strategic Planning and Business Development Workload Volumes

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Adjusted Patient Days Supported

The total number of Adjusted Patient Days supported by this department. This reported value is intended for a department providing support to more than one entity within a health system. Add and report the number of Adjusted Patient Days for each entity.

Business Development Plans

The number of formal business development plans prepared or developed by the department during the reporting period. These plans address development of new business activities, including mergers and acquisitions, and/or development of a new service (staging the addition of staff, identifying space requirements, physical relocation of existing services, and projecting patient utilization and revenues). If a plan development straddles reporting periods, count the plan in the reporting period that it is 50 percent completed. If you have reported a plan as being developed in a prior reporting period, do not include it in the current reporting period.

This is a subset of Strategic and Supplement Plans.

Covered Lives

Enter the number of covered lives during the reporting period. For ActionOI purposes, Covered Lives are consumers covered under the health system insurance plan.

Market Studies

The total market research studies prepared. This refers to formal market research studies during the reporting period. Studies typically include analyzing payer class, demographics, competing facility, facility strengths/weaknesses, and public attitude for the past, present, or future. The study may focus on current or projected market position.

Note: If a market study covers multiple data periods, report the study in the period containing the majority of the work, i.e. report the study in the period containing 50 percent or more of the work.
Organizational Strategic Plans

The number of formal organizational strategic plans developed by the department during the reporting period. Strategic plans address the strategy for existing business and organizational processes. For comprehensive plans (annual or otherwise) that contain several sub-plans, count each sub-plan as equivalent to one plan. If a plan development straddles reporting periods, count the plan in the reporting period that it is 50 percent completed. If you have reported a plan as being developed in a prior reporting period, do not include it in the current reporting period.

This is a subset of Strategic and Supplement Plans.

Other Promotional Activities

The total other promotional activities (sales calls, telemarketing campaigns, etc.) coordinated.

This is a subset of Promotional Activities.

Payment Contract Proposals

The total reimbursement contract proposals prepared. Reimbursement contract proposals prepared may take the form of Capitated, Case Based, Discounted Payment or Per Diem reimbursement and may be with HMOs or PPOs or other government agencies. The proposal may or may not have resulted in a contractual agreement. Do not count the number of times the proposal may have been reworked, just the final proposal.

Note: HMO and PPO proposals may use different reimbursement schemes. Be sure to count the proposal here and in the appropriate reimbursement method category (i.e., capitated, case based, discounted payment, per diem).

Promotional Activities

The number of new promotional activities prepared, coordinated, and/or conducted by the department during the reporting period. Include discrete advertisements created for print media, advertisements or shows aired on radio or television, special events, and other promotional activities. Promotional activities can be delivered via a variety of media’s: print media which includes newspaper and magazines, electronic media which includes radio and television, digital media which includes internet, social networking and social media sites and lastly, outdoor media which includes banner ads, billboards, etc.

Special Events

The number of special events coordinated by the department during the reporting period. This would include events such as health screenings, health fairs, lectures, etc. with the purpose of promoting the organization. The organization must participate in the event and it may be one of several other facilities present. The length/duration of the event does not impact the total count. For example, presence at a two day event, a one day event, a one hour event, or a four hour event all count as one event.

This is a subset of Promotional Activities.
Strategic and Supplement Plans

The number of formal strategic and individual supplement plans developed by the department during the reporting period. This may include: market plans, public relations plans, organizational strategic plans and business development plans. For comprehensive plans (annual or otherwise) that contain several sub-plans, count each sub-plan as equivalent to one plan. For example, a market plan includes several sub-plans each addressing a different image campaign, count each sub-plan as one plan. If the plan development straddles reporting periods, count the plan in the reporting period that it is 50 percent completed. If you have reported a plan as being developed in a prior reporting period, do not include it in the current reporting period.

Strategic Planning and Business Development Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Overtime is the total worked hours paid for overtime. Include hours worked on an overtime basis during orientation or for educational purposes. Exclude premium hours, non-worked hours, or callback hours for which an employee is reimbursed at a regular pay rate based on shift differential or scheduling needs. Also report overtime hours worked in the appropriate skill mix categories.

This is a subset of Worked Hours: Staff.
Worked Hours: Staff
Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Strategic Planning and Business Development Expense Elements

Contract Service Expense
Total expense for services (e.g., graphic design, printing) provided by outside contractors.

This is a subset of Other Direct Operating Expense.

Labor Expense
Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Other Direct Operating Expense
Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense
Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Professional Fee Expense
Total expense for professional fees (e.g., consultants).

This is a subset of Other Direct Operating Expense.

Supply Expense
Total expense for department operating supplies.

This is a subset of Other Direct Operating Expense.

Strategic Planning and Business Development Mandatory Elements
The following data elements are mandatory for this department:

- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Worked Hours: Staff

**Strategic Planning and Business Development Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Business development
- Strategic Planning and Facilitation, e.g., business development, portfolio management, strategic partnerships and alliances, strategic performance, development of overall organizational strategies, researching industry trends and forecasts

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Brand development and management
- Community relations, e.g., collaborates with community leaders for the community health needs assessment, plans community health events, gathers and reports benefits to the community
- Costs for promotional materials for Educational Services Series department sponsored events
- Costs for subscriptions and license fees to databases
- External Website content management
- Fund raising activities
- Internal communications
- Internal Website content management
- Marketing, e.g., promoting and advertising of Physician Practice services
- Patient Relations
- Patient Satisfaction, including the survey process and analysis of the results
- Physician liaison (staff acting as a point of contact between Physician / Providers and Hospital Administration)
- Physician referral call center
- Public Relations

**F6100, Marketing, Communications, Strat Plan, Public/Comm Relations Functional Rollup**

This rollup department includes all cost centers belonging to Marketing, Communications, Public Relations, Community Relations, and Strategic Planning Services. It is automatically created by the program when cost center mapping is finalized.

**Marketing, Communications, Strat Plan, Public/Comm Relations Functional Rollup Workload Volumes**

**Adjusted Discharges Supported**

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

**Adjusted Patient Days Supported**

The total number of Adjusted Patient Days supported by this department. This reported value is intended for a department providing support to more than one entity within a health system. Add and report the number of Adjusted Patient Days for each entity.

**Advertisements**

The number of discrete advertisements created for all media by the department during the reporting period. This would include all advertisements placed in newspapers, magazines, and other media in digital and non-digital format. The total number of different advertisements composed should be counted, not the number of copies run, the number of newspapers it ran in, or other multiple counts. Do not include press releases in this count.

This is a subset of Promotional Activities.
Average Ad Placement Cost

Enter the average cost to place an advertisement in all media formats. Enter the value in dollars and cents (e.g. 50.00). This would include newspaper, radio, TV, web display, search engine marketing, Facebook ads, Promoted Twitter ads, YouTube ads, etc.

Business Development Plans

The number of formal business development plans prepared or developed by the department during the reporting period. These plans address development of new business activities, including mergers and acquisitions, and/or development of a new service (staging the addition of staff, identifying space requirements, physical relocation of existing services, and projecting patient utilization and revenues). If a plan development straddles reporting periods, count the plan in the reporting period that it is 50 percent completed. If you have reported a plan as being developed in a prior reporting period, do not include it in the current reporting period.

This is a subset of Strategic and Supplement Plans.

Covered Lives

Enter the number of covered lives during the reporting period. For ActionOI purposes, Covered Lives are consumers covered under the health system insurance plan.

Direct Marketing Contacts

The total number of telephone calls and mail/email contacts to potential or existing customers during the reporting period.

Internal Communications

The total number of communications created and delivered to internal 'customers' during the reporting period. Examples include but are not limited to: newsletters, emails, posters, and videos.

Market Studies

The total market research studies prepared. This refers to formal market research studies during the reporting period. Studies typically include analyzing payer class, demographics, competing facility, facility strengths/weaknesses, and public attitude for the past, present, or future. The study may focus on current or projected market position.

Note: If a market study covers multiple data periods, report the study in the period containing the majority of the work, i.e. report the study in the period containing 50 percent or more of the work.

Marketing Plans

The number of formal market plans developed by the department during the reporting period. For comprehensive plans (annual or otherwise) that contain several sub-plans, count each sub-plan as equivalent to one plan.
This is a subset of Strategic and Supplement Plans.

**Organizational Strategic Plans**

The number of formal organizational strategic plans developed by the department during the reporting period. Strategic plans address the strategy for existing business and organizational processes. For comprehensive plans (annual or otherwise) that contain several sub-plans, count each sub-plan as equivalent to one plan. If a plan development straddles reporting periods, count the plan in the reporting period that it is 50 percent completed. If you have reported a plan as being developed in a prior reporting period, do not include it in the current reporting period.

This is a subset of Strategic and Supplement Plans.

**Other Promotional Activities**

The total other promotional activities (sales calls, telemarketing campaigns, etc.) coordinated.

This is a subset of Promotional Activities.

**Payment Contract Proposals**

The total reimbursement contract proposals prepared. Reimbursement contract proposals prepared may take the form of Capitated, Case Based, Discounted Payment or Per Diem reimbursement and may be with HMOs or PPOs or other government agencies. The proposal may or may not have resulted in a contractual agreement. Do not count the number of times the proposal may have been reworked, just the final proposal.

**Note:** HMO and PPO proposals may use different reimbursement schemes. Be sure to count the proposal here and in the appropriate reimbursement method category (i.e., capitated, case based, discounted payment, per diem).

**Place-based Marketing Advertisements**

Total number of discrete place-based advertisements created by the department during the reporting period. Place-based advertising encompasses a wide variety of formats (digital and non-digital) that are specially located where particular groups congregate for a variety of purposes. This includes, but is not limited to, individual billboards, bus/taxi/railway signs, stadiums and arenas, shopping malls, etc.

This is a subset of Advertisements.
Press Releases
The total number of press releases created and deployed by the department during the reporting period. Press releases are a written or recorded communication directed at members of the news media for the purpose of announcing something newsworthy. Typically, they are sent to assignment editors at newspapers, magazines, radio stations, television stations, or television networks. Press releases can announce a range of news items, such as scheduled events, personal promotions, awards, new products and services, etc.

This is a subset of Promotional Activities.

Promotional Activities
The number of new promotional activities prepared, coordinated, and/or conducted by the department during the reporting period. Include discrete advertisements created for print media, advertisements or shows aired on radio or television, special events, and other promotional activities. Promotional activities can be delivered via a variety of media's: print media which includes newspaper and magazines, electronic media which includes radio and television, digital media which includes internet, social networking and social media sites and lastly, outdoor media which includes banner ads, billboards, etc.

Public Relations Plans
The number of formal public relations plans developed by the department during the reporting period. These address a general image issue or focus on public attitudes toward a specific issue. The plan will usually address the composition of materials to present to the public, the selection of appropriate media to use for presentation, and follow-up on the effectiveness of the plan.

Radio and Television Features
The number of promotional activities or shows aired on radio or television by the department during the reporting period. This would include all features and shows (e.g., infomercials, telethons, etc.) aired only on radio or television. The total number of different features or shows should be counted, not the number of times the feature or show ran.

This is a subset of Promotional Activities.

Social Media Encounters
Enter the total number of social media encounters during the reporting period. Encounters would include such things as number of website page hits, number of Facebook fans, number of Twitter followers and YouTube video views.

Special Events
The number of special events coordinated by the department during the reporting period. This would include events such as health screenings, health fairs, lectures, etc. with the purpose of promoting the organization. The organization must participate in the event and it may be one of several other facilities present. The length/duration of the event does not impact the total count. For example, presence at a two day event, a one day event, a one hour event, or a four hour event all count as one event.
This is a subset of Promotional Activities.

**Strategic and Supplement Plans**

The number of formal strategic and individual supplement plans developed by the department during the reporting period. This may include: market plans, public relations plans, organizational strategic plans and business development plans. For comprehensive plans (annual or otherwise) that contain several sub-plans, count each sub-plan as equivalent to one plan. For example, a market plan includes several sub-plans each addressing a different image campaign, count each sub-plan as one plan. If the plan development straddles reporting periods, count the plan in the reporting period that it is 50 percent completed. If you have reported a plan as being developed in a prior reporting period, do not include it in the current reporting period.

**Marketing, Communications, Strat Plan, Public/Comm Relations Functional Rollup Department Hour Elements**

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
Worked Hours: Overtime

Overtime is the total worked hours paid for overtime. Include hours worked on an overtime basis during orientation or for educational purposes. Exclude premium hours, non-worked hours, or callback hours for which an employee is reimbursed at a regular pay rate based on shift differential or scheduling needs. Also report overtime hours worked in the appropriate skill mix categories.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Marketing, Communications, Strat Plan, Public/Comm Relations Functional Rollup

Expense Elements

Advertising Expense

Total expense for advertising and marketing for the facility.

This is a subset of Other Direct Operating Expense.

Contract Service Expense

Total expense for services (e.g., graphic design, printing) provided by outside contractors.

This is a subset of Other Direct Operating Expense.

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.
Professional Fee Expense
Total expense for professional fees (e.g., consultants).
This is a subset of Other Direct Operating Expense.

Supply Expense
Total expense for department operating supplies.
This is a subset of Other Direct Operating Expense.

Marketing, Communications, Strat Plan, Public/Comm Relations Functional Rollup Mandatory Elements
The following data elements are mandatory for this department:

- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Worked Hours: Staff

G6100, Other Marketing, Communications, Strategic Planning and Public/Comm Relations
This generic department includes all cost centers belonging to Marketing, Communications, Public Relations, Community Relations, and Strategic Planning Services that cannot be mapped to individual marketing, public relations, communications and/or strategic planning departments.
Other Marketing, Communications, Strategic Planning and Public/Comm Relations Workload Volumes

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Adjusted Patient Days Supported

The total number of Adjusted Patient Days supported by this department. This reported value is intended for a department providing support to more than one entity within a health system. Add and report the number of Adjusted Patient Days for each entity.

Advertisements

The number of discrete advertisements created for all media by the department during the reporting period. This would include all advertisements placed in newspapers, magazines, and other media in digital and non-digital format. The total number of different advertisements composed should be counted, not the number of copies run, the number of newspapers it ran in, or other multiple counts. Do not include press releases in this count.

This is a subset of Promotional Activities.

Average Ad Placement Cost

Enter the average cost to place an advertisement in all media formats. Enter the value in dollars and cents (e.g. 50.00). This would include newspaper, radio, TV, web display, search engine marketing, Facebook ads, Promoted Twitter ads, YouTube ads, etc.

Business Development Plans

The number of formal business development plans prepared or developed by the department during the reporting period. These plans address development of new business activities, including mergers and acquisitions, and/or development of a new service (staging the addition of staff, identifying space requirements, physical relocation of existing services, and projecting patient utilization and revenues). If a plan development straddles reporting periods, count the plan in the reporting period that it is 50 percent completed. If you have reported a plan as being developed in a prior reporting period, do not include it in the current reporting period.

This is a subset of Strategic and Supplement Plans.
Covered Lives

Enter the number of covered lives during the reporting period. For ActionOI purposes, Covered Lives are consumers covered under the health system insurance plan.

Direct Marketing Contacts

The total number of telephone calls and mail/email contacts to potential or existing customers during the reporting period.

Internal Communications

The total number of communications created and delivered to internal 'customers' during the reporting period. Examples include but are not limited to: newsletters, emails, posters, and videos.

Market Studies

The number of formal market research studies prepared and conducted by the department during the reporting period. Studies typically include analyzing payer class, demographics, competing facility, facility strengths/weaknesses, and public attitude for the past, present, or future. The study may focus on current or projected market position.

Marketing Plans

The number of formal market plans developed by the department during the reporting period. For comprehensive plans (annual or otherwise) that contain several sub-plans, count each sub-plan as equivalent to one plan.

This is a subset of Strategic and Supplement Plans.

Organizational Strategic Plans

The number of formal organizational strategic plans developed by the department during the reporting period. Strategic plans address the strategy for existing business and organizational processes. For comprehensive plans (annual or otherwise) that contain several sub-plans, count each sub-plan as equivalent to one plan. If a plan development straddles reporting periods, count the plan in the reporting period that it is 50 percent completed. If you have reported a plan as being developed in a prior reporting period, do not include it in the current reporting period.

This is a subset of Strategic and Supplement Plans.

Other Promotional Activities

The number of other promotional activities coordinated, conducted or delivered by the department during the reporting period. Examples include sales calls and telemarketing campaigns. Do not include advertisements, radio and television features, special events or press releases in this count, as they should be reported in the elements above.
This is a subset of Promotional Activities.

**Payment Contract Proposals**

The total reimbursement contract proposals prepared. Reimbursement contract proposals prepared may take the form of Capitated, Case Based, Discounted Payment or Per Diem reimbursement and may be with HMOs or PPOs or other government agencies. The proposal may or may not have resulted in a contractual agreement. Do not count the number of times the proposal may have been reworked, just the final proposal.

*Note:* HMO and PPO proposals may use different reimbursement schemes. Be sure to count the proposal here and in the appropriate reimbursement method category (i.e., capitated, case based, discounted payment, per diem).

**Place-based Marketing Advertisements**

Total number of discrete place-based advertisements created by the department during the reporting period. Place-based advertising encompasses a wide variety of formats (digital and non-digital) that are specially located where particular groups congregate for a variety of purposes. This includes, but is not limited to, individual billboards, bus/taxi/railway signs, stadiums and arenas, shopping malls, etc.

This is a subset of Advertisements.

**Press Releases**

The total number of press releases created and deployed by the department during the reporting period. Press releases are a written or recorded communication directed at members of the news media for the purpose of announcing something newsworthy. Typically, they are sent to assignment editors at newspapers, magazines, radio stations, television stations, or television networks. Press releases can announce a range of news items, such as scheduled events, personal promotions, awards, new products and services, etc.

This is a subset of Promotional Activities.

**Promotional Activities**

The number of new promotional activities prepared, coordinated, and/or conducted by the department during the reporting period. Include discrete advertisements created for print media, advertisements or shows aired on radio or television, special events, and other promotional activities. Promotional activities can be delivered via a variety of media's: print media which includes newspaper and magazines, electronic media which includes radio and television, digital media which includes internet, social networking and social media sites and lastly, outdoor media which includes banner ads, billboards, etc.
Public Relations Plans

The number of formal public relations plans developed by the department during the reporting period. These address a general image issue or focus on public attitudes toward a specific issue. The plan will usually address the composition of materials to present to the public, the selection of appropriate media to use for presentation, and follow-up on the effectiveness of the plan.

Radio and Television Features

The number of promotional activities or shows aired on radio or television by the department during the reporting period. This would include all features and shows (e.g., infomercials, telethons, etc.) aired only on radio or television. The total number of different features or shows should be counted, not the number of times the feature or show ran.

This is a subset of Promotional Activities.

Social Media Encounters

Enter the total number of social media encounters during the reporting period. Encounters would include such things as number of website page hits, number of Facebook fans, number of Twitter followers and YouTube video views.

Special Events

The number of special events coordinated by the department during the reporting period. This would include events such as health screenings, health fairs, lectures, etc. with the purpose of promoting the organization. The organization must participate in the event and it may be one of several other facilities present. The length/duration of the event does not impact the total count. For example, presence at a two day event, a one day event, a one hour event, or a four hour event all count as one event.

This is a subset of Promotional Activities.

Strategic and Supplement Plans

The number of formal strategic and individual supplement plans developed by the department during the reporting period. This may include: market plans, public relations plans, organizational strategic plans and business development plans. For comprehensive plans (annual or otherwise) that contain several sub-plans, count each sub-plan as equivalent to one plan. For example, a market plan includes several sub-plans each addressing a different image campaign, count each sub-plan as one plan. If the plan development straddles reporting periods, count the plan in the reporting period that it is 50 percent completed. If you have reported a plan as being developed in a prior reporting period, do not include it in the current reporting period.
Other Marketing, Communications, Strategic Planning and Public/Comm Relations Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee’s normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.
Other Marketing, Communications, Strategic Planning and Public/Comm Relations Expense Elements

Contract Service Expense
Total expense for services (e.g., graphic design, printing) provided by outside contractors.

This is a subset of Other Direct Operating Expense.

Labor Expense
Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Other Direct Operating Expense
Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense
Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Professional Fee Expense
Total expense for professional fees (e.g., consultants).

This is a subset of Other Direct Operating Expense.

Supply Expense
Total expense for department operating supplies.

This is a subset of Other Direct Operating Expense.
Other Marketing, Communications, Strategic Planning and Public/Comm Relations Mandatory Elements

The following data elements are mandatory for this department:

- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Worked Hours: Staff

Other Marketing, Communications, Strategic Planning and Public/Comm Relations Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Brand development and management
- Business development
- Community relations, e.g., collaborates with community leaders for the community health needs assessment, plans community health events, gathers and reports benefits to the community
- External Website content management
- Internal communications
- Internal Website content management
- Marketing, e.g., promoting and advertising of Physician Practice services
- Patient Relations
- Physician liaison (staff acting as a point of contact between Physician / Providers and Hospital Administration)
- Physician referral call center
- Public Relations
• Strategic Planning and Facilitation, e.g., business development, portfolio management, strategic partnerships and alliances, strategic performance, development of overall organizational strategies, researching industry trends and forecasts

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Conferences and/or Educational events (clinical or leadership)
• Costs for promotional materials for Educational Services Series department sponsored events
• Costs for subscriptions and license fees to databases
• Fund raising activities
• Patient Satisfaction, including the survey process and analysis of the results
• Sales and marketing activities for a Laboratory Outreach program
Chapter 25. Medical Staff Services

This chapter includes the following sections:

- 06510, Medical Staff Services 1197
- G6500, Other Medical Staff Office Services 1203

06510, Medical Staff Services

This department supports the medical staff organization and its functions by providing credentialing and appointment coordination; meeting coordination and minutes preparation; file, roster and bylaw maintenance; and Joint Commission compliance review.

Medical Staff Services Workload Volumes

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Other Physicians on Active Medical Staff

The total number of active physicians on the medical staff and supported by the department for Medical Staff Office functions who have admitted less than 20 patients during the last year. Count only those active physicians whose credentialing and recredentialing are handled by this department. In some instances, these professionals may not be employed by the hospital. Exclude associate, consulting, inactive, or emeritus status. Examples of Other Active Physicians may include Radiologists, Pathologists, and Hospitalists.

This is a subset of Medical Staff Members.
Allied Health Professionals

The total number of allied health professions on the medical staff and supported by the department. Count only Allied Health professionals (e.g., nurse practitioners, occupational therapists, physical therapists, radiographers, respiratory therapists, CRNAs) whose credentialing and re-credentialing are handled by this department.

This is a subset of Medical Staff Members.

Courtesy Physician Staff

The total number of physicians that do not qualify as active physicians on the medical staff. Count these physicians only if they are supported by the department, such as re-credentialing and meetings. Include associate, consulting, in-active and Emeritus status. Count only courtesy physicians whose credentialing and re-credentialing are handled by this department. This category represents physicians who make fewer than 20 inpatient admissions a year. Include Associate, Consulting, In-Active and Emeritus status.

This is a subset of Medical Staff Members.

Facilities Supported by Department

Total discrete physical facilities (e.g., hospitals, home health agencies, physician practice offices, rehab facilities) supported by the department. For a facility to qualify, the department should perform at least 80% of the relevant workload required by the facility.

Medical Staff Applications Processed

The total applications for medical staff appointment, reappointment, credentialing and/or privileging processed during the reporting period. The value entered should include only application packages received and processed in their entirety (i.e. received, primary verification complete, coordination and review by medical staff office, reviewed by medical staff executive committee and/or credentials committee, and Governing Body granted/denied membership and/or privileges).

If the department supports multiple entities and processes applications for multiple facilities, count the application processed once. For example: Your department processed an application for a physician who has privileges at 5 facilities, only count 1 application processed, not 5.

Medical Staff Meetings Attended

The total medical staff and medical staff committee meetings attended for the purpose of scribing minutes. This refers to meetings that the department staff provide some degree of support to. If actual counts are not maintained and meeting schedules stay relatively stable throughout the reporting period you may take a representative month and multiply by the number of months in the reporting period.
Medical Staff Members

The total number of individual physicians (including active and courtesy medical staff members) and Allied Health professionals supported by the department for Medical Staff Office functions. Count only medical staff members whose credentialing is handled by this department. The count of medical staff members is made up of three components:

- Active Physicians
- Courtesy Physician Staff
- Allied Health Professionals

For ActionOI purposes, active physicians are defined as physicians who have admitted at least 20 patients during the last year. Courtesy physicians are defined as physicians who, although they have not met the 20 admissions criteria, still go through the appointment application process. Be sure to count new physicians on provisional status. Count all allied health professionals whose credentialing is handled by this department. In some instances, these professionals may not be employed by the hospital. For example, a Nurse Practitioner may be employed in private practice but still take histories, etc. in the inpatient setting.

New Appointment Applications Processed

The total applications for initial medical staff appointment processed during the reporting period.

This is a subset of Medical Staff Applications Processed.

Other Physicians on Active Medical Staff

The total number of active physicians on the medical staff and supported by the department for Medical Staff Office functions who have admitted less than 20 patients during the last year. Count only those active physicians whose credentialing and recredentialing are handled by this department. In some instances, these professionals may not be employed by the hospital. Exclude associate, consulting, inactive, or emeritus status. Examples of Other Active Physicians may include Radiologists, Pathologists, and Hospitalists.

This is a subset of Medical Staff Members.
Physicians On Active Medical Staff

The total number of active physicians on the medical staff and supported by the department for Medical Staff Office functions. To qualify as active, physicians must have admitted at least 20 inpatients during the last year. Count only those active physicians whose credentialing and recredentialing are handled by this department. "Active" refers to at least 20 inpatient admissions a year. In some instances, these professionals may not be employed by the hospital. Exclude Associate, Consulting, In-active, or Emeritus status.

This is a subset of Medical Staff Members.

Medical Staff Services Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Administrator

The total hours paid for physicians providing administrative services.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
Worked Hours: Overtime

Overtime is the total worked hours paid for overtime. Include hours worked on an overtime basis during orientation or for educational purposes. Exclude premium hours, non-worked hours, or callback hours for which an employee is reimbursed at a regular pay rate based on shift differential or scheduling needs.

This is a subset of Worked Hours: Staff.

Worked Hours: Physician Administrator

Total hours worked by physicians providing administrative services.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Medical Staff Services Expense Elements

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Physician Administrative Payroll Expense

Total hours expense for physicians providing administrative services.

This is a subset of Labor Expense.
Physician Professional Expense

Total expense for physicians or physician groups on contract with the facility to provide administrative services.

This is a subset of Other Direct Operating Expense.

Residency Program Expense

Total expenses related to Residency Program (e.g., drug costs, travel and meal reimbursement). Exclude residents’ payroll expenses.

This is a subset of Other Direct Operating Expense.

Supply Expense

Total expense for department operating supplies.

This is a subset of Other Direct Operating Expense.

Medical Staff Services Mandatory Elements

The following data elements are mandatory for this department:

- Labor Expense
- Medical Staff Members
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Physicians On Active Medical Staff
- Worked Hours: Staff

Medical Staff Services Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Medical care evaluation via peer review, e.g., evaluation of an individual practitioner’s professional performance and includes the identification of opportunities to improve care
• Medical staff office, Medical Affairs, CME, and associated secretarial staff

• Physician Accreditation, e.g., activities involved in the verification of physician qualifications, granting of specific clinical privileges based on evaluation of competence

**G6500, Other Medical Staff Office Services**

If you have a cost center in this series that does not appropriately map to any of the individual departments, map to this department.

**Other Medical Staff Office Services Workload Volumes**

**Medical Staff Members**

The total number of individual physicians (including active and courtesy medical staff members) and Allied Health professionals supported by the department for Medical Staff Office functions. Count only medical staff members whose credentialing is handled by this department. The count of medical staff members is made up of three components:

- Active Physicians
- Courtesy Physician Staff
- Allied Health Professionals

For ActionOI purposes, active physicians are defined as physicians who have admitted at least 20 patients during the last year. Courtesy physicians are defined as physicians who, although they have not met the 20 admissions criteria, still go through the appointment application process. Be sure to count new physicians on provisional status. Count all allied health professionals whose credentialing is handled by this department. In some instances, these professionals may not be employed by the hospital. For example, a Nurse Practitioner may be employed in private practice but still take histories, etc. in the inpatient setting.

**Other Physicians on Active Medical Staff**

The total number of active physicians on the medical staff and supported by the department for Medical Staff Office functions who have admitted less than 20 patients during the last year. Count only those active physicians whose credentialing and re-credentialing are handled by this department. In some instances, these professionals may not be employed by the hospital. Exclude associate, consulting, inactive, or emeritus status. Examples of Other Active Physicians may include Radiologists, Pathologists, and Hospitalists.
Physicians On Active Medical Staff

The total number of active physicians on the medical staff and supported by the department for Medical Staff Office functions. To qualify as active, physicians must have admitted at least 20 inpatients during the last year. Count only those active physicians whose credentialing and recredentialing are handled by this department. "Active" refers to at least 20 inpatient admissions a year. In some instances, these professionals may not be employed by the hospital. Exclude Associate, Consulting, In-active, or Emeritus status.

Other Medical Staff Office Services Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.
Worked Hours: Physician Administrator

Total hours worked by physicians providing administrative services.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Other Medical Staff Office Services Expense Elements

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Other Medical Staff Office Services Mandatory Elements

The following data elements are mandatory for this department:

- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Worked Hours: Staff
Other Medical Staff Office Services Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Medical care evaluation via peer review, e.g., evaluation of an individual practitioner’s professional performance and includes the identification of opportunities to improve care

- Medical staff office, Medical Affairs, CME, and associated secretarial staff

- Physician Accreditation, e.g., activities involved in the verification of physician qualifications, granting of specific clinical privileges based on evaluation of competence
Chapter 26. Neurodiagnostic Services

This chapter includes the following sections:

- 04310, Neurodiagnostic Laboratory (EEG) 1207
- 04320, Sleep Diagnostic Center 1212
- G4300, Other EEG Services 1219
- Neurodiagnostic Services Worksheet 1223

04310, Neurodiagnostic Laboratory (EEG)

This department provides neurological evaluation and diagnosis to patients with known or suspected neurological trauma or dysfunction (i.e., disorders of the nervous system, which include diseases of the central and peripheral nervous system and muscles).

Neurodiagnostic Laboratory (EEG) Mapping Guidelines

If your cost center's patient population is less than 80% electroencephalography (EEG), electromyography (EMG), or nerve conduction velocity (NCV) and other related procedures, this department may not be an appropriate choice. Another option might be the 04220, Combined Noninvasive Cardiology and Vascular Services department or the G4300, Other EEG Services department.

Neurodiagnostic Laboratory (EEG) Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

EEG Procedures

The total number of EEG procedures provided for patients in the inpatient, outpatient, and emergency departments. Do not include when these procedures are done in operating room.
This is a subset of Total Procedures.

**Inpatient Procedures**

Count all procedures performed on inpatients by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, as well as Procedure Counting here in the DRM for more information.

This is a subset of Procedures.

**Night Procedures**

Total sleep studies performed during the patient's normal night sleep cycle.

This is a subset of Total Procedures.

**Sleep Study Procedures**

The total sleep and brain mapping studies performed.

This is a subset of Total Procedures.

**Total Patients**

Total number of inpatients and outpatients receiving services from the department.

**Total Procedures**

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

**Neurodiagnostic Laboratory (EEG) Department Hours Elements**

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.
Paid Hours: Physician Provider

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physician providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Neurodiagnostic Technical Staff

Total hours worked by Technical staff. This includes Registered EEG Technologist, Registered Evoked Potential Technologist, Registered Electro Neurodiagnostic Technologist, etc.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee’s normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.
Worked Hours: Physician Provider

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Worked Hours: Staff.

Worked Hours: RN

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Neurodiagnostic Laboratory (EEG) Expense Elements

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.
Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Operating Lease Expense

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense

Total contract expense for physicians, advanced practitioners and physician groups which provide professional services to the department. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Neurodiagnostic Laboratory (EEG) Mandatory Elements

The following data elements are mandatory for this department:

- APC Relative Weight
- Inpatient Procedures
- Labor Expense
• Labor Expense: Physician Provider
• Other Direct Operating Expense
• Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Physician Provider Professional Fee Expense
• Total Procedures
• Worked Hours: Physician Provider
• Worked Hours: Staff

Neurodiagnostic Laboratory (EEG) Normalizations

Exclude the hours costs and volumes (where applicable) associated with the

• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
• Patient Scheduling includes management of inbound and outbound calls, faxes, and or electronic communications to ensure an appointment is generated for the patient-related activity
• Repair and Maintenance of Clinical Equipment/Rooms

04320, Sleep Diagnostic Center

This department provides diagnosis and treatment of sleep apnea and other sleep-related disorders such as narcolepsy, insomnia etc. The sleep lab department includes pre-procedure activity (holding area), performance of the procedure, and post-procedure recovery. Report sleep apnea procedures and pulmonary function, electroencephalography, electrocardiography and plethysmography procedures if they are performed in the sleep lab cost center.
Sleep Diagnostic Center Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Beds

The total discrete patient spaces designed and equipped for sleep studies. Such spaces may accommodate routine neurodiagnostic procedures as well as sleep studies.

Follow-Up Visits

Total subsequent visits by patients for follow-up or reevaluation of initial diagnosis.

This is a subset of Patient Visits.

In Lab Inpatient Procedures

The total inpatient procedures performed in the sleep diagnostic center laboratory area.

This is a subset of Inpatient Procedures.

In Lab Outpatient Procedures

The total outpatient procedures performed in the sleep diagnostic center laboratory area.

This is a subset of Outpatient Procedures.

Inpatient Procedures

Count all procedures performed on inpatients by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, as well as Procedure Counting here in the DRM for more information.

This is a subset of Procedures.
Out of Lab Inpatient Procedures
The total inpatient procedures performed with portable equipment outside of the sleep diagnostic center laboratory area.
This is a subset of Inpatient Procedures.

Out of Lab Outpatient Procedures
The total outpatient procedures performed with portable equipment outside of the sleep diagnostic center.
This is a subset of Outpatient Procedures.

Outpatient Procedures
The total procedures performed in support of outpatients. This refers to procedures performed in an ambulatory care setting and/or considered an outpatient service.
This is a subset of Total Procedures.

Patient Initial Visits
The total number of initial visits that are supported by the department. Initial visits are visits by patients who have never been seen by the department, who have not been seen in the past three years, or a returning patient being treated for a new diagnosis/new site.
This is a subset of Patient Visits.

Patient Visits
Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. If the patient is seen by multiple providers (e.g., physician, dietitian, social worker) during the same visit the count should be recorded as one visit.

Total Procedures
Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.
Sleep Diagnostic Center Department Hours Elements

Paid Hours: Contract Labor
Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider
Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff
Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management
Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Neurodiagnostic Technical Staff
Total hours worked by Technical staff. This includes certified Polysomnographic Technologist, etc.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff
Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
**Worked Hours: Overtime**

Represents the sum of non-physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Worked Hours: Staff.

**Worked Hours: Polysomnographer**

Total hours worked by board certified/eligible polysomnographers.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Sleep Diagnostic Center Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.
**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

**Operating Lease Expense**

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.
**Physician Provider Professional Fee Expense**

Total contract expense for physicians, advanced practitioners and physician groups which provide professional services to the department. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Sleep Diagnostic Center Mandatory Elements**

The following data elements are mandatory for this department:

- APC Relative Weight
- Inpatient Procedures
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Total Procedures
- Worked Hours: Physician Provider
- Worked Hours: Staff

**Sleep Diagnostic Center Normalizations**

Include the hours, costs and volumes (where applicable) associated with the

- Procedure assessment, patient preparation and post-procedure recovery for Sleep disorder studies and related procedures
- Sleep studies
Exclude the hours and costs associated with the following function:

- Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
- Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
- Patient Scheduling includes management of inbound and outbound calls, faxes, and or electronic communications to ensure an appointment is generated for the patient-related activity
- Repair and Maintenance of Clinical Equipment/Rooms

**G4300, Other EEG Services**

This generic department includes all cost centers belonging to Neurodiagnostic Services that cannot be mapped to individual Neurodiagnostic Services departments.

**Other EEG Services Department Hours Elements**

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Paid Hours: Physician Provider**

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.
**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Neurodiagnostic Technical Staff**

Total hours worked by Technical staff. This includes Registered EEG Technologist, Registered Evoked Potential Technologist, Registered Electro Neurodiagnostic Technologist, certified Polysomnographic technologist, etc.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Worked Hours: Staff.
**Worked Hours: Polysomnographer**

Total hours worked by registered Polysomnographers.

This is a subset of Worked Hours: Staff.

**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Other EEG Services Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.
Operating Lease Expense

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense

Total contract expense for physicians, advanced practitioners and physician groups which provide professional services to the department. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Other EEG Services Mandatory Elements

The following data elements are mandatory for this department:

- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
• Physician Provider Professional Fee Expense

• Worked Hours: Physician Provider

• Worked Hours: Staff

**Other EEG Services Normalizations**

Exclude the hours costs and volumes (where applicable) associated with the

• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Patient Scheduling includes management of inbound and outbound calls, faxes, and or electronic communications to ensure an appointment is generated for the patient-related activity

• Repair and Maintenance of Clinical Equipment/Rooms

**Neurodiagnostic Services Worksheet**

The worksheets are Microsoft Excel spreadsheets. The worksheets contain all necessary computational formulas. For more information about worksheets, refer to Using Worksheets. The worksheets can be found on the Support tab of ActionOI. Use the following for help with this series.

• APC and Work RVU Worksheet
Chapter 27. Nursing Services

For an annotated list of Characteristic Questions for this series, please see the ActionOI support page.

This chapter includes the following sections:

- 01010, Medical/Surgical Intensive Care Unit 1227
- 01011, Medical Intensive Care Unit 1233
- 01012, Surgical Intensive Care Unit 1238
- 01013, Med/Surg/Cardiac Intensive Care Unit 1244
- 01014, Medical/Cardiac Intensive Care Unit 1250
- 01016, Trauma Intensive Care Unit 1256
- 01020, Bone Marrow Transplant Intensive Care Unit 1262
- 01021, Burn Care Intensive Care Unit 1267
- 01022, Cardiac Intensive Care Unit 1273
- 01023, Cardiovascular Surgical Intensive Care Unit 1279
- 01024, Cardio/Thoracic Intensive Care Unit w/o Transplant 1284
- 01025, Cardio/Thoracic Intensive Care Unit with Transplant 1290
- 01035, Neurology / Neurosurgical Intensive Care Unit 1296
- 01060, Pediatric Intensive Care Unit 1302
- 01110, Medical/Surgical Intermediate Care Unit 1307
- 01111, Med/Surg/Cardiac Intermediate Care Unit 1313
- 01112, Respiratory Intermediate Care Unit 1318
- 01122, Cardiac Intermediate Care Unit 1323
- 01123, Transplant Intermediate Care Unit 1328
- 01160, Pediatric Intermediate Care Unit 1334
• 01210, Medical/Surgical Acute Care Unit 1339
• 01211, General Medical Acute Care Unit 1344
• 01212, General Surgical Acute Care Unit 1349
• 01213, Med/Surg/Cardiac Acute Care Unit 1354
• 01214, Med/Surg/Oncology Acute Care Unit 1359
• 01234, Renal/Nephrology Acute Care Unit 1364
• 01235, Neurology/Neurosurgical Acute Care Unit 1369
• 01238, Oncology Inpatient Unit 1375
• 01239, Orthopedic/Neurology Acute Care Unit 1380
• 01240, Orthopedic Acute Care Unit 1385
• 01260, Pediatric Acute Care Unit 1390
• 01261, Pediatric Oncology Acute Care Unit 1395
• 01270, Labor/Delivery/Recovery/Postpartum/Nursery 1400
• 01271, Labor/Delivery/Recovery/Postpartum Unit 1410
• 01272, Mother/Baby Unit 1417
• 01273, Obstetrics/Gynecology Unit 1425
• 01274, Obstetrics Unit 1431
• 01275, Gynecology Unit 1436
• 01276, High Risk Obstetrical Unit 1442
• 01277, Neonatal Intensive Care Unit (NICU) 1447
• 01278, Neonatal Intermediate Unit 1454
• 01280, Newborn Nursery 1462
• 01285, Labor/Delivery with Recovery 1469
• 01350, Peds/Adolescent Behavioral Health Unit 1477
- 01360, Chemical Dependency Unit 1482
- 01390, Behavioral Health Unit 1487
- 01410, Acute Rehabilitation Unit 1492
- 01530, Skilled Nursing Unit 1498
- 01535, Subacute Nursing Unit 1503
- 01550, Long Term Care Unit 1509
- 01570, Hospice / Palliative Care Unit 1516
- 01620, Medical/Surgical Unit With Swing Beds 1521
- 01630, Blended Acuity Unit 1527
- 01710, Observation Unit 1534
- 01810, IV Team (Vascular Access) 1538
- 01830, Centralized Telemetry 1542
- 01910, Nursing Administration 1546
- 01911, Nurse Staffing Office 1551
- F1000, Nursing Services Functional Rollup 1555
- G1000, Generic Nursing Services 1563
- G1001, Generic Intensive Care Unit 1569
- G1101, Generic Intermediate Care Unit 1575
- G1201, Generic Acute Care Unit 1581
- G1301, Generic Behavioral Health Unit 1586
- G1401, Generic Rehabilitation Unit 1591
- G1501, Generic Non Acute Care Unit 1597
- I1000, Intensive Care Units Intermediate Rollup 1603
- I1100, Intermediate Care Units Intermediate Rollup 1609
01010, Medical/ Surgical Intensive Care Unit

This unit provides intensive, comprehensive care and monitoring for both medical and post-surgical patients having experienced shock, trauma, or other life-threatening conditions. This unit supports a mix of medical and surgical intensive patients.

Medical/Surgical ICU Inpatient Unit Mapping Guidelines

If your cost center's patient population is greater than 65% medical only or greater than 65% surgical only, this department may not be an appropriate choice. Other options include the 01011, Medical Intensive Care Unit department or 01012, Surgical Intensive Care Unit department.

Medical/Surgical ICU Inpatient Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.
Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.
Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.
Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.
Total Number of Stepdown Beds

The total number of stepdown beds located in the ICU. These beds are designated to provide care for patients who are stable enough to be discharged from the ICU but are not yet ready to be cared for on a general unit.

This is a subset of Bed Capacity

Total Reported Pressure Ulcers

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Ventilator Patient Days

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Patient Days.
Medical/ Surgical Intensive Care Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Total Number of Stepdown Beds
- Worked Hours: Physician Provider
- Worked Hours: Staff

Medical/Surgical Intensive Care Unit Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators who perform unit/department specific training
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:
• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Case Management (manages patient care while the patient is undergoing treatment)

01011, Medical Intensive Care Unit

This unit provides intensive, comprehensive care and monitoring for medical, non-surgical, patients having experienced shock, trauma, or other life-threatening conditions.

Medical Intensive Care Unit Mapping Guidelines

If your cost center's patient population is less than 65% medical, this department may not be an appropriate choice. Another option would be the 01010, Medical/Surgical Intensive Care Unit department.

Medical Intensive Care Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).
This is a subset of Patient Discharges and Transfers Out.

**Education and Orientation Hours**

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

**Full Day Patients**

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

**Licensed Nursing Staff**

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

**Licensed Nursing Staff Additions**

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

**Licensed Nursing Staff Separations**

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

**Minimum Staffing Level**

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.
Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.
**Patient Falls with Injury**

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

**Patient Specialty %**

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.

**Pressure Ulcers: Community acquired**

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

**Pressure Ulcers: Hospital acquired**

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

**Total Activity Volume**

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

**Total Number of Stepdown Beds**

The total number of stepdown beds located in the ICU. These beds are designated to provide care for patients who are stable enough to be discharged from the ICU but are not yet ready to be cared for on a general unit.

This is a subset of Bed Capacity

**Total Reported Pressure Ulcers**

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.
Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra-unit transfers such as from a semi-private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Ventilator Patient Days

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Patient Days.

Medical Intensive Care Unit Mandatory Elements

The following data elements are mandatory for this department.

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Patient Days
• Physician Provider Professional Fee Expense
• Total Number of Stepdown Beds
• Worked Hours: Physician Provider
• Worked Hours: Staff

Medical Intensive Care Unit Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
• Clinical/nursing staff acting as educators who perform unit/department specific training
• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
• Case Management (manages patient care while the patient is undergoing treatment)

01012, Surgical Intensive Care Unit

This unit provides intensive, comprehensive care and monitoring for patients with serious illness before and/or after surgery.
Surgical Intensive Care Unit Mapping Guidelines

If your cost center's patient population is less than 65% surgical, this department may not be an appropriate choice. Another option would be the 01010, Medical/Surgical Intensive Care Unit department.

Surgical Intensive Care Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.
Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.
Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.
Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Number of Stepdown Beds

The total number of stepdown beds located in the ICU. These beds are designated to provide care for patients who are stable enough to be discharged from the ICU but are not yet ready to be cared for on a general unit.

This is a subset of Bed Capacity

Total Reported Pressure Ulcers

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element “Admissions”. Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.
Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Ventilator Patient Days

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Patient Days.

Surgical Intensive Care Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Total Number of Stepdown Beds
• Worked Hours: Physician Provider

• Worked Hours: Staff

**Surgical Intensive Care Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care

• Clinical/nursing staff acting as educators who perform unit/department specific training

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Case Management (manages patient care while the patient is undergoing treatment)

**01013, Med/Surg/Cardiac Intensive Care Unit**

This unit provides intensive, comprehensive care and monitoring for medical, surgical, and cardiac patients having experienced shock, trauma, or other life-threatening conditions. This unit supports a mix of medical, surgical, and cardiac intensive patients.

**Med/Surg/Cardiac Intensive Care Unit Mapping Guidelines**

If your cost center's patient population is greater than 65% cardiac only or greater than 65% medical only, or more than 65% surgical only, this department may not be an appropriate choice. Other options include the 01010, Medical/Surgical Intensive Care Unit department; 01011, Medical Intensive Care Unit department; 01012, Surgical Intensive Care Unit department; or 01014, Medical/Cardiac Intensive Care Unit department.
**Med/Surg/Cardiac Intensive Care Unit Workload Volumes**

**Admissions**

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Bed Capacity**

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

**Discharges**

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

**Education and Orientation Hours**

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

**Full Day Patients**

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.
Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.
**Outpatient Observation Visits**

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

**Patient Days**

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

**Patient Discharges And Transfers Out**

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

**Patient Falls**

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

**Patient Falls with Injury**

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

**Patient Specialty %**

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.

**Pressure Ulcers: Community acquired**

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

**Pressure Ulcers: Hospital acquired**

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.
This is a subset of Total Reported Pressure Ulcers.

**Total Activity Volume**

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

**Total Number of Stepdown Beds**

The total number of stepdown beds located in the ICU. These beds are designated to provide care for patients who are stable enough to be discharged from the ICU but are not yet ready to be cared for on a general unit.

This is a subset of Bed Capacity

**Total Reported Pressure Ulcers**

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

**Transfers In**

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Transfers Out**

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.
Ventilator Patient Days

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Patient Days.

Med/Surg/Cardiac Care Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Total Number of Stepdown Beds
- Worked Hours: Physician Provider
- Worked Hours: Staff

Med/Surg/Cardiac Intensive Care Unit Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:
• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care

• Clinical/nursing staff acting as educators who perform unit/department specific training

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

01014, Medical/Cardiac Intensive Care Unit

This unit provides intensive, comprehensive care and monitoring for both medical (non-surgical) and cardiac patients with serious heart problems that do not require heart surgery. This unit supports a mix of medical and cardiac intensive patients.

Medical/Cardiac Intensive Care Unit Mapping Guidelines

If your cost center's patient population is greater than 65% medical only or 65% cardiac only, this department may not be an appropriate choice. Other options include the 01022, Cardiac Intensive Care Unit department or the 01011, Medical Intensive Care Unit department.

Medical/Cardiac/Intensive Care Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.
Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.
Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.
Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.
Total Number of Stepdown Beds

The total number of stepdown beds located in the ICU. These beds are designated to provide care for patients who are stable enough to be discharged from the ICU but are not yet ready to be cared for on a general unit.

This is a subset of Bed Capacity

Total Reported Pressure Ulcers

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Ventilator Patient Days

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Patient Days.
Medical/Cardiac Intensive Care Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Total Number of Stepdown Beds
- Worked Hours: Physician Provider
- Worked Hours: Staff

Medical/Cardiac Intensive Care Unit Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators who perform unit/department specific training
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:
• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Case Management (manages patient care while the patient is undergoing treatment)

01016, Trauma Intensive Care Unit

This unit provides intensive, comprehensive care and monitoring for trauma patients who have experienced shock or other life-threatening conditions. Trauma Intensive Care Units specialize in the care of patients who require a high level of monitoring and/or intervention following trauma, or during critical illness related to trauma.

Trauma Intensive Care Unit Mapping Guidelines

If your cost center's patient population is less than 65% trauma, this department may not be an appropriate choice. Another option would be the 01010, Medical/Surgical Intensive Care Unit department.

Trauma Intensive Care Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.
Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.
Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume.
Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Number of Stepdown Beds

The total number of stepdown beds located in the ICU. These beds are designated to provide care for patients who are stable enough to be discharged from the ICU but are not yet ready to be cared for on a general unit.

This is a subset of Bed Capacity
**Total Reported Pressure Ulcers**

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

**Transfers In**

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Transfers Out**

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

**Ventilator Patient Days**

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Patient Days.

**Trauma Intensive Care Unit Mandatory Elements**

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Total Number of Stepdown Beds
- Worked Hours: Physician Provider
- Worked Hours: Staff

**Trauma Intensive Care Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators who perform unit/department specific training
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
- Case Management (manages patient care while the patient is undergoing treatment)
- Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
01020, Bone Marrow Transplant Intensive Care Unit

This unit provides intensive, comprehensive care and monitoring for the treatment of patients who undergo bone marrow (stem cell) transplant for the treatment of various disorders.

Bone Marrow Transplant Intensive Care Unit Mapping Guidelines

If your cost center's patient population is less than 65% bone marrow transplant, this department may not be an appropriate choice. Another option would be the 01010, Medical/Surgical Intensive Care Unit department.

Bone Marrow Transplant Intensive Care Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.
Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.
Nursing Services

Nurse Direct Care Hours Worked
The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN
Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days
Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits
Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days
The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out
Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume.

Patient Falls
The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.
**Patient Falls with Injury**

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

**Patient Specialty %**

Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.

**Pressure Ulcers: Community acquired**

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

**Pressure Ulcers: Hospital acquired**

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

**Total Activity Volume**

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

**Total Number of Stepdown Beds**

The total number of stepdown beds located in the ICU. These beds are designated to provide care for patients who are stable enough to be discharged from the ICU but are not yet ready to be cared for on a general unit.

This is a subset of Bed Capacity

**Total Reported Pressure Ulcers**

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.
Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Ventilator Patient Days

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Patient Days.

Bone Marrow Transplant Intensive Care Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Patient Days
• Physician Provider Professional Fee Expense
• Total Number of Stepdown Beds
• Worked Hours: Physician Provider
• Worked Hours: Staff

**Bone Marrow Transplant Intensive Care Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
• Clinical/nursing staff acting as educators who perform unit/department specific training
• Patient Sitters who physically ‘sit’ in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
• Case Management (manages patient care while the patient is undergoing treatment)

**01021, Burn Care Intensive Care Unit**

This unit provides intensive, comprehensive care and observation for patients with thermal, electrical and chemical burns, cold injury, and skin diseases, or infection. Care provided for these patients involves a more intensive treatment than general acute care.

**Burn Care Intensive Care Unit Mapping Guidelines**
Given the highly specialized focus for this type of unit, there is no minimum % threshold to meet. However, the Patient Specialty % is mandatory and it must be reported.

**Burn Care Intensive Care Unit Workload Volumes**

**Admissions**

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Bed Capacity**

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

**Discharges**

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

**Education and Orientation Hours**

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

**Full Day Patients**

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.
This is a subset of Total Activity Volume.

**Intensive Care Patient Days**

Total patient days represented by patients with 3rd degree burn, monitored, and/or ventilator dependent.

This is a subset of Patient Days.

**Licensed Nursing Staff**

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

**Licensed Nursing Staff Additions**

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

**Licensed Nursing Staff Separations**

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

**Minimum Staffing Level**

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

**Nurse Direct Care Hours Worked**

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.
Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.
Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Number of Stepdown Beds

The total number of stepdown beds located in the ICU. These beds are designated to provide care for patients who are stable enough to be discharged from the ICU but are not yet ready to be cared for on a general unit.

This is a subset of Bed Capacity

Total Reported Pressure Ulcers

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.
Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Ventilator Patient Days

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be $500 \div 6 = 83.3$ Vent Days. If the department billed in 8 hour increments, the conversion would be $500 \div 3 = 166.6$ Vent Days, if the department billed in 12 hour increments, the conversion would be $500 \div 2 = 250$ etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Patient Days.

Burn Care Intensive Care Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Patient Specialty %
- Physician Provider Professional Fee Expense
• Total Number of Stepdown Beds

• Worked Hours: Physician Provider

• Worked Hours: Staff

**Burn Care Intensive Care Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care

• Clinical/nursing staff acting as educators who perform unit/department specific training

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Case Management (manages patient care while the patient is undergoing treatment)

**01022, Cardiac Intensive Care Unit**

This unit provides intensive, comprehensive care and monitoring for patients with heart-related, life-threatening conditions, including heart seizure or open heart surgery.

**Cardiac Intensive Care Unit Mapping Guidelines**

If your cost center's patient population is less than 65% cardiac patients requiring specialized cardiac intensive care, this department may not be an appropriate choice. Other options include the 01010, Medical/Surgical Intensive Care Unit department or the 01013, Med/Surg/Cardiac Intensive Care Unit department.

**Cardiac Intensive Care Unit Workload Volumes**
Admissions
The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity
Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges
Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours
Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients
Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff
Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.
**Licensed Nursing Staff Additions**

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

**Licensed Nursing Staff Separations**

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

**Minimum Staffing Level**

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

**Nurse Direct Care Hours Worked**

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

**Number of Patients assigned to an RN**

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

**Outpatient Observation Days**

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

**Outpatient Observation Visits**

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.
This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.
**Total Activity Volume**

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

**Total Number of Stepdown Beds**

The total number of stepdown beds located in the ICU. These beds are designated to provide care for patients who are stable enough to be discharged from the ICU but are not yet ready to be cared for on a general unit.

This is a subset of Bed Capacity.

**Total Reported Pressure Ulcers**

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

**Transfers In**

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Transfers Out**

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

**Ventilator Patient Days**

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.
This is a subset of Patient Days.

**Cardiac Intensive Care Unit Mandatory Elements**

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Total Number of Stepdown Beds
- Worked Hours: Physician Provider
- Worked Hours: Staff

**Cardiac Intensive Care Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators who perform unit/department specific training
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:
• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Case Management (manages patient care while the patient is undergoing treatment)

01023, Cardiovascular Surgical Intensive Care Unit

This unit provides intensive, comprehensive care and monitoring for post-surgical cardiac patients.

Cardiovascular Surgical Intensive Care Unit Mapping Guidelines

If your cost center's patient population is less than 65% cardiovascular surgical, this department may not be an appropriate choice. Another option would be the 01014, Medical/Cardiac Intensive Care Unit department.

Cardiovascular Surgical Intensive Care Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).
This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours
Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients
Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff
Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions
The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations
Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level
Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.
Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.
Patient Falls with Injury
Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Patient Specialty %
Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.

Pressure Ulcers: Community acquired
Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired
Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Total Activity Volume
The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Number of Stepdown Beds
The total number of stepdown beds located in the ICU. These beds are designated to provide care for patients who are stable enough to be discharged from the ICU but are not yet ready to be cared for on a general unit.

This is a subset of Bed Capacity

Total Reported Pressure Ulcers
Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.
Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Ventilator Patient Days

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Patient Days.

Cardiovascular Surgical Intensive Care Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Patient Days
• Physician Provider Professional Fee Expense
• Total Number of Stepdown Beds
• Worked Hours: Physician Provider
• Worked Hours: Staff

**Cardiovascular Surgical Intensive Care Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care

• Clinical/nursing staff acting as educators who perform unit/department specific training

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Case Management (manages patient care while the patient is undergoing treatment)

**01024, Cardio/Thoracic Intensive Care Unit w/o Transplant**

This unit provides intensive, comprehensive care and monitoring for patients following cardiac and/or thoracic surgery. This unit supports a mix of both cardiac and thoracic intensive care patients, however patients in this unit are not part of a thoracic organ transplant program.
Cardio/Thoracic Intensive Care Unit w/o Transplant Mapping Guidelines

If your cost center's patient population is less than 65% cardiovascular/thoracic and any patients are transplant patients, this department may not be an appropriate choice. Another option would be the 01025, Cardio/Thoracic Intensive Care Unit with Transplant Unit department.

Cardio/Thoracic Intensive Care Unit w/o Transplant Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.
Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.
Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.
Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Number of Stepdown Beds

The total number of stepdown beds located in the ICU. These beds are designated to provide care for patients who are stable enough to be discharged from the ICU but are not yet ready to be cared for on a general unit.

This is a subset of Bed Capacity

Total Reported Pressure Ulcers

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.
Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Ventilator Patient Days

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be $500 / 6 = 83.3$ Vent Days. If the department billed in 8 hour increments, the conversion would be $500 / 3 = 166.6$ Vent Days, if the department billed in 12 hour increments, the conversion would be $500 / 2 = 250$ etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Patient Days.

Cardio/Thoracic Intensive Care Unit w/o Transplant Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Total Number of Stepdown Beds
• Worked Hours: Physician Provider

• Worked Hours: Staff

Cardio/Thoracic Intensive Care Unit w/o Transplant Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care

• Clinical/nursing staff acting as educators who perform unit/department specific training

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Case Management (manages patient care while the patient is undergoing treatment)

01025, Cardio/Thoracic Intensive Care Unit with Transplant

This unit provides intensive, comprehensive care and monitoring for patients following cardiac and/or thoracic surgery. This unit represents a mix of both cardiac and thoracic intensive care patients. Patients in this unit are a part of a thoracic organ transplant program or may have a history of a thoracic transplant.

Cardio/Thoracic Intensive Care Unit with Transplant Mapping Guidelines

If your cost center's patient population is less than 65% cardiovascular/thoracic experiencing transplantation, this department may not be an appropriate choice. Another option would be the 01024, Cardio/Thoracic Intensive Care Unit Without Transplant Unit department.
Cardio/Thoracic Intensive Care Unit with Transplant Workload Volumes

Admissions
The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity
Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges
Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours
Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients
Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.
Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.
Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume.

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.
This is a subset of Total Reported Pressure Ulcers.

**Total Activity Volume**

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

**Total Number of Stepdown Beds**

The total number of stepdown beds located in the ICU. These beds are designated to provide care for patients who are stable enough to be discharged from the ICU but are not yet ready to be cared for on a general unit.

This is a subset of Bed Capacity

**Total Reported Pressure Ulcers**

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

**Transfers In**

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Transfers Out**

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges.

Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.
**Ventilator Patient Days**

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be $500 \div 6 = 83.3$ Vent Days. If the department billed in 8 hour increments, the conversion would be $500 \div 3 = 166.6$ Vent Days, if the department billed in 12 hour increments, the conversion would be $500 \div 2 = 250$ etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Patient Days.

**Cardio/Thoracic Intensive Care Unit with Transplant Mandatory Elements**

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Total Number of Stepdown Beds
- Worked Hours: Physician Provider
- Worked Hours: Staff

**Cardio/Thoracic Intensive Care Unit with Transplant Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:
• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care

• Clinical/nursing staff acting as educators who perform unit/department specific training

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Case Management (manages patient care while the patient is undergoing treatment)

**01035, Neurology / Neurosurgical Intensive Care Unit**

This unit provides intensive, comprehensive care and monitoring for medical or surgical patients requiring specialized treatment for life-threatening neurological diseases or disorders.

**Neurology / Neurosurgical Intensive Care Unit Mapping Guidelines**

If your cost center's patient population is less than 65% neurology/neurosurgical, this department may not be an appropriate choice. Another option would be the 01010, Medical/Surgical Intensive Care Unit department.

**Neurology/Neurosurgical Intensive Care Unit Workload Volumes**

**Admissions**

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.
Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.
Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.
Patient Discharges And Transfers Out
Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Falls
The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury
Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Patient Specialty %
Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.

Pressure Ulcers: Community acquired
Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired
Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Stroke Patient Days
Total patient days from patients recovering from a cerebral accident (stroke; MS DRG 064, 065, 066, 067, 068) impairment.

This is a subset of Patient Days.
**Total Activity Volume**

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

**Total Reported Pressure Ulcers**

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

**Transfers In**

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Transfers Out**

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

**Ventilator Patient Days**

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Patient Days.

**Neurology / Neurosurgical Intensive Care Unit Mandatory Elements**

The following data elements are mandatory for this department:
• Bed Capacity
• Labor Expense
• Labor Expense: Physician Provider
• Other Direct Operating Expense
• Outpatient Observation Days
• Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Patient Days
• Physician Provider Professional Fee Expense
• Total Number of Stepdown Beds
• Worked Hours: Physician Provider
• Worked Hours: Staff

Neurology/Neurosurgical Intensive Care Unit Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
• Clinical/nursing staff acting as educators who perform unit/department specific training
• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
• Case Management (manages patient care while the patient is undergoing treatment)
01060, Pediatric Intensive Care Unit

This unit provides intensive, comprehensive care and monitoring for pediatric patients (under 18 years of age) who are critically ill with medical and/or surgical conditions.

Pediatric Intensive Care Unit Mapping Guidelines

If your cost center's patient population is less than 65% pediatric, this department may not be an appropriate choice. Other options include the 01010, Medical/Surgical Intensive Care Unit department, 01011, Medical Intensive Care Unit department, or 01012, Surgical Intensive Care Unit department.

Pediatric Intensive Care Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.
Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.
Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.
Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Number of Stepdown Beds

The total number of stepdown beds located in the ICU. These beds are designated to provide care for patients who are stable enough to be discharged from the ICU but are not yet ready to be cared for on a general unit.

This is a subset of Bed Capacity

Total Reported Pressure Ulcers

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.
Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Ventilator Patient Days

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Patient Days.

Pediatric Intensive Care Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Total Number of Stepdown Beds
- Worked Hours: Physician Provider
- Worked Hours: Staff

**Pediatric Intensive Care Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators who perform unit/department specific training
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
- Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
- Case Management (manages patient care while the patient is undergoing treatment)

**01110, Medical/Surgical Intermediate Care Unit**

This unit provides care for post-critical (step-down) medical or surgical patients who require observation and care at a level less than intensive care patients, but more comprehensive than that required by general acute patients. This unit represents a mix of medical and surgical patients including monitored or ventilator-dependent patients.
Medical/Surgical Intermediate Care Unit Mapping Guidelines

If your cost center's patient population is less than 65% medical/surgical step-down, this department may not be an appropriate choice. Other options include the 01211, General Medical Acute Care Unit department or 01212, General Surgical Acute Care Unit department.

Medical/Surgical Intermediate Care Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.
**Full Day Patients**

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

**Licensed Nursing Staff**

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

**Licensed Nursing Staff Additions**

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

**Licensed Nursing Staff Separations**

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

**Minimum Staffing Level**

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

**Nurse Direct Care Hours Worked**

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.
**Number of Patients assigned to an RN**

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

**Outpatient Observation Days**

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

**Outpatient Observation Visits**

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

**Patient Days**

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

**Patient Discharges And Transfers Out**

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

**Patient Falls**

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

**Patient Falls with Injury**

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.
Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Reported Pressure Ulcers

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Ventilator Patient Days

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.
This is a subset of Patient Days.

**Medical/Surgical Intermediate Care Unit Mandatory Elements**

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff

**Medical/Surgical Intermediate Care Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators who perform unit/department specific training
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
- Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

- Case Management (manages patient care while the patient is undergoing treatment)

**01111, Med/Surg/Cardiac Intermediate Care Unit**

This unit provides care for post-critical (step-down) medical, surgical, or cardiac patients requiring observation and care at a level less than intensive care patients, but more comprehensive than that required by general acute patients. This unit represents a mix of medical, surgical, and cardiac patients including monitored and ventilator-dependent patients.

**Med/Surg/Cardiac Intermediate Care Unit Mapping Guidelines**

If your cost center's patient population is more than 65% cardiac only, or 65% medical and surgical only, this department may not be an appropriate choice. Other options include 01122, Cardiac Intermediate Unit department or 01110, Medical/Surgical Intermediate Unit department.

**Med/Surg/Cardiac Intermediate Care Unit Workload Volumes**

**Admissions**

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Bed Capacity**

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

**Discharges**

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).
This is a subset of Patient Discharges and Transfers Out.

**Education and Orientation Hours**

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

**Full Day Patients**

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

**Licensed Nursing Staff**

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

**Licensed Nursing Staff Additions**

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

**Licensed Nursing Staff Separations**

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

**Minimum Staffing Level**

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.
Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.
**Patient Falls with Injury**

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

**Patient Specialty %**

Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.

**Pressure Ulcers: Community acquired**

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

**Pressure Ulcers: Hospital acquired**

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

**Total Activity Volume**

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

**Total Reported Pressure Ulcers**

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

**Transfers In**

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.
**Ventilator Patient Days**

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be $500 / 6 = 83.3$ Vent Days. If the department billed in 8 hour increments, the conversion would be $500 / 3 = 166.6$ Vent Days, if the department billed in 12 hour increments, the conversion would be $500 / 2 = 250$ etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Patient Days.

**Med/Surg/Cardiac Intermediate Care Unit Mandatory Elements**

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff

**Med/Surg/Cardiac Intermediate Care Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:
• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care

• Clinical/nursing staff acting as educators who perform unit/department specific training

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Case Management (manages patient care while the patient is undergoing treatment)

01112, Respiratory Intermediate Care Unit

This unit provides care for respiratory patients requiring observation and care at a level less than intensive care patients, but more comprehensive than that required by general acute patients. This unit represents patients who are under respiratory care who may also be monitored or ventilator-dependent.

Respiratory Intermediate Care Unit Mapping Guidelines

If your cost center's patient population is less than 65% respiratory, this department may not be an appropriate choice. Other options include the 01110, Medical/Surgical Intermediate Care Unit department.

Respiratory Intermediate Care Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.
**Bed Capacity**

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

**Discharges**

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

**Education and Orientation Hours**

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

**Full Day Patients**

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

**Licensed Nursing Staff**

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

**Licensed Nursing Staff Additions**

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.
Licensed Nursing Staff Separations
Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level
Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked
The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN
Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days
Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits
Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days
The total number of patient days excluding normal newborn (MS DRG 795) patient days.
Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Reported Pressure Ulcers

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.
Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Ventilator Patient Days

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Patient Days.

Respiratory Intermediate Care Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
• Worked Hours: Physician Provider
• Worked Hours: Staff

**Respiratory Intermediate Care Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
• Clinical/nursing staff acting as educators who perform unit/department specific training
• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
• Case Management (manages patient care while the patient is undergoing treatment)

**01122, Cardiac Intermediate Care Unit**

This unit provides care for post-critical (step-down) cardiac patients requiring telemetry monitoring, possible ventilator support, and observation. The care provided in this unit is less than intensive care, but more comprehensive than is required by general acute patients. Patients may require specialty IV drips.

**Cardiac Intermediate Care Unit Mapping Guidelines**

If your cost center's patient population is less than 65% cardiac, this department may not be an appropriate choice. Other options include the 01110, Medical/Surgical Intermediate Care Unit department or the 01111, Med/Surg/Cardiac Intermediate Care Unit department.
Cardiac Intermediate Care Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.
Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.
Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume.

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.
This is a subset of Total Reported Pressure Ulcers.

**Total Activity Volume**

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

**Total Reported Pressure Ulcers**

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

**Transfers In**

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Ventilator Patient Days**

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Patient Days.

**Cardiac Intermediate Care Unit Mandatory Elements**

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
Cardiac Intermediate Care Unit Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators who perform unit/department specific training
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
- Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
- Case Management (manages patient care while the patient is undergoing treatment)

01123, Transplant Intermediate Care Unit

This unit provides care for transplant patients requiring observation and care less than intensive care, but more comprehensive than is required by general acute patients.
Transplant Intermediate Care Unit Mapping Guidelines

If your cost center's patient population is less than 65% transplant, this department may not be an appropriate choice. Another option would be the 01110, Medical/Surgical Intermediate Care Unit department.

Transplant Intermediate Care Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.
**Full Day Patients**

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

**Licensed Nursing Staff**

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

**Licensed Nursing Staff Additions**

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

**Licensed Nursing Staff Separations**

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

**Minimum Staffing Level**

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

**Nurse Direct Care Hours Worked**

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.
Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.
Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Reported Pressure Ulcers

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Ventilator Patient Days

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.
This is a subset of Patient Days.

**Transplant Intermediate Care Unit Mandatory Elements**

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff

**Transplant Intermediate Care Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators who perform unit/department specific training
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Case Management (manages patient care while the patient is undergoing treatment)

01160, Pediatric Intermediate Care Unit

This unit provides care for post-critical (step-down) pediatric patients (18 years of age or less) requiring close supervision and monitoring. The care provided in this unit is more comprehensive than is required by general acute patients.

Pediatric Intermediate Care Unit Mapping Guidelines

If your cost center's patient population is less than 65% pediatric, this department may not be an appropriate choice. Another option would be the 01110, Medical/Surgical Intermediate Care Unit department.

Pediatric Intermediate Care Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.
Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.
Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract-agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume
Patient Falls
The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury
Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Patient Specialty %
Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.

Pressure Ulcers: Community acquired
Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired
Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Total Activity Volume
The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Reported Pressure Ulcers
Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

Transfers In
Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).
This is a subset of Total Activity Volume.

**Ventilator Patient Days**

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Patient Days.

**Pediatric Intermediate Care Unit Mandatory Elements**

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff
Pediatric Intermediate Care Unit Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators who perform unit/department specific training
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
- Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
- Case Management (manages patient care while the patient is undergoing treatment)

01210, Medical/Surgical Acute Care Unit

This unit provides general acute care for a mix of both medical and surgical patients.

Medical/Surgical Acute Care Unit Mapping Guidelines

If your cost center's patient population is greater than 65% medical only, or greater than 65% surgical only, this department may not be an appropriate choice. Other options include the 01211, General Medical Acute Care Unit department or the 01212, General Surgical Acute Care Unit department.

Medical/Surgical/Acute Care Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.
Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (in!patient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.
Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.
Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Reported Pressure Ulcers

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.
Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Medical/Surgical Acute Care Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff
Medical/Surgical Acute Care Unit Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators who perform unit/department specific training
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
- Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
- Case Management (manages patient care while the patient is undergoing treatment)

01211, General Medical Acute Care Unit

This unit provides general acute care for medical patients only.

General Medical Acute Care Unit Mapping Guidelines

If your cost center's patient population is less than 65% medical, this department may not be an appropriate choice. Other options include the 01210, Medical/Surgical Acute Care Unit department or the 01212, General Surgical Acute Care Unit department.

General Medical Acute Care Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.
Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.
Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.
**Patient Discharges And Transfers Out**

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

**Patient Falls**

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

**Patient Falls with Injury**

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

**Patient Specialty %**

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.

**Pressure Ulcers: Community acquired**

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

**Pressure Ulcers: Hospital acquired**

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

**Total Activity Volume**

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

**Total Reported Pressure Ulcers**

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.
Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

General Medical Acute Care Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff
General Medical Acute Care Unit Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators who perform unit/department specific training
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
- Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
- Case Management (manages patient care while the patient is undergoing treatment)

01212, General Surgical Acute Care Unit

This unit provides general acute care for surgical patients.

General Surgical Acute Care Unit Mapping Guidelines

If your cost center's patient population is less than 65% surgical, this department may not be an appropriate choice. Other options include the 01211, General Medical Acute Care Unit department or the 01210, Medical/Surgical Acute Care Unit department.

General Surgical Acute Care Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.
Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.
Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.
Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Reported Pressure Ulcers

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.
Transfers In

The total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

The total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra-unit transfers such as from a semi-private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

General Surgical Acute Care Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff
General Surgical Acute Care Unit Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators who perform unit/department specific training
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
- Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
- Case Management (manages patient care while the patient is undergoing treatment)

01213, Med/Surg/Cardiac Acute Care Unit

This unit provides general acute care and monitoring for a mix of medical, surgical, and cardiac patients. This unit may also provide telemetric monitoring of patients.

Med/Surg/Cardiac Acute Care Unit Mapping Guidelines

If your cost center's patient population is greater than 65% medical only, or greater than 65% surgical only, or greater than 65% cardiac only, this department may not be an appropriate choice. Other options include the 01212, General Surgical Acute Care Unit department; the 01211, General Medical Acute Care Unit department; or the 01210, Medical/Surgical Acute Care Unit department.

Med/Surg/Cardiac Acute Care Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.
Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.
Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.
**Patient Discharges And Transfers Out**

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

**Patient Falls**

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

**Patient Falls with Injury**

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

**Patient Specialty %**

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.

**Pressure Ulcers: Community acquired**

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

**Pressure Ulcers: Hospital acquired**

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

**Total Activity Volume**

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

**Total Reported Pressure Ulcers**

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.
Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Med/Surg/Cardiac Acute Care Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff
**Med/Surg/Cardiac Acute Care Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators who perform unit/department specific training
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
- Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
- Case Management (manages patient care while the patient is undergoing treatment)

**01214, Med/Surg/Oncology Acute Care Unit**

This unit provides general acute care for a mix of medical, surgical, and oncology patients.

**Med/Surg/Oncology Acute Care Unit Mapping Guidelines**

If your cost center's patient population is greater than 65% medical only, greater than 65% surgical only, or greater than 65% oncology only, this department may not be an appropriate choice. Another option would include the 01210, Medical/Surgical Acute Care Unit department or 01238, Oncology Acute Care Unit department.

**Med/Surg/Oncology Acute Care Workload Volumes**

**Admissions**

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.
Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.
Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.
**Patient Discharges And Transfers Out**

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

**Patient Falls**

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

**Patient Falls with Injury**

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

**Patient Specialty %**

Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.

**Pressure Ulcers: Community acquired**

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

**Pressure Ulcers: Hospital acquired**

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

**Total Activity Volume**

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

**Total Reported Pressure Ulcers**

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.
Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Med/Surg/Oncology Acute Care Unit  Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff
Medical/Surgical/Oncology Acute Care Unit Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators who perform unit/department specific training
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
- Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
- Case Management (manages patient care while the patient is undergoing treatment)

01234, Renal/Nephrology Acute Care Unit

This unit provides general acute care for patients with renal system (kidney) dysfunction.

Renal/Nephrology Acute Care Unit Mapping Guidelines

If your cost center's patient population is less than 65% renal, this department may not be an appropriate choice. Another option would include the 01212, General Surgical Acute Care Unit department.

Renal/Nephrology Acute Care Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.
**Bed Capacity**

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

**Discharges**

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

**Education and Orientation Hours**

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

**Full Day Patients**

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

**Licensed Nursing Staff**

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

**Licensed Nursing Staff Additions**

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.
Licensed Nursing Staff Separations
Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level
Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked
The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN
Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days
Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits
Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days
The total number of patient days excluding normal newborn (MS DRG 795) patient days.
Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Reported Pressure Ulcers

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.
Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Renal/Nephrology Acute Care Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff
Renal/Nephrology Acute Care Unit Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators who perform unit/department specific training
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
- Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
- Case Management (manages patient care while the patient is undergoing treatment)

01235, Neurology/Neurosurgical Acute Care Unit

This unit provides general acute care for medical and surgical patients with neurological (nervous system) dysfunction.

Neurology/Neurosurgical Acute Care Unit Mapping Guidelines

If your cost center's patient population is less than 65% neurology/neurosurgical, this department may not be an appropriate choice. Another option would include the 01212, General Surgical Acute Care Unit department.

Neurology/Neurosurgical Acute Care Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.
Bed Capacity
Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges
Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours
Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients
Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff
Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions
The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.
Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.
**Patient Discharges And Transfers Out**  
Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

**Patient Falls**  
The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

**Patient Falls with Injury**  
Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

**Patient Specialty %**  
Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.

**Pressure Ulcers: Community acquired**  
Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

**Pressure Ulcers: Hospital acquired**  
Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

**Stroke Patient Days**  
Total patient days from patients recovering from a cerebral accident (stroke; MS DRG 064, 065, 066, 067, 068) impairment.

This is a subset of Patient Days.
Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Reported Pressure Ulcers

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Ventilator Patient Days

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Patient Days.

Neurology/Neurosurgical Acute Care Unit Mandatory Elements

The following data elements are mandatory for this department:
- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff

**Neurology/Neurosurgical Acute Care Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators who perform unit/department specific training
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
- Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
- Case Management (manages patient care while the patient is undergoing treatment)
01238, Oncology Inpatient Unit

This unit provides general acute care for patients undergoing diagnosis and treatment for cancer disorders.

Oncology Acute Care Unit Mapping Guidelines

If your cost center's patient population is less than 65% oncology, this department may not be an appropriate choice. Other options include the 01211, General Medical Acute Care Unit department, the 01212, General Surgical Acute Care Unit department or the 01210, Medical/Surgical Acute Care Unit department.

Oncology Acute Care Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.
Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.
Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.
**Patient Falls with Injury**

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

**Patient Specialty %**

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.

**Pressure Ulcers: Community acquired**

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

**Pressure Ulcers: Hospital acquired**

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

**Total Activity Volume**

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

**Total Reported Pressure Ulcers**

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

**Transfers In**

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.
Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Oncology Acute Care Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff

Oncology Acute Care Unit Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators who perform unit/department specific training
• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

01239, Orthopedic/Neurology Acute Care Unit

This unit provides general acute care for both surgical orthopedic patients and patients with neurological system dysfunction. This unit represents a mix of patients.

Orthopedic/Neurology Acute Care Unit Mapping Guidelines

If your cost center's patient population is greater than 65% surgical orthopedic only or greater than 65% neurologic only, this department may not be an appropriate choice. Another option would include the 01212, General Surgical Acute Care Unit department or the 01235, Neurology/Neurosurgical Acute Care Unit department.

Orthopedic/Neurology Acute Care Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.
Discharges
Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours
Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients
Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff
Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions
The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations
Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.
Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to a single RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume.
Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Reported Pressure Ulcers

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).
This is a subset of Total Activity Volume.

**Transfers Out**

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

**Orthopedic/Neurology Acute Care Unit Mandatory Elements**

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff

**Orthopedic/Neurology Acute Care Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
Clinical/nursing staff acting as educators who perform unit/department specific training

Patient Sitters who physically ‘sit’ in the patients’ room (do not include staff who watches video monitors in lieu of physically sitting in the patient’s room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
- Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
- Case Management (manages patient care while the patient is undergoing treatment)

**01240, Orthopedic Acute Care Unit**

This unit provides general acute care for the evaluation, treatment or surgery on bones, joints, and associated structures by an orthopedist.

**Orthopedic Acute Care Unit Mapping Guidelines**

If your cost center’s patient population is less than 65% orthopedic, this department may not be an appropriate choice. Other options include the 01212, General Surgical Acute Care Unit department or the 01210, Medical/Surgical Acute Care Unit department.

**Orthopedic Acute Care Unit Workload Volumes**

**Admissions**

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Bed Capacity**

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.
Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.
Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume
Patient Falls
The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury
Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Patient Specialty %
Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.

Pressure Ulcers: Community acquired
Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired
Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Total Activity Volume
The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Reported Pressure Ulcers
Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

Transfers In
Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).
This is a subset of Total Activity Volume.

**Transfers Out**

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

**Orthopedic Acute Care Unit Mandatory Elements**

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff

**Orthopedic Acute Care Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
• Clinical/nursing staff acting as educators who perform unit/department specific training

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Case Management (manages patient care while the patient is undergoing treatment)

01260, Pediatric Acute Care Unit

This unit provides general acute care for pediatric patients (18 years of age or less).

Pediatric Acute Care Unit Mapping Guidelines

If your cost center's patient population is less than 65% pediatric, this department may not be an appropriate choice. Other options include the 01211, General Medical Acute Care Unit department, the 01212, General Surgical Acute Care Unit department, or the 01210, Medical/Surgical Acute Care Unit department.

Pediatric Acute Care Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.
Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.
Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume
**Patient Falls**

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

**Patient Falls with Injury**

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

**Patient Specialty %**

Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.

**Pressure Ulcers: Community acquired**

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

**Pressure Ulcers: Hospital acquired**

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

**Total Activity Volume**

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

**Total Reported Pressure Ulcers**

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

**Transfers In**

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).
This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Pediatric Acute Care Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff

Pediatric Acute Care Unit Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators who perform unit/department specific training
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
- Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
- Case Management (manages patient care while the patient is undergoing treatment)

01261, Pediatric Oncology Acute Care Unit

This unit provides specialty care for the management and treatment of pediatric patients (18 years of age or less) with cancer disorders.

Pediatric Oncology Acute Care Unit Mapping Guidelines

If your cost center's patient population is less than 65% pediatric oncology, this department may not be an appropriate choice. Other options include the 01238, Oncology Acute Care Unit department or the 01260, Pediatric Acute Care Unit department.

Pediatric Oncology Acute Care Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.
Discharges
Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours
Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients
Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff
Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions
The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations
Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.
Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume
Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Reported Pressure Ulcers

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).
This is a subset of Total Activity Volume.

**Transfers Out**

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

**Pediatric Oncology Acute Care Unit Mandatory Elements**

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff

**Pediatric Oncology Acute Care Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
• Clinical/nursing staff acting as educators who perform unit/department specific training

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Case Management (manages patient care while the patient is undergoing treatment)

01270, Labor/Delivery/Recovery/Postpartum/Nursery

This unit provides labor, delivery, recovery, postpartum, and newborn (LDRPN) services. The OB Triage function is included here if performed by staff in this department. Ambulatory birthing centers are excluded.

Labor/Delivery/Recovery/Postpartum/Nursery Mapping Guidelines

If your cost center's patient population is less than 65% of combined labor, delivery, recovery, postpartum, and newborn care, this department may not be an appropriate choice. Other options include the 01272, Mother/Baby Unit department or the 01271, Labor/Delivery/Recovery/Postpartum Unit department.

Labor/Delivery/Recovery/Postpartum/Nursery Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Antenatal And Postnatal Procedures

The total number of antenatal and postnatal procedures performed. Procedures include, but are not limited to: stress tests, non-stress tests, ultrasound, fetal monitoring, cesarean sections, tubal ligations, D & C, and placement or removal of a cervical cerclage.
Antenatal Observation Days

Total observation hours for antenatal patients divided by 24. Include true observation patient hours only. Do not include carry over patient hours, i.e. patients who are awaiting an inpatient bed.

This is a subset of Outpatient Observation Days.

Bassinet Capacity

Total number of bassinets during the reporting period permanently maintained for neonates. Bassinets must be available for use and housed in rooms or wards (i.e., not in corridors or temporary beds). The term "bassinet capacity" as used for the purpose of counting beds is not intended to capture the day-to-day fluctuations in patient rooms and wards being used. Rather, the count is intended to capture changes in the size of a facility as beds/bassinets are added to or taken out of service.

This is a subset of Bed Capacity.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Inductions and Augmentations

Total number of deliveries requiring a medical induction which involves the use of medications or other methods to bring on labor and the number of deliveries requiring an augmentation which involves an intervention that is intended to increase the intensity of labor, usually when the caregiver feels that the labor is not progressing or progressing too slowly.
Labor and Delivery OR Minutes
Enter the total number of minutes patients spent in an operating room on the Labor and Delivery unit.

Labor and Delivery Visits
Total number of occurrences when an ante partum patient receives one or more services, such as delivery, examination, testing or nursing care, provided by specially trained nursing personnel. Even though one patient may have multiple visits during a specified time period, each visit is counted.

Licensed Nursing Staff
Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions
The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations
Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Live Births
Total number of live births delivered by Labor and Delivery unit patients. Include multiple births as number babies; i.e. twins count as two.

This is a subset of Neonate Deliveries.

Minimum Staffing Level
Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Mother Discharges
Total number of patients (mothers) discharged from the patient care unit during the reporting period. Include deaths and patients who leave the hospital against medical advice or without formal notification.
This is a subset of Patient Discharges and Transfers Out (Mother).

**Mother Transfer Outs**

Total number of patients (mothers) transferred out of this patient care unit to another patient care unit within the hospital. Exclude intra-unit transfers (such as from a semi-private to a private room within the unit). Report transfers to another facility as discharges.

This is a subset of Patient Discharges and Transfers Out (Mother).

**Neonate Deliveries**

Total neonate deliveries including live births and stillborns. Include multiple births as number of neonates delivered, e.g., twins count as two.

**Neonate Discharges**

Total number of patients (neonates) discharged from the patient care unit during the reporting period. Include deaths and patients who leave the hospital against medical advice or without formal notification.

This is a subset of Patient Discharges and Transfers Out (Neonate).

**Neonate Transfers Out**

Total number of patients (neonates) transferred out of this patient care unit to another patient care unit within the hospital. Exclude intra-unit transfers (such as from a semi-private to a private room within the unit). Report transfers to another facility as discharges.

This is a subset of Patient Discharges and Transfers Out (Neonate).

**Number of Patients assigned to an RN**

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

**Nurse Direct Care Hours Worked**

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.
**Outpatient Observation Days**

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

**Outpatient Observation Visits**

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

**Patient Days (Mother and Neonate)**

Total inpatient days (mother and neonate).

**Patient Days (Neonate)**

Total neonatal inpatient days.

This is a subset of Patient Days (Mother And Neonate).

**Patient Days: Neonate Level I**

Total patient days for Level I neonates. According to the American Academy of Pediatrics (AAP), Level I (basic) refers to postnatal care of healthy newborn infants; for infants born at 35 to 37 weeks' gestation who remain physiologically stable; and infants born at less than 35 weeks' gestational age and are held until transferred to a facility that can provide the appropriate level of neonatal care.

This is a subset of Patient Days (Neonate).

**Patient Days: Neonate Level II**

Total patient days for Level II neonates. According to the American Academy of Pediatrics (AAP), Level II (specialty) refers to postnatal care of infants born at more than 32 weeks' gestation and weighing more than 1500 g who have physiologic immaturity (such as apnea of prematurity, inability to maintain body temperature, or inability to take oral feedings); who are moderately ill with problems that are expected to resolve rapidly and are not anticipated to need subspecialty services on an urgent basis; or who are convalescing from intensive care. Level II neonates may require mechanical ventilation for brief durations (less than 24 hours) or continuous positive airway pressure.

This is a subset of Patient Days (Neonate).
Patient Days: Neonate Level III

Total patient days for Level III neonates. According to the American Academy of Pediatrics (AAP), Level III (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks' gestation and birth weight less than 1500 g. and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO).

This is a subset of Patient Days (Neonate).

Patient Days: Neonate Level IV

Total patient days for Level IV neonates. According to the American Academy of Pediatrics (AAP), Level IV (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks' gestation and birth weight less than 1500 g. and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO). These neonates are being treated in an institution with the capability to provide surgical repair of complex congenital or acquired conditions, with immediate on-site access to pediatric medical and surgical subspecialists and pediatric anesthesiologists.

This is a subset of Patient Days (Neonate).

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Discharges and Transfers Out (Mother)

Mother discharges and transfers out (including deaths). If unavailable, mother admissions and transfers in may be used.

This is a subset of Total Activity Volume.

Patient Discharges and Transfers Out (Neonate)

Neonate discharges and transfers out (including deaths). If unavailable, neonate admissions and transfers in may be used.

This is a subset of Total Activity Volume.
Patient Discharges: Neonate Level I

Total discharges for Level I neonates. According to the American Academy of Pediatrics (AAP), Level I (basic) refers to postnatal care of healthy newborn infants; for infants born at 35 to 37 weeks’ gestation who remain physiologically stable; and infants born at less than 35 weeks’ gestational age and are held until transferred to a facility that can provide the appropriate level of neonatal care.

Patient Discharges: Neonate Level III

Total discharges for Level III neonates. According to the American Academy of Pediatrics (AAP), Level III (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks’ gestation and birth weight less than 1500 g. and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO).

This is a subset of Neonate Discharges.

Patient Discharges: Neonate Level IV

Total discharges for Level IV neonates. According to the American Academy of Pediatrics (AAP), Level IV (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks’ gestation and birth weight less than 1500 g. and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO). These neonates are being treated in an institution with the capability to provide surgical repair of complex congenital or acquired conditions, with immediate on-site access to pediatric medical and surgical subspecialists and pediatric anesthesiologists.

This is a subset of Neonate Discharges.

Patient In Labor Hours

The total number of hours patients spent in active labor (contractions less than 6 minutes apart, and cervix dilation > 3.0 cm to delivery).

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.

Primary C Sections

Total number of primary cesarean sections performed on department patients.

This is a subset of Total C Sections.
**Repeat C Sections**

The total number of patients delivering an infant via a cesarean section, after one or more previous deliveries via cesarean section.

This is a subset of Total C Sections.

**Stillborns**

The total number of fetuses delivered that died in the womb after having survived through the first 20 weeks of pregnancy and which the end of the pregnancy is unintentional.

This is a subset of Neonate Deliveries.

**Successful VBACS**

Total number of patients delivering via normal vaginal means, following a previous delivery via C-section.

This is a subset of Vaginal Deliveries.

**Total Activity Volume**

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

**Total C Sections**

Total number of patients delivering an infant via a cesarean section.

**Transfers In**

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Vaginal Deliveries**

Total number of patients delivering an infant via normal vaginal means.

**Labor/Delivery/Recovery/Postpartum/Nursery Mandatory Elements**

The following data elements are mandatory for this department:
• Bassinet Capacity
• Bed Capacity
• Labor Expense
• Labor And Delivery Visits
• Labor Expense: Physician Provider
• Neonate Deliveries
• Other Direct Operating Expense
• Outpatient Observation Days
• Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Patient Days (Level 1 Neonate)
• Patient Days (Level 2 Neonate)
• Patient Days (Level 3 Neonate)
• Patient Days (Mother And Neonate)
• Patient Days (Neonate)
• Physician Provider Professional Fee Expense
• Worked Hours: Physician Provider
• Worked Hours: Staff

**Labor/Delivery/Recovery/Postpartum/Nursery Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care

• Clinical/nursing staff acting as educators or ‘preceptors’ who perform training on the unit/department
• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

• Clinical/nursing staff acting as educators who perform unit/department specific training

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Birth certificate preparation - the time needed to complete and submit the documentation required by the state

• Case Management (manages patient care while the patient is undergoing treatment)

• Clinical Staff Educators formal classroom training time

• Daily or terminal cleaning and wall washing for ancillary patient procedure areas

• Environmental services functions, e.g., cleaning services

• Food Service Worker

• IV Therapy Team

• Midwife

• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech

• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Managers/Directors above the nursing unit management level

• Patient Education (formal classes for Prenatal Education including Lamaze and Lactation)

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Repair and maintenance of patient beds and other clinical equipment

• Shift supervision for the entire house

• Social Workers

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Transport of patients not requiring clinical escort
01271, Labor/Delivery/Recovery/Postpartum Unit

This department provides labor, delivery, recovery and postpartum (LDRP) services all within the same suite. The OB Triage function is included here if performed by staff in this department. Ambulatory birthing centers are excluded.

Labor/Delivery/Recovery/Postpartum Unit Mapping Guidelines

If your cost center's patient population is less than 65% of combined labor, delivery, recovery, and postpartum care, this department may not be an appropriate choice. Other options include the 01272, Mother/Baby Unit department; the 01270, Labor/Delivery/Recovery/Postpartum/Nursery Unit department.

Labor/Delivery/Recovery/Postpartum Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Antenatal And Postnatal Procedures

The total number of antenatal and postnatal procedures performed. Procedures include, but are not limited to: stress tests, non-stress tests, ultrasound, fetal monitoring, cesarean sections, tubal ligations, D & C, and placement or removal of a cervical cerclage.

Antenatal Observation Days

Total observation hours for antenatal patients divided by 24. Include true observation patient hours only. Do not include carry over patient hours, i.e. patients who are awaiting an inpatient bed.

This is a subset of Outpatient Observation Days.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.
**Education and Orientation Hours**

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

**Full Day Patients**

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

**Inductions and Augmentations**

Total number of deliveries requiring a medical induction which involves the use of medications or other methods to bring on labor and the number of deliveries requiring an augmentation which involves an intervention that is intended to increase the intensity of labor, usually when the caregiver feels that the labor is not progressing or progressing too slowly.

**Labor and Delivery OR Minutes**

Enter the total number of minutes patients spent in an operating room on the Labor and Delivery unit.

**Labor and Delivery Visits**

Total number of occurrences when an ante partum patient receives one or more services, such as delivery, examination, testing or nursing care, provided by specially trained nursing personnel. Even though one patient may have multiple visits during a specified time period, each visit is counted.

**Licensed Nursing Staff**

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

**Licensed Nursing Staff Additions**

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.
**Licensed Nursing Staff Separations**

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

**Live Births**

Total number of live births delivered by Labor and Delivery unit patients. Include multiple births as number babies; i.e. twins count as two.

This is a subset of Neonate Deliveries.

**Minimum Staffing Level**

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

**Mother Discharges**

Total number of patients (mothers) discharged from the patient care unit during the reporting period. Include deaths and patients who leave the hospital against medical advice or without formal notification.

This is a subset of Patient Discharges and Transfers Out (Mother).

**Mother Transfer Outs**

Total number of patients (mothers) transferred out of this patient care unit to another patient care unit within the hospital. Exclude intra-unit transfers (such as from a semi-private to a private room within the unit). Report transfers to another facility as discharges.

This is a subset of Patient Discharges and Transfers Out (Mother).

**Neonate Deliveries**

Total neonate deliveries including live births and stillborns. Include multiple births as number of neonates delivered, e.g., twins count as two.

**Number of Patients assigned to an RN**

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.
Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges and Transfers Out (Mother)

Mother discharges and transfers out (including deaths). If unavailable, mother admissions and transfers in may be used.

This is a subset of Total Activity Volume.

Patient In Labor Hours

The total number of hours patients spent in active labor (contractions less than 6 minutes apart, and cervix dilation > 3.0 cm to delivery).

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.
Primary C Sections

Total number of primary cesarean sections performed on department patients.

This is a subset of Total C Sections.

Repeat C Sections

The total number of patients delivering an infant via a cesarean section, after one or more previous deliveries via cesarean section.

This is a subset of Total C Sections.

Stillborns

The total number of fetuses delivered that died in the womb after having survived through the first 20 weeks of pregnancy and which the end of the pregnancy is unintentional.

This is a subset of Neonate Deliveries.

Successful VBACS

Total number of patients delivering via normal vaginal means, following a previous delivery via C-section.

This is a subset of Vaginal Deliveries.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total C Sections

Total number of patients delivering an infant via a cesarean section.

Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.
Vaginal Deliveries

Total number of patients delivering an infant via normal vaginal means.

Labor/Delivery/Recovery/Postpartum Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor And Delivery Visits
- Labor Expense: Physician Provider
- Neonate Deliveries
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff

Labor/Delivery/Recovery/Postpartum Unit Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators or 'preceptors' who perform training on the unit/department
• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

• Clinical/nursing staff acting as educators who perform unit/department specific training

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Birth certificate preparation - the time needed to complete and submit the documentation required by the state

• Case Management (manages patient care while the patient is undergoing treatment)

• Clinical Staff Educators formal classroom training time

• Daily or terminal cleaning and wall washing for ancillary patient procedure areas

• Environmental services functions, e.g., cleaning services

• Food Service Worker

• IV Therapy Team

• Midwife

• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech

• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Managers/Directors above the nursing unit management level

• Patient Education (formal classes for Prenatal Education including Lamaze and Lactation)

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Repair and maintenance of patient beds and other clinical equipment

• Shift supervision for the entire house

• Social Workers

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Transport of patients not requiring clinical escort
01272, Mother/Baby Unit

This unit provides antepartum/antenatal and postpartum/postnatal care for maternity patients and normal newborns.

Mother/Baby Unit Mapping Guidelines

If your cost center's patient population is less than 65% antepartum/antenatal and postpartum/postnatal care for maternity patients and normal newborns, this department may not be an appropriate choice. Other options might include the 01270, Labor/Delivery/Recovery/Postpartum/Nursery Unit department or 01271, Labor/Delivery/Recovery/Postpartum Unit department.

Mother/Baby Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Antenatal And Postnatal Procedures

The total number of antenatal and postnatal procedures performed. Procedures include, but are not limited to: stress tests, non-stress tests, ultrasound, fetal monitoring, Cesarean sections, tubal ligations, D & C, and placement or removal of a cervical cerclage.

Bassinet Capacity

Total number of bassinets during the reporting period permanently maintained for neonates. Bassinets must be available for use and housed in rooms or wards (i.e., not in corridors or temporary beds). The term "bassinet capacity" as used for the purpose of counting beds is not intended to capture the day-to-day fluctuations in patient rooms and wards being used. Rather, the count is intended to capture changes in the size of a facility as beds/bassinets are added to or taken out of service.

This is a subset of Bed Capacity.
Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.
**Minimum Staffing Level**

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

**Mother Discharges**

Total number of patients (mothers) discharged from the patient care unit during the reporting period. Include deaths and patients who leave the hospital against medical advice or without formal notification.

This is a subset of Patient Discharges and Transfers Out (Mother).

**Mother Transfer Outs**

Total number of patients (mothers) transferred out of this patient care unit to another patient care unit within the hospital. Exclude intra-unit transfers (such as from a semi-private to a private room within the unit). Report transfers to another facility as discharges.

This is a subset of Patient Discharges and Transfers Out (Mother).

**Neonate Discharges**

Total number of patients (neonates) discharged from the patient care unit during the reporting period. Include deaths and patients who leave the hospital against medical advice or without formal notification.

This is a subset of Patient Discharges and Transfers Out (Neonate).

**Neonate Transfers Out**

Total number of patients (neonates) transferred out of this patient care unit to another patient care unit within the hospital. Exclude intra-unit transfers (such as from a semi-private to a private room within the unit). Report transfers to another facility as discharges.

This is a subset of Patient Discharges and Transfers Out (Neonate).

**Number of Patients assigned to an RN**

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.
Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days (Mother and Neonate)

Total inpatient days (mother and neonate).

Patient Days (Neonate)

Total neonatal inpatient days.

This is a subset of Patient Days (Mother And Neonate).

Patient Days: Neonate Level I

Total patient days for Level I neonates. According to the American Academy of Pediatrics (AAP), Level I (basic) refers to postnatal care of healthy newborn infants; for infants born at 35 to 37 weeks' gestation who remain physiologically stable; and infants born at less than 35 weeks' gestational age and are held until transferred to a facility that can provide the appropriate level of neonatal care.

This is a subset of Patient Days (Neonate).
Patient Days: Neonate Level II

Total patient days for Level II neonates. According to the American Academy of Pediatrics (AAP), Level II (specialty) refers to postnatal care of infants born at more than 32 weeks' gestation and weighing more than 1500 g who have physiologic immaturity (such as apnea of prematurity, inability to maintain body temperature, or inability to take oral feedings); who are moderately ill with problems that are expected to resolve rapidly and are not anticipated to need subspecialty services on an urgent basis; or who are convalescing from intensive care. Level II neonates may require mechanical ventilation for brief durations (less than 24 hours) or continuous positive airway pressure.

This is a subset of Patient Days (Neonate).

Patient Days: Neonate Level III

Total patient days for Level III neonates. According to the American Academy of Pediatrics (AAP), Level III (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks' gestation and birth weight less than 1500 g. and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO).

This is a subset of Patient Days (Neonate).

Patient Days: Neonate Level IV

Total patient days for Level IV neonates. According to the American Academy of Pediatrics (AAP), Level IV (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks' gestation and birth weight less than 1500 g. and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO). These neonates are being treated in an institution with the capability to provide surgical repair of complex congenital or acquired conditions, with immediate on-site access to pediatric medical and surgical subspecialists and pediatric anesthesiologists.

This is a subset of Patient Days (Neonate).

Patient Discharges and Transfers Out (Mother)

Mother discharges and transfers out (including deaths). If unavailable, mother admissions and transfers in may be used.

This is a subset of Total Activity Volume.

Patient Discharges and Transfers Out (Neonate)

Neonate discharges and transfers out (including deaths). If unavailable, neonate admissions and transfers in may be used.

This is a subset of Total Activity Volume.
**Patient Discharges: Neonate Level I**

Total discharges for Level I neonates. According to the American Academy of Pediatrics (AAP), Level I (basic) refers to postnatal care of healthy newborn infants; for infants born at 35 to 37 weeks’ gestation who remain physiologically stable; and infants born at less than 35 weeks’ gestational age and are held until transferred to a facility that can provide the appropriate level of neonatal care.

This is a subset of Neonate Discharges.

**Patient Discharges: Neonate Level II**

Total discharges for Level II neonates. According to the American Academy of Pediatrics (AAP), Level II (specialty) refers to postnatal care of infants born at more than 32 weeks’ gestation and weighing more than 1500 g who have physiologic immaturity (such as apnea of prematurity, inability to maintain body temperature, or inability to take oral feedings); who are moderately ill with problems that are expected to resolve rapidly and are not anticipated to need subspecialty services on an urgent basis; or who are convalescing from intensive care. Level II neonates may require mechanical ventilation for brief durations (less than 24 hours) or continuous positive airway pressure.

This is a subset of Neonate Discharges.

**Patient Discharges: Neonate Level III**

Total discharges for Level III neonates. According to the American Academy of Pediatrics (AAP), Level III (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks’ gestation and birth weight less than 1500 g. and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO).

This is a subset of Neonate Discharges.

**Patient Discharges: Neonate Level IV**

Total discharges for Level IV neonates. According to the American Academy of Pediatrics (AAP), Level IV (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks’ gestation and birth weight less than 1500 g. and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO). These neonates are being treated in an institution with the capability to provide surgical repair of complex congenital or acquired conditions, with immediate on-site access to pediatric medical and surgical subspecialists and pediatric anesthesiologists.

This is a subset of Neonate Discharges.

**Patient Specialty %**

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.
Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Mother/Baby Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bassinet Capacity
- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days (Level 1 Neonate)
- Patient Days (Level 2 Neonate)
- Patient Days (Level 3 Neonate)
- Patient Days (Mother And Neonate)
- Patient Days (Neonate)
• Physician Provider Professional Fee Expense

• Worked Hours: Physician Provider

• Worked Hours: Staff

**Mother Baby Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care

• Clinical/nursing staff acting as educators or ‘preceptors’ who perform training on the unit/department

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

• Clinical/nursing staff acting as educators who perform unit/department specific training

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Birth certificate preparation - the time needed to complete and submit the documentation required by the state

• Case Management (manages patient care while the patient is undergoing treatment)

• Clinical Staff Educators formal classroom training time

• Environmental services functions, e.g., cleaning services

• Food Service Worker

• IV Therapy Team

• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech

• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Managers/Directors above the nursing unit management level

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Patient Education (formal classes for Prenatal Education including Lamaze and Lactation)
- Repair and maintenance of patient beds and other clinical equipment
- Shift supervision for the entire house
- Social Workers
- Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
- Transport of patients not requiring clinical escort

**01273, Obstetrics/Gynecology Unit**

This unit provides antepartum and postpartum care for maternity patients and general acute care for female patients requiring reproductive system intervention.

**Obstetrics/Gynecology Unit Mapping Guidelines**

If your cost center's patient population is greater than 65% obstetric only or greater than 65% gynecology only, this department may not be an appropriate choice. Other options include the 01274, Obstetric Unit department, or the 01275, Gynecology Unit department.

**Obstetrics/Gynecology Unit Workload Volumes**

**Admissions**

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Antenatal And Postnatal Procedures**

The total number of antenatal and postnatal procedures performed. Procedures include, but are not limited to: stress tests, non-stress tests, ultrasound, fetal monitoring, cesarean sections, tubal ligations, D & C, and placement or removal of a cervical cerclage.
**Bed Capacity**

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

**Education and Orientation Hours**

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

**Full Day Patients**

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

**Licensed Nursing Staff**

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

**Licensed Nursing Staff Additions**

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

**Licensed Nursing Staff Separations**

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.
Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume.
Patient Falls
The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury
Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Patient Specialty %
Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.

Pressure Ulcers: Community acquired
Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired
Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Total Activity Volume
The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Reported Pressure Ulcers
Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

Transfers In
Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).
This is a subset of Total Activity Volume.

**Transfers Out**

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

**Obstetrics/Gynecology Unit Mandatory Elements**

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff

**Obstetrics / Gynecology Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
• Clinical/nursing staff acting as educators or 'preceptors' who perform training on the unit/department

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

• Clinical/nursing staff acting as educators who perform unit/department specific training

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Birth certificate preparation - the time needed to complete and submit the documentation required by the state

• Case Management (manages patient care while the patient is undergoing treatment)

• Clinical Staff Educators formal classroom training time

• Environmental services functions, e.g., cleaning services

• Food Service Worker

• IV Therapy Team

• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech

• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Managers/Directors above the nursing unit management level

• Patient Education (formal classes for Prenatal Education including Lamaze and Lactation)

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Repair and maintenance of patient beds and other clinical equipment

• Shift supervision for the entire house

• Social Workers

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Transport of patients not requiring clinical escort
01274, Obstetrics Unit

This unit provides antepartum and postpartum care for maternity patients. Gynecology patients are excluded.

Obstetrics Unit Mapping Guidelines

If your cost center's patient population is less than 65% obstetric, this department may not be an appropriate choice. Another option might be the 01273, Obstetric/Gynecology Unit department.

Obstetrics Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Antenatal And Postnatal Procedures

The total number of antenatal and postnatal procedures performed. Procedures include, but are not limited to: stress tests, non-stress tests, ultrasound, fetal monitoring, cesarean sections, tubal ligations, D & C, and placement or removal of a cervical cerclage.

Bassinet Capacity

Total number of bassinets during the reporting period permanently maintained for neonates. Bassinets must be available for use and housed in rooms or wards (i.e., not in corridors or temporary beds). The term "bassinet capacity" as used for the purpose of counting beds is not intended to capture the day-to-day fluctuations in patient rooms and wards being used. Rather, the count is intended to capture changes in the size of a facility as beds/bassinets are added to or taken out of service.

This is a subset of Bed Capacity.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.
Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.
Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.
**Total Activity Volume**

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

**Transfers In**

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Transfers Out**

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges.

Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

**Obstetrics Unit Mandatory Elements**

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
• Worked Hours: Physician Provider

• Worked Hours: Staff

**Obstetrics Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care

• Clinical/nursing staff acting as educators or 'preceptors' who perform training on the unit/department

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

• Clinical/nursing staff acting as educators who perform unit/department specific training

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Birth certificate preparation - the time needed to complete and submit the documentation required by the state

• Case Management (manages patient care while the patient is undergoing treatment)

• Clinical Staff Educators formal classroom training time

• Environmental services functions, e.g., cleaning services

• Food Service Worker

• IV Therapy Team

• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech

• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Managers/Directors above the nursing unit management level

• Patient Education (formal classes for Prenatal Education including Lamaze and Lactation)

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens (infants may require heel sticks) which are sent to the laboratory for analysis and testing. Does not include line draws.

• Repair and maintenance of patient beds and other clinical equipment
• Shift supervision for the entire house

• Social Workers

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Transport of patients not requiring clinical escort

01275, Gynecology Unit

This unit provides general acute care for female patients diagnosed and receiving treatments for reproductive system dysfunction. Obstetric (maternity) patients are excluded.

Gynecology Unit Mapping Guidelines

If your cost center’s patient population is less than 65% gynecology, this department may not be an appropriate choice. Another option might be the 01273, Obstetric/Gynecology Unit department.

Gynecology Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.
Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.
Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume
Patient Falls
The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury
Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Patient Specialty %
Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.

Pressure Ulcers: Community acquired
Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired
Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Total Activity Volume
The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Reported Pressure Ulcers
Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

Transfers In
Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).
This is a subset of Total Activity Volume.

**Transfers Out**

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

**Gynecology Unit Mandatory Elements**

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff

**Gynecology Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators or 'preceptors' who perform training on the unit/department
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)
- Clinical/nursing staff acting as educators who perform unit/department specific training

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Case Management (manages patient care while the patient is undergoing treatment)
- Clinical Staff Educators formal classroom training time
- Environmental services functions, e.g., cleaning services
- Food Service Worker
- IV Therapy Team
- Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech
- Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs
- Nursing Managers/Directors above the nursing unit management level
- Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
- Repair and maintenance of patient beds and other clinical equipment
- Shift supervision for the entire house
- Social Workers
- Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
- Transplant Coordinator
- Transport of patients not requiring clinical escort
01276, High Risk Obstetrical Unit

This unit provides intensive, comprehensive care and monitoring for antepartum/antenatal and postpartum/postnatal patients who have complications, obstetrical and/or medical, that impact their pregnancy.

High Risk Obstetrical Unit Mapping Guidelines

If your cost center's patient population is less than 65% high risk obstetric patients, this department may not be an appropriate choice. Other options include the 01274 Obstetrics Unit department; the 01271, Labor/Delivery/Recovery/Postpartum Unit department; or the 01273, Obstetrics/Gynecology Unit department.

High Risk Obstetrical Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.
Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.
Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.
Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

High Risk Obstetrical Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff

High Risk Obstetrical Unit Normalizations
Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators or 'preceptors' who perform training on the unit/department
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)
- Clinical/nursing staff acting as educators who perform unit/department specific training

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Birth certificate preparation - the time needed to complete and submit the documentation required by the state
- Case Management (manages patient care while the patient is undergoing treatment)
- Clinical Staff Educators formal classroom training time
- Environmental services functions, e.g., cleaning services
- Food Service Worker
- IV Therapy Team
- Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech
- Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs
- Nursing Managers/Directors above the nursing unit management level
- Patient Education (formal classes for Prenatal Education including Lamaze and Lactation)
- Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens (infants may require heel sticks) which are sent to the laboratory for analysis and testing. Does not include line draws.
- Repair and maintenance of patient beds and other clinical equipment
- Shift supervision for the entire house
- Social Workers
- Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
• Transport of patients not requiring clinical escort

01277, Neonatal Intensive Care Unit (NICU)

This unit provides intensive, comprehensive care and monitoring for neonates who are experiencing life-threatening conditions. According to the American Academy of Pediatrics (AAP), this would be a Level III or Level IV designation.

Neonatal Intensive Care Unit (NICU) Mapping Guidelines

Given the highly specialized focus for this type of unit, there is no minimum % threshold (i.e. greater than 65%) of Level III or Level IV neonate patients to meet. However, the Patient Specialty % data element is mandatory and it must be reported.

Neonatal Intensive Care Unit (NICU) Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bassinet Capacity

Total number of bassinets during the reporting period permanently maintained for neonates. Bassinets must be available for use and housed in rooms or wards (i.e., not in corridors or temporary beds). The term "bassinet capacity" as used for the purpose of counting beds is not intended to capture the day-to-day fluctuations in patient rooms and wards being used. Rather, the count is intended to capture changes in the size of a facility as beds/bassinets are added to or taken out of service.

This is a subset of Bed Capacity.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.
**Full Day Patients**

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

**Licensed Nursing Staff**

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

**Licensed Nursing Staff Additions**

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

**Licensed Nursing Staff Separations**

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

**Minimum Staffing Level**

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

**Nurse Direct Care Hours Worked**

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.
Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days: Neonate Level I

Total patient days for Level I neonates. According to the American Academy of Pediatrics (AAP), Level I (basic) refers to postnatal care of healthy newborn infants; for infants born at 35 to 37 weeks' gestation who remain physiologically stable; and infants born at less than 35 weeks' gestational age and are held until transferred to a facility that can provide the appropriate level of neonatal care.

This is a subset of Patient Days (Neonate).

Patient Days: Neonate Level II

Total patient days for Level II neonates. According to the American Academy of Pediatrics (AAP), Level II (specialty) refers to postnatal care of infants born at more than 32 weeks' gestation and weighing more than 1500 g who have physiologic immaturity (such as apnea of prematurity, inability to maintain body temperature, or inability to take oral feedings); who are moderately ill with problems that are expected to resolve rapidly and are not anticipated to need subspecialty services on an urgent basis; or who are convalescing from intensive care. Level II neonates may require mechanical ventilation for brief durations (less than 24 hours) or continuous positive airway pressure.

This is a subset of Patient Days (Neonate).
Patient Days: Neonate Level III

Total patient days for Level III neonates. According to the American Academy of Pediatrics (AAP), Level III (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks’ gestation and birth weight less than 1500 g. and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO).

This is a subset of Patient Days (Neonate).

Patient Days (Mother and Neonate)

Total inpatient days (mother and neonate).

Patient Days (Neonate)

Total neonatal inpatient days.

This is a subset of Patient Days (Mother And Neonate).

Patient Days: Neonate Level IV

Total patient days for Level IV neonates. According to the American Academy of Pediatrics (AAP), Level IV (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks’ gestation and birth weight less than 1500 g. and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO). These neonates are being treated in an institution with the capability to provide surgical repair of complex congenital or acquired conditions, with immediate on-site access to pediatric medical and surgical subspecialists and pediatric anesthesiologists.

This is a subset of Patient Days (Neonate).

Patient Discharges (Neonate)

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out (Neonate).

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.
This is a subset of Total Activity Volume

Patient Discharges: Neonate Level I

Total discharges for Level I neonates. According to the American Academy of Pediatrics (AAP), Level I (basic) refers to postnatal care of healthy newborn infants; for infants born at 35 to 37 weeks’ gestation who remain physiologically stable; and infants born at less than 35 weeks' gestational age and are held until transferred to a facility that can provide the appropriate level of neonatal care.

Patient Discharges: Neonate Level II

Total discharges for Level II neonates. According to the American Academy of Pediatrics (AAP), Level II (specialty) refers to postnatal care of infants born at more than 32 weeks’ gestation and weighing more than 1500 g who have physiologic immaturity (such as apnea of prematurity, inability to maintain body temperature, or inability to take oral feedings); who are moderately ill with problems that are expected to resolve rapidly and are not anticipated to need subspecialty services on an urgent basis; or who are convalescing from intensive care. Level II neonates may require mechanical ventilation for brief durations (less than 24 hours) or continuous positive airway pressure.

Patient Discharges: Neonate Level III

Total discharges for Level III neonates. According to the American Academy of Pediatrics (AAP), Level III (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks' gestation and birth weight less than 1500 g, and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO).

This is a subset of Patient Discharges (Neonate).

Patient Discharges: Neonate Level IV

Total discharges for Level IV neonates. According to the American Academy of Pediatrics (AAP), Level IV (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care; infants with birth weight of more than 1000 g and gestational age of more than 28 weeks; for extremely low birth weight infants (1000 g birth weight or less and 28 or less weeks' gestation). Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO).

This is a subset of Patient Discharges (Neonate).

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.
**Pressure Ulcers: Community acquired**

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

**Pressure Ulcers: Hospital acquired**

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

**Total Activity Volume**

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

**Total Reported Pressure Ulcers**

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

**Transfers In**

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Transfers Out**

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

**Neonatal Intensive Care Unit (NICU) Mandatory Elements**

The following data elements are mandatory for this department:

- Bassinet Capacity
• Labor Expense
• Labor Expense: Physician Provider
• Other Direct Operating Expense
• Outpatient Observation Days
• Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Patient Days (Level 1 Neonate)
• Patient Days (Level II Neonate)
• Patient Days (Level III Neonate)
• Patient Days (Neonate)
• Patient Specialty %
• Physician Provider Professional Fee Expense
• Worked Hours: Physician Provider
• Worked Hours: Staff

Neonatal Intensive Care Unit (NICU) Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
• Clinical/nursing staff acting as educators or ‘preceptors’ who perform training on the unit/department
• Patient Sitters who physically ‘sit’ in the patients’ room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)
• Clinical/nursing staff acting as educators who perform unit/department specific training

Exclude the hours, costs and volumes (where applicable) associated with the following functions:
• Birth certificate preparation - the time needed to complete and submit the documentation required by the state

• Case Management (manages patient care while the patient is undergoing treatment)

• Clinical Staff Educators formal classroom training time

• Environmental services functions, e.g., cleaning services

• Food Service Worker

• IV Therapy Team

• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech

• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Managers/Directors above the nursing unit management level

• Patient Education (formal classes for Prenatal Education including Lamaze and Lactation)

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Repair and maintenance of patient beds and other clinical equipment

• Shift supervision for the entire house

• Social Workers

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Transport of patients not requiring clinical escort

01278, Neonatal Intermediate Unit

This unit provides care for post-critical (step-down) neonates and infants requiring close monitoring but less care than a NICU, but more comprehensive than is required by normal newborn/nursery patients. According to the American Academy of Pediatrics (AAP), this would be a Special Care Nursery Level II designation.
Neonatal Intermediate Unit Mapping Guidelines

Given the highly specialized focus for this type of unit, there is no minimum % threshold (i.e. greater than 65%) of Level II neonate patients to meet. However, the Patient Specialty % data element is mandatory and it must be reported.

Neonatal Intermediate Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bassinet Capacity

Total number of bassinets during the reporting period permanently maintained for neonates. Bassinets must be available for use and housed in rooms or wards (i.e., not in corridors or temporary beds). The term "bassinet capacity" as used for the purpose of counting beds is not intended to capture the day-to-day fluctuations in patient rooms and wards being used. Rather, the count is intended to capture changes in the size of a facility as beds/bassinets are added to or taken out of service.

This is a subset of Bed Capacity.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.
Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.
Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days: Neonate Level I

Total patient days for Level I neonates. According to the American Academy of Pediatrics (AAP), Level I (basic) refers to postnatal care of healthy newborn infants; for infants born at 35 to 37 weeks' gestation who remain physiologically stable; and infants born at less than 35 weeks' gestational age and are held until transferred to a facility that can provide the appropriate level of neonatal care.

This is a subset of Patient Days (Neonate).

Patient Days: Neonate Level II

Total patient days for Level II neonates. According to the American Academy of Pediatrics (AAP), Level II (specialty) refers to postnatal care of infants born at more than 32 weeks' gestation and weighing more than 1500 g who have physiologic immaturity (such as apnea of prematurity, inability to maintain body temperature, or inability to take oral feedings); who are moderately ill with problems that are expected to resolve rapidly and are not anticipated to need subspecialty services on an urgent basis; or who are convalescing from intensive care. Level II neonates may require mechanical ventilation for brief durations (less than 24 hours) or continuous positive airway pressure.

This is a subset of Patient Days (Neonate).

Patient Days: Neonate Level III

Total patient days for Level III neonates. According to the American Academy of Pediatrics (AAP), Level III (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks' gestation and birth weight less than 1500 g. and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO).

This is a subset of Patient Days (Neonate).

Patient Days (Neonate)

Total neonatal inpatient days.

This is a subset of Patient Days (Mother And Neonate).
Patient Days: Neonate Level IV

Total patient days for Level IV neonates. According to the American Academy of Pediatrics (AAP), Level IV (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks’ gestation and birth weight less than 1500 g. and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO). These neonates are being treated in an institution with the capability to provide surgical repair of complex congenital or acquired conditions, with immediate on-site access to pediatric medical and surgical subspecialists and pediatric anesthesiologists.

This is a subset of Patient Days (Neonate).

Patient Discharges (Neonate)

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out (Neonate).

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Discharges: Neonate Level I

Total discharges for Level I neonates. According to the American Academy of Pediatrics (AAP), Level I (basic) refers to postnatal care of healthy newborn infants; for infants born at 35 to 37 weeks’ gestation who remain physiologically stable; and infants born at less than 35 weeks’ gestational age and are held until transferred to a facility that can provide the appropriate level of neonatal care.

Patient Discharges: Neonate Level II

Total discharges for Level II neonates. According to the American Academy of Pediatrics (AAP), Level II (specialty) refers to postnatal care of infants born at more than 32 weeks’ gestation and weighing more than 1500 g who have physiologic immaturity (such as apnea of prematurity, inability to maintain body temperature, or inability to take oral feedings); who are moderately ill with problems that are expected to resolve rapidly and are not anticipated to need subspecialty services on an urgent basis; or who are convalescing from intensive care. Level II neonates may require mechanical ventilation for brief durations (less than 24 hours) or continuous positive airway pressure.
Patient Discharges: Neonate Level III

Total discharges for Level III neonates. According to the American Academy of Pediatrics (AAP), Level III (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks’ gestation and birth weight less than 1500 g. and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO).

This is a subset of Patient Discharges (Neonate).

Patient Discharges: Neonate Level IV

Total discharges for Level IV neonates. According to the American Academy of Pediatrics (AAP), Level IV (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care; infants with birth weight of more than 1000 g and gestational age of more than 28 weeks; for extremely low birth weight infants (1000 g birth weight or less and 28 or less weeks' gestation). Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO).

This is a subset of Patient Discharges (Neonate).

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.
**Total Reported Pressure Ulcers**

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

**Transfers In**

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Transfers Out**

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

**Ventilator Patient Days**

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Patient Days.

**Neonatal Intermediate Unit Mandatory Elements**

The following data elements are mandatory for this department:

- Bassinet Capacity
- Labor Expense
- Labor Expense: Physician Provider
• Other Direct Operating Expense
• Outpatient Observation Days
• Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Patient Days (Level 1 Neonate)
• Patient Days (Level II Neonate)
• Patient Days (Level III Neonate)
• Patient Days (Neonate)
• Patient Specialty %
• Physician Provider Professional Fee Expense
• Worked Hours: Physician Provider
• Worked Hours: Staff

**Neonatal Intermediate Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
• Clinical/nursing staff acting as educators or ‘preceptors’ who perform training on the unit/department
• Patient Sitters who physically ‘sit’ in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)
• Clinical/nursing staff acting as educators who perform unit/department specific training

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Birth certificate preparation - the time needed to complete and submit the documentation required by the state
• Case Management (manages patient care while the patient is undergoing treatment)
• Clinical Staff Educators formal classroom training time

• Environmental services functions, e.g., cleaning services

• Food Service Worker

• IV Therapy Team

• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech

• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Managers/Directors above the nursing unit management level

• Patient Education (formal classes for Prenatal Education including Lamaze and Lactation)

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Repair and maintenance of patient beds and other clinical equipment

• Shift supervision for the entire house

• Social Workers

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Transport of patients not requiring clinical escort

01280, Newborn Nursery

This unit provides care for normal newborn infants. According to the American Academy of Pediatrics (AAP), this would be a Well Newborn Level I designation.

Newborn Nursery Mapping Guidelines

If your department provides less than 65% of normal newborn care, this department is not an appropriate choice. Other options might include the 01278, Neonatal Intermediate Unit department or the 01272, Mother/Baby Unit department.
Newborn Nursery Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bassinet Capacity

Total number of bassinets during the reporting period permanently maintained for neonates. Bassinets must be available for use and housed in rooms or wards (i.e., not in corridors or temporary beds). The term "bassinet capacity" as used for the purpose of counting beds is not intended to capture the day-to-day fluctuations in patient rooms and wards being used. Rather, the count is intended to capture changes in the size of a facility as beds/bassinets are added to or taken out of service.

This is a subset of Bed Capacity.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.
Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.
This is a subset of Total Activity Volume.

**Patient Days (Neonate)**

Total neonatal inpatient days.

This is a subset of Patient Days (Mother And Neonate).

**Patient Days: Neonate Level I**

Total patient days for Level I neonates. According to the American Academy of Pediatrics (AAP), Level I (basic) refers to postnatal care of healthy newborn infants; for infants born at 35 to 37 weeks' gestation who remain physiologically stable; and infants born at less than 35 weeks' gestational age and are held until transferred to a facility that can provide the appropriate level of neonatal care.

This is a subset of Patient Days (Neonate).

**Patient Days: Neonate Level II**

Total patient days for Level II neonates. According to the American Academy of Pediatrics (AAP), Level II (specialty) refers to postnatal care of infants born at more than 32 weeks' gestation and weighing more than 1500 g who have physiologic immaturity (such as apnea of prematurity, inability to maintain body temperature, or inability to take oral feedings); who are moderately ill with problems that are expected to resolve rapidly and are not anticipated to need subspecialty services on an urgent basis; or who are convalescing from intensive care. Level II neonates may require mechanical ventilation for brief durations (less than 24 hours) or continuous positive airway pressure.

This is a subset of Patient Days (Neonate).

**Patient Days: Neonate Level III**

Total patient days for Level III neonates. According to the American Academy of Pediatrics (AAP), Level III (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks' gestation and birth weight less than 1500 g, and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO).

This is a subset of Patient Days (Neonate).
Patient Days: Neonate Level IV

Total patient days for Level IV neonates. According to the American Academy of Pediatrics (AAP), Level IV (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks' gestation and birth weight less than 1500 g. and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO). These neonates are being treated in an institution with the capability to provide surgical repair of complex congenital or acquired conditions, with immediate on-site access to pediatric medical and surgical subspecialists and pediatric anesthesiologists.

This is a subset of Patient Days (Neonate).

Patient Discharges (Neonate)

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out (Neonate).

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Discharges: Neonate Level I

Total discharges for Level I neonates. According to the American Academy of Pediatrics (AAP), Level I (basic) refers to postnatal care of healthy newborn infants; for infants born at 35 to 37 weeks’ gestation who remain physiologically stable; and infants born at less than 35 weeks' gestational age and are held until transferred to a facility that can provide the appropriate level of neonatal care.

Patient Discharges: Neonate Level II

Total discharges for Level II neonates. According to the American Academy of Pediatrics (AAP), Level II (specialty) refers to postnatal care of infants born at more than 32 weeks’ gestation and weighing more than 1500 g who have physiologic immaturity (such as apnea of prematurity, inability to maintain body temperature, or inability to take oral feedings); who are moderately ill with problems that are expected to resolve rapidly and are not anticipated to need subspecialty services on an urgent basis; or who are convalescing from intensive care. Level II neonates may require mechanical ventilation for brief durations (less than 24 hours) or continuous positive airway pressure.
Patient Discharges: Neonate Level III

Total discharges for Level III neonates. According to the American Academy of Pediatrics (AAP), Level III (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks’ gestation and birth weight less than 1500 g. and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO).

This is a subset of Patient Discharges (Neonate).

Patient Discharges: Neonate Level IV

Total discharges for Level IV neonates. According to the American Academy of Pediatrics (AAP), Level IV (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care; infants with birth weight of more than 1000 g and gestational age of more than 28 weeks; for extremely low birth weight infants (1000 g birth weight or less and 28 or less weeks' gestation). Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO).

This is a subset of Patient Discharges (Neonate).

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.
This is a subset of Patient Discharges and Transfers Out.

**Newborn Nursery Mandatory Elements**

The following data elements are mandatory for this department:

- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days (Level 1 Neonate)
- Patient Days (Level 2 Neonate)
- Patient Days (Level 3 Neonate)
- Patient Days (Neonate)
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff

**Newborn Nursery Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators or 'preceptors' who perform training on the unit/department
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)
• Clinical/nursing staff acting as educators who perform unit/department specific training

Excluding the hours, costs and volumes (where applicable) associated with the following functions:

• Birth certificate preparation - the time needed to complete and submit the documentation required by the state

• Case Management (manages patient care while the patient is undergoing treatment)

• Clinical Staff Educators formal classroom training time

• Environmental services functions, e.g., cleaning services

• Food Service Worker

• IV Therapy Team

• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech

• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Managers/Directors above the nursing unit management level

• Patient Education (formal classes for Prenatal Education including Lamaze and Lactation)

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Repair and maintenance of patient beds and other clinical equipment

• Shift supervision for the entire house

• Social Workers

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Transport of patients not requiring clinical escort

01285, Labor/Delivery with Recovery

This department provides labor, delivery, and recovery (LDR) services. The OB Triage function is included here if performed by staff in this department. Postpartum, infant care, and ambulatory birthing centers are excluded.
Labor/Delivery with Recovery Mapping Guidelines

If your cost center's patient population is less than 65% labor and delivery, this department may not be an appropriate choice. Another option might include the 01273, Obstetrics/Gynecology Unit department.

Labor/Delivery with Recovery Workload  Volumes

Antenatal And Postnatal Procedures

The total number of antenatal and postnatal procedures performed. Procedures include, but are not limited to: stress tests, non-stress tests, ultrasound, fetal monitoring, cesarean sections, tubal ligations, D & C, and placement or removal of a cervical cerclage.

Antenatal Observation Days

Total observation hours for antenatal patients divided by 24. Include true observation patient hours only. Do not include carry over patient hours, i.e. patients who are awaiting an inpatient bed.

This is a subset of Outpatient Observation Days.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Inductions and Augmentations

Total number of deliveries requiring a medical induction which involves the use of medications or other methods to bring on labor and the number of deliveries requiring an augmentation which involves an intervention that is intended to increase the intensity of labor, usually when the caregiver feels that the labor is not progressing or progressing too slowly.

Invasive Procedures

The total invasive procedures, such as Cesarean sections, tubal ligations, and D&C.
This is a subset of Antenatal/Postnatal Procedures.

**Labor and Delivery OR Minutes**

Enter the total number of minutes patients spent in an operating room on the Labor and Delivery unit.

**Labor and Delivery Visits**

Total number of occurrences when an ante partum patient receives one or more services, such as delivery, examination, testing or nursing care, provided by specially trained nursing personnel. Even though one patient may have multiple visits during a specified time period, each visit is counted.

**Licensed Nursing Staff**

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

**Licensed Nursing Staff Additions**

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

**Licensed Nursing Staff Separations**

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

**Live Births**

Total number of live births delivered by Labor and Delivery unit patients. Include multiple births as number babies; i.e. twins count as two.

This is a subset of Neonate Deliveries.

**Minimum Staffing Level**

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.
Neonate Deliveries

Total neonate deliveries including live births and stillborns. Include multiple births as number of neonates delivered, e.g., twins count as two.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

The total number of outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient In Labor Hours

The total number of hours patients spent in active labor (contractions less than 6 minutes apart, and cervix dilation > 3.0 cm to delivery).

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.
Primary C Sections

Total number of primary cesarean sections performed on department patients.

This is a subset of Total C Sections.

Repeat C Sections

The total number of patients delivering an infant via a cesarean section, after one or more previous deliveries via cesarean section.

This is a subset of Total C Sections.

Stillborns

The total number of fetuses delivered that died in the womb after having survived through the first 20 weeks of pregnancy and which the end of the pregnancy is unintentional.

This is a subset of Neonate Deliveries.

Successful VBACS

Total number of patients delivering via normal vaginal means, following a previous delivery via C-section.

This is a subset of Vaginal Deliveries.

Total C Sections

Total number of patients delivering an infant via a cesarean section.

Vaginal Deliveries

Total number of patients delivering an infant via normal vaginal means.

Labor/Delivery with Recovery Expense Elements

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.
Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. This includes patient chargeable and department consumable (non-chargeable) items, non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total expense for the department non medical operating supplies, (e.g., equipment lubricants, office supplies, distribution supplies, and small non-capitalized) equipment.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.
Physician Provider Professional Fee Expense

Total contract expense for physicians, advanced practitioners and physician groups which provide professional services to the department. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Labor/Delivery with Recovery Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor And Delivery Visits
- Labor Expense: Physician Provider
- Neonate Deliveries
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff

Labor/Delivery with Recovery Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
• Clinical/nursing staff acting as educators or 'preceptors' who perform training on the unit/department

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

• Clinical/nursing staff acting as educators who perform unit/department specific training

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Birth certificate preparation - the time needed to complete and submit the documentation required by the state

• Case Management (manages patient care while the patient is undergoing treatment)

• Clinical Staff Educators formal classroom training time

• Daily or terminal cleaning and wall washing for ancillary patient procedure areas

• Environmental services functions, e.g., cleaning services

• Food Service Worker

• IV Therapy Team

• Midwife

• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech

• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Managers/Directors above the nursing unit management level

• Patient Education (formal classes for Prenatal Education including Lamaze and Lactation)

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Repair and maintenance of patient beds and other clinical equipment

• Shift supervision for the entire house

• Social Workers

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
- Transport of patients not requiring clinical escort

**01350, Peds/Adolescent Behavioral Health Unit**

This unit provides evaluation and treatment for patients 18 years or less with acute psychiatric or behavioral disorders.

**Peds/Adolescent Behavioral Health Unit Mapping Guidelines**

If your cost center's patient population is less than 65% pediatric/adolescent behavioral health, this department may not be an appropriate choice. Another option might be the 01390, Behavioral Health Unit department.

**Peds/Adolescent Behavioral Health Unit Workload Volumes**

**Admissions**

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Bed Capacity**

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

**Discharges**

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.
**Education and Orientation Hours**

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

**Electro Convulsive Therapy Treatments**

Total ECT treatments provided.

**Full Day Patients**

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

**Intensive Care Patient Days**

Total patient days from patients requiring constant observation.

This is a subset of Patient Days.

**Licensed Nursing Staff**

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

**Licensed Nursing Staff Additions**

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

**Licensed Nursing Staff Separations**

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.
Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Outpatient or Day Treatment Days

Total outpatient partial day therapy hours on the Unit divided by 24.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume
Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Peds/Adolescent Behavioral Health Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient or Day Treatment Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
• Paid Hours: Staff

• Patient Days

• Physician Provider Professional Fee Expense

• Worked Hours: Physician Provider

• Worked Hours: Staff

**Peds/Adolescent Behavioral Health Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care

• Clinical/nursing staff acting as educators or 'preceptors' who perform training on the unit/department

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

• Clinical/nursing staff acting as educators who perform unit/department specific training

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Case Management (manages patient care while the patient is undergoing treatment)

• Clinical Staff Educators formal classroom training time

• Environmental services functions, e.g., cleaning services

• Food Service Worker

• IV Therapy Team

• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech

• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Managers/Directors above the nursing unit management level

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
- Repair and maintenance of patient beds and other clinical equipment
- Shift supervision for the entire house
- Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
- Transport of patients not requiring clinical escort

01360, Chemical Dependency Unit

This unit provides evaluation, treatment and general acute care for patients diagnosed with chemical dependency and/or substance abuse disorders.

Chemical Dependency Unit Mapping Guidelines

If your cost center’s patient population is less than 65% chemical dependency, this department may not be an appropriate choice. Another option might be the 01390, Behavioral Health Unit department.

Chemical Dependency Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Detoxification Care Patient Days

Total patient days from patients in detoxification therapy.

This is a subset of Patient Days.
Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.
Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Visits

Total individual therapy sessions provided to outpatients.

This is a subset of Total Activity Volume.

Outpatient or Day Treatment Days

Total outpatient partial day therapy hours on the Unit divided by 24.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.
Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Chemical Dependency Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient or Day Treatment Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
• Worked Hours: Physician Provider
• Worked Hours: Staff

**Chemical Dependency Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, and or wound care
• Clinical/nursing staff acting as educators or ‘preceptors’ who perform training on the unit/department
• Patient Sitters who physically ‘sit’ in the patients’ room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)
• Clinical/nursing staff acting as educators who perform unit/department specific training

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Case Management
• Clinical Staff Educators formal classroom training time
• Environmental services functions, e.g., cleaning services
• Food Service Worker
• IV Therapy Team
• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech
• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs
• Nursing Managers/Directors above the nursing unit management level
• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
• Repair and maintenance of patient beds and other clinical equipment
• Shift supervision for the entire house
• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
- Transport of patients not requiring clinical escort

01390, Behavioral Health Unit

This unit provides evaluation and treatment for patients of all ages diagnosed with acute psychiatric, behavioral or mental health disorders.

Behavioral Health Unit Mapping Guidelines

If your cost center's patient population is less than 65% behavioral health, this department may not be an appropriate choice.

Behavioral Health Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.
Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Electro Convulsive Therapy Treatments

Total ECT treatments provided.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Intensive Care Patient Days

Total patient days from patients requiring constant observation.

This is a subset of Patient Days.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.
Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Outpatient or Day Treatment Days

Total outpatient partial day therapy hours on the Unit divided by 24.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume
**Patient Specialty %**

Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.

**Total Activity Volume**

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

**Transfers In**

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Transfers Out**

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

**Behavioral Health Unit Mandatory Elements**

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient or Day Treatment Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
• Paid Hours: Staff
• Patient Days
• Physician Provider Professional Fee Expense
• Worked Hours: Physician Provider
• Worked Hours: Staff

**Behavioral Health Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, and or wound care
• Clinical/nursing staff acting as educators or 'preceptors' who perform training on the unit/department
• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)
• Clinical/nursing staff acting as educators who perform unit/department specific training

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Case Management (manages patient care while the patient is undergoing treatment)
• Clinical Staff Educators formal classroom training time
• Environmental services functions, e.g., cleaning services
• Food Service Worker
• IV Therapy Team
• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech
• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs
• Nursing Managers/Directors above the nursing unit management level
• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
- Repair and maintenance of patient beds and other clinical equipment
- Shift supervision for the entire house
- Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
- Transport of patients not requiring clinical escort

**01410, Acute Rehabilitation Unit**

This unit provides rehabilitative health care services to patients with significant functional disabilities due to acute or chronic pain, musculoskeletal problems, stroke, or catastrophic events resulting in complete or partial paralysis. An acute inpatient rehabilitation unit utilizes an inter-disciplinary coordinated team approach that involves a minimum of three (3) hours rehabilitation services daily.

**Acute Rehabilitation Unit Mapping Guidelines**

If your cost center's patient population is less than 65% acute rehabilitation care, this department may not be an appropriate choice. Another option might be the 01211, General Medical Acute Care Unit department or a department profile within the Rehabilitation Services series.

**Acute Rehabilitation Unit Workload Volumes**

**Admissions**

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Bed Capacity**

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

**Brain Stem Patient Days**

Total patient days from patients recovering from severe brain stem trauma impairment.
This is a subset of Rehabilitation Patient Days.

Discharges
Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours
Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients
Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Head Injury Patient Days
Total patient days from patients recovering from severe head trauma impairment.

This is a subset of Rehabilitation Patient Days.

Licensed Nursing Staff
Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions
The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.
Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Muscular Skeletal Patient Days

Total patient days from patients recovering from severe muscular-skeletal impairment.

This is a subset of Rehabilitation Patient Days.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Other Patient Days

Total patient days from patients recovering from other physical impairments not listed above.

This is a subset of Rehabilitation Patient Days.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.
Outpatient or Day Treatment Days

Total outpatient partial day therapy hours on the Unit divided by 24.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.
Stroke Patient Days
Total patient days from patients recovering from a cerebral accident (stroke; MS DRG 064, 065, 066, 067, 068) impairment.
This is a subset of Patient Days.

Total Activity Volume
The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Reported Pressure Ulcers
Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

Transfers In
Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).
This is a subset of Total Activity Volume.

Transfers Out
Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.
This is a subset of Patient Discharges and Transfers Out.

Acute Rehabilitation Unit Mandatory Elements
The following data elements are mandatory for this department:
• Bed Capacity
• Labor Expense
• Labor Expense: Physician Provider
• Other Direct Operating Expense
• Outpatient or Day Treatment Days
• Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Patient Days
• Physician Provider Professional Fee Expense
• Worked Hours: Physician Provider
• Worked Hours: Staff

**Acute Rehabilitation Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, and or wound care
• Clinical/nursing staff acting as educators or 'preceptors' who perform training on the unit/department
• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)
• Clinical/nursing staff acting as educators who perform unit/department specific training

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Case Management (manages patient care while the patient is undergoing treatment)
• Clinical Staff Educators formal classroom training time
• Environmental services functions, e.g., cleaning services
• Food Service Worker
• IV Therapy Team
• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech
- Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs
- Nursing Managers/Directors above the nursing unit management level
- Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
- Repair and maintenance of patient beds and other clinical equipment
- Shift supervision for the entire house
- Social Workers
- Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
- Transplant Coordinator
- Transport of patients not requiring clinical escort

01530, Skilled Nursing Unit

This unit provides convalescent care or restorative services to post-acute and post-subacute patients. This unit should be approved by Medicare and is designed to provide short-term skilled nursing and rehab care, not long-term custodial care. A skilled nursing unit promotes the physical and mental health of the patient and primarily serves the geriatric population, chronic disabilities, or extended recovery.

Skilled Nursing Unit Mapping Guidelines

If your cost center’s patient population is less than 65% skilled nursing or convalescent care, this department may not be an appropriate choice. Another option might include the 01535, Subacute Nursing Unit department.

Skilled Nursing Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element “Transfers In”. Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.
Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.
Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.
Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit’s specialty for the reporting period.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Skilled Nursing Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
• Other Direct Operating Expense
• Outpatient Observation Days
• Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Patient Days
• Physician Provider Professional Fee Expense
• Worked Hours: Physician Provider
• Worked Hours: Staff

**Skilled Nursing Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, and or wound care

• Clinical/nursing staff acting as educators or 'preceptors' who perform training on the unit/department

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

• Clinical/nursing staff acting as educators who perform unit/department specific training

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Case Management (manages patient care while the patient is undergoing treatment)

• Clinical Staff Educators formal classroom training time

• Environmental services functions, e.g., cleaning services

• Food Service Worker

• IV Therapy Team

• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech
- Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs
- Nursing Managers/Directors above the nursing unit management level
- Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
- Repair and maintenance of patient beds and other clinical equipment
- Shift supervision for the entire house
- Social Workers
- Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
- Transplant Coordinator
- Transport of patients not requiring clinical escort

**01535, Subacute Nursing Unit**

This unit provides subacute nursing care or restorative services for post-acute patients. This includes patients who are beyond the acute phase of illness but still require additional medical care and/or rehabilitation and are not well enough to return to home. Exclude skilled nursing facility units.

**Subacute Nursing Unit Mapping Guidelines**

If your cost center's patient population is less than 65% subacute nursing care as defined above, this department may not be an appropriate choice. Another option might be the 01530, Skilled Nursing Unit department.

**Subacute Nursing Unit Workload Volumes**

**Admissions**

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.
Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.
**Licensed Nursing Staff Separations**

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

**Minimum Staffing Level**

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

**Nurse Direct Care Hours Worked**

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

**Number of Patients assigned to an RN**

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

**Outpatient Observation Days**

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

**Outpatient Observation Visits**

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

**Patient Days**

The total number of patient days excluding normal newborn (MS DRG 795) patient days.
Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Reported Pressure Ulcers

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.
Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Subacute Nursing Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff
**Subacute Nursing Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical/nursing staff acting as educators or 'preceptors' who perform training on the unit/department
- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, and or wound care
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)
- Clinical/nursing staff acting as educators who perform unit/department specific training

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Case Management (manages patient care while the patient is undergoing treatment)
- Clinical Staff Educators formal classroom training time
- Environmental services functions, e.g., cleaning services
- Food Service Worker
- IV Therapy Team
- Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech
- Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs
- Nursing Managers/Directors above the nursing unit management level
- Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
- Repair and maintenance of patient beds and other clinical equipment
- Shift supervision for the entire house
- Social Workers
- Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
- Transplant Coordinator
• Transport of patients not requiring clinical escort

01550, Long Term Care Unit

This unit provides acute care services to patients suffering medically complex conditions, or patients who have suffered recent catastrophic illness or injury and require an extended stay in an acute care environment.

Long Term Care Unit Mapping Guidelines

If your cost center's patient population is less than 65% long term care, as defined here, this department may not be an appropriate choice. Another option might be the 01530, Skilled Nursing Unit department.

Long Term Care Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.
**Education and Orientation Hours**

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

**Full Day Patients**

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

**Licensed Nursing Staff**

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

**Licensed Nursing Staff Additions**

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

**Licensed Nursing Staff Separations**

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

**Minimum Staffing Level**

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

**New Admissions**

Total new resident admissions to the long term care inpatient unit.

This is a subset of Resident Admissions.
**Number of Patients assigned to an RN**

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

**Nurse Direct Care Hours Worked**

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

**Outpatient Observation Days**

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

**Outpatient Observation Visits**

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

**Patient Days**

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

**Patient Discharges And Transfers Out**

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

**Patient Specialty %**

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.
Readmissions

The total number of resident re-admissions to the unit (i.e. admitted after previous discharge from unit).

This is a subset of Resident Admissions.

Resident Assessment Instruments (RAIs) Completed

Total number of resident assessment instruments (RAIs) completed 14 days following initial admission.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Long Term Care Unit Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.
**Worked Hours: LPN, LVN**

Hours worked by licensed practical nurse, licensed vocational nurses providing patient care services in the department.

This is a subset of Worked Hours: Staff.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Patient Care Provider**

Total hours worked by other patient care providers (e.g. nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care personnel.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.
**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

---

**Long Term Care Unit Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. This includes patient chargeable and department consumable (non chargeable) items, non capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non medical operating supplies, (e.g., equipment lubricants, office supplies, distribution supplies, and small non capitalized) equipment.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

---

**Long Term Care Unit Mandatory Elements**

The following data elements are mandatory for this department:

- Bed Capacity
• Labor Expense
• Other Direct Operating Expense
• Outpatient Observation Days
• Paid Hours: Contract Labor
• Paid Hours: Staff
• Patient Days
• Worked Hours: Staff

**Long Term Care Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical/nursing staff acting as educators or 'preceptors' who perform training on the unit/department

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, and or wound care

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

• Clinical/nursing staff acting as educators who perform unit/department specific training

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Case Management (manages patient care while the patient is undergoing treatment)

• Clinical Staff Educators formal classroom training time

• Environmental services functions, e.g., cleaning services

• Food Service Worker

• IV Therapy Team

• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech

• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Managers/Directors above the nursing unit management level
• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Repair and maintenance of patient beds and other clinical equipment

• Shift supervision for the entire house

• Social Workers

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Transplant Coordinator

• Transport of patients not requiring clinical escort

**01570, Hospice / Palliative Care Unit**

This unit provides palliative care for terminally ill patients.

**Hospice / Palliative Care Unit Mapping Guidelines**

If your cost center's patient population is less than 65% hospice, this department may not be an appropriate choice.

**Hospice / Palliative Care Workload Volumes**

**Admissions**

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Bed Capacity**

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.
**Discharges**

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

**Education and Orientation Hours**

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

**Full Day Patients**

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

**Licensed Nursing Staff**

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

**Licensed Nursing Staff Additions**

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

**Licensed Nursing Staff Separations**

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.
Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume
Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Hospice / Palliative Care Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
• Paid Hours: Staff
• Patient Days
• Physician Provider Professional Fee Expense
• Worked Hours: Physician Provider
• Worked Hours: Staff

**Hospice / Palliative Care Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical/nursing staff acting as educators or 'preceptors' who perform training on the unit/department
• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, and or wound care
• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)
• Clinical/nursing staff acting as educators who perform unit/department specific training

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Case Management (manages patient care while the patient is undergoing treatment)
• Clinical Staff Educators formal classroom training time
• Environmental services functions, e.g., cleaning services
• Food Service Worker
• IV Therapy Team
• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech
• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs
• Nursing Managers/Directors above the nursing unit management level
• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
• Repair and maintenance of patient beds and other clinical equipment
• Shift supervision for the entire house
• Social Workers
• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
• Transplant Coordinator
• Transport of patients not requiring clinical escort

01620, Medical/Surgical Unit With Swing Beds

This unit provides acute and skilled nursing care for a mix of both medical and surgical patients. This unit must have beds designated as 'Swing Beds.' A Swing Bed is a Medicare program designed to further provide inpatient care to patients who require additional time to transition to home. The Swing Bed allows physicians to swing patients from an "acute" status to a "skilled rehabilitation" status.

Medical/Surgical Unit with Swing Beds Mapping Guidelines

If your cost center's patient population is greater than 65% medical only or greater than 65% surgical only and the unit does not have swing beds, this department may not be an appropriate choice. Other options might include the General Medical Unit or the General Surgical Units.

Medical/Surgical Unit with Swing Beds Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.
**Discharges**

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

**Education and Orientation Hours**

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

**Full Day Patients**

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

**Licensed Nursing Staff**

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

**Licensed Nursing Staff Additions**

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

**Licensed Nursing Staff Separations**

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.
Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Non Acute Care Discharges (SNF And Swing Bed)

Total SNF/swing bed patient discharges (including deaths).

This is a subset of Discharges.

Non Acute Care Observation Days (SNF And Swing Outpatient)

Total outpatient observation hours for SNF / Swing bed patients divided by 24. Do not include carry over patient hours, i.e. patients who are awaiting an inpatient bed.

This is a subset of Outpatient Observation Days.

Non Acute Care Patient Days (SNF And Swing Bed)

Total patient days defined as "skilled nursing" or "swing bed" days.

This is a subset of Patient Days.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.
Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume.

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.

Skilled Nursing Facility (SNF) Swing Bed Capacity

Total number of available SNF / Swing beds for patient occupancy during the reporting period permanently maintained for lodging inpatients. Beds must be available for use and housed in patient rooms or wards (i.e., not in corridors or temporary beds). Thus, beds in a completely or partially closed wing of the facility are considered available only if the hospital put the beds into use when they are needed. The term “bed capacity” as used for the purpose of counting beds is not intended to capture the day-to-day fluctuations in patient rooms and wards being used. Rather, the count is intended to capture changes in the size of a facility as beds are added to or taken out of service.
This is a subset of Bed Capacity.

**Total Activity Volume**

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

**Transfers In**

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Transfers Out**

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

**Medical/Surgical Unit with Swing Beds Mandatory Elements**

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Non Acute Care Observation Days (SNF And Swing Outpatient)
- Non Acute Care Patient Days (SNF And Swing Bed)
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Patient Days
• Physician Provider Professional Fee Expense
• Skilled Nursing Facility (SNF) Swing Bed Capacity
• Worked Hours: Physician Provider
• Worked Hours: Staff

Medical/Surgical Unit with Swing Beds Normalizations

Include the hours, costs and volumes (where applicable) associated with the

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
• Clinical/nursing staff acting as educators who perform unit/department specific training
• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)
• Clinical/nursing staff acting as educators who perform unit/department specific training

Exclude the hours costs and volumes (where applicable) associated with the

• Case Management (manages patient care while the patient is undergoing treatment)
• Clerical support for Nursing Administration Managers or Directors
• Clinical Staff Educators formal classroom training time
• Environmental services functions, e.g., cleaning services
• Food Service Worker
• IV Therapy Team
• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech
• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs
• Nursing Managers/Directors above the nursing unit management level

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Repair and maintenance of patient beds and other clinical equipment

• Shift supervision for the entire house

• Social Workers

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Transplant Coordinator

• Transport of patients not requiring clinical escort

01630, Blended Acuity Unit

This unit is for the evaluation and treatment of a mixture of adult and/or pediatric patients whose conditions are of varying levels of acuity (e.g., critical care, general acute care, step-down type care, etc.). This unit may be comprised of patients followed by different hospital services (e.g., coronary, medical, surgical, etc.). This care area may or may not include "acuity adaptable" or "universal" beds.

Blended Acuity Unit Mapping Guidelines

This department is only to be used in organizations that have a dedicated unit to care for the variety of different ages, service types, and acuity of patients. This is a specific unit for this purpose. If your Cost Center’s patient population is greater than 65% of one particular patient service type, this department may not be an appropriate choice. Other options might include departments within the Nursing Services series which are specific to a particular service type (General Medical Acute Care Unit, Critical Care only, Orthopedic Acute Care Unit, etc.).

Blended Acuity Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.
**Bed Capacity**

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

**Cardiac Care Patient Days Revenue Codes**

Enter the total number of patients days billed for UB codes (Revenue codes) 210-219 for the reporting period.

This is a subset of Patient Days.

**Discharges**

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

**Education and Orientation Hours**

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

**Full Day Patients**

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

**Intensive Care Patient Days Revenue Codes**

Enter the total number of patients days billed for UB codes (Revenue codes) 200-202, 204-209 for the reporting period.
This is a subset of Patient Days.

**Licensed Nursing Staff**

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

**Licensed Nursing Staff Additions**

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

**Licensed Nursing Staff Separations**

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

**Med/General Patient Days Revenue Codes**

Enter the total number of patients days billed for UB codes (Revenue codes) 110, 111, 120–122, 124–132, 134–142, 144–152, 154–162, 164-169 for the reporting period.

This is a subset of Patient Days.

**Minimum Staffing Level**

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

**Number of Patients assigned to an RN**

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.
Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Oncology Patient Days Revenue Codes

Enter the total number of patients days billed for UB codes (Revenue codes) 117, 127, 137, 147, 157, 280, 289 for the reporting period.

This is a subset of Patient Days.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Pediatric General Patient Days Revenue Codes

Enter the total number of patients days billed for UB codes (Revenue codes) 113, 123, 133, 143, 153 for the reporting period.
This is a subset of Patient Days.

**Pediatric Intensive Care Patient Days Revenue Codes**

Enter the total number of patients days billed for UB codes (Revenue codes) 203 for the reporting period.

This is a subset of Patient Days.

**Sterile Environment Care Patient Days Revenue Codes**

Enter the total number of patients days billed for UB codes (Revenue codes) 164 for the reporting period.

This is a subset of Patient Days.

**Subacute Care Patient Days Revenue Codes**

Enter the total number of patients days billed for UB codes (Revenue codes) 190-199 for the reporting period.

This is a subset of Patient Days.

**Telemetry Care Patient Days Revenue Codes**

Enter the total number of patients days billed for UB codes (Revenue codes) 732 for the reporting period.

This is a subset of Patient Days.

**Total Activity Volume**

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

**Transfers In**

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.
Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Ventilator Patient Days

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Patient Days.

Blended Acuity Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Ventilator Patient Days

CPT is a registered trademark of the American Medical Association. All rights reserved.
• Worked Hours: Physician Provider
• Worked Hours: Staff

**Blended Acuity Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
• Clinical/nursing staff acting as educators who perform unit/department specific training
• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)
• Clinical/nursing staff acting as educators who perform unit/department specific training

Exclude the hours costs and volumes (where applicable) associated with the

• Case Management (manages patient care while the patient is undergoing treatment)
• Clerical support for Nursing Administration Managers or Directors
• Clinical Staff Educators formal classroom training time
• Environmental services functions, e.g., cleaning services
• Food Service Worker
• IV Therapy Team
• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech
• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs
• Nursing Managers/Directors above the nursing unit management level
• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
• Repair and maintenance of patient beds and other clinical equipment
• Shift supervision for the entire house
• Social Workers

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Transplant Coordinator

• Transport of patients not requiring clinical escort

01710, Observation Unit

This unit provides general nursing care to patients who are under observation and have not been admitted to the hospital as an inpatient. The patients in this unit are being held for observation care until either admitted or discharged. Patients may be undergoing secondary recovery for outpatient surgery, or diagnostic testing.

Observation Unit Mapping Guidelines

If your cost center's patient population is less than 65% outpatient or observation (non-admitted) patients, this department may not be an appropriate choice.

Observation Unit Workload Volumes

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.
Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Number of Patients assigned to an RN

Enter the number of patients assigned to an individual RN for the unit. For example, if your staffing requires you to have one-on-one patient care, enter 1. If your staffing requires an RN to care for 5 patients, enter 5. If you have different Patient to RN ratios for each shift, enter the average number of patients assigned to an RN taking into account all shifts.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

The total number of outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.
**Patient Days**

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

**Patient Falls**

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

**Patient Falls with Injury**

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

**Patient Specialty %**

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.

**Observation Unit Mandatory Elements**

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Patient Days
• Worked Hours: Physician Provider

• Worked Hours: Staff

Observation Unit Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical/nursing staff acting as educators who perform unit/department specific training

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Case Management (manages patient care while the patient is undergoing treatment)

• Clerical support for Nursing Administration Managers or Directors

• Clinical Staff Educators formal classroom training time

• Environmental services functions, e.g., cleaning services

• Food Service Worker

• IV Therapy Team

• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech

• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Managers/Directors above the nursing unit management level

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Shift supervision for the entire house

• Social Workers

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Transport of patients not requiring clinical escort
01810, IV Team (Vascular Access)

This department consists of a team responsible for placement and maintenance of Peripherally Inserted Central Catheters (PICC) and peripheral IV insertion, assisting with any difficult draws/insertions, checking IVs on the units, CVAD repair and decloting, and patient education.

IV Team (Vascular Access) Mapping Guidelines

If you do not have a separate, distinct and dedicated IV team, this department is not an appropriate choice.

IV Team (Vascular Access) Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page of ActionOI.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.
Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Observation Days Supported

Total observation days supported by the department for those patients requiring monitoring services for the reporting period. Observation days are defined as outpatient observation hours divided by 24.

Observation Visits Supported

Total observation visits supported.

Patient Days Supported

The total inpatient days supported by the department.

Total Procedures

Total procedures performed by staff in this department for the reporting period. A procedure is an IV start, restart, check, discontinue, or blood specimen draw.

IV Team (Vascular Access) Department Hour Elements

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.
Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Observation Days Supported

Total observation days supported. Observation days are defined as outpatient observation hours divided by 24.

Observation Visits Supported

Total observation visits supported.

Patient Days Supported

The total inpatient days supported by the department.
**Total Procedures**

Total procedures performed. A procedure is an IV start, restart, check, discontinue, or blood specimen draw.

**IV Team (Vascular Access) Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. This includes patient chargeable and department consumable (non chargeable) items, non capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non medical operating supplies, (e.g., equipment lubricants, office supplies, distribution supplies, and small non capitalized) equipment.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

**IV Team (Vascular Access) Mandatory Elements**

The following data elements are mandatory for this department:
• APC Relative Weight
• Labor Expense
• Observation Days Supported
• Other Direct Operating Expense
• Paid Hours: Contract Labor
• Paid Hours: Staff
• Patient Days Supported
• Worked Hours: Staff

**IV Team (Vascular Access) Normalizations**

Include the hours, costs and volumes (where applicable) associated with the

• IV Therapy Team

Exclude the hours costs and volumes (where applicable) associated with the

• Clinical Staff Educators formal classroom training time

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

**01830, Centralized Telemetry**

This department performs 24-hour cardiac monitoring for any patient requiring telemetry monitoring services through a centralized system in a remote location. Personnel are not directly involved with the patients’ care.

**Centralized Telemetry Mapping Guidelines**

If your cost center does not provide centralized or remote telemetry monitoring to the nursing units and/or ancillary areas, this department may not be an appropriate choice. Do not map nursing units or eICUs to this department profile.
Centralized Telemetry Workload Volumes

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Observation Days Supported

Total observation days supported by the department for those patients requiring monitoring services for the reporting period. Observation days are defined as outpatient observation hours divided by 24.

Telemetry Days Supported

The total patient days supported by the department for patients requiring telemetry monitoring services for the reporting period. Enter the total number of patients days billed for UB codes (Revenue codes) 732 for the reporting period.

Centralized Telemetry Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: LPN, LVN

Hours worked by licensed practical nurse, licensed vocational nurses providing patient care services in the department.

This is a subset of Worked Hours: Staff.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.
Worked Hours: Other Patient Care Provider

Total hours worked by other patient care providers (e.g. nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care personnel.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: RN

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Worked Hours: Technician

Total hours worked by technicians in the department. A technician generally holds a two year associates degree, and may have completed a certified training program.

This is a subset of Worked Hours: Staff.
Centralized Telemetry Expense Elements

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. This includes patient chargeable and department consumable (non chargeable) items, non capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total expense for the department non medical operating supplies, (e.g., equipment lubricants, office supplies, distribution supplies, and small non capitalized) equipment.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Centralized Telemetry Mandatory Elements

The following data elements are mandatory for this department:

- Labor Expense
- Observation Days Supported
• Other Direct Operating Expense
• Paid Hours: Contract Labor
• Paid Hours: Staff
• Patient Days Supported
• Worked Hours: Staff

Centralized Telemetry Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Repair and maintenance of patient beds and other clinical equipment

01910, Nursing Administration

This department performs the overall administrative and general support tasks for the entire Nursing Services series staff. If multiple nursing administration cost centers exist, such as a women and children’s or cancer center, combine them for reporting purposes.

Nursing Administration Mapping Guidelines

If this department does not provide nursing admin line management and staff support, this department may not be an appropriate choice. Another option might be the 01911, Nurse Staffing Office department.

Nursing Administration Workload Volumes

Discharges and Transfers Supported
Total discharges and transfers out (including deaths) supported by Nursing Administration. If unavailable, patient admissions and transfers in may be used.
Nursing Services

Hours Paid: Nursing Division

Total hours paid to staff (both payroll and non-payroll/registry) working within the nursing division for the reporting period. This value should only include staff in cost centers that are mapped to the Nursing Services Series (nursing units and G1000), including Physicians/Providers as long as they are employed by the facility. If Nursing Administration supports departments outside of the inpatient nursing series (i.e. Operating Room or Emergency Room), do not count those hours paid in this element.

Nursing Division Employees

Total number of individuals employed by the nursing division for the reporting period. This value should only include employees in cost centers that are mapped to the Nursing Services Series (nursing units and G1000), including Physicians/Providers as long as they are employed by the facility. If Nursing Staff Office supports departments outside of the inpatient nursing series (i.e. Operating Room or Emergency Room), do not count those employees in this element.

Nursing Division New Hires

Total employees hired by the nursing division for the reporting period. This value should only include employees hired in cost centers that are mapped to the Nursing Services Series (nursing units and G1000), including Physicians/Providers as long as they are employed by the facility. If Nursing Administration supports departments outside of the inpatient nursing services (i.e. Operating Room or Emergency Room), do not count the new hires in this element.

Observation Days Supported

Total observation days supported. Observation days are defined as outpatient observation hours divided by 24.

Observation Visits Supported

Total observation visits supported.

Patient Days Supported

The total inpatient days supported by the department.

Nursing Administration Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.
**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: LPN, LVN**

Hours worked by licensed practical nurse, licensed vocational nurses providing patient care services in the department.

This is a subset of Worked Hours: Staff.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Patient Care Provider**

Total hours worked by other patient care providers (e.g. nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care personnel.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.
This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Nursing Administration Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. This includes patient chargeable and department consumable (non chargeable) items, non capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Total Supply Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total dollars paid to all nonexempt, non-provider staff for overtime hours worked. The value reported reflects payments of at least time-and-one-half of the regular rate for hours worked over the employee's normal work schedule (40 hour workweek, or 8-80 workweek). This value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Labor Expense.
**Total Supply Expense**

Total supply expense represents the net expense cost including freight and distribution fees less rebates for all patient chargeable and department consumable supplies for all cost centers. Supply items have an expected life of less than one year unless they are used for the repair and maintenance of equipment. This includes, but is not limited to, drugs, IV additives, radiology film, oxygen and medical gases, blood and blood products, organ procurement, reagents and solutions, replacement linens, uniforms, food, replacement dietary items (e.g. glassware, silverware, etc.), cleaning products and general office and computer supplies. Include the supply portion of capital lease or rent expense or agreements that combine supply expense with provision of services (i.e., service agreements). Exclude minor equipment report in total other direct operating expense. Exclude repair parts, most instruments, computer software, equipment rental, and books. Exclude heating fuel costs report in Utility Expense.

This is a subset of Other Direct Operating Expense.

**Nursing Administration Mandatory Elements**

The following data elements are mandatory for this department:

- Hours Paid: Nursing Division
- Labor Expense
- Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Worked Hours: Staff

**Nursing Administration Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clerical support for Nursing Administration Managers or Directors
- Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs
- Nursing Managers/Directors above the nursing unit management level
- Shift supervision for the entire house

Exclude the hours, costs and volumes (where applicable) associated with the following functions:
• Case Management (manages patient care while the patient is undergoing treatment)

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care

• Clinical Staff Educators formal classroom training time

• Nursing Informatics (integration of nursing science, computer science and information science to manage and communicate data/information and knowledge/wisdom in nursing and informatics essential to the delivery of high quality, cost-effective care)

• Nursing Recruitment and Retention

• Operating a hospital based School of Nursing, e.g., administration and or teaching of students in a formal classroom setting to achieve a degree in a specialized field

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

• Transplant Coordinator

01911, Nurse Staffing Office

This department provides nurse scheduling coordination, allocation of nursing staff resources, and balances the nursing staff to patient and unit needs.

Nurse Staffing Office Mapping Guidelines

If this department does not provide nurse scheduling and resource management this department may not be an appropriate choice. Another option might be the 01910, Nursing Administration department.

Note: This department is not designed to accommodate nursing float pools. Another option for float pool might be the G1000, Other Nursing Services department.

Nurse Staffing Office Workload Volumes

Nursing Division Employees

Total number of individuals employed by the nursing division for the reporting period. This value should only include employees in cost centers that are mapped to the Nursing Services Series (nursing units and G1000), including Physicians/Providers as long as they are employed by the facility. If Nursing Staff Office supports departments outside of the inpatient nursing series (i.e. Operating Room or Emergency Room), do not count those employees in this element.
Paid Hours: Nursing Division Non Payroll
Total hours paid to staff (non payroll/registry only) working within the nursing division for the reporting period. This value should only include staff in cost centers that are mapped to the Nursing Services Series (nursing units and G1000), including Physicians/Providers as long as they are employed by the facility. If Nursing Staff Office supports departments outside of the inpatient nursing series (i.e. Operating Room or Emergency Room), do not count those hours paid in this element. Do not count staff on the payroll in this element.

Paid Hours: Nursing Division Payroll
Total hours paid to staff (payroll only) working within the nursing division for the reporting period. This value should only include staff in cost centers that are mapped to the Nursing Services Series (nursing units and G1000), including Physicians/Providers as long as they are employed by the facility. If Nursing Staff Office supports departments outside of the inpatient nursing series (i.e. Operating Room or Emergency Room), do not count those hours paid in this element. Do not count Non-payroll/Registry staff in this element.

Nurse Staffing Office Department Hour Elements

Paid Hours: Contract Labor
Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff
Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: LPN, LVN
Hours worked by licensed practical nurse, licensed vocational nurses providing patient care services in the department.

This is a subset of Worked Hours: Staff.

Worked Hours: Management
Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.
**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Nurse Staffing Office Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. This includes patient chargeable and department consumable (non chargeable) items, non capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Total Supply Expense.
**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

**Total Supply Expense**

Total supply expense represents the net expense cost including freight and distribution fees less rebates for all patient chargeable and department consumable supplies for all cost centers. Supply items have an expected life of less than one year unless they are used for the repair and maintenance of equipment. This includes, but is not limited to, drugs, IV additives, radiology film, oxygen and medical gases, blood and blood products, organ procurement, reagents and solutions, replacement linens, uniforms, food, replacement dietary items (e.g. glassware, silverware, etc.), cleaning products and general office and computer supplies. Include the supply portion of capital lease or rent expense or agreements that combine supply expense with provision of services (i.e., service agreements). Exclude minor equipment report in total other direct operating expense. Exclude repair parts, most instruments, computer software, equipment rental, and books. Exclude heating fuel costs report in Utility Expense.

This is a subset of Other Direct Operating Expense.

**Nurse Staffing Office Mandatory Elements**

The following data elements are mandatory for this department:

- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Nursing Division Non Payroll
- Paid Hours: Nursing Division Payroll
- Paid Hours: Staff
- Worked Hours: Staff
Nurse Staffing Office Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clerical support for Nursing Administration Managers or Directors
- Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs
- Nursing Managers/Directors above the nursing unit management level
- Shift supervision for the entire house

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Case Management (manages patient care while the patient is undergoing treatment)
- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical Staff Educators formal classroom training time
- Nursing Informatics (integration of nursing science, computer science and information science to manage and communicate data/information and knowledge/wisdom in nursing and informatics essential to the delivery of high quality, cost-effective care)
- Nursing Recruitment and Retention
- Operating a hospital based School of Nursing, e.g., administration and or teaching of students in a formal classroom setting to achieve a degree in a specialized field
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)
- Transplant Coordinator

F1000, Nursing Services Functional Rollup

This department includes all critical, intermediate, acute, specialty, and exempt nursing units, as well as the IV therapy team, Centralized Telemetry, Nurse Staffing Office, and Nursing Administration.

Nursing Services Functional Rollup Workload Volumes
Acute Care Bed Capacity

Enter the total number of beds that are licensed, physically set up and available for service of acute patient census during the reporting period. Include beds assigned to support all acute patients, including pediatric, psychiatric and rehabilitation patients. Exclude normal newborn (Level I) nursery bassinets and beds assigned to support skilled, swing, sub acute, and or long term care patients. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as "Available Beds" or "Operating Beds".

This is a subset of Bed Capacity.

Acute Care Discharges

Total discharges from acute care units, including rehabilitation and psychiatric units, including deaths. Exclude discharges from SNF and long term units. Exclude normal newborn discharges (DRG 391/MS DRG 795).

Acute Care Outpatient Observation Days

Total outpatient observation hours for acute care patients divided by 24. Include true observation patient hours only. Do not include carry over patient hours, i.e. patients who are awaiting an inpatient bed.

Acute Care Patient Days

Total acute care patient days supported by the hospital, including rehabilitation and behavioral health patients. Exclude SNF and long term care patients. Exclude normal newborn days (DRG 391/MS DRG 795).

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.
Behavioral Health Patient Days

Total behavioral health patient days supported by the hospital. This includes patient days from all behavioral health nursing units.

This is a subset of Acute Care Patient Days.

Critical Care Patient Days

Total critical care patient days supported by the hospital. This includes critical care days from all Critical Care and Intermediate nursing units, as well as Neonate Level II and above patient days.

This is a subset of Acute Care Patient Days.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.
**Licensed Nursing Staff Additions**

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

**Licensed Nursing Staff Separations**

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

**Non Acute Bed Capacity**

Enter the total number of beds that are licensed, physically set up and available for service of non acute patient census during the reporting period. Include beds assigned to support all non acute patients, including skilled, swing, sub acute, and or long term care patients. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as "Available Beds" or "Operating Beds."

This is a subset of Bed Capacity.

**Non Acute Care Discharges**

Total discharges for all non-acute care nursing units. This includes SNF, Long Term Care, Sub-Acute, Swing -bed unit and Palliative care unit. Exclude normal newborn discharges.

**Non Acute Care Outpatient Observation Days**

Total outpatient observation hours for non-acute patients divided by 24. Do not include carry over patient hours, i.e. patients who are awaiting an inpatient bed.

**Non Acute Care Patient Days**

Total skilled nursing, swing bed, sub-acute, and / or long term care patient days supported.
Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume.

Patient Falls

The total number of patient falls for the reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Note: This value will automatically calculate correctly if Patient Falls has been reported at the unit level. If you are not able to report Patient Falls at the unit level, manually enter the total number of Patient Falls for all eligible units for the reporting period.

Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Rehabilitation Patient Days

Total rehabilitation patient days supported by the hospital. This includes patient days from all rehabilitation nursing units.

This is a subset of Acute Care Patient Days.
Total Activity Volume

The sum total of admissions, transfers-in, discharges, transfers-out, full day patients, and outpatient/observation visits.

Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra-unit transfers such as from a semi-private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Nursing Services Functional Rollup Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.
**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: LPN, LVN**

Hours worked by licensed practical nurse, licensed vocational nurses providing patient care services in the department.

This is a subset of Worked Hours: Staff.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Patient Care Provider**

Total hours worked by other patient care providers (e.g. nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care personnel.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.
**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Worked Hours: Staff.

**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Technician**

Total hours worked by technicians in the department. A technician generally holds a two year associates degree, and may have completed a certified training program

This is a subset of Worked Hours: Staff.

**Nursing Services Functional Rollup Mandatory Elements**

The following data elements are mandatory for this department:

- Acute Care Discharges
- Acute Care Operating Beds
- Acute Care Outpatient Observation Days
- Acute Care Patient Days
- Bed Capacity
- Labor Expense
• Labor Expense: Physician Provider
• Non Acute Bed Capacity
• Non Acute Care Discharges
• Non Acute Care Outpatient Observation Days
• Non Acute Care Patient Days
• Other Direct Operating Expense
• Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Physician Provider Professional Fee Expense
• Worked Hours: Physician Provider
• Worked Hours: Staff

G1000, Generic Nursing Services

This generic department includes any cost center(s) reporting to Nursing Services that cannot be mapped to a specific nursing unit department or a level of care generic, i.e., Other Acute Care Nursing.

Generic Nursing Services Workload Volumes

Acute Care Bed Capacity

Enter the total number of beds that are licensed, physically set up and available for service of acute patient census during the reporting period. Include beds assigned to support all acute patients, including pediatric, psychiatric and rehabilitation patients. Exclude normal newborn (Level I) nursery bassinets and beds assigned to support skilled, swing, sub acute, and or long term care patients. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as "Available Beds" or "Operating Beds."
**Acute Care Outpatient Observation Days**

Total outpatient observation hours for acute care patients divided by 24. Include true observation patient hours only. Do not include carry over patient hours, i.e. patients who are awaiting an inpatient bed.

**Acute Care Patient Days**

Total acute care patient days supported by the department, including rehabilitation and behavioral health patients. Exclude SNF and long term care patients. Exclude normal newborn days (DRG 391/MS DRG 795).

**Admissions**

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Critical Care Patient Days**

Total critical care patient days supported by the hospital. This includes critical care days from all Critical Care and Intermediate nursing units, as well as Neonate Level II and above patient days. Exclude normal newborn (Level I) patient days.

This is a subset of Acute Care Patient Days.

**Discharges**

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

**Education and Orientation Hours**

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.
**Full Day Patients**

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

**Licensed Nursing Staff**

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

**Licensed Nursing Staff Additions**

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

**Licensed Nursing Staff Separations**

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

**Non Acute Bed Capacity**

Enter the total number of beds that are licensed, physically set up and available for service of non acute patient census during the reporting period. Include beds assigned to support all non acute patients, including skilled, swing, sub acute, and or long term care patients. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as "Available Beds" or "Operating Beds."

**Non Acute Care Discharges (SNF And Swing Bed)**

Total skilled nursing, swing bed, sub-acute, and / or long-term care discharges (including deaths).

This is a subset of Patient Discharges And Transfers Out.
**Non Acute Care Outpatient Observation Days**

Total outpatient observation hours for non-acute patients divided by 24. Do not include carry over patient hours, i.e. patients who are awaiting an inpatient bed.

**Non Acute Care Patient Days**

Total skilled nursing, swing bed, sub-acute, and/or long term care patient days supported.

**Nurse Direct Care Hours Worked**

The total number of hours worked by nursing staff (RNs, LVNs/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

**Outpatient Observation Visits**

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

**Patient Discharges And Transfers Out**

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

**Patient Falls**

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

**Patient Falls with Injury**

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.
**Pressure Ulcers: Community acquired**

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

**Pressure Ulcers: Hospital acquired**

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

**Total Activity Volume**

The sum total of admissions, transfers-in, discharges, transfers-out, full day patients, and outpatient/observation visits.

**Total Reported Pressure Ulcers**

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

**Transfers In**

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Transfers Out**

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

**Generic Nursing Services Mandatory Elements**

The following data elements are mandatory for this department:

- Acute Care Outpatient Observation Days
- Acute Care Patient Days
- Average Operating Acute Beds
- Labor Expense
- Labor Expense: Physician Provider
- Non Acute Care Outpatient Observation Days
- Non Acute Care Patient Days
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff

**Generic Nursing Services Normalizations**

Exclude the hours, cost and volumes (where applicable) associated with the following functions:

- Birth certificate preparation - the time needed to complete and submit the documentation required by the state
- Case Management (manages patient care while the patient is undergoing treatment)
- Clerical support for Nursing Administration Managers or Directors
- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical Staff Educators formal classroom training time
- Environmental services functions, e.g., cleaning services
- Food Service Worker
- IV Therapy Team
• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech

• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Informatics (integration of nursing science, computer science and information science to manage and communicate data/information and knowledge/wisdom in nursing and informatics essential to the delivery of high quality, cost-effective care)

• Nursing Managers/Directors above the nursing unit management level

• Nursing Recruitment and Retention

• Operating a hospital based School of Nursing, e.g., administration and or teaching of students in a formal classroom setting to achieve a degree in a specialized field

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Repair and maintenance of patient beds and other clinical equipment

• Shift supervision for the entire house

• Social Workers

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Transplant Coordinator

• Transport of patients not requiring clinical escort

G1001, Generic Intensive Care Unit

This generic unit includes any cost center reporting to Nursing Services that cannot be mapped to an individual or specific intensive care nursing unit department.
Generic Intensive Care Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.
Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.
This is a subset of Total Activity Volume.

**Patient Days**

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

**Patient Discharges And Transfers Out**

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

**Patient Falls**

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

**Patient Falls with Injury**

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

**Pressure Ulcers: Community acquired**

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

**Pressure Ulcers: Hospital acquired**

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

**Total Activity Volume**

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.
Total Number of Stepdown Beds

The total number of stepdown beds located in the ICU. These beds are designated to provide care for patients who are stable enough to be discharged from the ICU but are not yet ready to be cared for on a general unit.

This is a subset of Bed Capacity

Total Reported Pressure Ulcers

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Ventilator Patient Days

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Patient Days.
Generic Intensive Care Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Total Number of Stepdown Beds
- Worked Hours: Physician Provider
- Worked Hours: Staff

Generic Intensive Care Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators who perform unit/department specific training
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Case Management (manages patient care while the patient is undergoing treatment)
• Clerical support for Nursing Administration Managers or Directors

• Clinical Staff Educators formal classroom training time

• Environmental services functions, e.g., cleaning services

• Food Service Worker

• IV Therapy Team

• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech

• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Managers/Directors above the nursing unit management level

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Repair and maintenance of patient beds and other clinical equipment

• Shift supervision for the entire house

• Social Workers

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Transplant Coordinator

• Transport of patients not requiring clinical escort

**G1101, Generic Intermediate Care Unit**

This generic unit includes any cost center reporting to Nursing Services that cannot be mapped to an individual or specific intermediate or step-down care nursing unit department.

**Generic Intermediate Care Unit Workload Volumes**
Admissions
The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity
Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges
Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours
Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients
Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff
Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.
Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.
**Patient Discharges And Transfers Out**

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

---

**Patient Falls**

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

---

**Patient Falls with Injury**

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

---

**Pressure Ulcers: Community acquired**

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

---

**Pressure Ulcers: Hospital acquired**

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

---

**Total Activity Volume**

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

---

**Total Reported Pressure Ulcers**

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.
Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Ventilator Patient Days

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Patient Days.

Generic Intermediate Care Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Patient Days
• Physician Provider Professional Fee Expense
• Worked Hours: Physician Provider
• Worked Hours: Staff

**Generic Intermediate Care Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care

• Clinical/nursing staff acting as educators who perform unit/department specific training

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Case Management

• Clerical support for Nursing Administration Managers or Directors

• Clinical Staff Educators formal classroom training time

• Environmental services functions, e.g., cleaning services

• Food Service Worker

• IV Therapy Team

• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech

• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Managers/Directors above the nursing unit management level
• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Repair and maintenance of patient beds and other clinical equipment

• Shift supervision for the entire house

• Social Workers

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Transplant Coordinator

• Transport of patients not requiring clinical escort

G1201, Generic Acute Care Unit

This generic department includes any cost center reporting to Nursing Services that cannot be mapped to an individual or specific acute care nursing unit department.

Generic Acute Care Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.
Discharges
Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours
Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients
Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff
Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions
The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations
Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.
Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume.

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.
**Patient Falls with Injury**

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

**Pressure Ulcers: Community acquired**

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

**Pressure Ulcers: Hospital acquired**

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

**Total Activity Volume**

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

**Total Reported Pressure Ulcers**

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

**Transfers In**

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Transfers Out**

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.
**Generic Acute Care Unit Mandatory Elements**

The following data elements are mandatory for this department:

- Bed Capacity
- Discharges
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff

**Generic Acute Care Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators who perform unit/department specific training
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Case Management (manages patient care while the patient is undergoing treatment)
• Clerical support for Nursing Administration Managers or Directors
• Clinical Staff Educators formal classroom training time
• Environmental services functions, e.g., cleaning services
• Food Service Worker
• IV Therapy Team
• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech
• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs
• Nursing Managers/Directors above the nursing unit management level
• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
• Repair and maintenance of patient beds and other clinical equipment
• Shift supervision for the entire house
• Social Workers
• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
• Transplant Coordinator
• Transport of patients not requiring clinical escort

**G1301, Generic Behavioral Health Unit**

This generic department includes any cost center reporting to Nursing Services that cannot be mapped to an individual or specific behavioral health care nursing unit department.
Generic Behavioral Health Unit Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Electro Convulsive Therapy Treatments

Total ECT treatments provided.
Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Intensive Care Patient Days

Total patient days from patients requiring constant observation.

This is a subset of Patient Days.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.
Nurse Direct Care Hours Worked
The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Outpatient Observation Visits
Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Outpatient or Day Treatment Days
Total outpatient partial day therapy hours on the Unit divided by 24.

Patient Days
The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out
Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume.

Total Activity Volume
The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Transfers In
Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.
Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Generic Behavioral Health Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff

Generic Behavioral Health Unit Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators who perform unit/department specific training
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)
Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Case Management (manages patient care while the patient is undergoing treatment)
- Clerical support for Nursing Administration Managers or Directors
- Clinical Staff Educators formal classroom training time
- Environmental services functions, e.g., cleaning services
- Food Service Worker
- IV Therapy Team
- Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech
- Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs
- Nursing Managers/Directors above the nursing unit management level
- Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
- Repair and maintenance of patient beds and other clinical equipment
- Shift supervision for the entire house
- Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience
- Transport of patients not requiring clinical escort

G1401, Generic Rehabilitation Unit

This generic department includes any cost center reporting to Nursing Services that cannot be mapped to an individual or specific rehabilitation care nursing unit department.

Generic Rehabilitation Unit Workload Volumes
Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Brain Stem Patient Days

Total patient days from patients recovering from severe brain stem trauma impairment.

This is a subset of Rehabilitation Patient Days.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.
This is a subset of Total Activity Volume.

**Head Injury Patient Days**
Total patient days from patients recovering from severe head trauma impairment.
This is a subset of Rehabilitation Patient Days.

**Licensed Nursing Staff**
Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

**Licensed Nursing Staff Additions**
The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

**Licensed Nursing Staff Separations**
Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

**Minimum Staffing Level**
Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

**Muscular Skeletal Patient Days**
Total patient days from patients recovering from severe muscular-skeletal impairment.
This is a subset of Patient Days.

**Nurse Direct Care Hours Worked**
The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.
Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Outpatient or Day Treatment Days

Total outpatient partial day therapy hours on the Unit divided by 24.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.
This is a subset of Total Reported Pressure Ulcers.

**Stroke Patient Days**

Total patient days from patients recovering from a cerebral accident (stroke; MS DRG 064, 065, 066, 067, 068) impairment.

This is a subset of Patient Days.

**Total Activity Volume**

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

**Total Reported Pressure Ulcers**

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

**Transfers In**

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Transfers Out**

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

**Generic Rehabilitation Unit Mandatory Elements**

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
Generic Rehabilitation Unit Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
- Clinical/nursing staff acting as educators who perform unit/department specific training
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Case Management (manages patient care while the patient is undergoing treatment)
- Clerical support for Nursing Administration Managers or Directors
- Clinical Staff Educators formal classroom training time
- Environmental services functions, e.g., cleaning services
- Food Service Worker
- IV Therapy Team
- Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech
• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Managers/Directors above the nursing unit management level

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Repair and maintenance of patient beds and other clinical equipment

• Shift supervision for the entire house

• Social Workers

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Transplant Coordinator

• Transport of patients not requiring clinical escort

**G1501, Generic Non Acute Care Unit**

This generic department includes any cost center reporting to Nursing Services that cannot be mapped to an individual or specific non acute care nursing unit department.

**Generic Non Acute Care Unit Workload Volumes**

**Admissions**

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

**Bed Capacity**

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.
Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.
Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

New Admissions

Total new resident admissions to facility.

This is a subset of Admissions.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVNs/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume
Patient Falls
The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury
Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Pressure Ulcers: Community acquired
Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired
Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Resident Assessment Instruments (RAIs) Completed
Total number of resident assessment instruments (RAIs) completed 14 days following initial admission.

Total Activity Volume
The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Reported Pressure Ulcers
Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

Transfers In
Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).
This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Generic Non Acute Care Unit Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff

Generic Non Acute Care Unit Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
• Clinical/nursing staff acting as educators who perform unit/department specific training

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Case Management (manages patient care while the patient is undergoing treatment)

• Clerical support for Nursing Administration Managers or Directors

• Clinical Staff Educators formal classroom training time

• Environmental services functions, e.g., cleaning services

• Food Service Worker

• IV Therapy Team

• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech

• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Managers/Directors above the nursing unit management level

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Repair and maintenance of patient beds and other clinical equipment

• Shift supervision for the entire house

• Social Workers

• Student nurses or externs (not providing direct patient care) assigned to the unit for clinical experience

• Transplant Coordinator

• Transport of patients not requiring clinical escort
I1000, Intensive Care Units Intermediate Rollup

The intermediate rollup is automatically generated when an intensive care unit instance is created. This includes all intensive care units: 01010, 01011, 01012, 01013, 01014, 01016, 01020, 01021, 01022, 01023, 01024, 01025, 01035, 01060, and G1001.

Intensive Care Units Intermediate Rollup Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.
Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.
**Outpatient Observation Days**

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

**Outpatient Observation Visits**

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

**Patient Days**

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

**Patient Discharges And Transfers Out**

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

**Patient Falls**

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

**Patient Falls with Injury**

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

**Pressure Ulcers: Community acquired**

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.
Pressure Ulcers: Hospital acquired
Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Stroke Patient Days
Total patient days from patients recovering from a cerebral accident (stroke; MS DRG 064, 065, 066, 067, 068) impairment.

This is a subset of Patient Days.

Total Activity Volume
The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Number of Stepdown Beds
The total number of stepdown beds located in the ICU. These beds are designated to provide care for patients who are stable enough to be discharged from the ICU but are not yet ready to be cared for on a general unit.

This is a subset of Bed Capacity

Total Reported Pressure Ulcers
Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

Transfers In
Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out
Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.
This is a subset of Patient Discharges and Transfers Out.

**Ventilator Patient Days**

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be \(\frac{500}{6} = 83.3\) Vent Days. If the department billed in 8 hour increments, the conversion would be \(\frac{500}{3} = 166.6\) Vent Days, if the department billed in 12 hour increments, the conversion would be \(\frac{500}{2} = 250\) etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Patient Days.

**Intensive Care Units Intermediate Rollup Mandatory Elements**

The following data elements are mandatory for this department:

- Bed Capacity
- Discharges
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Total Number of Stepdown Beds
- Worked Hours: Physician Provider
- Worked Hours: Staff
Intensive Care Units Intermediate Rollup Expense Elements

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. This includes patient chargeable and department consumable (non-chargeable) items, non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total expense for the department non medical operating supplies, (e.g., equipment lubricants, office supplies, distribution supplies, and small non capitalized) equipment.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.
Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense

Total contract expense for physicians, advanced practitioners and physician groups which provide professional services to the department. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

I1100, Intermediate Care Units Intermediate Rollup

This department includes all intermediate care nursing units: 01110, 01111, 01112, 01122, 01123, 01160 and G1101.

Intermediate Care Units Intermediate Rollup Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.
Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.
Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.
Pressure Ulcers: Community acquired
Total number of pressure ulcers Stage II or greater identified and recorded on admission.
This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired
Total number of pressure ulcers Stage II or greater that developed after admission to the facility.
This is a subset of Total Reported Pressure Ulcers.

Total Activity Volume
The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Reported Pressure Ulcers
Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period.
Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

Transfers In
Total number of patients transferred in to this patient care unit from another hospital patient care unit.
Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).
This is a subset of Total Activity Volume.

Transfers Out
Total number of inpatients transferred out of this patient care unit to another hospital patient care unit.
Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.
This is a subset of Patient Discharges and Transfers Out.
**Ventilator Patient Days**

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Patient Days.

**Intermediate Care Units Intermediate Rollup Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. This includes patient chargeable and department consumable (non chargeable) items, non capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.
**Non Medical Supply Expense**

Total expense for the department non medical operating supplies, (e.g., equipment lubricants, office supplies, distribution supplies, and small non capitalized) equipment.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total contract expense for physicians, advanced practitioners and physician groups which provide professional services to the department. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Intermediate Care Units Intermediate Rollup Mandatory Elements**

The following data elements are mandatory for this department:

- Bed Capacity
- Discharges
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
• Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Patient Days
• Physician Provider Professional Fee Expense
• Worked Hours: Physician Provider
• Worked Hours: Staff

I1200, General Acute Care Units Intermediate Rollup

This department includes all general acute care nursing units: 01210, 01211, 01212, 01213, 01214, 01234, 01235, 01238, 01239, 01240, 01260, 01261 and G1201.

General Acute Care Units Intermediate Rollup Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).
This is a subset of Patient Discharges and Transfers Out.

**Education and Orientation Hours**

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

**Full Day Patients**

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

**Licensed Nursing Staff**

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

**Licensed Nursing Staff Additions**

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

**Licensed Nursing Staff Separations**

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

**Nurse Direct Care Hours Worked**

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.
Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.
Pressure Ulcers: Hospital acquired
Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Stroke Patient Days
Total patient days from patients recovering from a cerebral accident (stroke; MS DRG 064, 065, 066, 067, 068) impairment.

This is a subset of Patient Days.

Total Activity Volume
The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Reported Pressure Ulcers
Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

Transfers In
Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out
Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.
General Acute Care Units Intermediate Rollup Expense Elements

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. This includes patient chargeable and department consumable (non chargeable) items, non capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total expense for the department non medical operating supplies, (e.g., equipment lubricants, office supplies, distribution supplies, and small non capitalized) equipment.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.
Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense

Total contract expense for physicians, advanced practitioners and physician groups which provide professional services to the department. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

General Acute Care Units Intermediate Rollup Mandatory Elements

The following data elements are mandatory for this department:

- Bed Capacity
- Discharges
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff
I1300, Behavioral Health Units Intermediate Rollup

This department includes all behavioral health care nursing units: 01350, 01360, 01390, and G1301.

Behavioral Health Units Intermediate Rollup Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Detoxification Care Patient Days

Total patient days from patients in detoxification therapy.

This is a subset of Patient Days.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.
Electro Convulsive Therapy Treatments

Total ECT treatments provided.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Intensive Care Patient Days

Total patient days from patients requiring constant observation.

This is a subset of Patient Days.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.
Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Outpatient or Day Treatment Days

Total outpatient partial day therapy hours on the Unit divided by 24.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.
Behavioral Health Units Intermediate Rollup Expense Elements

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. This includes patient chargeable and department consumable (non chargeable) items, non capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non medical operating supplies, (e.g., equipment lubricants, office supplies, distribution supplies, and small non capitalized) equipment.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.
**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total contract expense for physicians, advanced practitioners, and physician groups which provide professional services to the department. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Behavioral Health Units Intermediate Rollup Mandatory Elements**

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Days
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff
I1400, Rehabilitation Care Intermediate Rollup

This department includes all rehabilitation care nursing units mapped to the 01410 and G1401.

Rehabilitation Care Intermediate Rollup Workload Volumes

Admissions

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Brain Stem Patient Days

Total patient days from patients recovering from severe brain stem trauma impairment.

This is a subset of Rehabilitation Patient Days.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.
Full Day Patients
Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Head Injury Patient Days
Total patient days from patients recovering from severe head trauma impairment.

This is a subset of Rehabilitation Patient Days.

Licensed Nursing Staff
Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions
The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations
Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level
Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

Muscular Skeletal Patient Days
Total patient days from patients recovering from severe muscular-skeletal impairment.

This is a subset of Patient Days.
Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Other Patient Days

Total patient days from patients recovering from other physical impairments not listed above.

This is a subset of Rehabilitation Patient Days.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Outpatient or Day Treatment Days

Total outpatient partial day therapy hours on the Unit divided by 24.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.

Patient Discharges And Transfers Out

Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.
Patient Falls with Injury

Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Patient Specialty %

Enter the percentage (as a whole number) of the patient population that represents the unit's specialty for the reporting period.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Stroke Patient Days

Total patient days from patients recovering from a cerebral accident (stroke; MS DRG 064, 065, 066, 067, 068) impairment.

This is a subset of Patient Days.

Total Activity Volume

The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Reported Pressure Ulcers

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.
Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Rehabilitation Care Intermediate Rollup Expense Elements

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advanced practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. This includes patient chargeable and department consumable (non chargeable) items, non capitalized medical / surgical supplies and pharmaceuticals.
This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non medical operating supplies, (e.g., equipment lubricants, office supplies, distribution supplies, and small non capitalized) equipment.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total contract expense for physicians, advanced practitioners and physician groups which provide professional services to the department. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Rehabilitation Care Intermediate Rollup Mandatory Elements**

The following data elements are mandatory for this department:

- Clinical Service Workload Units
- Drug Expense
- Days of Operation per Week
- Hours of Operation per Week
- Inpatient Gross Charges
• Labor Expense
• Medical Supply Expense
• Non Medical Supply Expense
• Other Direct Operating Expense
• Outpatient Gross Charges
• Paid Hours: Contract Labor
• Pharmacy Intensity Score: Outpatient
• Pharmacy Intensity Score: Inpatient
• Paid Hours: Staff
• Pharmacy Intensity Score
• Worked Hours: Pharmacy Resident
• Worked Hours: Staff

**I1500, Non Acute Care Unit Intermediate Rollup**

This department includes all Non Acute Care nursing units from the following profiles: 01530, 01535, 01550, 01570, and G1501.

**Non Acute Care Unit Intermediate Rollup Workload Volumes**

**Admissions**

The total number of patients admitted to the unit during the reporting period. Report transfers from another unit under the element "Transfers In". Admissions excludes ambulatory surgery, observation patients, and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.
Bed Capacity

Enter the total number of beds that are physically set up and available for use on the unit during the reporting period. These are beds regularly maintained in the hospital for the use of patients (inpatient or observation), and which furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed but are physically available, thus beds in a partially closed area of the unit would be counted only if the hospital put the beds into use when they are needed. This is also known as Available Beds.

Discharges

Total number of patients discharged from the cost center(s) during the reporting period. Include all patients released from hospital care from these cost center(s) through a formal notification process. In addition, deaths, transfers to a different health care institution, and patients who leave the hospital against medical advice or without formal notification are included as discharges. Discharges excludes ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Patient Discharges and Transfers Out.

Education and Orientation Hours

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Full Day Patients

Total patients who remained for a full day (midnight on one day to midnight on the next) on the unit. Count each patient day where the patient was not admitted or transferred and also was not discharged or transferred out. Note that this count is not the same as midnight census, since midnight census will include patients admitted and transferred in on that same day. If you are unable to capture this workload volume leave blank, do not estimate.

This is a subset of Total Activity Volume.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.
Licensed Nursing Staff Separations

Total number of voluntary uncontrolled separations during the reporting period. This includes full-time and part-time RNs, LPNs, and LVNs who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

Minimum Staffing Level

Minimum number of personnel assigned to the unit for any shift during periods of lowest patient occupancy.

New Admissions

Total new resident admissions to facility.

This is a subset of Admissions.

Nurse Direct Care Hours Worked

The total number of hours worked by nursing staff (RNs, LVN/LPNs, and UAPs) that had direct patient care responsibilities for greater than 50% of their shift. Include nursing staff employed directly by the facility and contract/agency staff. UAPs are Unlicensed Assistive Personnel, also known as Nurse Assistants, Nurse Techs, or Nurse Aides. This value should be consistent with the value reported to NDNQI (National Database of Nursing Quality Indicators). The value reported does not include sick time, vacation, leave, orientation, education, and committee time.

Outpatient Observation Days

Total outpatient observation hours divided by 24. Include true observation patient hours only (hours spent by patients in the department and cared for by department staff as outpatients under observation i.e. HCPCS code G0378 Observation services, per hour). If you are able to track the length of time an Outpatient spends on the unit regardless of billing as observation status, you may include the hours here. Do not include carry over patient hours, i.e. patients who are waiting for an inpatient bed.

Outpatient Observation Visits

Total outpatient observation patients reported as a head count regardless of how long patients stayed on the unit. Observation patients may be waiting for evaluation for admission, waiting for a procedure, or recovering from a procedure.

This is a subset of Total Activity Volume.

Patient Days

The total number of patient days excluding normal newborn (MS DRG 795) patient days.
Patient Discharges And Transfers Out
Total patient discharges and transfers out (including deaths). If unavailable, patient admissions and transfers in may be used.

This is a subset of Total Activity Volume

Patient Falls
The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI as an unplanned descent to the floor. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury
Total of all patient falls which resulted in an injury, regardless of severity. See NDNQI for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

This is a subset of Patient Falls.

Pressure Ulcers: Community acquired
Total number of pressure ulcers Stage II or greater identified and recorded on admission.

This is a subset of Total Reported Pressure Ulcers.

Pressure Ulcers: Hospital acquired
Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

This is a subset of Total Reported Pressure Ulcers.

Resident Assessment Instruments (RAIs) Completed
Total number of resident assessment instruments (RAIs) completed 14 days following initial admission.

Total Activity Volume
The sum total of admissions, transfers in, discharges, transfers out, full day patients, outpatient and observation visits.

Total Reported Pressure Ulcers
Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.
Transfers In

Total number of patients transferred in to this patient care unit from another hospital patient care unit. Each patient transfer during a hospital stay is counted individually, however intra-unit transfers are excluded (such as from a semi-private to a private room within the same unit). Report transfers in from another facility under the element "Admissions". Exclude ambulatory surgery, observation patients and normal newborns (MS DRG 795).

This is a subset of Total Activity Volume.

Transfers Out

Total number of inpatients transferred out of this patient care unit to another hospital patient care unit. Each patient transfer during a hospital stay is counted individually. Exclude intra unit transfers such as from a semi private to a private room within the unit. Report transfers to another facility as discharges. Exclude observation patients.

This is a subset of Patient Discharges and Transfers Out.

Non Acute Care Unit Intermediate Rollup Expense Elements

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. This includes patient chargeable and department consumable (non chargeable) items, non capitalized medical / surgical supplies and pharmaceuticals.
This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non medical operating supplies, (e.g., equipment lubricants, office supplies, distribution supplies, and small non capitalized) equipment.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total contract expense for physicians, advanced practitioners and physician groups which provide professional services to the department. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Non Acute Care Unit Intermediate Rollup Mandatory Elements**

The following data elements are mandatory for this department:

- Bed Capacity
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Outpatient Observation Days
Nursing Services Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: LPN, LVN

Hours worked by licensed practical nurse, licensed vocational nurses providing patient care services in the department.

This is a subset of Worked Hours: Staff.
Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Patient Care Provider

Total hours worked by other patient care providers (e.g. nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care personnel.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Physician Provider

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Worked Hours: Staff.

Worked Hours: RN

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.
This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Nursing Services Expense Elements

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. This includes patient chargeable and department consumable (non chargeable) items, non capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total dollars payable to vendors for stocked and non stocked operating supplies. This includes, but is not limited to, replacement linens, uniforms, food, replacement dietary items (i.e. glassware, silverware, etc.), cleaning products and general office and computer supplies. Include all non capitalized operating supplies.

This is a subset of Other Direct Operating Expense.
Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total dollars paid to all nonexempt, non-provider staff for overtime hours worked. The value reported reflects payments of at least time-and-one-half of the regular rate for hours worked over the employee’s normal work schedule (40 hour workweek, or 8-80 workweek). This value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense

Total contract expense for physicians, advanced practitioners and physician groups which provide professional services to the department. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Nursing Services Normalizations

The following are lists of normalizations based on general groupings of Nursing departments. Normalizations for departments that are missing from the groupings below are unique and can be found under the individual departments. A complete list of normalizations can also be found on the Support tab of ActionOI.

Administrative and Nurse Staffing Normalizations

The normalizations for the departments within this series:

- 01910, Nursing Administration
- 01911, Nurse Staffing Office

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clerical support for Nursing Administration Managers or Directors
• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Managers/Directors above the nursing unit management level

• Shift supervision for the entire house

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Case Management

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, and or wound care

• Clinical Staff Educators formal classroom training time

• Nursing Informatics (integration of nursing science, computer science and information science to manage and communicate data/information and knowledge/wisdom in nursing and informatics essential to the delivery of high quality, cost-effective care)

• Nursing Recruitment and Retention

• Operating a hospital based School of Nursing, e.g., administration and or teaching of students in a formal classroom setting to achieve a degree in a specialized field

• Transplant Coordinator

Cardiac Intensive Care Unit

The normalizations for the departments within this series:

• 01022, Cardiac Intensive Care Unit

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care

• Clinical/nursing staff acting as educators who perform unit/department specific training

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Case Management
• Clerical support for Nursing Administration Managers or Directors
• Environmental services functions, e.g., cleaning services
• Food Service Worker
• IV Therapy Team
• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech
• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs
• Nursing Managers/Directors above the nursing unit management level
• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens (infants may require heel sticks) which are sent to the laboratory for analysis and testing. Does not include line draws.
• Repair and maintenance of patient beds and other clinical equipment
• Shift supervision for the entire house
• Social Workers
• Student nurses or externs assigned to the unit for clinical experience
• Transplant Coordinator
• Transport of patients not requiring clinical escort

**Bone Marrow Transplant Intensive Care Unit**

The normalizations for the departments within this series:

• 01020, Bone Marrow Transplant Intensive Care Unit

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialties providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
• Clinical/nursing staff acting as educators who perform unit/department specific training
• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:
• Case Management

• Clerical support for Nursing Administration Managers or Directors

• Environmental services functions, e.g., cleaning services

• Food Service Worker

• IV Therapy Team

• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech

• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Managers/Directors above the nursing unit management level

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens (infants may require heel sticks) which are sent to the laboratory for analysis and testing. Does not include line draws.

• Repair and maintenance of patient beds and other clinical equipment

• Shift supervision for the entire house

• Social Workers

• Student nurses or externs assigned to the unit for clinical experience

• Transplant Coordinator

• Transport of patients not requiring clinical escort

**Burn Care Intensive Care Unit**

The normalizations for the departments within this series:

• 01020, Burn Care Intensive Care Unit

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care

• Clinical/nursing staff acting as educators who perform unit/department specific training
• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Case Management

• Clerical support for Nursing Administration Managers or Directors

• Environmental services functions, e.g., cleaning services

• Food Service Worker

• IV Therapy Team

• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech

• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Managers/Directors above the nursing unit management level

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens (infants may require heel sticks) which are sent to the laboratory for analysis and testing. Does not include line draws.

• Repair and maintenance of patient beds and other clinical equipment

• Shift supervision for the entire house

• Social Workers

• Student nurses or externs assigned to the unit for clinical experience

• Transplant Coordinator

• Transport of patients not requiring clinical escort

**General Acute Care Units**

The normalizations for the departments within this series:

• 01210, Medical/Surgical IP Unit

• 01211, General Medical Unit

• 01212, Gen Surg Acute Care Unit
• 01213, Med/Surg/Cardiac Acute
• 01214, Med/Surg/Oncology Acute Care Unit
• 01234, Nephrology Unit
• 01235, Neuro/Neurosurg Unit
• 01238, Oncology Unit
• 01239, Orthopedic/Neurology Unit
• 01240, Orthopedic Unit
• 01260, Pediatric Acute Care Unit
• 01261, Pediatric Oncology Unit
• G1201, Generic Acute Care Unit

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, and or wound care
• Clinical/nursing staff acting as educators who perform unit/department specific training
• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Case Management
• Clerical support for Nursing Administration Managers or Directors
• Clinical Staff Educators formal classroom training time
• Environmental services functions, e.g., cleaning services
• Food Service Worker
• IV Therapy Team
• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech
• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Managers/Directors above the nursing unit management level

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens (infants may require heel sticks) which are sent to the laboratory for analysis and testing

• Repair and maintenance of patient beds and other clinical equipment

• Shift supervision for the entire house

• Social Workers

• Student nurses or externs assigned to the unit for clinical experience

• Transplant Coordinator

• Transport of patients not requiring clinical escort

**Intensive Care Units**

The normalizations for the departments within this series:

• 01010, Med/Surg ICU

• 01011, Medical ICU

• 01012, Surgical ICU

• 01013, Med/Surg/Card ICU

• 01014, Medical/Cardiac ICU

• 01016, Trauma ICU

• 01020, Bone Marrow Transplant ICU

• 01021, Burn Care ICU

• 01022, Cardiac ICU

• 01023, Cardiovasc Surg ICU

• 01024, Cardio/Thor ICU w/o Transplant

• 01025, Cardio/Thoracic ICU w Transplant
• 01035, Neuro/Neurosurg ICU
• 01060, Pediatric ICU

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, and or wound care
• Clinical/nursing staff acting as educators who perform unit/department specific training
• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Case Management
• Clerical support for Nursing Administration Managers or Directors
• Clinical Staff Educators formal classroom training time
• Environmental services functions, e.g., cleaning services
• Food Service Worker
• IV Therapy Team
• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech
• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs
• Nursing Managers/Directors above the nursing unit management level
• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens (infants may require heel sticks) which are sent to the laboratory for analysis and testing
• Repair and maintenance of patient beds and other clinical equipment
• Shift supervision for the entire house
• Social Workers
• Student nurses or externs assigned to the unit for clinical experience
• Transplant Coordinator
• Transport of patients not requiring clinical escort

**Intermediate Care Units**

The normalizations for the departments within this series:

• 01110, Med/Surg Intermediate Unit
• 01111, Med/Surg/Card Intermediate Unit
• 01112, Resp Intermed Unit
• 01122, Cardiac Intermed Unit
• 01123, Transplant Intermed Unit
• 01160, Pediatric Intermed Unit

Include the hours, costs and volumes (where applicable) associated with the following functions

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
• Clinical/nursing staff acting as educators who perform unit/department specific training
• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions

• Case Management
• Clerical support for Nursing Administration Managers or Directors
• Clinical Staff Educators formal classroom training time
• Environmental services functions, e.g., cleaning services
• Food Service Worker
• IV Therapy Team
• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech
• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs
• Nursing Managers/Directors above the nursing unit management level
• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens (infants may require heel sticks) which are sent to the laboratory for analysis and testing
• Repair and maintenance of patient beds and other clinical equipment
• Shift supervision for the entire house
• Social Workers
• Student nurses or externs assigned to the unit for clinical experience
• Transplant Coordinator
• Transport of patients not requiring clinical escort

Med/Surg/Cardiac Intensive Care Unit

The normalizations for the departments within this series:

• 01013, Med/Surg/Cardiac Intensive Care Unit

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
• Clinical/nursing staff acting as educators who perform unit/department specific training
• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Case Management
• Clerical support for Nursing Administration Managers or Directors
• Environmental services functions, e.g., cleaning services
• Food Service Worker
• IV Therapy Team
• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech
• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Managers/Directors above the nursing unit management level

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens (infants may require heel sticks) which are sent to the laboratory for analysis and testing. Does not include line draws.

• Repair and maintenance of patient beds and other clinical equipment

• Shift supervision for the entire house

• Social Workers

• Student nurses or externs assigned to the unit for clinical experience

• Transplant Coordinator

• Transport of patients not requiring clinical escort

**Medical Intensive Care Unit**

The normalizations for the departments within this series:

• 01011, Medical Intensive Care Unit

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care

• Clinical/nursing staff acting as educators who perform unit/department specific training

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Case Management

• Clerical support for Nursing Administration Managers or Directors

• Environmental services functions, e.g., cleaning services

• Food Service Worker

• IV Therapy Team
• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech

• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Managers/Directors above the nursing unit management level

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens (infants may require heel sticks) which are sent to the laboratory for analysis and testing. Does not include line draws.

• Repair and maintenance of patient beds and other clinical equipment

• Shift supervision for the entire house

• Social Workers

• Student nurses or externs assigned to the unit for clinical experience

• Transplant Coordinator

• Transport of patients not requiring clinical escort

**Medical/Cardiac Intensive Care Unit**

The normalizations for the departments within this series:

• 01014, Medical/Cardiac Intensive Care Unit

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care

• Clinical/nursing staff acting as educators who perform unit/department specific training

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Case Management

• Clerical support for Nursing Administration Managers or Directors

• Environmental services functions, e.g., cleaning services
• Food Service Worker
• IV Therapy Team
• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech
• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs
• Nursing Managers/Directors above the nursing unit management level
• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens (infants may require heel sticks) which are sent to the laboratory for analysis and testing. Does not include line draws.
• Repair and maintenance of patient beds and other clinical equipment
• Shift supervision for the entire house
• Social Workers
• Student nurses or externs assigned to the unit for clinical experience
• Transplant Coordinator
• Transport of patients not requiring clinical escort

**Medical/Surgical Intensive Care Unit**

The normalizations for the departments within this series:

• 01010, Medical/Surgical Intensive Care Unit

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care
• Clinical/nursing staff acting as educators who perform unit/department specific training
• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Case Management
• Clerical support for Nursing Administration Managers or Directors
• Clinical Staff Educators formal classroom training time
• Environmental services functions, e.g., cleaning services
• Food Service Worker
• IV Therapy Team
• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech
• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs
• Nursing Managers/Directors above the nursing unit management level
• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens (infants may require heel sticks) which are sent to the laboratory for analysis and testing. Does not include line draws.
• Repair and maintenance of patient beds and other clinical equipment
• Shift supervision for the entire house
• Social Workers
• Student nurses or externs assigned to the unit for clinical experience
• Transplant Coordinator
• Transport of patients not requiring clinical escort

Non-Acute Care Units

The normalizations for the departments within this series:

• 01530, Skilled Nursing Unit
• 01535, Subacute Nursing Unit
• 01550, Long Term Care Unit
• 01570, Hospice / Palliative Care Unit

Include the hours, costs and volumes (where applicable) associated with the following functions:
• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, and or wound care

• Clinical/nursing staff acting as educators who perform unit/department specific training

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Case Management

• Clerical support for Nursing Administration Managers or Directors

• Clinical Staff Educators formal classroom training time

• Environmental services functions, e.g., cleaning services

• Food Service Worker

• IV Therapy Team

• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech

• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Managers/Directors above the nursing unit management level

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens (infants may require heel sticks) which are sent to the laboratory for analysis and testing

• Repair and maintenance of patient beds and other clinical equipment

• Shift supervision for the entire house

• Social Workers

• Student nurses or externs assigned to the unit for clinical experience

• Transplant Coordinator

• Transport of patients not requiring clinical escort

**Psychiatric Care Units**

The normalizations for the departments within this series:
- 01350, Peds/Adolescent Behavioral Health Unit
- 01360, Chemical Dependency Unit
- 01390, Psychiatric Unit

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, and or wound care
- Clinical/nursing staff acting as educators who perform unit/department specific training
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Case Management
- Clerical support for Nursing Administration Managers or Directors
- Clinical Staff Educators formal classroom training time
- Environmental services functions, e.g., cleaning services
- Food Service Worker
- IV Therapy Team
- Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech
- Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs
- Nursing Managers/Directors above the nursing unit management level
- Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens (infants may require heel sticks) which are sent to the laboratory for analysis and testing
- Repair and maintenance of patient beds and other clinical equipment
- Shift supervision for the entire house
- Student nurses or externs assigned to the unit for clinical experience
- Transport of patients not requiring clinical escort
Rehabilitation Care Units

The normalizations for the departments within this series:

- 01410, Acute Rehabilitation Unit

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, and or wound care
- Clinical/nursing staff acting as educators or 'preceptors' who perform training on the unit/department
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Case Management
- Clinical Staff Educators formal classroom training time
- Environmental services functions, e.g., cleaning services
- Food Service Worker
- IV Therapy Team
- Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech
- Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs
- Nursing Managers/Directors above the nursing unit management level
- Phlebotomy, e.g., drawing blood by making an incision in the patients vein (infants may require heel sticks) and sending/taking the blood specimens to the laboratory to prepare for testing
- Repair and maintenance of patient beds and other clinical equipment
- Shift supervision for the entire house
- Social Workers
- Student nurses or externs assigned to the unit for clinical experience
- Transplant Coordinator
• Transport of patients not requiring clinical escort

**Surgical Intensive Care Unit**

The normalizations for the departments within this series:

• 01012, Surgical Intensive Care Unit

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care

• Clinical/nursing staff acting as educators who perform unit/department specific training

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Case Management

• Clerical support for Nursing Administration Managers or Directors

• Environmental services functions, e.g., cleaning services

• Food Service Worker

• IV Therapy Team

• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech

• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs

• Nursing Managers/Directors above the nursing unit management level

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens (infants may require heel sticks) which are sent to the laboratory for analysis and testing. Does not include line draws.

• Repair and maintenance of patient beds and other clinical equipment

• Shift supervision for the entire house

• Social Workers
• Student nurses or externs assigned to the unit for clinical experience
• Transplant Coordinator
• Transport of patients not requiring clinical escort

**Trauma Intensive Care Unit**

The normalizations for the departments within this series:

• 01016, Trauma Intensive Care Unit

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Clinical Nurse Specialists providing care to patient within this department, e.g., critical, cardiac, pain, pediatric, psychiatric, wound care

• Clinical/nursing staff acting as educators who perform unit/department specific training

• Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Case Management
• Clerical support for Nursing Administration Managers or Directors
• Environmental services functions, e.g., cleaning services
• Food Service Worker
• IV Therapy Team
• Monitor Technicians, including any staff performing telemetry monitoring functions in lieu of a Monitor Tech
• Nurse scheduling coordination, allocation of nursing staff resources, and balancing the nursing staff to patient and unit needs
• Nursing Managers/Directors above the nursing unit management level
• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens (infants may require heel sticks) which are sent to the laboratory for analysis and testing. Does not include line draws.
• Repair and maintenance of patient beds and other clinical equipment
• Shift supervision for the entire house
• Social Workers
• Student nurses or externs assigned to the unit for clinical experience
• Transplant Coordinator
• Transport of patients not requiring clinical escort
Chapter 28. Other Clinical Support Services

For an annotated list of Characteristic Questions for this series, please see the ActionOI support page.

This chapter includes the following sections:

- 04620, Orthotics and Prosthetics Services 1661
- 04630, Endoscopy (GI) Laboratory 1666
- 04640, Hematology Oncology Infusion Therapy (Hema/Onc) 1674
- 04642, Pediatric Hematology Oncology Infusion Therapy (Peds) 1680
- 04644, Hematology Infusion Therapy (Hema) 1686
- 04650, Lithotriptor Center 1692
- 04665, Pre Admission / Pre Procedure Testing 1697
- G4600, Other Clinical Services 1701
- Other Clinical Support Services Worksheets 1705

04620, Orthotics and Prosthetics Services

The Orthotics/Prosthetics department provides custom orthotic and/or prosthetic devices to patients in accordance with a physician-prescribed order.

Orthotics and Prosthetics Workload Volumes

Inpatient Visits

The total number of separate visits made by an orthotics and prosthetics health care professional to the inpatient bedside.

This is a subset of Total Patient Visits.
Orthotic Prescriptions

Orthotic Prescriptions is the unique number of physician prescribed orders for a new orthotic devices or for a repair of an existing orthotic device which is past warranty.

This is a subset of Total Prescriptions.

Outpatient Visits

The total number of outpatient visits seen for an orthotics and prosthetics appointment.

This is a subset of Total Patient Visits.

Patient Visits

Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. If the patient is seen by multiple providers (e.g., physician, dietitian, social worker) during the same visit the count should be recorded as one visit.

Prosthetic Prescriptions

Prosthetic Prescriptions is the unique number of physician prescribed orders for new prosthetic or devices or for a repair of an existing prosthetic device which is past warranty.

This is a subset of Total Prescriptions.

Total Prescriptions

Total prescriptions is the unique number of physician prescribed orders for new orthotic or prosthetic devices or for a repair of an existing device which is past warranty.

Orthotics and Prosthetics Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.
Paid Hours: Physician Provider

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Orthotist, Pedorthist, Prosthetist

Total hours worked by certified Orthotist, Pedorthist or Prosthetist.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Patient Care Provider

Total hours worked by other patient care providers (e.g. nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care personnel.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

---

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

---

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

---

**Orthotics and Prosthetics Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.
Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Orthotic and Prosthetic Medical Supply Expense

Total expense for all custom componentry, soft goods, plastic, off the shelf goods, etc. that are used to fabricate custom devices, custom-fit devices, or are devices sold directly to the patient.

This is a subset of Medical Supply Expense.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Orthotics and Prosthetics Mandatory Elements

The following data elements are mandatory for this department:

- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Paid Hours: Contract Labor
• Paid Hours: Physician Provider

• Paid Hours: Staff

• Patient Visits

• Physician Provider Professional Fee Expense

• Worked Hours: Physician Provider

• Worked Hours: Staff

Orthotics and Prosthetics Normalizations

Exclude the hours and costs associated with the following function:

• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

• Operating a hospital based School of Orthotics and Prosthetics, e.g., administration and or teaching of students in a formal classroom setting to achieve a degree in a specialized field

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Repair and Maintenance of Clinical Equipment/Rooms

04630, Endoscopy (GI) Laboratory

The Endoscopy/GI Laboratory department provides general support to physicians conducting and patients undergoing procedures that involve the introduction of a scope or related instrument into the body. Procedures done in this department include: endoscopies and other invasive gastrointestinal examinations (Colonoscopy, Sigmoidoscopy, Anal/Rectal Manometry, Rectal U/S, Gastroscopy, Cholangioscopy, Feeding Tube insertion, Capsule Endoscopy, ERCP with or without intervention, EGD, Esophageal U/S, Esophageal manometry, GI ablation procedures); pulmonary procedures (bronchoscopy, Trach tube removal/exchange, Endobronchial U/S); and pain procedures. The department includes pre-procedure activity, performance of the procedure, and post-procedure recovery. Counted services can be provided in any area of the facility as long as they are provided by the department staff.

Endoscopy (GI) Laboratory Mapping Guidelines
If your cost center includes 20% or more of procedures other than endoscopies, pulmonary, pain and other invasive gastrointestinal procedures and exams, this department is not an appropriate choice. Other options may include 03011, Operating Room department; 03040, Ambulatory Surgery Center department; or G4600, Other Clinical Support Services department.

**Endoscopy (GI) Laboratory Workload Volumes**

**APC Relative Weight**

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

**Bronchoscopy Procedures**

Count all bronchoscopy procedures performed by the department for the reporting period. Include only CPT codes 31622 – 31661.

This is a component of Total Procedures.

**Days of Operation per Week**

Total number of days the department is open for operation during the week.

The maximum number reported here is 7.

**Hours of Operation per Week**

Total number of hours the department is open for operation during the week.

The maximum number reported here is 168.

**Inpatient Procedures**

Count all procedures performed on inpatients by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, as well as Procedure Counting here in the DRM for more information.

This is a component of Total Procedures.
Patient Visits

Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. If the patient is seen by multiple providers (e.g., physician, dietitian, social worker) during the same visit the count should be recorded as one visit.

Patient Visits: Pediatric

Total separate pediatric patient encounters supported by department staff for the reporting period. A pediatric patient is one that is younger than 18 years of age. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. If the patient is seen by multiple providers (e.g., physician, dietitian, social worker) during the same visit the count should be recorded as one visit.

This is a component of Patient Visits.

Procedure Minutes: Pediatric

The total number of minutes from when the pediatric patient enters a procedure room to when the patient leaves a procedure room; when provided outside a procedure room the count would be procedure start to procedure end. Count the entire time that a pediatric patient spends in the procedure room for each procedure. A pediatric patient is one that is younger than 18 years of age.

This is a component of Procedure Minutes.

Procedure Rooms

The total number of discrete spaces designed and equipped for patient procedures. Procedure rooms do not typically overlap with exam rooms. Report only those rooms routinely used for procedures.

Procedures

Total procedures performed. These procedures relate to many different parts of the anatomy and cover a wide range of CPT codes.

See the APC and Work RVU worksheet for more information. The worksheet can be found on the Support tab of ActionOI.

Procedures: Pediatric

Count all procedures performed on pediatric patients by the department for the reporting period. A pediatric patient is one that is younger than 18 years of age.

This is a component of Total Procedures.
Recovery Time

The total number of minutes that patients spent in recovery, including phase 1 and phase 2. Include only the recovery time for patients who recover on this unit or for patients whose recovery is the responsibility of the staff in this department.

Total Procedures

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

Endoscopy (GI) Laboratory Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.
**Worked Hours: Other Patient Care Provider**

Total hours worked by other patient care providers (e.g. nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care personnel.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.
**Worked Hours: Technician**

Total hours worked by certified technician including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

**Endoscopy (GI) Laboratory Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non medical operating supplies, (e.g., equipment lubricants, office supplies, distribution supplies, and small non capitalized) equipment.

This is a subset of Other Direct Operating Expense.
Operating Lease Expense

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Endoscopy (GI) Laboratory Mandatory Elements

The following data elements are mandatory for this department:

- APC Relative Weight
- Inpatient Procedures
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
• Physician Provider Professional Fee Expense

• Total Procedures

• Worked Hours: Physician Provider

• Worked Hours: Staff

**Endoscopy (GI) Laboratory Normalizations**

Include the hours and costs associated with the following function:

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, outreach service to attract new business, residency program (Endoscopy)

• Cleaning and processing of scopes or instruments used by the Endoscopy-GI Lab department

• Endoscopy (GI) procedure room cleaning between patients, e.g., pick up trash, disinfect surfaces, replace soiled linens

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Endoscopy)

• Post-procedure recovery for Endoscopy GI studies and related procedures (phase 1 and 2)

• Pre-procedure assessment and patient preparation for Endoscopy GI studies and related procedures

Exclude the hours and costs associated with the following function:

• Daily or terminal cleaning and wall washing for ancillary patient procedure areas

• Grant or research funded services

• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Patient Scheduling includes management of inbound and outbound calls, faxes, and or electronic communications to ensure an appointment is generated for the patient-related activity

• Repair and Maintenance of Clinical Equipment/Rooms

• Transport of patients not requiring clinical escort
04640, Hematology Oncology Infusion Therapy (Hema/Onc)

The Hematology Oncology Infusion Therapy department provides ambulatory infusion therapy, including but not limited to chemotherapy, antiviral, antibiotics, antifungal, hydration, anti-inflammatory; anti-thrombolytic; autoimmune deficiency medications, total parenteral nutrition and blood products (stem cells, platelets, red cells, donor lymphocytes, provvenge, and cryoprecipitate). This department may also perform the following procedures or services; bone marrow biopsies, insertion and care of central catheters, insertion and care of bladder catheters, line placements, PICC line repair, IV Diagnostic testing, TPA.

Hematology Oncology Infusion Therapy (Hema/Onc) Mapping Guidelines

Other duties/responsibilities that should be included: department management and administrative support staff assisting the services provided to the patients.

Hematology Oncology Infusion Therapy (Hema/Onc) Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Days of Operation per Week

Total number of days the department is open for operation during the week.

The maximum number reported here is 7.

Hours of Operation per Week

Total number of hours the department is open for operation during the week.

The maximum number reported here is 168.

Infusion Beds

Total infusion beds available for Infusion Therapy.
Infusion Chairs
Total chairs available for infusion therapy. These are typically medical recliner chairs dedicated to infusion therapy administration.

Infusions
Report the total billable infusions that are supported by the infusion therapy staff. May include, but is not limited to transcatheter, intravenous, subcutaneous or intramuscular infusion therapies.

This is a subset of Total Procedures.

Procedure Rooms
The total discrete spaces designed and equipped for procedures used by department staff. Procedure rooms are usually distinct from examination rooms; however if a room is equipped for dual purposes (exams and procedures), it should be included in this count.

This value should not include the values used in the elements: Infusion beds and chairs.

Total Procedures
Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

Hematology Oncology Infusion Therapy (Hema/Onc) Department Hours Elements

Paid Hours: Contract Labor
Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider
Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.
This is a subset of Paid Hours: Staff.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: LPN, LVN**

Hours worked by LPN/LVNs (Licensed Practical Nurses or Licensed Vocational Nurses) providing patient care services in the department.

This is a subset of Worked Hours: Non MD and Non Mid Level Staff.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Patient Care Provider**

Total hours worked by other patient care providers (e.g. nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care personnel.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee’s normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.
**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Hematology Oncology Infusion Therapy (Hema/Onc) Expense Elements**

**Drug Expense**

Total expense for pharmaceuticals expensed to this department.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).
This is a subset of Labor Expense.

**Medical Supply Expense**
Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

**Operating Lease Expense**
Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**
Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**
Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**
Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Hematology Oncology Infusion Therapy (Hema/Onc) Mandatory Elements**
The following data elements are mandatory for this department:

- APC Relative Weight
- Infusions
• Labor Expense
• Labor Expense: Physician Provider
• Other Direct Operating Expense
• Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Physician Provider Professional Fee Expense
• Total Procedures
• Worked Hours: Physician Provider
• Worked Hours: Staff

**Hematology Oncology Infusion Therapy (Hema/Onc) Normalizations**

Exclude the hours and costs associated with the following function:

• Clinical Dietitian
• Clinical Engineer and/or Biomedical Technician
• Cost of all medications, including IV solutions administered to outpatients. Do not include take home and OTC drugs, contrast media, volatile anesthetic gases, and hemophilia factors
• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
• Patient Scheduling includes management of inbound and outbound calls, faxes, and or electronic communications to ensure an appointment is generated for the patient-related activity
• Repair and Maintenance of Clinical Equipment/Roads
• Social Workers
04642, Pediatric Hematology Oncology Infusion Therapy (Peds)

The Pediatric Hematology Oncology Therapy Infusion Therapy department provides ambulatory infusion therapy, including but not limited to chemotherapy, antiviral, antibiotics, antifungal, hydration, anti-inflammatory; anti-thrombolytic; autoimmune deficiency medications, total parenteral nutrition and blood products (stem cells, platelets, red cells, donor lymphocytes, provence, and cryoprecipitate). This department may also perform the following procedures or services; bone marrow biopsies, insertion and care of central catheters, insertion and care of bladder catheters, line placements, PICC line repair, IV Diagnostic testing, TPA.

Pediatric Hematology Oncology Infusion Therapy (Peds) Mapping Guidelines

Other duties/responsibilities that should be included: department management and administrative support staff assisting the services provided to the patients. The patient population should be at least 95% 18 years of age or younger.

Pediatric Hematology Oncology Infusion Therapy (Peds) Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Days of Operation per Week

Total number of days the department is open for operation during the week.

The maximum number reported here is 7.

Hours of Operation per Week

Total number of hours the department is open for operation during the week.

The maximum number reported here is 168.

Infusion Beds

Total infusion beds available for Infusion Therapy.
Infusion Chairs

Total chairs available for infusion therapy. These are typically medical recliner chairs dedicated to infusion therapy administration.

Infusions

Report the total billable infusions that are supported by the infusion therapy staff. May include, but is not limited to transcatheter, intravenous, subcutaneous or intramuscular infusion therapies. Infusions is not a subset of Procedures.

This is a subset of Total Procedures.

Procedure Rooms

The total discrete spaces designed and equipped for procedures used by department staff. Procedure rooms are usually distinct from examination rooms; however if a room is equipped for dual purposes (exams and procedures), it should be included in this count.

This value should not include the values used in the elements: Infusion beds and chairs.

Total Procedures

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

Pediatric Hematology Oncology Infusion Therapy (Peds) Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.
Paid Hours: Physician Provider

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: LPN, LVN

Hours worked by LPN/LVN (Licensed Practical Nurses or Licensed Vocational Nurses) providing patient care services in the department.

This is a subset of Worked Hours: Non MD and Non Mid Level Staff.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Patient Care Provider

Total hours worked by other patient care providers (e.g. nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care personnel.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
worked hours: overtime

represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). hours worked on an overtime basis while attending training or seminars would be included. exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. the value should match what is reported to the u.s. department of labor under the fair labor standards act (flsa) section 3(s)(1)(b).

this is a subset of worked hours: staff.

worked hours: physician provider

represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. include licensed physicians, interns, residents, nurse practitioners and crnas who work as advanced practitioners, and other advanced practitioners. include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to adt orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. also include medical directors that provide clinical expertise and guidance for a unit or service line.

this is a subset of worked hours: staff.

worked hours: rn

total hours worked by rn (registered nurse) including but not limited to time spent providing patient care services.

this is a subset of worked hours: staff.

worked hours: staff

total hours worked, include regular and overtime hours. exclude on call stand by hours.

Pediatric Hematology Oncology Infusion Therapy (Peds) Expense Elements

Drug Expense

Total expense for pharmaceuticals expensed to this department.

This is a subset of Medical Supply Expense.

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.
Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Operating Lease Expense

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.
**Physician Provider Professional Fee Expense**

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Pediatric Hematology Oncology Infusion Therapy (Peds) Mandatory Elements**

The following data elements are mandatory for this department:

- APC Relative Weight
- Infusions
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Total Procedures
- Worked Hours: Physician Provider
- Worked Hours: Staff

**Pediatric Hematology Oncology Infusion Therapy (Peds) Normalizations**

Exclude the hours and costs associated with the following function:

- Clinical Dietitian
- Clinical Engineer and/or Biomedical Technician
- Cost of all medications, including IV solutions administered to outpatients. Do not include take home and OTC drugs, contrast media, volatile anesthetic gases, and hemophilia factors
• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Patient Scheduling includes management of inbound and outbound calls, faxes, and or electronic communications to ensure an appointment is generated for the patient-related activity

• Repair and Maintenance of Clinical Equipment/Rooms

• Social Workers

---

04644, Hematology Infusion Therapy (Hema)

The Hematology Infusion Therapy department provides ambulatory infusion therapy, including but not limited to antiviral, antibiotics, antifungal, hydration, anti-inflammatory; anti-thrombolytic; autoimmune deficiency medications, total parenteral nutrition and blood products (stem cells, platelets, red cells, donor lymphocytes, provence, and cryoprecipitate). This department may also perform the following procedures or services; bone marrow biopsies, insertion and care of central catheters, insertion and care of bladder catheters, line placements, PICC line repair, IV Diagnostic testing, TPA.

Hematology Infusion Therapy (Hema) Mapping Guidelines

Other duties/responsibilities that should be included: department management and administrative support staff assisting the services provided to the patients. The patient population should be at least 95% Hematology, and does not provide oncology/chemotherapy services.

Hematology Infusion Therapy (Hema) Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Days of Operation per Week

Total number of days the department is open for operation during the week.

The maximum number reported here is 7.
**Hours of Operation per Week**

Total number of hours the department is open for operation during the week.

The maximum number reported here is 168.

**Infusion Beds**

Total infusion beds available for Infusion Therapy.

**Infusion Chairs**

Total chairs available for infusion therapy. These are typically medical recliner chairs dedicated to infusion therapy administration.

**Infusions**

Report the total billable infusions that are supported by the infusion therapy staff. May include, but is not limited to transcatheter, intravenous, subcutaneous or intramuscular infusion therapies. Infusions is not a subset of Procedures.

This is a subset of Total Procedures.

**Procedure Rooms**

The total discrete spaces designed and equipped for procedures used by department staff. Procedure rooms are usually distinct from examination rooms; however if a room is equipped for dual purposes (exams and procedures), it should be included in this count.

This value should not include the values used in the elements: Infusion beds and chairs.

**Total Procedures**

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.
### Hematology Infusion Therapy (Hema) Department Hour Elements

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Paid Hours: Physician Provider**

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: LPN, LVN**

Hours worked by LPN/LVNs (Licensed Practical Nurses or Licensed Vocational Nurses) providing patient care services in the department.

This is a subset of Worked Hours: Non MD and Non Mid Level Staff.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Patient Care Provider**

Total hours worked by other patient care providers (e.g. nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care personnel.
Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Physician Provider

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

Worked Hours: RN

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Hematology Infusion Therapy (Hema) Expense Elements

Drug Expense

Total expense for pharmaceuticals expensed to this department.

This is a subset of Medical Supply Expense.
Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Operating Lease Expense

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.
Physician Provider Professional Fee Expense

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Hematology Infusion Therapy (Hema) Mandatory Elements

The following data elements are mandatory for this department:

- APC Relative Weight
- Infusions
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Total Procedures
- Worked Hours: Physician Provider
- Worked Hours: Staff

Hematology Infusion Therapy (Hema) Normalizations

Exclude the hours and costs associated with the following function:

- Clinical Dietitian
- Clinical Engineer and/or Biomedical Technician
- Cost of all medications, including IV solutions administered to outpatients. Do not include take home and OTC drugs, contrast media, volatile anesthetic gases, and hemophilia factors
- Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

- Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

- Patient Scheduling includes management of inbound and outbound calls, faxes, and or electronic communications to ensure an appointment is generated for the patient-related activity

- Repair and Maintenance of Clinical Equipment/Rooms

- Social Workers

04650, Lithotriptor Center

The Lithotriptor Center department provides lithotripsy services to disintegrate renal and/or biliary calculi using ultrasonic waves.

Lithotriptor Center Workload Volumes

Inpatient Procedures

Count all procedures performed on inpatients by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, as well as Procedure Counting here in the DRM for more information.

This is a subset of Procedures.

Patient Initial Visits

The total number of initial visits that are supported by the department. Initial visits are visits by patients who have never been seen by the department, who have not been seen in the past three years, or a returning patient being treated for a new diagnosis/new site.

This is a subset of Patient Visits.

Patient Visits

Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. If the patient is seen by multiple providers (e.g., physician, dietitian, social worker) during the same visit the count should be recorded as one visit.
Procedures

The total shock wave treatments performed. This includes but is not limited to Bile Duct Calculi (Stone) Endoscopy, Lithotripsy, or extracorporeal shock wave.

Total Procedures

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

Lithotripter Center Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.
Worked Hours: Other Patient Care Provider

Total hours worked by other patient care providers (e.g. nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care personnel.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Physician Provider

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

Worked Hours: RN

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Lithotripter Center Expense Elements

September 2019

IBM ActionOI®
Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Operating Lease Expense

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Lithotriptor Center Mandatory Elements**

The following data elements are mandatory for this department:

- Inpatient Procedures
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Total Procedures
- Worked Hours: Physician Provider
- Worked Hours: Staff

**Lithotriptor Center Normalizations**

Exclude the hours and costs associated with the following function:

- Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
- Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
- Patient Scheduling includes management of inbound and outbound calls, faxes, and or electronic communications to ensure an appointment is generated for the patient-related activity
- Repair and Maintenance of Clinical Equipment/Rooms
04665, Pre Admission / Pre Procedure Testing

This department coordinates and performs pre-admission/pre-procedure screening encounters. These encounters include phone call appointments, in-person visits with RNs and NPs, labs and other diagnostic testing. These encounters ensure the appropriate paperwork and results are coordinated and organized at least 48 hours prior to the scheduled admission or procedure. This department may also perform services for other ancillary areas such as Endoscopy, Electrophysiology, Invasive Cardiology, and Labor and Delivery.

Pre Admission / Pre Procedure Testing Mapping Guidelines

If your actual cost center(s) is dedicated to surgical procedures and the testing/screening occurs less than 48 hours prior to the scheduled admission or procedure, this department may not be the appropriate choice. Other options include 03030, Ambulatory Preop and Postop department or G3000, Other Surgical Services department.

Pre Admission / Pre Procedure Testing Workload Volumes

Cases Supported
Total surgical cases supported by department staff.

Days of Operation per Week
Total number of days the department is open for operation during the week.

The maximum number that can be reported is 7.

Hours of Operation per Week
Total number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

Patient Visits
Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. If the patient is seen by multiple providers (e.g., physician, dietitian, social worker) during the same visit the count should be recorded as one visit.
**Phone Encounters**

The number of routine, pre-admission/pre-procedure encounters (evaluations with pre-procedure teaching) by a registered nurse performed via telephone.

**Pre Inpatient Admission Visits**

The total separate visits supported by department staff, made by patients in preparation for an inpatient hospital stay.

This is a subset of Patient Visits.

**Pre Admission / Pre Procedure Testing Department Hours Elements**

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: LPN, LVN**

Hours worked by LPN and or LVNs (Licensed Practical Nurses or Licensed Vocational Nurses) providing patient care services in the department.

This is a subset of Worked Hours: Staff.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Patient Care Provider**

Hours worked by other patient care providers (e.g. nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care personnel.

This is a subset of Worked Hours: Staff.
**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non-physician worked hours that are paid on an overtime basis (hours worked over the employee’s normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Preadmission Testing Staff**

Total hours worked by technologist, technician, and medical assistant staff dedicated to preadmission testing activities.

This is a subset of Worked Hours: Staff.

**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Pre Admission / Pre Procedure Testing Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.
This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g., office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Pre Admission / Pre Procedure Testing Mandatory Elements**

The following data elements are mandatory for this department:

- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Patient Visits
- Physician Provider Professional Fee Expense
• Worked Hours: Staff

G4600, Other Clinical Services

This generic department includes all cost centers belonging to Clinical Services that cannot be mapped to the individual clinical services departments.

Other Clinical Services Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.
**Worked Hours: Other Patient Care Provider**

Total hours worked by other patient care providers (e.g. nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care personnel.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.
**Worked Hours: Technician**

Total hours worked by certified technician including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

**Worked Hours: Technologist**

Total hours worked by Registered Vascular Technologists or equivalent.

This is a subset of Worked Hours: Staff.

**Other Clinical Services Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

**Operating Lease Expense**

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.
This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Other Clinical Services Mandatory Elements**

The following data elements are mandatory for this department:

- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff
Other Clinical Services Normalizations

Exclude the hours and costs associated with the following function:

- Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
- Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
- Patient Scheduling includes management of inbound and outbound calls, faxes, and or electronic communications to ensure an appointment is generated for the patient-related activity
- Repair and Maintenance of Clinical Equipment/Rooms

Other Clinical Support Services Worksheets

Workload computation worksheets are used to submit procedure-level data for the calculation of Relative Value Units. Count only actual procedures (relevant CPT codes) for the procedure count. Non-procedure charges (CPT codes in the 99000 series), such as supply, STAT, portable, time charges, set-up charges, computer processing charges, and other miscellaneous non-procedure charges, should not be counted. Do not include physician service codes in the procedure count.

Use the following worksheets for this department. The worksheets can be found on the Support tab of ActionOI.

- APC and Work RVU Worksheet
- Infusion Therapy Worksheet
Chapter 29. Other Support Services

This chapter includes the following sections:

- 05910, Security 1706
- 05920, Patient Shuttle Services 1711
- 05925, Patient Escort (Transport) Services 1714
- G5900, Other Support Services 1717

05910, Security

This department provides protection and security services to ensure the safety of hospital patients, visitors, staff, and facility. Tasks may include, but are not limited to: visitor control, non-patient escorts, education and investigations of workplace violence interventions.

Security Mapping Guidelines

This department does not include Patient Safety which is a discipline that applies safety science methods toward the goal of achieving a trustworthy system of health care delivery; it minimizes the incidence and impact of, and maximizes recovery from, adverse events. Patient Safety, e.g., utilize safety science methods to ensure the quality of the health care delivered, researches incidents, creates plans to minimize future incidents involving patients.

Security Workload Volumes

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.
**Assistance Calls Completed**

The total requests for assistance received and completed by the security staff in this department for the reporting period. Assistance Calls Completed includes, but is not limited to assistance whether minor (i.e. automobile lockout or escort) or major (i.e. assault) in nature for any person (employees/staff, patients and or visitors). The value reported should be the sum of Auto Related and Facility Access Calls, Employee, Patient and Visitor Incidents/Accidents.

**Automobile Related Calls**

The total calls completed involving automobile related issues includes, but is not limited to abandoned vehicle, jump-starts, lock outs, parking, and traffic. This value would also include the number of calls that resulted in physical interventions of local or state law enforcement agencies.

This is a subset of Assistance Calls Completed.

**Employee Incidents/Accidents**

The total calls completed involving investigation of an employee incident and or accident includes, but is not limited to alarms, criminal mischief, disorderly conduct, escorts, lost property, and suspicious activities. This value would also include the number of calls that resulted in physical interventions of local or state law enforcement agencies. Do not include calls related to automobile or facility within this element.

This is a subset of Assistance Calls Completed.

**Facility Access Calls**

The total calls completed involving the facility and or room access issues includes, but is not limited to bomb threats, codes, door access, and fire alarms. This value would also include the number of calls that resulted in physical interventions of local or state law enforcement agencies.

This is a subset of Assistance Calls Completed.

**Gross Square Feet Patrolled**

The gross square feet routinely patrolled by the Security department staff includes the square footage of physical building(s)/property such as: hospital(s), physician offices, clinics, warehouses as well as parking areas and land. This value should also include roof space and the square footage of each floor of a parking garage physically patrolled on foot. This element will not match square feet that maybe used in other standard departments.

**Patient Incidents/Accidents**

The total calls completed involving investigation of a patient incident and or accident includes, but is not limited to alarms, combativeness, and mental illness/psychiatric. This value would also include the number of calls that resulted in physical interventions of local or state law enforcement agencies. Do not include calls related to automobiles or facility within this element.
This is a subset of Assistance Calls Completed.

**Police Interventions**

The total cases requiring on-site physical interventions of local or state law enforcement agencies. The incident may involve additional levels of agency involvement, such as high level investigation at later stages. However, the count should reflect the number of cases requiring additional assistance, not the number of times or the number of agencies involved in the assistance.

**Visitor Incidents/Accidents**

The total calls completed involving investigation of a visitor incident or accident includes, but is not limited to alarms, criminal mischief, disorderly conduct, escorts, missing persons, and suspicious activities. This value would also include the number of calls that resulted in physical interventions of local or state law enforcement agencies. Do not include calls related to automobiles or facility within this element.

This is a subset of Assistance Calls Completed.

**Security Department Hours Elements**

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: Dispatcher**

Total hours worked by those responsible for communication activities, operations and maintenance of equipment: including but not limited to telephones, alarm systems, access control systems, CCTV systems, digital video recorders, radio systems and computers; may also be responsible for handling all service and emergency telephone calls and all radio communication transmissions; sending and receiving calls for service and documenting the activities of all security personnel on duty.

This is a subset of Worked Hours: Staff.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.
This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Overtime is the total worked hours paid for overtime. Include hours worked on an overtime basis during orientation or for educational purposes. Exclude premium hours, non-worked hours, or callback hours for which an employee is reimbursed at a regular pay rate based on shift differential or scheduling needs.

This is a subset of Worked Hours: Staff.

**Worked Hours: Security Professional**

Total hours worked by security/enforcement staff (may or may not have constable power to make arrests) enforcing hospital regulations, and provides a safe and secure environment for hospital patients, visitors and employees. May also investigate complaints or potential criminal conduct and may assist in restraining patients as necessary.

This is a subset of Worked Hours: Staff.

**Worked Hours: Security Professional**

Total hours worked by security/enforcement staff (may or may not have constable power to make arrests).

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Security Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.
Operating Lease Expense
Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense
Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense
Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Supply Expense
Total expense for department operating supplies.

This is a subset of Other Direct Operating Expense.

Security Mandatory Elements
The following data elements are mandatory for this department:

- Gross Square Feet Patrolled
- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Worked Hours: Staff

Security Normalizations
Include the hours, costs and volumes (where applicable) associated with the
• Security Functions, e.g., visitor control, non-patient escorts, education, investigations of workplace violence interventions. Do not move personnel functioning as a sitter or 1:1 observation; it stays in the department where the patient is located.

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Parking functions, e.g., tollbooth, valet services

• Patient Safety which is a discipline that applies safety science methods toward the goal of achieving a trustworthy system of health care delivery; it minimizes the incidence and impact of, and maximizes recovery from, adverse events. Patient Safety, e.g., utilize safety science methods to ensure the quality of the health care delivered, researches incidents, creates plans to minimizes future incidents.

• Patient Sitters

05920, Patient Shuttle Services

This department includes functions related to moving patients between their places of residence or transportation terminals and the facility via bus, van, or automobile.

Patient Shuttle Services Workload Volumes

Miles Traveled

Total miles logged by department vehicles in support of specific requests.

Patient Transports Performed

The total number of one way patient transports performed by the department staff. Each patient transport from one destination to another, counts as an escort. For example, a request to provide patient transport from a nursing unit to radiology, counts as an escort. Similarly, a department escort of the patient from radiology back to the nursing unit counts as an escort. The patient may also be accompanied by a medical professional from another department. Off-site transports to or from the facility also count for each direction that a patient is transported. The number Patient Transports Performed may be greater than number Round Trips Performed.

Round Trips Performed

The number of round trips made by the department staff. Each departure from and return to the department base of operations counts as one trip. For example, a department staff member leaves the department to transport a patient from the clinic to the lab. While in the lab, the staff member escorts another patient back to the nursing unit. The staff member then returns to the department. This counts as one trip. Each trip with a departure from the base of operations that returns to base of operations, counts as one trip. Note: Courier service primarily performs non-patient transport. Patient escort primarily performs patient transport on site. Patient shuttle primarily performs patient transport offsite.
Patient Shuttle Services Department Hour Elements

**Paid Hours: Contract Labor**
Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Paid Hours: Staff**
Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: Management**
Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**
Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**
Overtime is the total worked hours paid for overtime. Include hours worked on an overtime basis during orientation or for educational purposes. Exclude premium hours, non worked hours, or callback hours for which an employee is reimbursed at a regular pay rate based on shift differential or scheduling needs.

This is a subset of Worked Hours: Staff.

**Worked Hours: Shuttle Driver**
Total hours worked by patient shuttle drivers.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**
Total hours worked, include regular and overtime hours. Exclude on call stand by hours.
Patient Shuttle Services Expense Elements

Contract Service Expense
Total expense for services (e.g., collections) provided by outside contractors.
This is a subset of Other Direct Operating Expense.

Labor Expense
Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Non Medical Supply Expense
Total expense for the department non medical operating supplies, (e.g., equipment lubricants, office supplies, distribution supplies, and small non capitalized) equipment.
This is a subset of Other Direct Operating Expense.

Operating Lease Expense
Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.
This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense
Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense
Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.
This is a subset of Labor Expense.

Vehicle Expense
Total expense for vehicle maintenance.
This is a subset of Other Direct Operating Expense.
Patient Shuttle Services Mandatory Elements

The following data elements are mandatory for this department:

- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Patient Transports Performed
- Worked Hours: Staff

Patient Shuttle Services Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Drivers of patient shuttles

05925, Patient Escort (Transport) Services

This department includes functions related to moving inpatients and outpatients throughout the facility.

Patient Escort (Transport) Services Workload Volumes

Patient Transports Performed

The total number of one way patient transports performed by the department staff. Each patient transport from one destination to another, counts as an escort. For example, a request to provide patient transport from a nursing unit to radiology, counts as an escort. Similarly, a department escort of the patient from radiology back to the nursing unit counts as an escort. The patient may also be accompanied by a medical professional from another department. Off-site transports to or from the facility also count for each direction that a patient is transported. The number Patient Transports Performed may be greater than number Round Trips Performed.
**Round Trips Performed**

The number of round trips made by the department staff. Each departure from and return to the department base of operations counts as one trip. For example, a department staff member leaves the department to transport a patient from the clinic to the lab. While in the lab, the staff member escorts another patient back to the nursing unit. The staff member then returns to the department. This counts as one trip. Each trip with a departure from the base of operations that returns to base of operations counts as one trip. Note: Courier service primarily performs non-patient transport. Patient escort primarily performs patient transport on site. Patient shuttle primarily performs patient transport offsite.

**Patient Escort (Transport) Services Department Hour Elements**

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or standby hours.

This is a subset of **Worked Hours: Staff**.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of **Worked Hours: Staff**.

**Worked Hours: Overtime**

Overtime is the total worked hours paid for overtime. Include hours worked on an overtime basis during orientation or for educational purposes. Exclude premium hours, non worked hours, or callback hours for which an employee is reimbursed at a regular pay rate based on shift differential or scheduling needs.

This is a subset of **Worked Hours: Staff**.
**Worked Hours: Patient Escort**
Total hours worked for patient escort staff.
This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**
Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Patient Escort (Transport) Services Expense Elements**

**Contract Service Expense**
Total expense for services (e.g., collections) provided by outside contractors.
This is a subset of Other Direct Operating Expense.

**Labor Expense**
Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Non Medical Supply Expense**
Total expense for the department non medical operating supplies, (e.g., equipment lubricants, office supplies, distribution supplies, and small non capitalized) equipment.
This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**
Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**
Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.
This is a subset of Labor Expense.
Patient Escort (Transport) Services Mandatory Elements

The following data elements are mandatory for this department:

- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Patient Transports Performed
- Worked Hours: Staff

Patient Escort (Transport) Services Normalizations

Include the hours, costs and volumes (where applicable) associated with the

- Internal wheelchair or ambulatory patient transport
- Transport of patients not requiring clinical escort
- Transport of patients to/from the department

G5900, Other Support Services

This generic department includes all cost centers belonging to Other Support Services that cannot be mapped to individual departments.

Other Support Services Workload Volumes

Assistance Calls Completed

The total requests for assistance received and completed by the security staff in this department for the reporting period. Assistance Calls Completed includes, but is not limited to assistance whether minor (i.e. automobile lockout or escort) or major (i.e. assault) in nature for any person (employees/staff, patients and or visitors). The value reported should be the sum of Auto Related and Facility Access Calls, Employee, Patient and Visitor Incidents/Accidents.
Automobile Related Calls
The total calls completed involving automobile related issues includes, but is not limited to abandoned vehicle, jump-starts, lock outs, parking, and traffic. This value would also include the number of calls that resulted in physical interventions of local or state law enforcement agencies.

This is a subset of Assistance Calls Completed.

Employee Incidents/Accidents
The total calls completed involving investigation of an employee incident and or accident includes, but is not limited to alarms, criminal mischief, disorderly conduct, escorts, lost property, and suspicious activities. This value would also include the number of calls that resulted in physical interventions of local or state law enforcement agencies. Do not include calls related to automobile or facility within this element.

This is a subset of Assistance Calls Completed.

Facility Access Calls
The total calls completed involving the facility and or room access issues includes, but is not limited to bomb threats, codes, door access, and fire alarms. This value would also include the number of calls that resulted in physical interventions of local or state law enforcement agencies.

This is a subset of Assistance Calls Completed.

Gross Square Feet Patrolled
The gross square feet routinely patrolled by the Security department staff includes the square footage of physical building(s)/property such as: hospital(s), physician offices, clinics, warehouses as well as parking areas and land. This value should also include roof space and the square footage of each floor of a parking garage physically patrolled on foot. This element will not match square feet that maybe used in other standard departments.

Miles Traveled
Total miles logged by department vehicles in support of specific requests.

Patient Incidents/Accidents
The total calls completed involving investigation of a patient incident and or accident includes, but is not limited to alarms, combativeness, and mental illness/psychiatric. This value would also include the number of calls that resulted in physical interventions of local or state law enforcement agencies. Do not include calls related to automobiles or facility within this element.

This is a subset of Assistance Calls Completed.
Patient Transports Performed

The total number of one way patient transports performed by the department staff. Each patient transport from one destination to another, counts as an escort. For example, a request to provide patient transport from a nursing unit to radiology, counts as an escort. Similarly, a department escort of the patient from radiology back to the nursing unit counts as an escort. The patient may also be accompanied by a medical professional from another department. Off-site transports to or from the facility also count for each direction that a patient is transported. The number Patient Transports Performed may be greater than number Round Trips Performed.

Police Interventions

The total cases requiring on-site physical interventions of local or state law enforcement agencies. The incident may involve additional levels of agency involvement, such as high level investigation at later stages. However, the count should reflect the number of cases requiring additional assistance, not the number of times or the number of agencies involved in the assistance.

Round Trips Performed

The number of round trips made by the department staff. Each departure from and return to the department base of operations counts as one trip. For example, a department staff member leaves the department to transport a patient from the clinic to the lab. While in the lab, the staff member escorts another patient back to the nursing unit. The staff member then returns to the department. This counts as one trip. Each trip with a departure from the base of operations that returns to base of operations, counts as one trip. Note: Courier service primarily performs non-patient transport. Patient escort primarily performs patient transport on site. Patient shuttle primarily performs patient transport offsite.

Visitor Incidents/Accidents

The total calls completed involving investigation of a visitor incident or accident includes, but is not limited to alarms, criminal mischief, disorderly conduct, escorts, missing persons, and suspicious activities. This value would also include the number of calls that resulted in physical interventions of local or state law enforcement agencies. Do not include calls related to automobiles or facility within this element.

This is a subset of Assistance Calls Completed.

Other Support Services Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.
Worked Hours: Dispatcher

Total hours worked by those responsible for communication activities, operations and maintenance of equipment: including but not limited to telephones, alarm systems, access control systems, CCTV systems, digital video recorders, radio systems and computers; may also be responsible for handling all service and emergency telephone calls and all radio communication transmissions; sending and receiving calls for service and documenting the activities of all security personnel on duty.

This is a subset of Worked Hours: Staff.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Security Professional

Total hours worked by security/enforcement staff (may or may not have constable power to make arrests) enforcing hospital regulations, and provides a safe and secure environment for hospital patients, visitors and employees. May also investigate complaints or potential criminal conduct and may assist in restraining patients as necessary.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.
Other Support Services Expense Elements

**Contract Service Expense**

Total expense for services (e.g., collections) provided by outside contractors.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Non Medical Supply Expense**

Total expense for the department non medical operating supplies, (e.g., equipment lubricants, office supplies, distribution supplies, and small non capitalized) equipment.

This is a subset of Other Direct Operating Expense.

**Operating Lease Expense**

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

**Vehicle Expense**

Total expense for vehicle maintenance.

This is a subset of Other Direct Operating Expense.
**Other Support Services Mandatory Elements**

The following data elements are mandatory for this department:

- Gross Square Feet Patrolled
- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Worked Hours: Staff

**Other Support Services Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Security Functions, e.g., visitor control, non-patient escorts, education, investigations of workplace violence interventions. Do not move personnel functioning as a sitter or 1:1 observation; it stays in the department where the patient is located

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Parking functions, e.g., tollbooth, valet services
- Patient Safety, e.g., utilize safety science methods to ensure the quality of the health care delivered, researches incidents, creates plans to minimize future incidents
- Patient Sitters who physically 'sit' in the patients' room (do not include staff who watches video monitors in lieu of physically sitting in the patient's room)
Chapter 30. Pharmacy Services

For an annotated list of Characteristic Questions for this series, please see the ActionOI support page.

This chapter includes the following sections:

- 04410, Pharmacy Services: Inpatient & Outpatient 1723
- 04411, Pharmacy Services: Retail/Prescription 1734
- 04430, Pharmacy Services: Inpatient Only 1744
- 04440, Pharmacy Services: Outpatient Only 1754
- 04490, Pharmacy Services: Administration and Support 1764
- G4400, Pharmacy Other Services 1771
- I4400, Pharmacy Patient Services Rollup 1783
- I4411, Pharmacy Retail/Prescription Services Rollup 1792
- Pharmacy Services Worksheets 1800

04410, Pharmacy Services: Inpatient & Outpatient

This department controls, mixes, compounds, and distributes drugs, and provides pharmaceutical consultation in support of inpatients, as well as to ambulatory areas including ambulatory/outpatient clinics, infusion therapy, infusion oncology, ambulatory dialysis, ambulatory surgery, ambulatory procedural areas, Operating Rooms and the Emergency Department. Include Pharmacy residents only if they are independently filling a shift and providing clinical and/or distributed services captured and reflected in the workload units. Prescription-based Retail entities are excluded.

Pharmacy Services: Inpatient & Outpatient Mapping Guidelines

If your actual cost center is a combination of both inpatient and ambulatory pharmacy services, including shared staff between these services, map to this department. If you have an actual distinct cost center or cost centers for inpatient pharmacy services, it is more appropriate to map to 04430, Pharmacy Inpatient Services department. If you have an actual distinct cost center or cost centers for ambulatory/clinic pharmacy services, it is more appropriate to map to 04440, Pharmacy Ambulatory/Clinic Services department. Do not map prescription-based retail entities to this department.
If you would like to separate your actual combined pharmacy cost center(s) into inpatient and/or ambulatory components, create a normalized only 04430, Pharmacy Inpatient Services department and/or 04440, Pharmacy Ambulatory/Clinic Services department. The creation of these normalized only departments is optional.

Pharmacy Services: Inpatient & Outpatient Workload Volumes

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Ambulatory Patient Visits Seen by Pharmacist

Total ambulatory patient visits for which medication services were provided in the reporting period. Visits supported include ambulatory patients seen in the Emergency Department, Ambulatory Clinics, Ambulatory Surgery, Invasive Cardiology, Electrophysiology, Radiation Therapy, Infusion Therapy, Endoscopy, and other related departments being supported.

This is a subset of Ambulatory Patient Visits Supported.

Ambulatory Patient Visits Supported

Total ambulatory patient visits for which medication services were provided by department staff during the reporting period. Visits supported include ambulatory/outpatient patients seen in the Emergency Department, Ambulatory Clinics, Ambulatory Surgery, Invasive Cardiology, Electrophysiology, Radiation Therapy, Infusion Therapy, Endoscopy, and other related departments being supported.

Clinical Service Workload Units

The total calculated time spent by department staff performing clinical services during the reporting period. Clinical services includes but is not limited to: consultations, pharmacist interventions, encounters with patients to assess and adjust drug therapy, drug utilization reviews, and adverse drug reaction reporting. Report activity in hours; use decimals to report a fraction of an hour (e.g. enter 1.25 = 1 hour, 15 minutes). Refer to the Pharmacy Workload Worksheet found on the Support Page for a complete list of clinical workload activities.
Compounded Doses Dispensed
Total doses of medication compounded and dispensed to patients by the department for the reporting period.

This is a component of Doses Dispensed.

Days of Operation per Week
Total number of days the department is open for operation during the week.

Doses Dispensed
The total doses of medication dispensed to patients (via all routes of administration) by the department during the reporting period. Include automated point of care drug dispensing system (e.g. Pyxis, Omnicell) refills and all other doses dispensed by the department to patient areas.

Doses Dispensed: Complex IV
Total doses of medication produced and dispensed to patients via complex IV administration. Doses may be ready-made or compounded.

This is a subset of Doses Dispensed.

Doses Dispensed: Oral
Total doses of medication produced and dispensed to patients via oral administration. Doses may be ready-made or compounded.

This is a subset of Doses Dispensed.

Doses Dispensed: Simple IV
Total doses of medication produced and dispensed to patients via simple IV administration. Doses may be ready-made or compounded.

This is a subset of Doses Dispensed.

Doses Dispensed: TPN
Total doses of medication produced and dispensed to patients via TPN administration. Doses may be ready-made or compounded.

This is a subset of Doses Dispensed.
**Hours Devoted to Teaching**

The total hours devoted by the department to teaching residents and students, including but not limited to bench/on-the-job teaching and/or preceptoring for the reporting period. Enter 0 if there is no teaching program supported by the department.

**Hours of Operation per Week**

Total number of hours the department is open for operation during the week.

**Infusions Supported**

The total number of Infusion Therapy infusions supported by this department during the reporting period. This includes infusions by all routes of administration as long as the department provided support for the infusion. This may include infusions performed in an Infusion Therapy department, Cancer Center, and Home Care Infusion.

**Investigational Drug Studies In Progress**

Enter the total number of investigational drug studies in progress during the reporting period.

**Medication Reconciliation Service Units**

Total calculated time spent by department staff performing medication reconciliation during the reporting period. Report activity in hours; use decimals to report a fraction of an hour (e.g. enter 1.25 = 1 hour, 15 minutes). Refer to the Pharmacy Workload Worksheet on the Support Page for details on how to calculate the service units.

This is a subset of Clinical Service Workload Units.

**Number of Clinics Pharmacy Department Provides Services**

Total number of clinics/ambulatory centers to which this department provides services, including but not limited to: drug distribution, charge capture, and inventory control (i.e. outdate checks).

**Number of Clinics with Dedicated Pharmacist**

Total number of clinics/ambulatory centers to which this department provides services, including but not limited to: drug distribution, charge capture, and inventory control (i.e. outdate checks) with a dedicated Pharmacist.

**Orders Processed**

The total new, revised and/or modified orders processed by the department during the reporting period. Include discontinued orders and re-dispenses.
**Pharmacy Intensity Score: Inpatient**

The Pharmacy Intensity Score: Inpatient is based on the number of discharges by MS-DRG multiplied by the intensity weight for each MS-DRG. The MS-DRG specific intensity weights were developed using discharge level data from over 1,000 hospitals and are used to calculate the overall supply intensity score for your organization. Sufficient discharge data is not available for newer MS-DRGs, however the average intensity weight of all weighted MS-DRGs will be used for all active, non-weighted MS-DRGs until specific weights can be calculated. If your organization does not capture discharges by MS-DRG, do not report a value for the Pharmacy Intensity Score. When entering a value that is less than 1.0, enter the leading zero before the decimal (ex: 0.97). Please refer to the Intensity Score Workbook_Supply and Pharmacy worksheet available on the Support tab for assistance reporting this value.

**Pharmacy Residents Supported**

Total number of individual Pharmacy Residents supported by the department during the reporting period.

**Pharmacy Services: Inpatient & Outpatient Department Hours Elements**

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time-off hours. Exclude on-call or standby time.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
Worked Hours: Overtime

Represents the sum of non-physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Pharmacist

Total hours worked by registered pharmacists.

This is a subset of Worked Hours: Staff.

Worked Hours: Pharmacy Buyer

Total hours worked by staff responsible for all pharmaceutical orders, purchases, inventory and pharmaceutical cost management.

This is a subset of Worked Hours: Staff.

Worked Hours: Pharmacy Resident

Total pharmacy resident hours used by the department.

This is a subset of Worked Hours: Staff.

Worked Hours: Pharmacy Technician

Total hours worked by pharmacy technicians.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Pharmacy Services: Inpatient & Outpatient Operational Metrics

Pharmacy Intensity Score

The Pharmacy Intensity Score calculated for your facility on the Intensity Score workbook_Supply and Pharmacy. The worksheet can be found on the Support tab of ActionOI.
Pharmacy Services: Inpatient & Outpatient Revenue Elements

Inpatient Gross Charges
Report the facility wide total pharmacy gross charges for inpatients only for the reporting period. Report charges as the actual dollar amount. Exclude physician fees and charges for discharge prescriptions.

Outpatient Gross Charges
Report the facility wide total pharmacy gross charges for services provided to ambulatory areas including but not limited to ambulatory/outpatient clinics, infusion therapy, infusion oncology, ambulatory dialysis, ambulatory surgery, ambulatory procedural areas (e.g. Operating Rooms, Emergency Department, etc) for the reporting period. Report charges as the actual dollar amount. Exclude charges for take-home and retail prescriptions.

Pharmacy Services: Inpatient & Outpatient Expense Elements

Albumin and Plasma Protein Fraction Expense
Total drug expense for all strengths and sizes of albumin and plasma protein fraction.
This is a subset of Drug Expense.

Anti-Infective Drug Expense
Total drug expense for all anti-infective drugs.
This is a subset of Drug Expense.

Anticoagulant and Thrombolytic Drug Expense
Total drug expense for all anticoagulant and thrombolytic drugs, including but not limited to abciximab, alteplase, anti-thrombin III, argatroban, bivalirudin, enoxaparin, eptifibatide, heparin, lepirudin, reteplase, streptokinase, tirofiban, urokinase, and warfarin.
This is a subset of Drug Expense.

Blood and Immune System Modifiers Expense
Total drug expense for all blood and immune system modifier drugs, including but not limited to darbepoitin, epoetin, filgrastim, pegfilgrastim, sargramostim, adalimumab, omalizumab, and interferons (all variations).
This is a subset of Drug Expense.
Botulinum Toxin Expense
Total drug expense for all strengths, sizes, and brands of botulinum toxin type A and botulinum toxin type B.
This is a subset of Drug Expense.

Contrast Media Expense
Total drug expense for all strengths, sizes and brands of radiology contrast media.
This is a subset of Drug Expense.

Drug Expense
Total pharmaceutical expense for the department.
This is a subset of Medical Supply Expense.

Enzyme Deficiency Replacement Drug Expense
Total drug expense for all enzyme replacement therapy drugs, including but not limited to agalsidase beta, alglucerase, alglucosidase alfa, elosulfase alfa, galsulfase, idursulfase, imiglucerase, and laronidase.
This is a subset of Drug Expense.

Hemophilia Factor Expense
Total drug expense for all strengths, sizes and brands of Factor VIIa, VIII and IX.
This is a subset of Drug Expense.

Infliximab Drug Expense
Total drug expense for Infliximab.
This is a subset of Drug Expense.

IV Immune Globulin Expense
Total drug expense for all brands of IV immune globulin (IVIG).
This is a subset of Drug Expense.
Labor Expense
Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Macular Degeneration Drug Expense
Total drug expense for all macular degeneration drugs, including but not limited to pegaptanib, ranibizumab, and verteporfin.

This is a subset of Drug Expense.

Medical Supply Expense
Report the expense for the period for stocked and non stocked patient medical supplies. Include all non capitalized medical and surgical supplies, pharmaceuticals, and other materials used in the diagnosis and treatment of patients.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense
Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

Oncology Drug Expense
Total drug expense for all antineoplastic/oncology drugs.

This is a subset of Drug Expense.

Operating Lease Expense
Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense
Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.
Overtime Salary Expense
Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.

Transplant Drug Expense
Total drug expense for all transplant drugs, including but not limited to cyclosporine, mycophenolate, sirolimus, tacrolimus, basiliximab, anti-thymocyte globulin, cytomegalovirus immune globulin, and lymphocyte immune globulin.

This is a subset of Drug Expense.

Vaccines and Toxoids Expense
Total drug expense for all vaccines and toxoids.

This is a subset of Drug Expense.

Volatile Anesthetic Gases Expense
Total drug expense for all strengths, sizes and brands of volatile anesthetic gases.

This is a subset of Drug Expense.

Pharmacy Services: Inpatient & Outpatient Mandatory Elements
The following data elements are mandatory for this department:

- Clinical Service Workload Units
- Days of Operation per Week
- Drug Expense
- Hours of Operation per Week
- Inpatient Gross Charges
- Labor Expense
- Medical Supply Expense
Pharmacy Services: Inpatient & Outpatient Normalizations

Include the hours, costs and volumes (where applicable) associated with the

- Albumin, plasma protein fraction, Rh Immune Globulin, Anti Thrombin, Varicella Zoster Immune Globulin, and other specialty plasma products

- Cost of all medications, including IV solutions administered to inpatients. Do not include take home prescriptions and OTC drugs, radiology contrast media, volatile anesthetic gases, and hemophilia factors.

- Cost of all medications, including IV solutions administered to outpatients. Do not include take home and OTC drugs, contrast media, volatile anesthetic gases, and hemophilia factors

- Personnel performing the functions of the department's day to day managerial operations (Pharmacy)

Exclude the hours costs and volumes (where applicable) associated with the

- Administration of Indigent Drug Program, e.g., assisting patients to help qualify for assistance to be able to receive prescription medications; indigent drug programs (Pharmacy Services)

- Administration of Indigent Drug Program, e.g., assisting patients to help qualify for assistance to be able to receive prescription medications; indigent drug programs

- Anesthetic gases (e.g. nitrous oxide, sevoflurane, desflurane, isoflurane, and halothane)
• Contrast Media Expense

• Cost of all take-home prescriptions and over the counter drugs for patients and employees

• Cost of hemophilia factors

• Marketing/Sales staff whose primary objective is to solicit new pharmacy business (do not process scripts)

• Nuclear pharmacy services staff and drug expenses

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Pharmacy)

• Pharmaceutical research programs, e.g., investigational drug studies

• Pharmacy Informatics (focusing on medication-related data and knowledge in the delivery of optimal medication-related patient care and health outcomes; including its acquisition, storage, analysis, use and dissemination)

• Pharmacy Residency Program administration and support

• Purchasing, Receiving, Warehousing and Inventory Control (Pharmacy)

• Repair and Maintenance of Clinical Equipment/Rooms

• Support activities performed by department staff for quality improvement, regulatory compliance, and drug policy related activities

• Support department activities for Information Systems, Electronic Health Record, automated distribution systems, etc.

04411, Pharmacy Services: Retail/Prescription

This department primarily dispenses take-home prescription medications for patients being discharged, ambulatory patients (i.e. clinic-based retail), and/or employees. It may also include the following functions: specialty drug/prescriptions, refilling prescriptions, mail order prescriptions, durable medical equipment sales, and over the counter sales. Home Infusion Pharmacies are excluded.

Pharmacy Services: Retail/Prescription Mapping Guidelines

If your actual cost center does not exclusively include take-home prescription medication and the associated labor and supply expenses for prescriptions filled in prescription-based retail or outpatient entities, it may not be appropriate to map to this department. Another option may be the G4400, Pharmacy Other Services department.
If you have mapped your actual cost center to the G4400, Pharmacy Other Services department, in which staff time and materials expense for take-home prescriptions are a component, the creation of a normalized only 04411, Pharmacy Retail/Prescription Services department is encouraged.

**Pharmacy Services: Retail/Prescription Workload Volumes**

**340(B) Qualified Rx Processed**

Enter the total number of 340(B) qualified prescriptions received and processed by the department during the reporting period.

This is a subset of Retail Prescriptions Processed.

**Adjusted Discharges Supported**

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non-hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

**Days of Operation per Week**

Total number of days the department is open for operation during the week.

**Employee Rx Processed**

Enter the total number of prescriptions for employees received and processed by the department during the reporting period.

This is a subset of Retail Prescriptions Processed.

**Hours of Operation per Week**

Total number of hours the department is open for operation during the week.

**Infusions Supported**

The total number of Infusion Therapy infusions supported by this department during the reporting period. This includes infusions by all routes of administration as long as the department provided support for the infusion. This may include infusions performed in an Infusion Therapy department, Cancer Center, and Home Care Infusion.
Number of Clinics Pharmacy Department Provides Services

Total number of clinics/ambulatory centers to which this department provides services, including but not limited to: drug distribution, charge capture, and inventory control (i.e. outdate checks).

Number of Clinics with Dedicated Pharmacist

Total number of clinics/ambulatory centers to which this department provides services, including but not limited to: drug distribution, charge capture, and inventory control (i.e. outdate checks) with a dedicated Pharmacist.

Retail Prescriptions Processed

The total number of retail prescriptions received and processed by the department during the reporting period. Refer to the Pharmacy Workload Worksheet found on the Support Page for assistance with reporting this element.

Specialty Rx Prescriptions Processed

Enter the total number of specialty prescriptions received and processed by the department during the reporting period. Specialty prescriptions are medications that are generally high cost and require prior authorization (i.e. approval) prior to dispensing to patients. They are have additional restrictions (generally by insurance companies) as to which pharmacies can dispense them.

This is a subset of Retail Prescriptions Processed.

Weighted Compounded Prescriptions

Enter the total number of weighted compounded prescriptions received and processed by the department during the reporting period. Refer to the Pharmacy Workload Worksheet found on the Support Page for assistance with reporting this element.

This is a subset of Weighted Prescriptions.

Weighted DME Sales

Total weighted number of durable medical equipment devices sold (e.g. glucose monitoring devices, handicap equipment) and total number of boxes of non durable supplies (e.g. such as syringes, gauze, etc.). Refer to the Pharmacy Workload Worksheet found on the Support Page for assistance with reporting this element.

This is a subset of Weighted Prescriptions.

Weighted Mail Order Prescriptions

Total weighted new and refill mail order prescriptions that are mailed to patients. Refer to the Pharmacy Workload Worksheet found on the Support Page for assistance with reporting this element.
Pharmacy Services

Weighted Prescriptions
Total number of weighted prescriptions processed by the department during the reporting period. Refer to the Pharmacy Workload Worksheet found on the Support Page for assistance with reporting this element.

Weighted Specialty Prescriptions
Enter the total number of weighted specialty prescriptions received and processed by the department during the reporting period. Refer to the Pharmacy Workload Worksheet found on the Support Page for assistance with reporting this element.

Pharmacy Services: Retail/Prescription Department Hours Elements

Paid Hours: Contract Labor
Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff
Total hours paid. Include regular, premium, and paid time-off hours. Exclude on-call or standby time.

Worked Hours: Management
Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

Worked Hours: Other Support Staff
Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Pharmacist**

Total hours worked by registered pharmacists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Pharmacy Buyer**

Total hours worked by staff responsible for all pharmaceutical orders, purchases, inventory and pharmaceutical cost management.

This is a subset of Worked Hours: Staff.

**Worked Hours: Pharmacy Resident**

Total pharmacy resident hours used by the department.

This is a subset of Worked Hours: Staff.

**Worked Hours: Pharmacy Technician**

Total hours worked by pharmacy technicians.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Pharmacy Services: Retail/Prescription Revenue Elements**

**Total Retail Revenue**

Total retail revenue received from all sales including but not limited to revenue related to sundries. Include revenue from both retail and take-home prescriptions.
Pharmacy Services: Retail/Prescription Expense Elements

**Albumin and Plasma Protein Fraction Expense**
Total drug expense for all strengths and sizes of albumin and plasma protein fraction.

This is a subset of Drug Expense.

**Anti-Infective Drug Expense**
Total drug expense for all anti-infective drugs.

This is a subset of Drug Expense.

**Anticoagulant and Thrombolytic Drug Expense**
Total drug expense for all anticoagulant and thrombolytic drugs, including but not limited to abciximab, alteplase, anti-thrombin III, argatroban, bivalirudin, enoxaparin, eptifibatide, heparin, lepirudin, reteplase, streptokinase, tirofiban, urokinase, and warfarin.

This is a subset of Drug Expense.

**Blood And Immune System Modifiers Expense**
Total drug expense for all blood and immune system modifier drugs, including but not limited to darbepotin, epoetin, filgrastim, pegfilgrastim, sargramostim, adalimumab, omalizumab, and interferons (all variations).

This is a subset of Drug Expense.

**Botulinum Toxin Expense**
Total drug expense for all strengths, sizes, and brands of botulinum toxin type A and botulinum toxin type B.

This is a subset of Drug Expense.

**Contrast Media Expense**
Total drug expense for all strengths, sizes and brands of radiology contrast media.

This is a subset of Drug Expense.
**Drug Expense**

Total expense for pharmaceuticals expensed to this department.

This is a subset of Medical Supply Expense.

**Enzyme Deficiency Replacement Drug Expense**

Total drug expense for all enzyme replacement therapy drugs, including but not limited to agalsidase beta, alglucerase, alglucosidase alfa, elosulfase alfa, galsulfase, idursulfase, imiglucerase, and laronidase.

This is a subset of Drug Expense.

**Hemophilia Factor Expense**

Total drug expense for all strengths, sizes and brands of Factor VIIa, VIII and IX.

This is a subset of Drug Expense.

**Infliximab Drug Expense**

Total drug expense for Infliximab.

This is a subset of Drug Expense.

**IV Immune Globulin Expense**

Total drug expense for all brands of IV immune globulin (IVIG).

This is a subset of Drug Expense.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Macular Degeneration Drug Expense**

Total drug expense for all macular degeneration drugs, including but not limited to pegaptanib, ranibizumab, and verteporfin.

This is a subset of Drug Expense.
Medical Supply Expense
Report the expense for the period for stocked and non-stocked patient medical supplies. Include all non-capitalized medical and surgical supplies, pharmaceuticals, and other materials used in the diagnosis and treatment of patients.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense
Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

Oncology Drug Expense
Total drug expense for all antineoplastic/oncology drugs.

This is a subset of Drug Expense.

Operating Lease Expense
Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense
Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense
Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.

Transplant Drug Expense
Total drug expense for all transplant drugs, including but not limited to cyclosporine, mycophenolate, sirolimus, tacrolimus, basiliximab, anti-thymocyte globulin, cytomegalovirus immune globulin, and lymphocyte immune globulin.

This is a subset of Drug Expense.
**Vaccines and Toxoids Expense**

Total drug expense for all vaccines and toxoids. 

This is a subset of Drug Expense.

**Volatile Anesthetic Gases Expense**

Total drug expense for all strengths, sizes and brands of volatile anesthetic gases. 

This is a subset of Drug Expense.

**Pharmacy Services: Retail/Prescription Mandatory Elements**

The following data elements are mandatory for this department:

- Days of Operation per Week
- Drug Expense
- Hours of Operation per Week
- Labor Expense
- Medical Supply Expense
- Non Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Retail Prescriptions Processed
- Total Retail Revenue
- Worked Hours: Pharmacy Resident
- Worked Hours: Staff

**Pharmacy Services: Retail/Prescription Normalizations**

Include the hours, costs and volumes (where applicable) associated with the
• Billing for mail order prescriptions

• Cost of all take-home prescriptions and over the counter drugs for patients and employees

• Personnel performing the functions of the department’s day to day managerial operations (Pharmacy)

Exclude the hours costs and volumes (where applicable) associated with the

• Administration of Indigent Drug Program, e.g., assisting patients to help qualify for assistance to be able to receive prescription medications; indigent drug programs (Pharmacy Services)

• Administration of Indigent Drug Program, e.g., assisting patients to help qualify for assistance to be able to receive prescription medications; indigent drug programs

• Cost of hemophilia factors

• Contrast Media Expense

• Marketing/Sales staff whose primary objective is to solicit new pharmacy business (do not process scripts)

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Pharmacy)

• Pharmaceutical research programs, e.g., investigational drug studies

• Pharmacy Informatics (focusing on medication-related data and knowledge in the delivery of optimal medication-related patient care and health outcomes; including its acquisition, storage, analysis, use and dissemination)

• Pharmacy Residency Program administration and support

• Purchasing, Receiving, Warehousing and Inventory Control (Pharmacy)

• Repair and Maintenance of Clinical Equipment/Rooms

• Support activities performed by department staff for quality improvement, regulatory compliance, and drug policy related activities

• Support department activities for Information Systems, Electronic Health Record, automated distribution systems, etc.
04430, Pharmacy Services: Inpatient Only

This department controls, mixes, compounds, and distributes pharmaceuticals, and provides pharmaceutical consultation in support of patients classified as inpatients only. Include Pharmacy residents only if they are independently filling a shift and providing clinical and/or distributed services captured and reflected in the workload units.

Pharmacy Services: Inpatient Only Mapping Guidelines

If you have an actual distinct cost center or cost centers for inpatient pharmacy services, including staff time and materials expense devoted to inpatients, map to this department. If you have an actual cost center that includes a combination of inpatient and outpatient pharmacy services, it is more appropriate to map to the 04410, Pharmacy Services department.

It is acceptable to create a normalized only the 04430, Pharmacy Inpatient Services department to separate staff time and materials expense devoted to inpatients if your actual cost center is mapped to the 04410, Pharmacy Services department. The creation of this normalized only department is optional. If your staff time and materials expense devoted to inpatients is completely included as a component of the G4400, Pharmacy Other Services department, creation of normalized only the 04430, Pharmacy Inpatient Services department is encouraged.

Pharmacy Services: Inpatient Only Workload Volumes

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Clinical Service Workload Units

The total calculated time spent by department staff performing clinical services during the reporting period. Clinical services includes but is not limited to: consultations, pharmacist interventions, encounters with patients to assess and adjust drug therapy, drug utilization reviews, and adverse drug reaction reporting. Report activity in hours; use decimals to report a fraction of an hour (e.g. enter 1.25 = 1 hour, 15 minutes). Refer to the Pharmacy Workload Worksheet found on the Support Page for a complete list of clinical workload activities.
Compounded Doses Dispensed

Total doses of medication compounded and dispensed to patients by the department for the reporting period.

This is a component of Doses Dispensed.

Days of Operation per Week

Total number of days the department is open for operation during the week.

Doses Dispensed

The total doses of medication dispensed to patients (via all routes of administration) by the department during the reporting period. Include automated point of care drug dispensing system (e.g. Pyxis, Omnicell) refills and all other doses dispensed by the department to patient areas.

Doses Dispensed: Complex IV

Total doses of medication produced and dispensed to patients via complex IV administration. Doses may be ready-made or compounded.

This is a subset of Doses Dispensed.

Doses Dispensed: Oral

Total doses of medication produced and dispensed to patients via oral administration. Doses may be ready-made or compounded.

This is a subset of Doses Dispensed.

Doses Dispensed: Simple IV

Total doses of medication produced and dispensed to patients via simple IV administration. Doses may be ready-made or compounded.

This is a subset of Doses Dispensed.

Doses Dispensed: TPN

Total doses of medication produced and dispensed to patients via TPN administration. Doses may be ready-made or compounded.

This is a subset of Doses Dispensed.
**Hours Devoted to Teaching**

The total hours devoted by the department to teaching residents and students, including but not limited to bench/on-the-job teaching and/or preceptoring for the reporting period. Enter 0 if there is no teaching program supported by the department.

**Hours of Operation per Week**

Total number of hours the department is open for operation during the week.

**Infusions Supported**

The total number of Infusion Therapy infusions supported by this department during the reporting period. This includes infusions by all routes of administration as long as the department provided support for the infusion. This may include infusions performed in an Infusion Therapy department, Cancer Center, and Home Care Infusion.

**Investigational Drug Studies In Progress**

Enter the total number of investigational drug studies in progress during the reporting period.

**Orders Processed**

The total new, revised and/or modified orders processed by the department during the reporting period. Include discontinued orders and re-dispenses.

**Pharmacy Intensity Score: Inpatient**

The Pharmacy Intensity Score: Inpatient is based on the number of discharges by MS-DRG multiplied by the intensity weight for each MS-DRG. The MS-DRG specific intensity weights were developed using discharge level data from over 1,000 hospitals and are used to calculate the overall supply intensity score for your organization. Sufficient discharge data is not available for newer MS-DRGs, however the average intensity weight of all weighted MS-DRGs will be used for all active, non-weighted MS-DRGs until specific weights can be calculated. If your organization does not capture discharges by MS-DRG, do not report a value for the Pharmacy Intensity Score. When entering a value that is less than 1.0, enter the leading zero before the decimal (ex: 0.97). Please refer to the Intensity Score Workbook_Supply and Pharmacy worksheet available on the Support tab for assistance reporting this value.

**Pharmacy Residents Supported**

Total number of individual Pharmacy Residents supported by the department during the reporting period.

**Medication Reconciliation Service Units**

Total calculated time spent by department staff performing medication reconciliation during the reporting period. Report activity in hours; use decimals to report a fraction of an hour (e.g. enter 1.25 = 1 hour, 15 minutes). Refer to the Pharmacy Workload Worksheet on the Support Page for details on how to calculate the service units.
Pharmacy Services: Inpatient Only Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time-off hours. Exclude on-call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Pharmacist

Total hours worked by registered pharmacists.

This is a subset of Worked Hours: Staff.
Worked Hours: Pharmacy Buyer
Total hours worked by staff responsible for all pharmaceutical orders, purchases, inventory and pharmaceutical cost management.
This is a subset of Worked Hours: Staff.

Worked Hours: Pharmacy Resident
Total pharmacy resident hours used by the department.
This is a subset of Worked Hours: Staff.

Worked Hours: Pharmacy Technician
Total hours worked by pharmacy technicians.
This is a subset of Worked Hours: Staff.

Worked Hours: Staff
Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Pharmacy Services: Inpatient Only Operational Metrics

Pharmacy Intensity Score
The Pharmacy Intensity Score calculated for your facility on the Intensity Score workbook_Supply and Pharmacy. The worksheet can be found on the Support tab of ActionOI.

Pharmacy Services: Inpatient Only Revenue Elements

Inpatient Gross Charges
Report the facility wide total pharmacy gross charges for inpatients only for the reporting period. Report charges as the actual dollar amount. Exclude physician fees and charges for discharge prescriptions.

Pharmacy Services: Inpatient Only Expense Elements

Albumin and Plasma Protein Fraction Expense
Total drug expense for all strengths and sizes of albumin and plasma protein fraction.
This is a subset of Drug Expense.
Anti-Infective Drug Expense
Total drug expense for all anti-infective drugs.

This is a subset of Drug Expense.

Anticoagulant and Thrombolytic Drug Expense
Total drug expense for all anticoagulant and thrombolytic drugs, including but not limited to abciximab, alteplase, anti-thrombin III, argatroban, bivalirudin, enoxaparin, eptifibatide, heparin, lepirudin, reteplase, streptokinase, tirofiban, urokinase, and warfarin.

This is a subset of Drug Expense.

Blood and Immune System Modifiers Expense
Total drug expense for all blood and immune system modifier drugs, including but not limited to darbepoitin, epoetin, filgrastim, pegfilgrastim, sargramostim, adalimumab, omalizumab, and interferons (all variations).

This is a subset of Drug Expense.

Botulinum Toxin Expense
Total drug expense for all strengths, sizes, and brands of botulinum toxin type A and botulinum toxin type B.

This is a subset of Drug Expense.

Contrast Media Expense
Total drug expense for all strengths, sizes and brands of radiology contrast media.

This is a subset of Drug Expense.

Drug Expense
Total expense for pharmaceuticals expensed to this department.

This is a subset of Medical Supply Expense.

Enzyme Deficiency Replacement Drug Expense
Total drug expense for all enzyme replacement therapy drugs, including but not limited to agalsidase beta, alglucerase, alglucosidase alfa, elosulfase alfa, galsulfase, idursulfase, imiglucerase, and laronidase.
This is a subset of Drug Expense.

**Hemophilia Factor Expense**

Total drug expense for all strengths, sizes and brands of Factor VIIa, VIII and IX.

This is a subset of Drug Expense.

**Infliximab Drug Expense**

Total drug expense for Infliximab.

This is a subset of Drug Expense.

**IV Immune Globulin Expense**

Total drug expense for all brands of IV immune globulin (IVIG).

This is a subset of Drug Expense.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Macular Degeneration Drug Expense**

Total drug expense for all macular degeneration drugs, including but not limited to pegaptanib, ranibizumab, and verteporfin.

This is a subset of Drug Expense.

**Medical Supply Expense**

Report the expense for the period for stocked and non stocked patient medical supplies. Include all non capitalized medical and surgical supplies, pharmaceuticals, and other materials used in the diagnosis and treatment of patients.

This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.
**Oncology Drug Expense**

Total drug expense for all antineoplastic/oncology drugs.

This is a subset of Drug Expense.

**Operating Lease Expense**

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.

**Transplant Drug Expense**

Total drug expense for all transplant drugs, including but not limited to cyclosporine, mycophenolate, sirolimus, tacrolimus, basiliximab, anti-thymocyte globulin, cytomegalovirus immune globulin, and lymphocyte immune globulin.

This is a subset of Drug Expense.

**Vaccines and Toxoids Expense**

Total drug expense for all vaccines and toxoids.

This is a subset of Drug Expense.

**Volatile Anesthetic Gases Expense**

Total drug expense for all strengths, sizes and brands of volatile anesthetic gases.

This is a subset of Drug Expense.
Pharmacy Services: Inpatient Only Mandatory Elements

The following data elements are mandatory for this department:

- Clinical Service Workload Units
- Days of Operation per Week
- Drug Expense
- Hours of Operation per Week
- Inpatient Gross Charges
- Labor Expense
- Medical Supply Expense
- Non Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Pharmacy Intensity Score
- Pharmacy Intensity Score: Inpatient
- Worked Hours: Pharmacy Resident
- Worked Hours: Staff

Pharmacy Services: Inpatient Only Normalizations

Include the hours, costs and volumes (where applicable) associated with the

- Albumin, plasma protein fraction, Rh Immune Globulin, Anti Thrombin, Varicella Zoster Immune Globulin, and other specialty plasma products
- Cost of all medications, including IV solutions administered to inpatients. Do not include take home prescriptions and OTC drugs, radiology contrast media, volatile anesthetic gases, and hemophilia factors.
- Personnel performing the functions of the department’s day to day managerial operations (Pharmacy)
Exclude the hours costs and volumes (where applicable) associated with the

- Administration of Indigent Drug Program, e.g., assisting patients to help qualify for assistance to be able to receive prescription medications; indigent drug programs (Pharmacy Services)

- Administration of Indigent Drug Program, e.g., assisting patients to help qualify for assistance to be able to receive prescription medications; indigent drug programs

- Anesthetic gases (e.g. nitrous oxide, sevoflurane, desflurane, isoflurane, and halothane)

- Contrast Media Expense

- Cost of all take-home prescriptions and over the counter drugs for patients and employees

- Marketing/Sales staff whose primary objective is to solicit new pharmacy business (do not process scripts)

- Cost of hemophilia factors

- Nuclear pharmacy services staff and drug expenses

- Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Pharmacy)

- Pharmaceutical research programs, e.g., investigational drug studies

- Pharmacy Informatics (focusing on medication-related data and knowledge in the delivery of optimal medication-related patient care and health outcomes; including its acquisition, storage, analysis, use and dissemination)

- Pharmacy Residency Program administration and support

- Purchasing, Receiving, Warehousing and Inventory Control (Pharmacy)

- Repair and Maintenance of Clinical Equipment/Rooms

- Support activities performed by department staff for quality improvement, regulatory compliance, and drug policy related activities

- Support department activities for Information Systems, Electronic Health Record, automated distribution systems, etc.
04440, Pharmacy Services: Outpatient Only

This department provides drug distribution and pharmaceutical services to ambulatory patients and clinics including Ambulatory Dialysis, Ambulatory Surgery or Outpatient Operating Room, Catheterization Laboratory, Emergency Department, Infusion Therapy, Infusion Oncology, and all other ambulatory clinics. Include Pharmacy residents only if they are independently filling a shift and providing clinical and/or distributed services captured and reflected in the workload units. Inpatient Operating Rooms and Prescription-based Retail entities are excluded.

Pharmacy Services: Outpatient Only Mapping Guidelines

If you have an actual distinct cost center or cost centers for ambulatory/clinic pharmacy services, including staff time and materials expense devoted to ambulatory patients, map to this department. If you have an actual cost center that includes a combination of inpatient and outpatient pharmacy services, it is more appropriate to map to the 04410, Pharmacy Services department.

It is acceptable to create a normalized only the 04440, Pharmacy Ambulatory/Clinic Services department to separate staff time and materials expense devoted to ambulatory/clinic patients if your actual cost center is mapped to the 04410, Pharmacy Services department. The creation of this normalized only department is optional. If your staff time and materials expense devoted to ambulatory/clinic patients is completely included as a component of the G4400, Pharmacy Other Services department, creation of normalized only the 04440, Pharmacy Ambulatory/Clinic Services department is encouraged.

Pharmacy Services: Outpatient Only Workload Volumes

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Ambulatory Patient Visits Seen by Pharmacist

Total ambulatory patient visits for which medication services were provided in the reporting period. Visits supported include ambulatory patients seen in the Emergency Department, Ambulatory Clinics, Ambulatory Surgery, Invasive Cardiology, Electrophysiology, Radiation Therapy, Infusion Therapy, Endoscopy, and other related departments being supported.

This is a subset of Ambulatory Patient Visits Supported.
Ambulatory Patient Visits Supported

Total ambulatory patient visits for which medication services were provided by department staff during the reporting period. Visits supported include ambulatory/outpatient patients seen in the Emergency Department, Ambulatory Clinics, Ambulatory Surgery, Invasive Cardiology, Electrophysiology, Radiation Therapy, Infusion Therapy, Endoscopy, and other related departments being supported.

Clinical Service Workload Units

The total calculated time spent by department staff performing clinical services during the reporting period. Clinical services includes but is not limited to: consultations, pharmacist interventions, encounters with patients to assess and adjust drug therapy, drug utilization reviews, and adverse drug reaction reporting. Report activity in hours; use decimals to report a fraction of an hour (e.g. enter 1.25 = 1 hour, 15 minutes). Refer to the Pharmacy Workload Worksheet found on the Support Page for a complete list of clinical workload activities.

Compounded Doses Dispensed

Total doses of medication compounded and dispensed to patients by the department for the reporting period.

This is a component of Doses Dispensed.

Days of Operation per Week

Total number of days the department is open for operation during the week.

Doses Dispensed

The total doses of medication dispensed to patients (via all routes of administration) by the department during the reporting period. Include automated point of care drug dispensing system (e.g. Pyxis, Omnicell) refills and all other doses dispensed by the department to patient areas.

Doses Dispensed: Complex IV

Total doses of medication produced and dispensed to patients via complex IV administration. Doses may be ready-made or compounded.

This is a subset of Doses Dispensed.

Doses Dispensed: Oral

Total doses of medication produced and dispensed to patients via oral administration. Doses may be ready-made or compounded.
This is a subset of Doses Dispensed.

**Doses Dispensed: Simple IV**

Total doses of medication produced and dispensed to patients via simple IV administration. Doses may be ready-made or compounded.

This is a subset of Doses Dispensed.

**Doses Dispensed: TPN**

Total doses of medication produced and dispensed to patients via TPN administration. Doses may be ready-made or compounded.

This is a subset of Doses Dispensed.

**Hours Devoted To Teaching**

The total hours devoted by the department to teaching residents and students, including but not limited to bench/on-the-job teaching and/or preceptoring for the reporting period. Enter 0 if there is no teaching program supported by the department.

**Hours of Operation per Week**

Total number of hours the department is open for operation during the week.

**Infusions Supported**

The total number of Infusion Therapy infusions supported by this department during the reporting period. This includes infusions by all routes of administration as long as the department provided support for the infusion. This may include infusions performed in an Infusion Therapy department, Cancer Center, and Home Care Infusion.

**Investigational Drug Studies In Progress**

Enter the total number of investigational drug studies in progress during the reporting period.

**Medication Reconciliation Service Units**

Total calculated time spent by department staff performing medication reconciliation during the reporting period. Report activity in hours; use decimals to report a fraction of an hour (e.g. enter 1.25 = 1 hour, 15 minutes). Refer to the Pharmacy Workload Worksheet on the Support Page for details on how to calculate the service units.

This is a subset of Clinical Service Workload Units.
Number of Clinics Pharmacy Department Provides Services

Total number of clinics/ambulatory centers to which this department provides services, including but not limited to: drug distribution, charge capture, and inventory control (i.e. outdate checks).

Number of Clinics with Dedicated Pharmacist

Total number of clinics/ambulatory centers to which this department provides services, including but not limited to: drug distribution, charge capture, and inventory control (i.e. outdate checks) with a dedicated Pharmacist.

Orders Processed

The total new, revised and/or modified orders processed by the department during the reporting period. Include discontinued orders and re-dispenses.

Pharmacy Residents Supported

Total number of individual Pharmacy Residents supported by the department during the reporting period.

Pharmacy Services: Outpatient Only Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time-off hours. Exclude on-call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Pharmacist

Total hours worked by registered pharmacists.

This is a subset of Worked Hours: Staff.

Worked Hours: Pharmacy Buyer

Total hours worked by staff responsible for all pharmaceutical orders, purchases, inventory and pharmaceutical cost management.

This is a subset of Worked Hours: Staff.

Worked Hours: Pharmacy Resident

Total pharmacy resident hours used by the department.

This is a subset of Worked Hours: Staff.

Worked Hours: Pharmacy Technician

Total hours worked by pharmacy technicians.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Pharmacy Services: Outpatient Only Revenue Elements
Outpatient Gross Charges

Report the facility wide total pharmacy gross charges for services provided to ambulatory areas including but not limited to ambulatory/outpatient clinics, infusion therapy, infusion oncology, ambulatory dialysis, ambulatory surgery, ambulatory procedural areas (e.g. Operating Rooms, Emergency Department, etc) for the reporting period. Report charges as the actual dollar amount. Exclude charges for take-home and retail prescriptions.

Pharmacy Services: Outpatient Only Expense Elements

Albumin and Plasma Protein Fraction Expense

Total drug expense for all strengths and sizes of albumin and plasma protein fraction.

This is a subset of Drug Expense.

Anti-Infective Drug Expense

Total drug expense for all anti-infective drugs.

This is a subset of Drug Expense.

Anticoagulant and Thrombolytic Drug Expense

Total drug expense for all anticoagulant and thrombolytic drugs, including but not limited to abciximab, alteplase, anti-thrombin III, argatroban, bivalirudin, enoxaparin, eptifibatide, heparin, lepirudin, reteplase, streptokinase, tirofiban, urokinase, and warfarin.

This is a subset of Drug Expense.

Blood and Immune System Modifiers Expense

Total drug expense for all blood and immune system modifier drugs, including but not limited to darbepoitin, epoetin, filgrastim, pegfilgrastim, sargramostim, adalimumab, omalizumab, and interferons (all variations).

This is a subset of Drug Expense.

Botulinum Toxin Expense

Total drug expense for all strengths, sizes, and brands of botulinum toxin type A and botulinum toxin type B.

This is a subset of Drug Expense.
**Contrast Media Expense**

Total drug expense for all strengths, sizes and brands of radiology contrast media.

This is a subset of Drug Expense.

**Drug Expense**

Total expense for pharmaceuticals expensed to this department.

This is a subset of Medical Supply Expense.

**Enzyme Deficiency Replacement Drug Expense**

Total drug expense for all enzyme replacement therapy drugs, including but not limited to agalsidase beta, alglucerase, alglucosidase alfa, elosulfase alfa, galsulfase, idursulfase, imiglucerase, and laronidase.

This is a subset of Drug Expense.

**Hemophilia Factor Expense**

Total drug expense for all strengths, sizes and brands of Factor VIIa, VIII and IX.

This is a subset of Drug Expense.

**Infliximab Drug Expense**

Total drug expense for Infliximab.

This is a subset of Drug Expense.

**IV Immune Globulin Expense**

Total drug expense for all brands of IV immune globulin (IVIG).

This is a subset of Drug Expense.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.
Macular Degeneration Drug Expense

Total drug expense for all macular degeneration drugs, including but not limited to pegaptanib, ranibizumab, and verteporfin.

This is a subset of Drug Expense.

Medical Supply Expense

Report the expense for the period for stocked and non stocked patient medical supplies. Include all non capitalized medical and surgical supplies, pharmaceuticals, and other materials used in the diagnosis and treatment of patients.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

Oncology Drug Expense

Total drug expense for all antineoplastic/oncology drugs.

This is a subset of Drug Expense.

Operating Lease Expense

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.
Transplant Drug Expense

Total drug expense for all transplant drugs, including but not limited to cyclosporine, mycophenolate, sirolimus, tacrolimus, basiliximab, anti-thymocyte globulin, cytomegalovirus immune globulin, and lymphocyte immune globulin.

This is a subset of Drug Expense.

Vaccines and Toxoids Expense

Total drug expense for all vaccines and toxoids.

This is a subset of Drug Expense.

Volatile Anesthetic Gases Expense

Total drug expense for all strengths, sizes and brands of volatile anesthetic gases.

This is a subset of Drug Expense.

Pharmacy Services: Outpatient Only Mandatory Elements

The following data elements are mandatory for this department:

- Clinical Service Workload Units
- Days of Operation per Week
- Drug Expense
- Hours of Operation per Week
- Labor Expense
- Medical Supply Expense
- Non Medical Supply Expense
- Other Direct Operating Expense
- Outpatient Gross Charges
- Paid Hours: Contract Labor
- Paid Hours: Staff
• Pharmacy Intensity Score: Outpatient

• Worked Hours: Pharmacy Resident

• Worked Hours: Staff

Pharmacy Services: Outpatient Only Normalizations

Include the hours, costs and volumes (where applicable) associated with the

• Albumin, plasma protein fraction, Rh Immune Globulin, Anti Thrombin, Varicella Zoster Immune Globulin, and other specialty plasma products

• Cost of all medications, including IV solutions administered to outpatients. Do not include take home and OTC drugs, contrast media, volatile anesthetic gases, and hemophilia factors

• Personnel performing the functions of the department’s day to day managerial operations (Pharmacy)

Exclude the hours costs and volumes (where applicable) associated with the

• Administration of Indigent Drug Program, e.g., assisting patients to help qualify for assistance to be able to receive prescription medications; indigent drug programs (Pharmacy Services)

• Administration of Indigent Drug Program, e.g., assisting patients to help qualify for assistance to be able to receive prescription medications; indigent drug programs

• Anesthetic gases (e.g. nitrous oxide, sevoflurane, desflurane, isoflurane, and halothane)

• Contrast Media Expense

• Cost of all take-home prescriptions and over the counter drugs for patients and employees

• Cost of hemophilia factors

• Marketing/Sales staff whose primary objective is to solicit new pharmacy business (do not process scripts)

• Nuclear pharmacy services staff and drug expenses

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Pharmacy)

• Pharmacy Informatics (focusing on medication-related data and knowledge in the delivery of optimal medication-related patient care and health outcomes; including its acquisition, storage, analysis, use and dissemination)

• Pharmaceutical research programs, e.g., investigational drug studies
Pharmacy Services: Administration and Support

This department performs the overall administrative and general support tasks for the entire Pharmacy Services series. These tasks and functions include, but are not limited to, management of inpatient, outpatient and retail/prescription services departments, inclusive of secretarial and clerical staff, inventory control staff, billing staff, residency programs, drug policy, drug information, investigational drugs, pharmacy research programs, precepting activities for students, and the associated management of these support activities.

Pharmacy Services: Administration and Support Mapping Guidelines

Separate and distinct actual costs centers for or that include staff time and materials expense devoted to residents, pharmacy informatics, drug policy, drug information, investigational drugs, pharmacy research programs, precepting activities for students, office secretarial staff, billing staff, and the associated management of these functions should be mapped to this department.

Pharmacy Services: Administration and Support Workload Volumes

340(B) Qualified Rx Processed Supported

Enter the total number of 340(B) qualified prescriptions received and processed by the department during the reporting period.

This is a subset of Retail Prescriptions Processed.

Adjusted Discharges Supported

The total months of training provided to students by the department during the reporting period. For example, if 3 students received 6 weeks (1 1/2 months) of training each during the reporting period, enter 4.5. If 3 students received 3 months of training.
Ambulatory Patient Visits Supported

Total ambulatory patient visits for which medication services were provided by department staff during the reporting period. Visits supported include ambulatory/outpatient patients seen in the Emergency Department, Ambulatory Clinics, Ambulatory Surgery, Invasive Cardiology, Electrophysiology, Radiation Therapy, Infusion Therapy, Endoscopy, and other related departments being supported.

Clinical Service Workload Units Supported

The total calculated supported time spent by department staff performing clinical services during the reporting period. Clinical services includes but is not limited to: consultations, pharmacist interventions, encounters with patients to assess and adjust drug therapy, drug utilization reviews, and adverse drug reaction reporting. Report activity in hours; use decimals to report a fraction of an hour (e.g. enter 1.25 = 1 hour, 15 minutes). Refer to the Pharmacy Workload Worksheet found on the Support Page for a complete list of clinical workload activities.

Divisional Employees Supported

Total number of individual employees reporting through Pharmacy Services division supported by the department during the reporting period.

Doses Dispensed Supported

The total supported doses of medication dispensed to patients (via all routes of administration) by the department during the reporting period. Include automated point of care drug dispensing system (e.g. Pyxis, Omnicell) refills and all other doses dispensed by the department to patient areas.

Hours Devoted To Teaching

The total hours devoted by the department to teaching residents and students, including but not limited to bench/on-the-job teaching and/or preceptoring for the reporting period. Enter 0 if there is no teaching program supported by the department.

Investigational Drug Studies In Progress

Enter the total number of investigational drug studies in progress during the reporting period.

Medication Reconciliation Service Units Supported

Total hours supported, rounded to the nearest 15 minute increment, spent by department staff performing medication reconciliation during the reporting period. Use decimals to report fractions of an hour (e.g. 1.25 hours for 1 hour 15 minutes). Refer to the Pharmacy Workload Worksheet on the Support Page for details on how to calculate the service units.

This is a subset of Clinical Service Workload Units.
Orders Processed Supported
The total new, revised and/or modified orders processed supported by the department during the reporting period. Include discontinued orders and re-dispenses.

Pharmacy Residents Supported
Total number of individual Pharmacy Residents supported by the department during the reporting period.

Retail Prescriptions Processed Supported
The total number of retail prescriptions received and processed by the departments supported during the reporting period. Refer to the Pharmacy Workload Worksheet found on the Support Page for assistance with reporting this element.

Student Training Months Provided
The total months of training provided to students by the department during the reporting period. For example, if 3 students received 6 weeks (1 1/2 months) of training each during the reporting period, enter 4.5. If 3 students received 3 months of training each, enter 9. Enter 0 if there is no teaching program provided by the department.

Pharmacy Services: Administration and Support Department Hour Elements

Paid Hours: Contract Labor
Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff
Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management
Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.
**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Pharmacist**

Total hours worked by registered pharmacists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Pharmacy Buyer**

Total hours worked by staff responsible for all pharmaceutical orders, purchases, inventory and pharmaceutical cost management.

This is a subset of Worked Hours: Staff.

**Worked Hours: Pharmacy Resident**

Total pharmacy resident hours used by the department.

This is a subset of Worked Hours: Staff.

**Worked Hours: Pharmacy Technician**

Total hours worked by pharmacy technicians.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.
Pharmacy Services: Administration and Support Expense Elements

Contrast Media Expense
Total drug expense for all strengths, sizes and brands of radiology contrast media.
This is a subset of Drug Expense.

Drug Expense
Total expense for pharmaceuticals expensed to this department.
This is a subset of Medical Supply Expense.

Hemophilia Factor Expense
Total drug expense for all strengths, sizes and brands of Factor VIIa, VIII and IX.
This is a subset of Drug Expense.

Labor Expense
Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Medical Supply Expense
Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.
This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense
Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

Operating Lease Expense
Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.
This is a subset of Other Direct Operating Expense.
Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Volatile Anesthetic Gases Expense

Total drug expense for all strengths, sizes and brands of volatile anesthetic gases.

This is a subset of Drug Expense.

Pharmacy Services: Administration and Support Mandatory Elements

The following data elements are mandatory for this department:

- Clinical Service Workload Units Supported
- Drug Expense
- Hours Devoted To Teaching
- Labor Expense
- Medical Supply Expense
- Non Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Retail Prescriptions Processed Supported
- Worked Hours: Pharmacy Resident
• Worked Hours: Staff

**Pharmacy Services: Administration and Support Normalizations**

Include the hours, costs and volumes (where applicable) associated with the

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, scheduling, residency program. (Pharmacy Services)

• Administration of Indigent Drug Program, e.g., assisting patients to help qualify for assistance to be able to receive prescription medications; indigent drug programs (Pharmacy Services)

• Administration of Indigent Drug Program, e.g., assisting patients to help qualify for assistance to be able to receive prescription medications; indigent drug programs (Revenue Cycle Management)

• Marketing/Sales staff whose primary objective is to solicit new pharmacy business (do not process scripts)

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Pharmacy)

• Pharmaceutical research programs, e.g., investigational drug studies

• Pharmacy Residency Program administration and support

• Purchasing, Receiving, Warehousing and Inventory Control (Pharmacy)

• Support activities performed by department staff for quality improvement, regulatory compliance, and drug policy related activities

• Support department activities for Information Systems, Electronic Health Record, automated distribution systems, etc.

Exclude the hours costs and volumes (where applicable) associated with the

• Albumin, plasma protein fraction, Rh Immune Globulin, Anti Thrombin, Varicella Zoster Immune Globulin, and other specialty plasma products

• Personnel performing the functions of the department's day to day managerial operations (Pharmacy)

• Pharmacy Informatics (focusing on medication-related data and knowledge in the delivery of optimal medication-related patient care and health outcomes; including its acquisition, storage, analysis, use and dissemination)
G4400, Pharmacy Other Services

This generic department includes all cost centers belonging to pharmacy services that cannot be mapped to individual pharmacy services departments.

Pharmacy Other Services Mapping Guidelines

Separate actual costs centers for or that include staff time and materials expense devoted to residents, pharmacy informatics, drug policy, drug information, poison control, investigational drugs and pharmacy research programs, precepting activities for students, office secretarial staff, billing staff, and the associated management of these functions should be mapped to this department.

Pharmacy Other Services Workload Volumes

340(B) Qualified Rx Processed

Enter the total number of 340(B) qualified prescriptions received and processed by the department during the reporting period.

This is a subset of Retail Prescriptions Processed.

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Ambulatory Patient Visits Seen by Pharmacist

Total ambulatory patient visits for which medication services were provided in the reporting period. Visits supported include ambulatory patients seen in the Emergency Department, Ambulatory Clinics, Ambulatory Surgery, Invasive Cardiology, Electrophysiology, Radiation Therapy, Infusion Therapy, Endoscopy, and other related departments being supported.

This is a subset of Ambulatory Patient Visits Supported.
Ambulatory Patient Visits Supported

Total ambulatory patient visits for which medication services were provided by department staff during the reporting period. Visits supported include ambulatory/outpatient patients seen in the Emergency Department, Ambulatory Clinics, Ambulatory Surgery, Invasive Cardiology, Electrophysiology, Radiation Therapy, Infusion Therapy, Endoscopy, and other related departments being supported.

Clinical Service Workload Units

The total calculated time spent by department staff performing clinical services during the reporting period. Clinical services includes but is not limited to: consultations, pharmacist interventions, encounters with patients to assess and adjust drug therapy, drug utilization reviews, and adverse drug reaction reporting. Report activity in hours; use decimals to report a fraction of an hour (e.g. enter 1.25 = 1 hour, 15 minutes). Refer to the Pharmacy Workload Worksheet found on the Support Page for a complete list of clinical workload activities.

Compounded Doses Dispensed

Total doses of medication compounded and dispensed to patients by the department for the reporting period.

This is a component of Doses Dispensed.

Doses Dispensed

The total doses of medication dispensed to patients (via all routes of administration) by the department during the reporting period. Include automated point of care drug dispensing system (e.g. Pyxis, Omnicell) refills and all other doses dispensed by the department to patient areas.

Doses Dispensed: Complex IV

Total doses of medication produced and dispensed to patients via complex IV administration. Doses may be ready-made or compounded.

This is a subset of Doses Dispensed.

Doses Dispensed: Oral

Total doses of medication produced and dispensed to patients via oral administration. Doses may be ready-made or compounded.

This is a subset of Doses Dispensed.
Doses Dispensed: Simple IV
Total doses of medication produced and dispensed to patients via simple IV administration. Doses may be ready-made or compounded.

This is a subset of Doses Dispensed.

Doses Dispensed: TPN
Total doses of medication produced and dispensed to patients via TPN administration. Doses may be ready-made or compounded.

This is a subset of Doses Dispensed.

Employee Rx Processed
Enter the total number of prescriptions for employees received and processed by the department during the reporting period.

This is a subset of Retail Prescriptions Processed.

Hours Devoted to Teaching
The total hours devoted by the department to teaching residents and students, including but not limited to bench/on-the-job teaching and/or preceptoring for the reporting period. Enter 0 if there is no teaching program supported by the department.

Infusions Supported
The total number of Infusion Therapy infusions supported by this department during the reporting period. This includes infusions by all routes of administration as long as the department provided support for the infusion. This may include infusions performed in an Infusion Therapy department, Cancer Center, and Home Care Infusion.

Investigational Drug Studies In Progress
Enter the total number of investigational drug studies in progress during the reporting period.

Medication Reconciliation Service Units
Total calculated time spent by department staff performing medication reconciliation during the reporting period. Report activity in hours; use decimals to report a fraction of an hour (e.g. enter 1.25 = 1 hour, 15 minutes). Refer to the Pharmacy Workload Worksheet on the Support Page for details on how to calculate the service units.

This is a subset of Clinical Service Workload Units.
Orders Processed

The total new, revised and/or modified orders processed by the department during the reporting period. Include discontinued orders and re-dispenses.

Pharmacy Intensity Score: Inpatient

The Pharmacy Intensity Score: Inpatient is based on the number of discharges by MS-DRG multiplied by the intensity weight for each MS-DRG. The MS-DRG specific intensity weights were developed using discharge level data from over 1,000 hospitals and are used to calculate the overall supply intensity score for your organization. Sufficient discharge data is not available for newer MS-DRGs, however the average intensity weight of all weighted MS-DRGs will be used for all active, non-weighted MS-DRGs until specific weights can be calculated. If your organization does not capture discharges by MS-DRG, do not report a value for the Pharmacy Intensity Score. When entering a value that is less than 1.0, enter the leading zero before the decimal (ex: 0.97). Please refer to the Intensity Score Workbook_Supply and Pharmacy worksheet available on the Support tab for assistance reporting this value.

Pharmacy Residents Supported

Total number of individual Pharmacy Residents supported by the department during the reporting period.

Prescriptions Sold

Enter the total number of prescriptions sold by the department during the reporting period. Refer to the Pharmacy Workload Worksheet found on the Support Page for assistance with reporting this element.

Retail Prescriptions Processed

The total number of retail prescriptions received and processed by the department during the reporting period. Refer to the Pharmacy Workload Worksheet found on the Support Page for assistance with reporting this element.

Specialty Rx Prescriptions Processed

Enter the total number of specialty prescriptions received and processed by the department during the reporting period. Specialty prescriptions are medications that are generally high cost and require prior authorization (i.e. approval) prior to dispensing to patients. They are have additional restrictions (generally by insurance companies) as to which pharmacies can dispense them.

This is a subset of Retail Prescriptions Processed.

Weighted Compounded Prescriptions

Enter the total number of weighted compounded prescriptions received and processed by the department during the reporting period. Refer to the Pharmacy Workload Worksheet found on the Support Page for assistance with reporting this element.

This is a subset of Weighted Prescriptions.
Weighted DME Sales
Total weighted number of durable medical equipment devices sold (e.g. glucose monitoring devices, handicap equipment) and total number of boxes of non durable supplies (e.g. such as syringes, gauze, etc.). Refer to the Pharmacy Workload Worksheet found on the Support Page for assistance with reporting this element.

This is a subset of Weighted Prescriptions.

Weighted Mail Order Prescriptions
Total weighted new and refill mail order prescriptions that are mailed to patients. Refer to the Pharmacy Workload Worksheet found on the Support Page for assistance with reporting this element.

This is a subset of Weighted Prescriptions.

Weighted Prescriptions
Total number of weighted prescriptions processed by the department during the reporting period. Refer to the Pharmacy Workload Worksheet found on the Support Page for assistance with reporting this element.

Weighted Specialty Prescriptions
Enter the total number of weighted specialty prescriptions received and processed by the department during the reporting period. Refer to the Pharmacy Workload Worksheet found on the Support Page for assistance with reporting this element.

This is a subset of Weighted Prescriptions.

Pharmacy Other Services Department Hours Elements

Paid Hours: Contract Labor
Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff
Total hours paid. Include regular, premium, and paid time-off hours. Exclude on-call or standby time.

Worked Hours: Management
Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.
This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee’s normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Pharmacist**

Total hours worked by registered pharmacists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Pharmacy Buyer**

Total hours worked by staff responsible for all pharmaceutical orders, purchases, inventory and pharmaceutical cost management.

This is a subset of Worked Hours: Staff.

**Worked Hours: Pharmacy Resident**

Total pharmacy resident hours used by the department.

This is a subset of Worked Hours: Staff.

**Worked Hours: Pharmacy Technician**

Total hours worked by pharmacy technicians.

This is a subset of Worked Hours: Staff.
Worked Hours: Staff
Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Pharmacy Other Services Operational Metrics

Pharmacy Intensity Score
The Pharmacy Intensity Score calculated for your facility on the Intensity Score workbook_Supply and Pharmacy. The worksheet can be found on the Support tab of ActionOI.

Pharmacy Other Services Revenue Elements

Inpatient Gross Charges
Report the facility wide total pharmacy gross charges for inpatients only for the reporting period. Report charges as the actual dollar amount. Exclude physician fees and charges for discharge prescriptions.

Outpatient Gross Charges
Report the facility wide total pharmacy gross charges for services provided to ambulatory areas including but not limited to ambulatory/outpatient clinics, infusion therapy, infusion oncology, ambulatory dialysis, ambulatory surgery, ambulatory procedural areas (e.g. Operating Rooms, Emergency Department, etc) for the reporting period. Report charges as the actual dollar amount. Exclude charges for take-home and retail prescriptions.

Total Retail Revenue
Total retail revenue received from all sales including but not limited to revenue related to sundries.

Pharmacy Other Services Expense Elements

Albumin and Plasma Protein Fraction Expense
Total drug expense for all strengths and sizes of albumin and plasma protein fraction.

This is a subset of Drug Expense.

Anti-Infective Drug Expense
Total drug expense for all anti-infective drugs.

This is a subset of Drug Expense.
Anticoagulant and Thrombolytic Drug Expense

Total drug expense for all anticoagulant and thrombolytic drugs, including but not limited to abciximab, alteplase, anti-thrombin III, argatroban, bivalirudin, enoxaparin, eptifibatide, heparin, lepirudin, reteplase, streptokinase, tirofiban, urokinase, and warfarin.

This is a subset of Drug Expense.

Blood and Immune System Modifiers Expense

Total drug expense for all blood and immune system modifier drugs, including but not limited to darbepoetin, epoetin, filgrastim, pegfilgrastim, sargramostim, adalimumab, omalizumab, and interferons (all variations).

This is a subset of Drug Expense.

Botulinum Toxin Expense

Total drug expense for all strengths, sizes, and brands of botulinum toxin type A and botulinum toxin type B.

This is a subset of Drug Expense.

Contrast Media Expense

Total drug expense for all strengths, sizes and brands of radiology contrast media.

This is a subset of Drug Expense.

Drug Expense

Total expense for pharmaceuticals expensed to this department.

This is a subset of Medical Supply Expense.

Enzyme Deficiency Replacement Drug Expense

Total drug expense for all enzyme replacement therapy drugs, including but not limited to agalsidase beta, alglucerase, alglucosidase alfa, elosulfase alfa, galsulfase, idursulfase, imiglucerase, and laronidase.

This is a subset of Drug Expense.

Hemophilia Factor Expense

Total drug expense for all strengths, sizes and brands of Factor VIIa, VIII and IX.
This is a subset of Drug Expense.

**Infliximab Drug Expense**

Total drug expense for Infliximab.

This is a subset of Drug Expense.

**IV Immune Globulin Expense**

Total drug expense for all brands of IV immune globulin (IVIG).

This is a subset of Drug Expense.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Macular Degeneration Drug Expense**

Total drug expense for all macular degeneration drugs, including but not limited to pegaptanib, ranibizumab, and verteporfin.

This is a subset of Drug Expense.

**Medical Supply Expense**

Report the expense for the period for stocked and non stocked patient medical supplies. Include all non capitalized medical and surgical supplies, pharmaceuticals, and other materials used in the diagnosis and treatment of patients.

This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

**Oncology Drug Expense**

Total drug expense for all antineoplastic/oncology drugs.

This is a subset of Drug Expense.
Operating Lease Expense
Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense
Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense
Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.

Transplant Drug Expense
Total drug expense for all transplant drugs, including but not limited to cyclosporine, mycophenolate, sirolimus, tacrolimus, basiliximab, anti-thymocyte globulin, cytomegalovirus immune globulin, and lymphocyte immune globulin.

This is a subset of Drug Expense.

Vaccines and Toxoids Expense
Total drug expense for all vaccines and toxoids.

This is a subset of Drug Expense.

Volatile Anesthetic Gases Expense
Total drug expense for all strengths, sizes and brands of volatile anesthetic gases.

This is a subset of Drug Expense.

Pharmacy Other Services Mandatory Elements
The following data elements are mandatory for this department:
• Clinical Service Workload Units
• Drug Expense
• Days of Operation per Week
• Inpatient Gross Charges
• Labor Expense
• Medical Supply Expense
• Non Medical Supply Expense
• Other Direct Operating Expense
• Outpatient Gross Charges
• Paid Hours: Contract Labor
• Paid Hours: Staff
• Pharmacy Intensity Score
• Pharmacy Intensity Score: Outpatient
• Pharmacy Intensity Score: Inpatient
• Retail Prescriptions Processed
• Total Retail Revenue
• Worked Hours: Pharmacy Resident
• Worked Hours: Staff

**Pharmacy Other Services Normalizations**

Include the hours costs and volumes (where applicable) associated with the

• Albumin, plasma protein fraction, Rh Immune Globulin, Anti Thrombin, Varicella Zoster Immune Globulin, and other specialty plasma products
• Billing for mail order prescriptions
• Cost of all take-home prescriptions and over the counter drugs for patients and employees
• Cost of hemophilia factors

• Personnel performing the functions of the department’s day to day managerial operations (Pharmacy)

Exclude the hours costs and volumes (where applicable) associated with the

• Administration of Indigent Drug Program, e.g., assisting patients to help qualify for assistance to be able to receive prescription medications; indigent drug programs (Pharmacy Services)

• Administration of Indigent Drug Program, e.g., assisting patients to help qualify for assistance to be able to receive prescription medications; indigent drug programs

• Anesthetic gases (e.g. nitrous oxide, sevoflurane, desflurane, isoflurane, and halothane)

• Contrast Media Expense

• Marketing/Sales staff whose primary objective is to solicit new pharmacy business (do not process scripts)

• Nuclear pharmacy services staff and drug expenses

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Pharmacy)

• Pharmaceutical research programs, e.g., investigational drug studies

• Pharmacy Residency Program administration and support

• Purchasing, Receiving, Warehousing and Inventory Control (Pharmacy)

• Repair and Maintenance of Clinical Equipment/Rooms

• Support activities performed by department staff for quality improvement, regulatory compliance, and drug policy related activities

• Support department activities for Information Systems, Electronic Health Record, automated distribution systems, etc.
I4400, Pharmacy Patient Services Rollup

This department is a roll up of all instances of the 04430 Pharmacy Services: Inpatient Only and 04440 Pharmacy Services: Outpatient Only, and instances of the 04410 Pharmacy Services: Inpatient & Outpatient profiles, in order to provide appropriate sample sizes for comparative analysis based on defined compare groups. It includes all drug distribution and pharmaceutical services provided to both inpatients and outpatients. This intermediate rollup does not include instances of the 04411, Pharmacy Services: Retail/Prescription department.

Pharmacy Patient Services Rollup Workload Volumes

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Ambulatory Patient Visits Seen by Pharmacist

Total ambulatory patient visits for which medication services were provided in the reporting period. Visits supported include ambulatory patients seen in the Emergency Department, Ambulatory Clinics, Ambulatory Surgery, Invasive Cardiology, Electrophysiology, Radiation Therapy, Infusion Therapy, Endoscopy, and other related departments being supported.

This is a subset of Ambulatory Patient Visits Supported.

Ambulatory Patient Visits Supported

Total ambulatory patient visits for which medication services were provided by department staff during the reporting period. Visits supported include ambulatory/outpatient patients seen in the Emergency Department, Ambulatory Clinics, Ambulatory Surgery, Invasive Cardiology, Electrophysiology, Radiation Therapy, Infusion Therapy, Endoscopy, and other related departments being supported.

Clinical Service Workload Units

The total calculated time spent by department staff performing clinical services during the reporting period. Clinical services includes but is not limited to: consultations, pharmacist interventions, encounters with patients to assess and adjust drug therapy, drug utilization reviews, and adverse drug reaction reporting. Report activity in hours; use decimals to report a fraction of an hour (e.g. enter 1.25 = 1 hour, 15 minutes). Refer to the Pharmacy Workload Worksheet found on the Support Page for a complete list of clinical workload activities.
Compounded Doses Dispensed

Total doses of medication compounded and dispensed to patients by the department for the reporting period.

This is a component of Doses Dispensed.

Days of Operation per Week

Total number of days the department is open for operation during the week.

Doses Dispensed

The total doses of medication dispensed to patients (via all routes of administration) by the department during the reporting period. Include automated point of care drug dispensing system (e.g. Pyxis, Omnicell) refills and all other doses dispensed by the department to patient areas.

Doses Dispensed: Complex IV

Total doses of medication produced and dispensed to patients via complex IV administration. Doses may be ready-made or compounded.

This is a subset of Doses Dispensed.

Doses Dispensed: Oral

Total doses of medication produced and dispensed to patients via oral administration. Doses may be ready-made or compounded.

This is a subset of Doses Dispensed.

Doses Dispensed: Simple IV

Total doses of medication produced and dispensed to patients via simple IV administration. Doses may be ready-made or compounded.

This is a subset of Doses Dispensed.

Doses Dispensed: TPN

Total doses of medication produced and dispensed to patients via TPN administration. Doses may be ready-made or compounded.
This is a subset of Doses Dispensed.

**Hours Devoted to Teaching**

The total hours devoted by the department to teaching residents and students, including but not limited to bench/on-the-job teaching and/or preceptoring for the reporting period. Enter 0 if there is no teaching program supported by the department.

**Hours of Operation per Week**

Total number of hours the department is open for operation during the week.

**Infusions Supported**

The total number of Infusion Therapy infusions supported by this department during the reporting period. This includes infusions by all routes of administration as long as the department provided support for the infusion. This may include infusions performed in an Infusion Therapy department, Cancer Center, and Home Care Infusion.

**Investigational Drug Studies In Progress**

Enter the total number of investigational drug studies in progress during the reporting period.

**Medication Reconciliation Service Units**

Total calculated time spent by department staff performing medication reconciliation during the reporting period. Report activity in hours; use decimals to report a fraction of an hour (e.g. enter 1.25 = 1 hour, 15 minutes). Refer to the Pharmacy Workload Worksheet on the Support Page for details on how to calculate the service units.

This is a subset of Clinical Service Workload Units.

**Number of Clinics Pharmacy Department Provides Services**

Total number of clinics/ambulatory centers to which this department provides services, including but not limited to: drug distribution, charge capture, and inventory control (i.e. outdate checks).

**Number of Clinics with Dedicated Pharmacist**

Total number of clinics/ambulatory centers to which this department provides services, including but not limited to: drug distribution, charge capture, and inventory control (i.e. outdate checks) with a dedicated Pharmacist.
**Orders Processed**

The total new, revised and/or modified orders processed by the department during the reporting period. Include discontinued orders and re-dispenses.

**Pharmacy Intensity Score: Inpatient**

The Pharmacy Intensity Score: Inpatient is based on the number of discharges by MS-DRG multiplied by the intensity weight for each MS-DRG. The MS-DRG specific intensity weights were developed using discharge level data from over 1,000 hospitals and are used to calculate the overall supply intensity score for your organization. Sufficient discharge data is not available for newer MS-DRGs, however the average intensity weight of all weighted MS-DRGs will be used for all active, non-weighted MS-DRGs until specific weights can be calculated. If your organization does not capture discharges by MS-DRG, do not report a value for the Pharmacy Intensity Score. When entering a value that is less than 1.0, enter the leading zero before the decimal (ex: 0.97). Please refer to the Intensity Score Workbook_Supply and Pharmacy worksheet available on the Support tab for assistance reporting this value.

**Pharmacy Residents Supported**

Total number of individual Pharmacy Residents supported by the department during the reporting period.

**Pharmacy Patient Services Rollup Department Hours Elements**

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time-off hours. Exclude on-call or standby time.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Pharmacist**

Total hours worked by registered pharmacists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Pharmacy Buyer**

Total hours worked by staff responsible for all pharmaceutical orders, purchases, inventory and pharmaceutical cost management.

This is a subset of Worked Hours: Staff.

**Worked Hours: Pharmacy Resident**

Total pharmacy resident hours used by the department.

This is a subset of Worked Hours: Staff.

**Worked Hours: Pharmacy Technician**

Total hours worked by pharmacy technicians.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Pharmacy Patient Services Rollup Operational Metrics**

**Pharmacy Intensity Score**

The Pharmacy Intensity Score calculated for your facility on the Intensity Score workbook_Supply and Pharmacy. The worksheet can be found on the Support tab of ActionOI.
Pharmacy Patient Services Rollup Revenue Elements

**Inpatient Gross Charges**

Report the facility wide total pharmacy gross charges for inpatients only for the reporting period. Report charges as the actual dollar amount. Exclude physician fees and charges for discharge prescriptions.

**Outpatient Gross Charges**

Report the facility wide total pharmacy gross charges for services provided to ambulatory areas including but not limited to ambulatory/outpatient clinics, infusion therapy, infusion oncology, ambulatory dialysis, ambulatory surgery, ambulatory procedural areas (e.g. Operating Rooms, Emergency Department, etc) for the reporting period. Report charges as the actual dollar amount. Exclude charges for take-home and retail prescriptions.

Pharmacy Patient Services Rollup Expense Elements

**Albumin and Plasma Protein Fraction Expense**

Total drug expense for all strengths and sizes of albumin and plasma protein fraction.

This is a subset of Drug Expense.

**Anti-Infective Drug Expense**

Total drug expense for all anti-infective drugs.

This is a subset of Drug Expense.

**Anticoagulant and Thrombolytic Drug Expense**

Total drug expense for all anticoagulant and thrombolytic drugs, including but not limited to abciximab, alteplase, anti-thrombin III, argatroban, bivalirudin, enoxaparin, eptifibatide, heparin, lepirudin, reteplase, streptokinase, tirofiban, urokinase, and warfarin.

This is a subset of Drug Expense.

**Blood and Immune System Modifiers Expense**

Total drug expense for all blood and immune system modifier drugs, including but not limited to darbepotin, epoetin, filgrastim, pegfilgrastim, sargramostim, adalimumab, omalizumab, and interferons (all variations).

This is a subset of Drug Expense.
**Botulinum Toxin Expense**
Total drug expense for all strengths, sizes, and brands of botulinum toxin type A and botulinum toxin type B.

This is a subset of Drug Expense.

**Contrast Media Expense**
Total drug expense for all strengths, sizes and brands of radiology contrast media.

This is a subset of Drug Expense.

**Drug Expense**
Total expense for pharmaceuticals expensed to this department.

This is a subset of Medical Supply Expense.

**Enzyme Deficiency Replacement Drug Expense**
Total drug expense for all enzyme replacement therapy drugs, including but not limited to agalsidase beta, alglucerase, alglucosidase alfa, elosulfase alfa, galsulfase, idursulfase, imiglucerase, and laronidase.

This is a subset of Drug Expense.

**Hemophilia Factor Expense**
Total drug expense for all strengths, sizes and brands of Factor VIIa, VIII and IX.

This is a subset of Drug Expense.

**Infliximab Drug Expense**
Total drug expense for Infliximab.

This is a subset of Drug Expense.

**IV Immune Globulin Expense**
Total drug expense for all brands of IV immune globulin (IVIG).

This is a subset of Drug Expense.
Labor Expense
Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Macular Degeneration Drug Expense
Total drug expense for all macular degeneration drugs, including but not limited to pegaptanib, ranibizumab, and verteporfin.

This is a subset of Drug Expense.

Medical Supply Expense
Report the expense for the period for stocked and non stocked patient medical supplies. Include all non capitalized medical and surgical supplies, pharmaceuticals, and other materials used in the diagnosis and treatment of patients.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense
Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

Oncology Drug Expense
Total drug expense for all antineoplastic/oncology drugs.

This is a subset of Drug Expense.

Operating Lease Expense
Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense
Total other direct operating expense that includes professional fees, department supplies, equipment rental fees, operating leases for equipment, dues, travel and small (non-capitalized) equipment. Exclude depreciation, building rent expense, capitalized lease costs.
Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.

Transplant Drug Expense

Total drug expense for all transplant drugs, including but not limited to cyclosporine, mycophenolate, sirolimus, tacrolimus, basiliximab, anti-thymocyte globulin, cytomegalovirus immune globulin, and lymphocyte immune globulin.

This is a subset of Drug Expense.

Vaccines and Toxoids Expense

Total drug expense for all vaccines and toxoids.

This is a subset of Drug Expense.

Volatile Anesthetic Gases Expense

Total drug expense for all strengths, sizes and brands of volatile anesthetic gases.

This is a subset of Drug Expense.

Pharmacy Patient Services Rollup Mandatory Elements

The following data elements are mandatory for this department:

- Clinical Service Workload Units
- Drug Expense
- Days of Operation per Week
- Hours of Operation per Week
- Inpatient Gross Charges
- Labor Expense
- Medical Supply Expense
• Non Medical Supply Expense
• Other Direct Operating Expense
• Outpatient Gross Charges
• Paid Hours: Contract Labor
• Pharmacy Intensity Score: Outpatient
• Pharmacy Intensity Score: Inpatient
• Paid Hours: Staff
• Pharmacy Intensity Score
• Worked Hours: Pharmacy Resident
• Worked Hours: Staff

**I4411, Pharmacy Retail/Prescription Services Rollup**

This department is a roll up of all instances of the 04411, Pharmacy Services: Retail/Prescription profiles in order to provide a summary of retail-based pharmacy services provided by the organization. This intermediate rollup does not include cost centers mapped to the 04410, 04430 or 04440 profiles within the Pharmacy Services series.

**Pharmacy Retail/Prescription Services Rollup Workload Volumes**

**340(B) Qualified Rx Processed**

Enter the total number of 340(B) qualified prescriptions received and processed by the department during the reporting period.

This is a subset of Retail Prescriptions Processed.

**Adjusted Discharges Supported**

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review the Guiding Principles section in the DRM for more information.
Days of Operation per Week
Total number of days the department is open for operation during the week.

Employee Rx Processed
Enter the total number of prescriptions for employees received and processed by the department during the reporting period.

This is a subset of Retail Prescriptions Processed.

Hours of Operation per Week
Total number of hours the department is open for operation during the week.

Infusions Supported
The total number of Infusion Therapy infusions supported by this department during the reporting period. This includes infusions by all routes of administration as long as the department provided support for the infusion. This may include infusions performed in an Infusion Therapy department, Cancer Center, and Home Care Infusion.

Number of Clinics Pharmacy Department Provides Services
Total number of clinics/ambulatory centers to which this department provides services, including but not limited to: drug distribution, charge capture, and inventory control (i.e. outdate checks).

Number of Clinics with Dedicated Pharmacist
Total number of clinics/ambulatory centers to which this department provides services, including but not limited to: drug distribution, charge capture, and inventory control (i.e. outdate checks) with a dedicated Pharmacist.

Retail Prescriptions Processed
The total number of retail prescriptions received and processed by the department during the reporting period. Refer to the Pharmacy Workload Worksheet found on the Support Page for assistance with reporting this element.

Specialty Rx Prescriptions Processed
Enter the total number of specialty prescriptions received and processed by the department during the reporting period. Specialty prescriptions are medications that are generally high cost and require prior authorization (i.e. approval) prior to dispensing to patients. They are have additional restrictions (generally by insurance companies) as to which pharmacies can dispense them.

This is a subset of Retail Prescriptions Processed.
Pharmacy Services

Weighted Compounded Prescriptions

Enter the total number of weighted compounded prescriptions received and processed by the department during the reporting period. Refer to the Pharmacy Workload Worksheet found on the Support Page for assistance with reporting this element.

This is a subset of Weighted Prescriptions.

Weighted DME Sales

Total weighted number of durable medical equipment devices sold (e.g. glucose monitoring devices, handicap equipment) and total number of boxes of non durable supplies (e.g. such as syringes, gauze, etc.). Refer to the Pharmacy Workload Worksheet found on the Support Page for assistance with reporting this element.

This is a subset of Weighted Prescriptions.

Weighted Mail Order Prescriptions

Total weighted new and refill mail order prescriptions that are mailed to patients. Refer to the Pharmacy Workload Worksheet found on the Support Page for assistance with reporting this element.

This is a subset of Weighted Prescriptions.

Weighted Prescriptions

Total number of weighted prescriptions processed by the department during the reporting period. Refer to the Pharmacy Workload Worksheet found on the Support Page for assistance with reporting this element.

Weighted Specialty Prescriptions

Enter the total number of weighted specialty prescriptions received and processed by the department during the reporting period. Refer to the Pharmacy Workload Worksheet found on the Support Page for assistance with reporting this element.

This is a subset of Weighted Prescriptions.

Pharmacy Retail/Prescription Services Rollup Department Hour Element

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.
**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non-physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Pharmacist**

Total hours worked by registered pharmacists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Pharmacy Buyer**

Total hours worked by staff responsible for all pharmaceutical orders, purchases, inventory and pharmaceutical cost management.

This is a subset of Worked Hours: Staff.

**Worked Hours: Pharmacy Resident**

Total pharmacy resident hours used by the department.

This is a subset of Worked Hours: Staff.

**Worked Hours: Pharmacy Technician**

Total hours worked by pharmacy technicians.

This is a subset of Worked Hours: Staff.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time-off hours. Exclude on-call or standby time.
Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Pharmacy Retail/Prescription Services Rollup Revenue Elements

Total Retail Revenue

Total retail revenue received from all sales including but not limited to revenue related to sundries. Include revenue from both retail and take-home prescriptions.

Pharmacy Retail/Prescription Services Rollup Expense Elements

Albumin and Plasma Protein Fraction Expense

Total drug expense for all strengths and sizes of albumin and plasma protein fraction.

This is a subset of Drug Expense.

Anti-Infective Drug Expense

Total drug expense for all anti-infective drugs.

This is a subset of Drug Expense.

Anticoagulant and Thrombolytic Drug Expense

Total drug expense for all anticoagulant and thrombolytic drugs, including but not limited to abciximab, alteplase, anti-thrombin III, argatroban, bivalirudin, enoxaparin, eptifibatide, heparin, lepirudin, reteplase, streptokinase, tirofiban, urokinase, and warfarin.

This is a subset of Drug Expense.

Blood And Immune System Modifiers Expense

Total drug expense for all blood and immune system modifier drugs, including but not limited to darbepotin, epoetin, filgrastim, pegfilgrastim, sargramostim, adalimumab, omalizumab, and interferons (all variations).
This is a subset of Drug Expense.

**Botulinum Toxin Expense**

Total drug expense for all strengths, sizes, and brands of botulinum toxin type A and botulinum toxin type B.

This is a subset of Drug Expense.

**Contrast Media Expense**

Total drug expense for all strengths, sizes and brands of radiology contrast media.

This is a subset of Drug Expense.

**Drug Expense**

Total expense for pharmaceuticals expensed to this department.

This is a subset of Medical Supply Expense.

**Enzyme Deficiency Replacement Drug Expense**

Total drug expense for all enzyme replacement therapy drugs, including but not limited to agalsidase beta, alglucerase, alglucosidase alfa, elosulfase alfa, galsulfase, idursulfase, imiglucerase, and laronidase.

This is a subset of Drug Expense.

**Hemophilia Factor Expense**

Total drug expense for all strengths, sizes and brands of Factor VIIa, VIII and IX.

This is a subset of Drug Expense.

**Infliximab Drug Expense**

Total drug expense for Infliximab.

This is a subset of Drug Expense.

**IV Immune Globulin Expense**

Total drug expense for all brands of IV immune globulin (IVIG).
Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Macular Degeneration Drug Expense

Total drug expense for all macular degeneration drugs, including but not limited to pegaptanib, ranibizumab, and verteporfin.

This is a subset of Drug Expense.

Medical Supply Expense

Report the expense for the period for stocked and non stocked patient medical supplies. Include all non capitalized medical and surgical supplies, pharmaceuticals, and other materials used in the diagnosis and treatment of patients.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total expense for the department non medical operating supplies, (e.g., equipment lubricants, office supplies, distribution supplies, and small non capitalized) equipment.

Oncology Drug Expense

Total drug expense for all antineoplastic/oncology drugs.

This is a subset of Drug Expense.

Operating Lease Expense

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense that includes professional fees, department supplies, equipment rental fees, operating leases for equipment, dues, travel and small (non-capitalized) equipment. Exclude depreciation, building rent expense, capitalized lease costs.
Overtime Salary Expense
Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Transplant Drug Expense
Total drug expense for all transplant drugs, including but not limited to cyclosporine, mycophenolate, sirolimus, tacrolimus, basiliximab, anti-thymocyte globulin, cytomegalovirus immune globulin, and lymphocyte immune globulin.

This is a subset of Drug Expense.

Vaccines and Toxoids Expense
Total drug expense for all vaccines and toxoids.

This is a subset of Drug Expense.

Volatile Anesthetic Gases Expense
Total drug expense for all strengths, sizes and brands of volatile anesthetic gases.

This is a subset of Drug Expense.

Pharmacy Retail/Prescription Services Rollup Mandatory Elements

The following data elements are mandatory for this department:

- Clinical Service Workload Units
- Days of Operation per Week
- Hours of Operation per Week
- Worked Hours: Pharmacy Resident
- Retail Prescriptions Processed
- Total Retail Revenue

Pharmacy Retail/Prescription Services Rollup Normalizations
Pharmacy Services Worksheets

The Pharmacy Intensity Score is based upon publicly available cost report data and is based upon the most recent data that is deemed robust enough to calculate weights. Due to timing constraints, the Pharmacy Intensity Scores are typically based on DRGs and information that is one year in arrears.

Use the following worksheets for this department. The worksheets can be found on the Support tab of ActionOI.

- Intensity Score workbook_Supply and Pharmacy
- Retail Pharmacy Worksheet
- Pharm Clin Serv Workload Unit Worksheet
Chapter 31. Psychiatry and Psychological Services

This chapter includes the following sections:

- 04710, Partial Hospitalization
- G4700, Other Psychiatry/Psychology Services

04710, Partial Hospitalization

This department offers outpatient mental health treatment programs for patients of all ages. Services include diagnosis, crisis intervention, individual and group counseling. Services may include day treatment, comprised of intensive outpatient programs used to stabilize acute psychiatric symptoms to help patients learn to manage their psychiatric disorders and/or related issues. This department may also serve as a step down from or alternative to psychiatric inpatient treatment.

Partial Hospitalization Mapping Guidelines

If your cost center's patient population is less than 80% partial hospitalization for mental health day treatment as defined here, this department may not be an appropriate choice.

Partial Hospitalization Workload Volumes

Department Specific Timed Work Units (TWUs)

The timed work units (TWUs) performed is the time spent by department staff during patient and group therapy sessions. Each timed work unit represents one minute. Simply report the total number of minutes during which sessions were conducted.

Group Therapy Sessions

Total group therapy sessions conducted during the reporting period. Patient group therapy sessions are any session where more than one patient is treated concurrently. This is a count of the sessions, not the number of patients being seen, the number of patients in each session does not affect the count.

This is a subset of Patient Sessions.
Individual Patient Sessions

Total Individual patient sessions conducted during the reporting period. Individual patient sessions are encounters (visits) with patients on an individual basis. The patient may have more than one encounter over a period of time. The length of encounter does not affect the count.

This is a subset of Patient Sessions.

Outpatient Observation Visits

The total number of patient visits supported by the department staff during the reporting period. A visit may include one or more sessions.

Patient Sessions

The total therapeutic patient sessions conducted either individually or in a group setting for the reporting period. Patient sessions is the sum of individual patient sessions and group therapy sessions. The sessions could be conducted by either the Clinical Psychologist or other staff member within the department.

Partial Hospitalization Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider

Total hours paid by physicians/providers on the department's payroll who provide clinical services. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who are billed by the facility on a CMS 1500 Form. Include only physicians/providers on the facility payroll who spend 80% or more of their time in clinical or patient care activities. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.
**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Patient Care Provider**

Total hours worked by other patient care providers (e.g. nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care personnel.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Total hours worked by physicians/providers on the department's payroll who provide clinical services. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who are billed by the facility on a CMS 1500 Form. Include only physicians/providers on the facility payroll who spend 80% or more of their time in clinical or patient care activities. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Worked Hours: Staff.

**Worked Hours: RN**

Total hours worked by registered nurse. Including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.
Worked Hours: Staff
Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Partial Hospitalization Expense Elements

Labor Expense
Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider
Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense
Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense
Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense
Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.
Physician Provider Professional Fee Expense

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Partial Hospitalization Mandatory Elements

The following data elements are mandatory for this department:

- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Patient Sessions
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff

Partial Hospitalization Normalizations

Exclude the hours costs and volumes (where applicable) associated with the

- Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
- Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
- Patient Scheduling includes management of inbound and outbound calls, faxes, and or electronic communications to ensure an appointment is generated for the patient-related activity
- Repair and Maintenance of Clinical Equipment/Rooms
G4700, Other Psychiatry/Psychology Services

This generic department includes all cost centers belonging to psychiatry/psychology services that cannot be mapped to the Psychiatry/Psychology department.

Other Psychiatry/Psychology Services Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee’s normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.
Worked Hours: Physician Provider

Total hours worked by physicians/providers on the department's payroll who provide clinical services. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who are billed by the facility on a CMS 1500 Form. Include only physicians/providers on the facility payroll who spend 80% or more of their time in clinical or patient care activities. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Worked Hours: Staff.

Worked Hours: RN

Total hours worked by registered nurse. Including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Other Psychiatry/Psychology Services Expense Elements

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.
**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Other Psychiatry/Psychology Services Mandatory Elements**

The following data elements are mandatory for this department:

- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
• Worked Hours: Staff

Other Psychiatry/Psychology Services Normalizations

Exclude the hours costs and volumes (where applicable) associated with the

• Medical records transcription, e.g., lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments into this department

• Outpatient Registrations for any ancillary services (e.g., cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Patient Procedure Scheduling includes management of inbound and outbound calls, faxes, and or electronic communications to ensure an appointment is generated for the patient-related activity

• Repair and Maintenance of Clinical Equipment/Rooms

• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

• Outpatient Registrations for any ancillary services, e.g., cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services

• Patient Scheduling includes management of inbound and outbound calls, faxes, and or electronic communications to ensure an appointment is generated for the patient-related activity

• Repair and Maintenance of Clinical Equipment/Rooms
Chapter 32. Quality Indicators

This department provides quality indicators for the acute and ambulatory care environments to assist health care facilities in evaluating patient care quality and identifying opportunities for improvement. These indicators are not to be used exclusively to establish performance thresholds or standards of care.

This chapter includes the following sections:

- 00300, Quality Indicators Elements 1810
- Quality Indicators Mandatory Elements 1814

00300, Quality Indicators Elements

Central line catheter-associated blood stream infection rate

The percentage of ICU and high-risk nursery patients who acquired a central line catheter-associated blood stream infection. This measurement follows the guidelines and requirements set forth by NDNQI® for hospital acquired infections and is based on the rate of central line-associated bloodstream infections per 1000 days of central line use.

Deep Vein Thrombosis and Pulmonary Embolism Following Ortho procedures

Total number of DVTs acquired following orthopedic procedures: Total Knee Replacement and Hip Replacement. This measurement follows the guidelines and requirements set forth by CMS for reportable hospital acquired conditions.

HCAHPS: Nurse Communication

Based on the most recently published version of the Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) Survey, enter the percent of patients who reported that their nurses "Always" communicated well. (Question #3: During this hospital stay, how often did nurses explain things in a way you could understand?)

Note: Publicly reported HCAHPS results are based on four consecutive quarters of patient surveys. CMS publishes participating hospitals’ HCAHPS results four times a year, with the oldest quarter of patient surveys rolling off as the most recent quarter rolls on.

Visit www.medicare.gov/hospitalcompare to obtain your facility's score.
HCAHPS: Nurse Responsiveness

Based on the most recently published version of the Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) Survey, enter the percent of patients who reported that they "Always" received help as soon as they wanted. (Question #4: During this hospital stay, after you pressed the call button, how often did you get help as soon as you wanted it?)

Note: Publicly reported HCAHPS results are based on four consecutive quarters of patient surveys. CMS publishes participating hospitals' HCAHPS results four times a year, with the oldest quarter of patient surveys rolling off as the most recent quarter rolls on.

Visit www.medicare.gov/hospitalcompare to obtain your facility's score.

Licensed Contracted agency staff Mix

Total number of contracted agency staff (RNs and LPNs) working with direct patient care.

Licensed Nursing Staff

Total number of full-time and part-time nurses (RNs, LPNs, LVNs) who provide patient care. Include per diem nurses who have regularly scheduled units and schedules. Do not include float pool nurses.

Licensed Nursing Staff Additions

The total number of new hires or employee transfers into the department for Licensed Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Additions are counted as of the first day worked. Include per diem nurses who have regularly scheduled units and schedules. Therefore, an employee addition is credited to the reporting period of the first day worked, even if the new hire, or employee transfer, was submitted and/or approved in the period prior.

Licensed Nursing Staff Separations

The total number of voluntary employment separations for Nursing staff (RNs, LPNs, LVNs) who provide patient care during the reporting period. Separations are counted as of the last day worked. Therefore, an employee separation is credited to the reporting period of the last day worked, even if the resignation was submitted in the prior period.

LPN/LVN Mix

Total number of full-time, part-time, and Per Diem LPN/LVNs working with direct patient care. Include Per Diem Nursing staff employed by the hospital and have regular schedules and units. Do not include Float Pool nurses.

Manifestations of Poor Glycemic Control

The total number of reported Diabetic Ketoacidosis (DKA), Nonketotic Hyperosmolar coma (NKHC), and Hypoglycemic Comas. This measurement follows the guidelines and requirements set forth by CMS for reportable, hospital acquired conditions.
Nursing Care Hours Worked

The total number of productive hours worked by nursing staff assigned to have direct patient care responsibilities for greater than 50% of their shift. Productive hours and Direct Patient Care Responsibilities are further defined by the ANA. This includes RNs, LPNs, LVNs, and UAPs.

Nursing Staff Mix

The total number of all nursing staff supplied by RNs, LPN/LVNs, Unlicensed Assistive Personnel (aides), and agency staff working with direct patient care. Include Per Diem Nursing staff employed by the hospital and have regular schedules and units. Do not include Float Pool nurses.

Patient Falls

The total number of patient falls for a reporting period. A Patient Fall is defined by the NDNQI® as an unplanned descent to the floor. See NDNQI® for further explanation of this definition, eligible departments, and internal calculation for this quality indicator.

Patient Falls with Injury

A Patient Fall with injury is the total of all Patient Falls which resulted in an injury regardless of severity. See NDNQI for further explanation of this definition, eligible departments and internal calculation for this quality indicator.

Pressure Ulcers: Community acquired

Total number of pressure ulcers Stage II or greater identified and recorded on admission.

Pressure Ulcers: Hospital acquired

Total number of pressure ulcers Stage II or greater that developed after admission to the facility.

Readmissions Within 30 Days

Include all readmissions that are unplanned and that are subsequent to an inpatient admission to any acute care facility which occurs within 30 days of the discharge date for any condition. A hospital readmission occurs when a patient is admitted to a hospital within a specified time period after being discharged from an earlier (initial) hospitalization and includes hospital readmission to any hospital, not just the hospital at which the patient was originally hospitalized.

RN Mix

Total number of full-time, part-time, and Per Diem RNs working with direct patient care. Include Per Diem Nursing staff employed by the hospital and have regular schedules and units. Do not include Float Pool nurses.
**Surgical Site Infection: following Bariatric Procedures**

Total number of infections following Bariatric Surgery including only Laparoscopic Gastric Bypass, Gastroenterostomy, and Laparoscopic Gastric Restrictive Surgery. This measurement follows the guidelines and requirements set forth by CMS for reportable hospital acquired conditions. Verify with CMS for eligible reportable procedures.

**Surgical Site Infection: following CABG, Mediastinitis**

Total number of infections following Coronary Artery Bypass Graft - Mediastinitis surgery. This measurement follows the guidelines and requirements set forth by CMS for reportable hospital acquired conditions. Verify with CMS for eligible reportable procedures.

**Surgical Site Infection: following Ortho Procedures**

Total number of infections following Orthopedic Surgery including: Spine, Neck, Shoulder, and Elbow. This measurement follows the guidelines and requirements set forth by CMS for reportable hospital acquired conditions. Verify with CMS for eligible reportable procedures.

**Total Inpatient Deaths**

Include all inpatient deaths, without adjustment for such factors as age, diagnosis, or severity of illness. Do not include Emergency Department deaths and DOAs, stillborns, neonates, and all patients in non-acute care settings.

**Total Number of Employees**

Total number of individuals employed during the reporting period regardless of current employment status.

**Total Reported Pressure Ulcers**

Total number of pressure ulcers Stage II or greater identified and recorded during the reporting period. Include pressure ulcers initially acquired in the hospital, in the community, or from an unknown origin.

**Total Resignations And Terminations**

Total number of resignations and terminations for all employees. This includes part-time and full-time employees.

This is a subset of Total Number of Employees.

**Unlicensed Assistive Personnel (aides) Mix**

Total number of full-time, part-time, and Per Diem UAPs working with direct patient care. Include Per Diem Nursing staff employed by the hospital and have regular schedules and units.
Vascular Catheter-Associated Infection rate

The percentage of Vascular Catheter-Associated Blood Stream infections (BSI). This measurement follows the guidelines and requirements set forth by CMS for hospital acquired conditions.

Quality Indicators Mandatory Elements

The following data elements are mandatory for this department:

- AMA Readmissions Within 30 Days
Chapter 33. Quality Management and Patient Safety Services

This chapter includes the following sections:

- 06410, Infection Prevention and Control and Healthcare Epidemiology
- G6400, Other Quality Management and Patient Safety Services

06410, Infection Prevention and Control and Healthcare Epidemiology

This department collects, analyzes, and interprets health data in order to track infection trends, plan appropriate interventions, measure success, and report relevant data internally to Administration and relevant bodies and externally to public health agencies as required by state law. It also establishes scientifically based infection prevention practices and collaborates with the healthcare team to assure implementation. The department performs comprehensive surveillance and creates, implements, supports, and sustains evidence-based interventions to prevent healthcare-associated infections and organism transmissions. It also educates healthcare personnel, patients and the public about infectious diseases and how to limit their spread.

Infection Prevention and Control and Healthcare Epidemiology Workload Volumes

Ambulatory Clinics Supported

Total distinct clinic sites or entities in the ambulatory services function that provide direct patient care for the period.

Ambulatory Surgery Cases

The total number of cases performed in your Ambulatory Surgery Center(s) for the period.

Blood Culture Evaluations

Total number of blood cultures investigated during the reporting period.

This is a subset of Total Culture Evaluations.
CAUTI Healthcare-associated Infections (HAIs)

Enter the total number of CAUTI Healthcare-associated infections as defined by the CDC’s National Healthcare Safety Network (NHSN) for the reporting period. Visit http://www.cdc.gov/nhsn/cms/index.html for more information.

This is a subset of Total Healthcare-associated Infections (HAIs).

CLABSI Healthcare-associated Infections (HAIs)

Enter the total number of CLABSI Healthcare-associated infections as defined by the CDC’s National Healthcare Safety Network (NHSN) for the reporting period. Visit http://www.cdc.gov/nhsn/cms/index.html for more information.

This is a subset of Total Healthcare-associated Infections (HAIs).

CMS reported C. difficile LabID events

Total number of C. difficile LabID events reported to CMS as defined by the CDC’s National Healthcare Safety Network (NHSN) for the reporting period. If there are no events to report please enter a zero. If you are not reporting this data please leave blank.

This is a subset of Total CMS reported HAIs.

CMS reported CAUTI HAIs

Enter the total number of CAUTI HAIs reported to CMS as defined by the CDC’s National Healthcare Safety Network (NHSN) for the reporting period. If there are no events to report please enter a zero. If you are not reporting this data please leave blank.

This is a subset of Total CMS reported HAIs.

CMS reported Central Line Days

The total number of days a central line has been accessed per NHSN CMS reporting guidelines. Only one central line per patient is counted per calendar day regardless of the number of central lines present. This should match what is reported to the CMS Hospital Inpatient Quality Reporting Program. If there have been no central line days please report a zero.

CMS reported CLABSI HAIs

Enter the total number of CLABSI HAIs reported to CMS as defined by the CDC’s National Healthcare Safety Network (NHSN) for the reporting period. If there are no events to report please enter a zero. If you are not reporting this data please leave blank.

This is a subset of Total CMS reported HAIs.
CMS Reported Healthcare-Associated Infections (HAIs)

Enter the total number of healthcare-associated infections reported to Centers of Medicare Services (CMS) as defined by the CDC’s National Healthcare Safety Network (NHSN) for the reporting period. If there are no events to report please enter a zero. If you are not reporting this data please leave blank.

CMS reported Methicillin-resistant Staphylococcus Aureus (MRSA) bacteremia LabID events

Total number of MRSA events reported to CMS as defined by the CDC’s National Healthcare Safety Network (NHSN) for the reporting period. If there are no events to report please enter a zero. If you are not reporting this data please leave blank.

This is a subset of Total CMS reported HAIs.

CMS reported Surgical Site Infections (SSI)

Total number of Surgical Site Infections (SSI) healthcare-associated infections reported to CMS as defined by the CDC’s National Healthcare Safety Network (NHSN) for the reporting period. If there are no events to report please enter a zero. If you are not reporting this data please leave blank.

This is a subset of Total CMS reported HAIs.

CMS reported Urinary Catheter Days

The total number of urinary catheter days per NHSN CMS reporting guidelines. This should match what is reported to the CMS Hospital Inpatient Quality Reporting Program. If there have been no urinary catheter days please report a zero.

ICRA Construction/Renovation Projects

Enter the number of Infection Control Risk Assessment construction and renovation projects completed during the reporting period. This includes all construction and renovation projects regardless of type (inspection/non-invasive activities through major demolition and construction) where the staff in this department were actively involved in the project for the purpose of minimizing construction-related outbreaks of environmental airborne contaminants and infectious agents.

ICU Patient Days Supported

Total number of Intensive Care Unit Patient Days supported for the period. This is a total of all patient days on all Intensive Care Units in the facility.

ICU Units Supported

Total number of Intensive Care Units supported for the period.

This is a component of Inpatient Units.
**Inpatient Units Supported**
Total number of Inpatient nursing units supported for the period.

**Isolation Management Patient Days**
Total number of days patient spent in isolation for the reporting period.

**Oncology Units Supported**
Total number of units dedicated to oncology care for the period.

This is a component of Inpatient Units.

**Operating Room Cases**
The total number of cases performed in your Operating Room(s) supported for the period.

**Operating Rooms Supported**
The total number of supported operating rooms designed and equipped for surgical operations, which are licensed by the state, for the period.

**SSI Healthcare-associated Infections (HAIs)**
Total number of SSI healthcare-associated infections for the reporting period. A SSI is a healthcare-associated Surgical Site Infection that patients acquired during the course of receiving treatment.

This is a subset of Total Healthcare-associated Infections (HAIs).

**Surgical Site Infection (SSI) Surveillance Procedures**
Number of procedures for which NHSN defined surgical site infection (SSI) surveillance performed for the reporting period. This is also known as procedure-associated events SSI.

**Surveillance Cultures**
Total number of surveillance cultures reported as part of infection control surveillance, such as stool cultures for vancomycin-resistant enterococci (VRE), not for use in patient diagnosis. Also called active surveillance cultures or testing (AST).

**Total Culture Evaluations**
Total number of cultures investigated (urine, blood, etc) during the reporting period.
Total Device Days

Total number of device days for which National Healthcare Safety Network (NHSN) defined healthcare associated infection surveillance was performed for the reporting period.

Total Healthcare-associated Infections (HAIs)

Enter the total number of healthcare-associated infections as defined by the CDC's National Healthcare Safety Network (NHSN) for the reporting period. Visit http://www.cdc.gov/nhsn/cms/index.html for more information.

Total Non Acute Care Patient Discharges

Total skilled nursing, swing, sub acute, and or long term care discharges including deaths supported by the organization for the reporting period.

Transplant Units Supported

Total number of units that support transplant patients for the period.

This is a component of Inpatient Units.

Urine Culture Evaluations

Total number of urine cultures investigated during the reporting period.

This is a subset of Total Culture Evaluations.

VAP, VAE Healthcare-associated Infections (HAIs)

Enter the total number of VAP, VAE Healthcare-associated infections as defined by the CDC's National Healthcare Safety Network (NHSN) for the reporting period. Visit http://www.cdc.gov/nhsn/cms/index.html for more information.

This is a subset of Total Healthcare-associated Infections (HAIs).

Ventilator Patient Days

Enter the total number of patient days where patients were supported by a Ventilator. For ActionOI reporting, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500, 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.
VRE infection surveillance Patient Days

Number of patient days for which NHSN defined healthcare associated VRE infection surveillance is performed.

Infection Prevention and Control and Healthcare Epidemiology Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: LPN, LVN

Hours worked by licensed practical nurse, licensed vocational nurses providing patient care services in the department.

This is a subset of Worked Hours: Staff.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.
**Worked Hours: Other Patient Care Provider**

Total hours worked by other patient care providers (e.g. nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care personnel.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.
Infection Prevention and Control and Healthcare Epidemiology Expense Elements

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners and other advanced practitioners. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Report the expense for the period for stocked and non stocked patient medical supplies. Include all non capitalized medical and surgical supplies, pharmaceuticals, and other materials used in the diagnosis and treatment of patients.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.
**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Infection Prevention and Control and Healthcare Epidemiology Mandatory Elements**

The following data elements are mandatory for this department:

- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff

**Infection Prevention and Control and Healthcare Epidemiology Normalizations**

Include the hours, costs and volumes (where applicable) associated with the

- Infection Control (e.g. functions specific to the collection, analysis, and interpretation of health data in order to track infection trends, plan appropriate interventions, measure outcomes, and report relevant data both internally and externally).
Exclude the hours costs and volumes (where applicable) associated with the

- Employee formal facility wide training programs, e.g., fire safety, CPR, hand washing
- Grant or research funded services
- Hospital Quality Assurance, e.g., activities surrounding the collecting and disseminating of data to monitor and improve patient care at the facility (hospital level quality management)
- Instrument Decontamination, Pack Assembly, Terminal Sterilization

**G6400, Other Quality Management and Patient Safety Services**

This generic department includes all cost centers belonging to Quality Management and Patient Safety Services that cannot be mapped to individual departments.

**Other Quality Management and Patient Safety Services Department Hour Elements**

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Paid Hours: Physician Provider**

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.
Worked Hours: LPN, LVN

Hours worked by licensed practical nurse, licensed vocational nurses providing patient care services in the department.

This is a subset of Worked Hours: Staff.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Patient Care Provider

Total hours worked by other patient care providers (e.g. nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care personnel.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Physician Provider

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.
This is a subset of Worked Hours: Staff.

**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Other Quality Management and Patient Safety Services Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Medical Supply Expense**

Report the expense for the period for stocked and non stocked patient medical supplies. Include all non capitalized medical and surgical supplies, pharmaceuticals, and other materials used in the diagnosis and treatment of patients.

This is a subset of Other Direct Operating Expense.
Non Medical Supply Expense
Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense
Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense
Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense
Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Other Quality Management and Patient Safety Services Mandatory Elements
The following data elements are mandatory for this department:

- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
• Worked Hours: Physician Provider

• Worked Hours: Staff

**Other Quality Management and Patient Safety Services Normalizations**

Include the hours costs and volumes (where applicable) associated with the

• Patient Safety which is a discipline that applies safety science methods toward the goal of achieving a trustworthy system of health care delivery; it minimizes the incidence and impact of, and maximizes recovery from, adverse events. Patient Safety, e.g., utilize safety science methods to ensure the quality of the health care delivered, researches incidents, creates plans to minimize future incidents.

Exclude the hours costs and volumes (where applicable) associated with the

• Employee formal facility wide training programs, e.g., fire safety, CPR, hand washing

• Grant or research funded services

• Hospital Quality Assurance, e.g., activities surrounding the collecting and disseminating of data to monitor and improve patient care at the facility (hospital level quality management)

• Infection Control (e.g., functions specific to the collection, analysis, and interpretation of health data in order to track infection trends, plan appropriate interventions, measure outcomes, and report relevant data both internally and externally).

• Instrument Decontamination, Pack Assembly, Terminal Sterilization
Chapter 34. Radiation Therapy Services

This chapter includes the following sections:

- 04010, Radiation Therapy (Oncology) 1829
- 04020, Radiation Therapy (Gamma) 1836
- 04030, Radiation Therapy (Proton) 1843
- G4000, Other Radiation Therapy Services 1849
- Radiation Therapy Services Worksheets 1855

04010, Radiation Therapy (Oncology)

The Radiation Therapy (Oncology) department performs localized treatments of benign and malignant conditions using high-energy radiation from cobalt, electrons, photons, x-rays and other external beam or teletherapy. (ex. Cyberknife and IOERT)

Radiation Therapy (Oncology) Mapping Guidelines

Other duties/responsibilities that should be included: department management and administrative support staff assisting the services provided to the patients. If you have separate cost centers for specialty services this is not an appropriate mapping, use 04020, Radiation Therapy (Gamma) department or 04030, Radiation Therapy (Proton) department.

Radiation Therapy (Oncology) Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Brachytherapy Treatments

The total number of brachytherapy treatments. Brachytherapy is a technique involving placing radioelements internally, directly at the treatment site.
Exam Suites
Exams Suites are individual treatment rooms or partitioned areas in an open bay concept designed and equipped to accommodate patient evaluation. Do not include waiting areas or office spaces. Report only rooms routinely used for examinations. Do not include a procedure room that is used for examinations only when no other space is available.

Hours Accelerators Available
The total number of hours in a reporting period that each linear accelerator was available for treatment. Report the total amount of time that all combined accelerators were available during the report period. For example, in a single reporting quarter, if three accelerators were each available 40 hours a week for 13 weeks that would equal 1,560 total hours.

Inpatient Treatments
Total Radiation Oncology treatments performed on hospital inpatients.

Linear Accelerators
The total number of linear accelerators used for therapeutic purposes in the department.

Medical Radiation Physics Plans And Simulations
The total number of medical radiation and dosimetry calculations and plans. Include CPT codes only if performed by staff other than physicians. Do not include CPT codes which relate to the construction of treatment devices.

Patient Visits
Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. If the patient is seen by multiple providers (e.g., physician, dietitian, social worker) during the same visit the count should be recorded as one visit.

Procedure Rooms
The total discrete spaces designed and equipped for procedures used by department staff. Procedure rooms are usually distinct from examination rooms; however if a room is equipped for dual purposes (exams and procedures), it should be included in this count.
Simulation Rooms
The total number of discrete spaces designed and equipped for simulation. A simulation session is a meeting between patient the radiation oncologist, and other members of the radiation team. During this meeting the radiation team plans where and how to use the radiation to destroy the cancer cells.

Therapeutic Units
The total number of machines used for therapeutic treatment. This data element refers to units not used for simulation. They might include cobalt units, linear accelerators, superficial x-ray machines, and other specialty therapeutic units.

Total Procedures
Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, as well as the Procedure Counting section.

Treatments
This refers to all treatments performed by this department as calculated on the Radiation Therapy Subset Procedure worksheet. This does not include training sessions. Count specific treatments regardless of the procedure time frame. The count must include a value for all activities performed by the department. The department may perform additional procedures not assigned to the Radiation Therapy department designation listed on the worksheet.

This is a component of Total Procedures.

Radiation Therapy (Oncology) Department Hours Elements

Paid Hours: Contract Labor
Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider
Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.
This is a subset of Paid Hours: Staff.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: Clinical Engineers and Biomedical Equipment Technicians**

Total hours worked by clinical engineers and biomedical equipment technicians.

This is a subset of Worked Hours: Staff.

**Worked Hours: Dosimetrist**

Total hours worked by dosimetrists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Patient Care Provider**

Total hours worked by other patient care providers (e.g. nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care personnel.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).
This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: Physicist**

Total hours worked by physicists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Radiation Therapist**

Total hours worked by radiation therapists.

This is a subset of Worked Hours: Staff.

**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Radiation Therapy (Oncology) Expense Elements**

**Equipment Repair And Maintenance Expense**

Total expense to repair and maintain technical devices. Include fee for service labor and parts expense, service contract costs, and other related costs.

This is a subset of Other Direct Operating Expense.
Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non stocked medical supplies. Include all non capitalized medical, surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total expense for the department non medical operating supplies, (e.g., equipment lubricants, office supplies, distribution supplies, and small non capitalized) equipment.

This is a subset of Other Direct Operating Expense.

Operating Lease Expense

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.
Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Radiation Therapy (Oncology) Mandatory Elements

The following data elements are mandatory for this department:

- APC Relative Weight
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Total Procedures
- Treatments
- Worked Hours: Physician Provider
- Worked Hours: Staff

Radiation Therapy (Oncology) Normalizations

Exclude the hours costs and volumes (where applicable) associated with the
• Clinical Dietitian

• Clinical Engineer and/or Biomedical Technician

• Cost of all medications, including IV solutions administered to outpatients including Ambulatory Dialysis, Ambulatory Surgery (not the main OR), and all other outpatient/ambulatory clinics. Cost of all medications, including IV solutions administered to outpatients. Do not include take home and OTC drugs, contrast media, volatile anesthetic gases, and hemophilia factors

• Management/Oversight of a school based curriculum/program for radiation therapy students

• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Patient Scheduling includes management of inbound and outbound calls, faxes, and or electronic communications to ensure an appointment is generated for the patient-related activity

• Repair and Maintenance of Clinical Equipment/Rooms

• Social Workers

04020, Radiation Therapy (Gamma)

The Radiation Therapy (Gamma) department performs localized treatments of benign and malignant conditions using gamma rays. (ex. Gamma Knife)

Radiation Therapy (Gamma) Mapping Guidelines

Other duties/responsibilities that should be included: department management and administrative support staff assisting the services provided to the patients. If your cost center provides service via electrons, photons, or protons this is not an appropriate mapping, use 04010, Radiation Therapy (Oncology) department or 04030, Radiation Therapy (Proton) department.

Radiation Therapy (Gamma) Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.
**Hours Therapeutic Unit is Available**

The total number of hours in a reporting period that each Therapeutic Unit was available for treatment. Report the total amount of time that all combined units were available during the report period. For example, in a single reporting quarter, if three units were each available 40 hours a week for 13 weeks that would equal 1,560 total hours.

**Inpatient Treatments**

Total Radiation Oncology treatments performed on hospital inpatients.

This is a subset of Treatments.

**Medical Radiation Physics Plans**

The total number of medical radiation and dosimetry calculations and plans. Include CPT codes only if performed by staff other than physicians. Do not include CPT codes which relate to the construction of treatment devices.

**Patient Visits**

Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. If the patient is seen by multiple providers (e.g., physician, dietitian, social worker) during the same visit the count should be recorded as one visit.

**Procedure Rooms**

The total discrete spaces designed and equipped for procedures used by department staff. Procedure rooms are usually distinct from examination rooms; however if a room is equipped for dual purposes (exams and procedures), it should be included in this count.

**Therapeutic Units**

The total number of machines used for therapeutic treatment. This data element refers to units not used for simulation. They might include cobalt units, linear accelerators, superficial x-ray machines, and other specialty therapeutic units.

**Total Procedures**

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, as well as the Procedure Counting section.
Treatments

This refers to all treatments performed by this department as calculated on the Radiation Therapy Subset Procedure worksheet. This does not include training sessions. Count specific treatments regardless of the procedure time frame. The count must include a value for all activities performed by the department. The department may perform additional procedures not assigned to the Radiation Therapy department designation listed on the worksheet.

This is a component of Total Procedures.

Radiation Therapy (Gamma) Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Clinical Engineers and Biomedical Equipment Technicians

Total hours worked by clinical engineers and biomedical equipment technicians.

This is a subset of Worked Hours: Staff.

Worked Hours: Dosimetrist

Total hours worked by dosimetrists.

This is a subset of Worked Hours: Staff.
Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Patient Care Provider

Total hours worked by other patient care providers (e.g. nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care personnel.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non-physician worked hours that are paid on an overtime basis (hours worked over the employee’s normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Physician Provider

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

Worked Hours: Physicist

Total hours worked by physicists.

This is a subset of Worked Hours: Staff.
Worked Hours: Radiation Therapist

Total hours worked by radiation therapists.

This is a subset of Worked Hours: Staff.

Worked Hours: RN

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Radiation Therapy (Gamma) Expense Elements

Equipment Repair And Maintenance Expense

Total expense to repair and maintain technical devices. Include fee for service labor and parts expense, service contract costs, and other related costs.

This is a subset of Other Direct Operating Expense.

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.
Medical Supply Expense
Total expense for stocked and non stocked medical supplies. Include all non capitalized medical, surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense
Total expense for the department non medical operating supplies, (e.g., equipment lubricants, office supplies, distribution supplies, and small non capitalized) equipment.

This is a subset of Other Direct Operating Expense.

Operating Lease Expense
Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense
Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense
Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense
Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Radiation Therapy (Gamma) Mandatory Elements
The following data elements are mandatory for this department:
• APC Relative Weight
• Labor Expense
• Labor Expense: Physician Provider
• Other Direct Operating Expense
• Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Physician Provider Professional Fee Expense
• Total Procedures
• Treatments
• Worked Hours: Physician Provider
• Worked Hours: Staff

**Radiation Therapy (Gamma) Normalizations**

Exclude the hours costs and volumes (where applicable) associated with the

• Clinical Dietitian

• Clinical Engineer and/or Biomedical Technician

• Cost of all medications, including IV solutions administered to outpatients including Ambulatory Dialysis, Ambulatory Surgery (not the main OR), and all other outpatient/ambulatory clinics. Cost of all medications, including IV solutions administered to outpatients. Do not include take home and OTC drugs, contrast media, volatile anesthetic gases, and hemophilia factors

• Management/Oversight of a school based curriculum/program for radiation therapy students

• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Patient Scheduling includes management of inbound and outbound calls, faxes, and or electronic communications to ensure an appointment is generated for the patient-related activity
• Repair and Maintenance of Clinical Equipment/Rooms

• Social Workers

04030, Radiation Therapy (Proton)

The Radiation Therapy (Proton) department performs localized treatments of benign and malignant conditions using protons.

Radiation Therapy (Proton) Mapping Guidelines

Other duties/responsibilities that should be included: department management and administrative support staff assisting the services provided to the patients. If your cost center provides service via electrons, photons, or gamma rays this is not an appropriate mapping, use 04010, Radiation Therapy (Oncology) department or 04020, Radiation Therapy (Gamma) department.

Radiation Therapy (Proton) Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Hours Therapeutic Unit is Available

The total number of hours in a reporting period that each Therapeutic Unit was available for treatment. Report the total amount of time that all combined units were available during the report period. For example, in a single reporting quarter, if three units were each available 40 hours a week for 13 weeks that would equal 1,560 total hours.

Inpatient Treatments

Total Radiation Oncology treatments performed on hospital inpatients.

This is a subset of Treatments.

Medical Radiation Physics Plans

The total number of medical radiation and dosimetry calculations and plans. Include CPT codes only if performed by staff other than physicians. Do not include CPT codes which relate to the construction of treatment devices.
**Patient Visits**

Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. If the patient is seen by multiple providers (e.g., physician, dietitian, social worker) during the same visit the count should be recorded as one visit.

**Procedure Rooms**

The total discrete spaces designed and equipped for procedures used by department staff. Procedure rooms are usually distinct from examination rooms; however if a room is equipped for dual purposes (exams and procedures), it should be included in this count.

**Therapeutic Units**

The total number of machines used for therapeutic treatment. This data element refers to units not used for simulation. They might include cobalt units, linear accelerators, superficial x-ray machines, and other specialty therapeutic units.

**Total Procedures**

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, as well as the Procedure Counting section.

**Treatments**

This refers to all treatments performed by this department as calculated on the Radiation Therapy Subset Procedure worksheet. This does not include training sessions. Count specific treatments regardless of the procedure time frame. The count must include a value for all activities performed by the department. The department may perform additional procedures not assigned to the Radiation Therapy department designation listed on the worksheet.

This is a component of Total Procedures.

**Radiation Therapy (Proton) Department Hour Elements**

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.
Paid Hours: Physician Provider

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Clinical Engineers and Biomedical Equipment Technicians

Total hours worked by clinical engineers and biomedical equipment technicians.

This is a subset of Worked Hours: Staff.

Worked Hours: Dosimetrist

Total hours worked by dosimetrists.

This is a subset of Worked Hours: Staff.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Patient Care Provider

Total hours worked by other patient care providers (e.g. nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care personnel.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.
This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: Physicist**

Total hours worked by physicists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Radiation Therapist**

Total hours worked by radiation therapists.

This is a subset of Worked Hours: Staff.

**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.
Radiation Therapy (Proton) Expense Elements

Equipment Repair And Maintenance Expense

Total expense to repair and maintain technical devices. Include fee for service labor and parts expense, service contract costs, and other related costs.

This is a subset of Other Direct Operating Expense.

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non stocked medical supplies. Include all non capitalized medical, surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total expense for the department non medical operating supplies, (e.g., equipment lubricants, office supplies, distribution supplies, and small non capitalized) equipment.

This is a subset of Other Direct Operating Expense.
**Operating Lease Expense**

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Radiation Therapy (Proton) Mandatory Elements**

The following data elements are mandatory for this department:

- APC Relative Weight
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
• Total Procedures
• Treatments
• Worked Hours: Physician Provider
• Worked Hours: Staff

**Radiation Therapy (Proton) Normalizations**

Exclude the hours costs and volumes (where applicable) associated with the

• Clinical Dietitian
• Clinical Engineer and/or Biomedical Technician
• Cost of all medications, including IV solutions administered to outpatients including Ambulatory Dialysis, Ambulatory Surgery (not the main OR), and all other outpatient/ambulatory clinics. Cost of all medications, including IV solutions administered to outpatients. Do not include take home and OTC drugs, contrast media, volatile anesthetic gases, and hemophilia factors
• Management/Oversight of a school based curriculum/program for radiation therapy students
• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
• Patient Scheduling includes management of inbound and outbound calls, faxes, and or electronic communications to ensure an appointment is generated for the patient-related activity
• Repair and Maintenance of Clinical Equipment/Rooms
• Social Workers

**G4000, Other Radiation Therapy Services**

This generic department includes cost centers belonging to Radiation Therapy Services Series that cannot be mapped to one of the Radiation Therapy departments.

**Other Radiation Therapy Services Mapping Guidelines**

Departments utilizing this standard generic department will not be represented on a report.
Other Radiation Therapy Services Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Patient Visits

Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. If the patient is seen by multiple providers (e.g., physician, dietitian, social worker) during the same visit the count should be recorded as one visit.

Total Procedures

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, as well as the Procedure Counting section.

Treatments

This refers to all treatments performed by this department as calculated on the Radiation Therapy Subset Procedure worksheet. This does not include training sessions. Count specific treatments regardless of the procedure time frame. The count must include a value for all activities performed by the department. The department may perform additional procedures not assigned to the Radiation Therapy department designation listed on the worksheet.

This is a component of Total Procedures.

Other Radiation Therapy Services Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.
**Paid Hours: Physician Provider**

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: Clinical Engineers and Biomedical Equipment Technicians**

Total hours worked by clinical engineers and biomedical equipment technicians.

This is a subset of Worked Hours: Staff.

**Worked Hours: Dosimetrist**

Total hours worked by dosimetrists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.s.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Patient Care Provider**

Total hours worked by other patient care providers (e.g. nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care personnel.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.
This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee’s normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: Physicist**

Total hours worked by physicists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Radiation Therapist**

Total hours worked by radiation therapists.

This is a subset of Worked Hours: Staff.

**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.
Other Radiation Therapy Services Expense Elements

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advanced practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non stocked medical supplies. Include all non capitalized medical, surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total expense for the department non medical operating supplies, (e.g., equipment lubricants, office supplies, distribution supplies, and small non capitalized) equipment.

This is a subset of Other Direct Operating Expense.

Operating Lease Expense

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.
Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Other Radiation Therapy Services Mandatory Elements

The following data elements are mandatory for this department:

- APC Relative Weight
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Total Procedures
- Treatments
- Worked Hours: Physician Provider
• Worked Hours: Staff

Other Radiation Therapy Services Normalizations

Exclude the hours costs and volumes (where applicable) associated with the

• Clinical Dietitian

• Clinical Engineer and/or Biomedical Technician

• Cost of all medications, including IV solutions administered to outpatients including Ambulatory Dialysis, Ambulatory Surgery (not the main OR), and all other outpatient/ambulatory clinics. Cost of all medications, including IV solutions administered to outpatients. Do not include take home and OTC drugs, contrast media, volatile anesthetic gases, and hemophilia factors

• Management/Oversight of a school based curriculum/program for radiation therapy students

• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Patient Scheduling includes management of inbound and outbound calls, faxes, and or electronic communications to ensure an appointment is generated for the patient-related activity

• Repair and Maintenance of Clinical Equipment/Rooms

• Social Workers

Radiation Therapy Services Worksheets

Use the following worksheets for this department. These worksheets can be found on the Support tab of ActionOI.

• APC and Work RVU Worksheet

• Radiation Therapy Worksheet
Chapter 35. Rehabilitation Services

For an annotated list of Characteristic Questions for this series, please see the ActionOI support page.

This chapter includes the following sections:

- 04811, Physical Therapy: Inpatient 1857
- 04812, Physical Therapy: Outpatient 1865
- 04815, Physical Therapy: Inpatient and Outpatient 1874
- 04821, Occupational Therapy: Inpatient 1884
- 04822, Occupational Therapy: Outpatient 1893
- 04825, Occupational Therapy: Inpatient and Outpatient 1901
- 04830, Occupational Rehabilitation 1911
- 04840, Sports Medicine Therapies 1920
- 04850, Recreational Therapy 1928
- 04860, Speech Language Pathology and Audiology Combined 1938
- 04861, Speech Language Pathology: Inpatient and Outpatient 1948
- 04862, Audiology 1958
- 04863, Speech Language Pathology: Inpatient 1968
- 04864, Speech Language Pathology: Outpatient 1977
- 04870, PT/OT/SLP Combined: Inpatient and Outpatient 1986
- 04871, PT/OT/SLP Combined: Inpatient 1996
- 04872, PT/OT/SLP Combined: Outpatient 2006
- 04899, Rehabilitation Services Administration and Support 2015
- F4800, Rehabilitation Therapies Functional Rollup 2021
- G4800, Other Rehabilitation Therapies Services 2031
Rehabilitation Services Worksheet 2042

04811, Physical Therapy: Inpatient

This department provides evaluation and treatment for inpatients with neurological, muscular, cardiac, pulmonary, orthopedic and skeletal trauma or dysfunction. Physical therapy is the treatment of disorders with physical agents and methods, such as massage, manipulation, therapeutic exercises, cold, heat, hydrotherapy, electrical stimulation, and light to assist in habilitating or rehabilitating patients and in restoring function after an illness or injury.

Physical Therapy: Inpatient Mapping Guidelines

If your actual cost center’s patient population is less than 95% physical therapy inpatient this department may not be an appropriate choice. Another option might be the 04815 - Physical Therapy: Inpatient & Outpatient department.

Physical Therapy: Inpatient Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs) represent billable workload which is routinely performed in rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet that can be accessed in the Support Tab.

Case Mix Group (CMG) Index

The average Case Mix Group relative weight, based on the most recently published CMS values, for all inpatients admitted to the Inpatient Rehabilitation Unit (IRF) during the reporting period. This value may be obtained through the data calculated by UDSmr or a similar vendor.

Note: This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).
Days of Operation per Week

Total number of days the department is open for operation during the week.

The maximum number that can be reported is 7.

Department Specific Billed Time Units (BTUs)

Department Specific Total Billed Time Units (BTUs) represent all billable workload performed by the department staff. These may include billable time units for which the department charges and captures on the worksheet, including any unlisted procedures. The Department Specific Billed Time Units (BTUs) count is the sum of all Department Specific Billed Time Units (BTUs) recorded on the Rehabilitation Services Worksheet available in the support tab.

Department Specific Evaluation Billed Timed Units (BTUs)

Represents the sum of the evaluation billed time units (BTUs) performed by the department staff as calculated on the Rehabilitation Services Worksheet. The sum of Department Specific Evaluation BTUs associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Department Specific BTUs.

Hours of Operation per Week

The average number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

Length of Stay (LOS) Efficiency

The aggregate Functional Independence Measurement instrument (FIM) point gain by all patients on acute rehabilitation unit divided by the total patient days on the unit. This value should correspond to the reporting quarter and may be obtained through the data calculated by UDSmr or a similar vendor.

Note: This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).

Missed Appointments

The number of missed patient appointments which occurred as a result of a patient, staff member(s) including a physician, provider, and/or specialist, equipment, room, and/or other resource that is unavailable, for any reason, at the scheduled time for a specific patient service.

This is a subset of Patient Appointments Scheduled.
Patient Appointments Scheduled

Total number of patient appointments scheduled for the reporting period. An appointment is defined as a distinct block of scheduled time for a specific patient service, which includes visits, procedures, treatments, consultations, education, and/or tests.

Patient No Shows

The total number of patients who did not appear, for any reason, for a scheduled appointment including cancellation, non appearance or reschedule less than 24 hours prior to the appointment during the reporting period.

This is a subset of Missed Appointments.

Patient Visits

Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

Pediatric Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs): Pediatric represent billable workload which was performed on pediatric patients by the rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet available on the Support Tab.

This is a component of Baseline Billed Time Units (BTUs).

Pediatric Evaluations

Total evaluations performed on pediatric patients by the department staff during the reporting period. The sum of the number of evaluations performed on pediatric patients associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Evaluations and Total Procedures.

Pediatric Procedures

Total count all procedures (including evaluations) performed on pediatric patients by the department for the reporting period. It is recommended that this value be populated by referring to the Rehabilitation Services Worksheet available on the Support Page.

This is a component of Total Procedures.
Pediatric Visits

Total separate pediatric patient encounters performed and/or supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

This is a subset of Patient Visits.

Pre and Post Activity Time Units

The number of 15-minute units a therapy professional spends preparing for a treatment/procedure and any post treatment/procedure time spent charting and report completion. This does not include face-to-face time with the patient. It is the sum of Pre and Post Activity Time Units recorded in Column 14 on the Rehabilitation Services Worksheet available on the Support Page.

Service Units

The number of 15-minute units necessary for the therapy professional to complete the service/treatment/procedure (face to face time with the patient). It is the result of column 6 Total Department-Specific BTUs divided by 15. Refer to the Rehabilitation Services Worksheet available on the Support Page for assistance in reporting this element.

Total Evaluations

Total evaluations performed by the department staff. The sum of the number of evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Procedures.

Total Procedures

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

Physical Therapy: Inpatient Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.
**Paid Hours: Physician Provider**

Total hours paid by physicians/providers on the department's payroll who provide clinical services. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who are billed by the facility on a CMS 1500 Form. Include only physicians/providers on the facility payroll who spend 80% or more of their time in clinical or patient care activities. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Patient Care Provider**

Total hours worked by other patient care providers (e.g. rehab/therapy technician or aide, nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care department personnel.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.
**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Therapist**

Total hours worked by licensed therapists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Therapy Assistant**

Total hours worked by certified therapy assistants.

This is a subset of Worked Hours: Staff.

**Physical Therapy: Inpatient Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.
Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and callback time; exclude expense for on call time.

This is a subset of Labor Expense.
Physician Provider Professional Fee Expense

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

Physical Therapy: Inpatient Mandatory Elements

The following data elements are mandatory for this department:

- APC Relative Weight
- Days of Operation per Week
- Hours of Operation per Week
- Labor Expense
- Labor Expense: Physician Provider
- Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Total Procedures
- Worked Hours: Physician Provider
- Worked Hours: Staff
- Worked Hours: Therapist

Physical Therapy: Inpatient Normalizations

Include the hours costs and volumes (where applicable) associated with:
• Personnel performing the functions of the department’s day to day managerial operations (Rehabilitation)

Exclude the hours costs and volumes (where applicable) associated with:

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program (Rehabilitation Services)

• Case Management (manages patient care while the patient is undergoing treatment)

• Insurance verification - initial time spent obtaining name and identification and pre-admission certification during the admission process

• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture

• Patient reception, e.g., greeting, checking in of patients, answering phone calls (Rehabilitation)

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Rehabilitation)

• PPS (Prospective Payment System) Coordinator

• Rehab Services Patient Scheduling

• Repair and Maintenance of Clinical Equipment/Rooms

• Social Workers

• Transport of patients not requiring clinical escort

04812, Physical Therapy: Outpatient

This department provides evaluation and treatment for outpatients with neurological, muscular, orthopedic and skeletal trauma or dysfunction. Physical therapy is the treatment of disorders with physical agents and methods, such as massage, manipulation, therapeutic exercises, cold, heat, hydrotherapy, electrical stimulation, and light to assist in habilitating or rehabilitating patients and in restoring function after an illness or injury.
Physical Therapy: Outpatient Mapping Guidelines

If your actual cost center's patient population is less than 95% physical therapy outpatient this department may not be an appropriate choice. Another option might be the 04815 - Physical Therapy: Inpatient & Outpatient department.

Physical Therapy: Outpatient Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs) represent billable workload which is routinely performed in rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet that can be accessed in the Support Tab.

Days of Operation per Week

Total number of days the department is open for operation during the week.

The maximum number that can be reported is 7.

Department Specific Billed Time Units (BTUs)

Department Specific Total Billed Time Units (BTUs) represent all billable workload performed by the department staff. These may include billable time units for which the department charges and captures on the worksheet, including any unlisted procedures. The Department Specific Billed Time Units (BTUs) count is the sum of all Department Specific Billed Time Units (BTUs) recorded on the Rehabilitation Services Worksheet available in the support tab.

Department Specific Evaluation Billed Timed Units (BTUs)

Represents the sum of the evaluation billed time units (BTUs) performed by the department staff as calculated on the Rehabilitation Services Worksheet. The sum of Department Specific Evaluation BTUs associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Department Specific BTUs.
**Hours of Operation per Week**

The average number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

**Missed Appointments**

The number of missed patient appointments which occurred as a result of a patient, staff member(s) including a physician, provider, and/or specialist, equipment, room, and/or other resource that is unavailable, for any reason, at the scheduled time for a specific patient service.

This is a subset of Patient Appointments Scheduled.

**Patient Appointments Scheduled**

Total number of patient appointments scheduled for the reporting period. An appointment is defined as a distinct block of scheduled time for a specific patient service, which includes visits, procedures, treatments, consultations, education, and/or tests.

**Patient No Shows**

The total number of patients who did not appear, for any reason, for a scheduled appointment including cancellation, non appearance or reschedule less than 24 hours prior to the appointment during the reporting period.

This is a subset of Missed Appointments.

**Patient Visits**

Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

**Pediatric Baseline Billed Time Units (BTUs)**

Baseline Billed Time Units (BTUs): Pediatric represent billable workload which was performed on pediatric patients by the rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet available on the Support Tab.

This is a component of Baseline Billed Time Units (BTUs).
Pediatric Evaluations

Total evaluations performed on pediatric patients by the department staff during the reporting period. The sum of the number of evaluations performed on pediatric patients associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Evaluations and Total Procedures.

Pediatric Procedures

Total count all procedures (including evaluations) performed on pediatric patients by the department for the reporting period. It is recommended that this value be populated by referring to the Rehabilitation Services Worksheet available on the Support Page.

This is a component of Total Procedures.

Pediatric Visits

Total separate pediatric patient encounters performed and/or supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

This is a subset of Patient Visits.

Pre and Post Activity Time Units

The number of 15-minute units a therapy professional spends preparing for a treatment/procedure and any post treatment/procedure time spent charting and report completion. This does not include face-to-face time with the patient. It is the sum of Pre and Post Activity Time Units recorded in Column 14 on the Rehabilitation Services Worksheet available on the Support Page.

Service Units

The number of 15-minute units necessary for the therapy professional to complete the service/treatment/procedure (face to face time with the patient). It is the result of column 6 Total Department-Specific BTUs divided by 15. Refer to the Rehabilitation Services Worksheet available on the Support Page for assistance in reporting this element.

Total Evaluations

Total evaluations performed by the department staff. The sum of the number of evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Procedures.
Total Procedures
Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

Physical Therapy: Outpatient Department Hours Elements

Paid Hours: Contract Labor
Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider
Total hours paid by physicians/providers on the department's payroll who provide clinical services. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who are billed by the facility on a CMS 1500 Form. Include only physicians/providers on the facility payroll who spend 80% or more of their time in clinical or patient care activities. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff
Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management
Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Patient Care Provider
Total hours worked by other patient care providers (e.g. rehab/therapy technician or aide, nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care department personnel.

This is a subset of Worked Hours: Staff.
Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Physician Provider

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Worked Hours: Therapist

Total hours worked by licensed therapists.

This is a subset of Worked Hours: Staff.

Worked Hours: Therapy Assistant

Total hours worked by certified therapy assistants.

This is a subset of Worked Hours: Staff.

Physical Therapy: Outpatient Expense Elements

September 2019

CPT is a registered trademark of the American Medical Association. All rights reserved.
**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and callback time; exclude expense for on call time.

This is a subset of Labor Expense.
**Physician Provider Professional Fee Expense**

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

**Physical Therapy: Outpatient Mandatory Elements**

The following data elements are mandatory for this department:

- APC Relative Weight
- Days of Operation per Week
- Hours of Operation per Week
- Labor Expense
- Labor Expense: Physician Provider
- Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Total Procedures
- Worked Hours: Physician Provider
- Worked Hours: Staff
- Worked Hours: Therapist

**Physical Therapy: Outpatient Normalizations**
Include the hours costs and volumes (where applicable) associated with:

- Personnel performing the functions of the department's day-to-day managerial operations (Rehabilitation)

Exclude the hours costs and volumes (where applicable) associated with the:

- Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program (Rehabilitation Services)
- Case Management (manages patient care while the patient is undergoing treatment)
- Insurance verification - initial time spent obtaining name and identification and pre-admission certification during the admission process
- Medical records transcription (e.g., lines produced internally or outsourced; do not include transcription services from Laboratory and Imaging Services Departments)
- Outpatient Registrations for any ancillary services (e.g., cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
- Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture
- Patient reception, e.g., greeting, checking in of patients, answering phone calls (Rehabilitation)
- Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Rehabilitation)
- PPS (Prospective Payment System) Coordinator
- Rehab Services Patient Scheduling
- Repair and Maintenance of Clinical Equipment/Rooms
- Social Workers
- Transport of patients not requiring clinical escort
04815, Physical Therapy: Inpatient and Outpatient

This department provides evaluation and treatment for inpatients and outpatients with neurological, muscular, and skeletal trauma or dysfunction. Physical therapy is the treatment of disorders with physical agents and methods, such as massage, manipulation, therapeutic exercises, cold, heat, hydrotherapy, electrical stimulation, and light to assist in habilitating or rehabilitating patients and in restoring function after an illness or injury. This department includes work hardening as applicable.

Physical Therapy: Inpatient and Outpatient Mapping Guidelines

If your actual cost center's patient population is less than 95% physical therapy for inpatients and outpatients, this department may not be an appropriate choice. Other options might include creating the 04811 Physical Therapy: Inpatient department and the 04812 Physical Therapy: Outpatient departments, or the G4800 Other Rehabilitation Therapies Services.

Physical Therapy: Inpatient and Outpatient Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs) represent billable workload which is routinely performed in rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet that can be accessed in the Support Tab.

Case Mix Group (CMG) Index

The average Case Mix Group relative weight, based on the most recently published CMS values, for all inpatients admitted to the Inpatient Rehabilitation Unit (IRF) during the reporting period. This value may be obtained through the data calculated by UDSmr or a similar vendor.

Note: This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).

Days of Operation per Week

Total number of days the department is open for operation during the week.

The maximum number that can be reported is 7.
Department Specific Billed Time Units (BTUs)

Department Specific Total Billed Time Units (BTUs) represent all billable workload performed by the department staff. These may include billable time units for which the department charges and captures on the worksheet, including any unlisted procedures. The Department Specific Billed Time Units (BTUs) count is the sum of all Department Specific Billed Time Units (BTUs) recorded on the Rehabilitation Services Worksheet available in the support tab.

Department Specific Evaluation Billed Timed Units (BTUs)

Represents the sum of the evaluation billed time units (BTUs) performed by the department staff as calculated on the Rehabilitation Services Worksheet. The sum of Department Specific Evaluation BTUs associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Department Specific BTUs.

Hours of Operation per Week

The average number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

Inpatient Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs): Inpatients is the sum of all billable workload performed by the department staff in support of facility inpatients. Baseline BTUs represent the standard time value for workload performed in the department as recorded on the Rehabilitation Services Workload Computation Worksheet available in the Support Tab.

This is a subset of Total Baseline BTUs.

Inpatient Department Specific Billed Time Units (BTUs)

Department Specific Billed Time Units (BTUs): Inpatient is the sum of all billable workload performed by the department staff in support of facility inpatients. These Inpatient Department Specific BTUs may include billable items for which the department charges but which are not itemized on the Rehabilitation Services Workload Computation Worksheet available in the Support Tab.

This is a subset of Total Department Specific BTUs.

Inpatient Dept Specific Evaluation Billed Time Units (BTUs)

Billed time units (BTUs) for evaluations performed by department staff in support of facility inpatients. The value is the sum of the inpatient evaluation billed time units (BTUs) associated with the evaluation CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.
Rehabilitation Services

This is a subset of Department Specific Evaluation Billed Timed Units (BTUs).

**Inpatient Evaluations**

Total evaluations performed by the department staff in support of facility inpatients. The sum of the number of inpatient evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Evaluations.

**Inpatient Procedures**

Count all procedures performed on inpatients by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, as well as Procedure Counting here in the DRM for more information.

This is a subset of Total Procedures.

**Inpatient Visits**

Total patient encounters performed in support of facility inpatients.

This is a subset of Patient Visits.

**Length of Stay (LOS) Efficiency**

The aggregate Functional Independence Measurement instrument (FIM) point gain by all patients on acute rehabilitation unit divided by the total patient days on the unit. This value should correspond to the reporting quarter and may be obtained through the data calculated by UDSmr or a similar vendor.

**Note:** This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).

**Missed Appointments**

The number of missed patient appointments which occurred as a result of a patient, staff member(s) including a physician, provider, and/or specialist, equipment, room, and/or other resource that is unavailable, for any reason, at the scheduled time for a specific patient service.

This is a subset of Patient Appointments Scheduled.

**Patient Appointments Scheduled**

Total number of patient appointments scheduled for the reporting period. An appointment is defined as a distinct block of scheduled time for a specific patient service, which includes visits, procedures, treatments, consultations, education, and/or tests.
Patient No Shows

The total number of patients who did not appear, for any reason, for a scheduled appointment including cancellation, non appearance or reschedule less than 24 hours prior to the appointment during the reporting period.

This is a subset of Missed Appointments.

Patient Visits

Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

Pediatric Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs): Pediatric represent billable workload which was performed on pediatric patients by the rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet available on the Support Tab.

This is a component of Baseline Billed Time Units (BTUs).

Pediatric Evaluations

Total evaluations performed on pediatric patients by the department staff during the reporting period. The sum of the number of evaluations performed on pediatric patients associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Evaluations and Total Procedures.

Pediatric Procedures

Total count all procedures (including evaluations) performed on pediatric patients by the department for the reporting period. It is recommended that this value be populated by referring to the Rehabilitation Services Worksheet available on the Support Page.

This is a component of Total Procedures.
Pediatric Visits

Total separate pediatric patient encounters performed and/or supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

This is a subset of Patient Visits.

Pre and Post Activity Time Units

The number of 15-minute units a therapy professional spends preparing for a treatment/procedure and any post treatment/procedure time spent charting and report completion. This does not include face-to-face time with the patient. It is the sum of Pre and Post Activity Time Units recorded in Column 14 on the Rehabilitation Services Worksheet available on the Support Page.

Service Units

The number of 15-minute units necessary for the therapy professional to complete the service/treatment/procedure (face to face time with the patient). It is the result of column 6 Total Department-Specific BTUs divided by 15. Refer to the Rehabilitation Services Worksheet available on the Support Page for assistance in reporting this element.

Total Evaluations

Total evaluations performed by the department staff. The sum of the number of evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Procedures.

Total Procedures

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

Physical Therapy: Inpatient and Outpatient Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.
**Paid Hours: Physician Provider**

Total hours paid by physicians/providers on the department's payroll who provide clinical services. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who are billed by the facility on a CMS 1500 Form. Include only physicians/providers on the facility payroll who spend 80% or more of their time in clinical or patient care activities. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Patient Care Provider**

Total hours worked by other patient care providers (e.g. rehab/therapy technician or aide, nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care department personnel.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.
**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Therapist**

Total hours worked by licensed therapists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Therapy Assistant**

Total hours worked by certified therapy assistants.

This is a subset of Worked Hours: Staff.

**Physical Therapy: Inpatient and Outpatient Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.
Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and callback time; exclude expense for on call time.

This is a subset of Labor Expense.
Physician Provider Professional Fee Expense

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

Physical Therapy: Inpatient and Outpatient Mandatory Elements

The following data elements are mandatory for this department:

- APC Relative Weight
- Days of Operation per Week
- Hours of Operation per Week
- Inpatient Procedures
- Labor Expense
- Labor Expense: Physician Provider
- Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Total Procedures
- Worked Hours: Physician Provider
- Worked Hours: Staff
- Worked Hours: Therapist
Physical Therapy: Inpatient and Outpatient Normalizations

Include the hours costs and volumes (where applicable) associated with:

- Personnel performing the functions of the department’s day to day managerial operations (Rehabilitation)

Exclude the hours costs and volumes (where applicable) associated with the

- Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program (Rehabilitation Services)

- Case Management (manages patient care while the patient is undergoing treatment)

- Insurance verification - initial time spent obtaining name and identification and pre-admission certification during the admission process

- Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

- Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

- Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture

- Patient reception, e.g., greeting, checking in of patients, answering phone calls (Rehabilitation)

- Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Rehabilitation)

- PPS (Prospective Payment System) Coordinator

- Rehab Services Patient Scheduling

- Repair and Maintenance of Clinical Equipment/Rooms

- Social Workers

- Transport of patients not requiring clinical escort
04821, Occupational Therapy: Inpatient

This department provides evaluation and treatment for inpatients with sensory-motor, perceptual, or neuromuscular trauma or dysfunction. Occupational therapy is designed to help people of all ages with physical, developmental, social, or emotional deficits regain and build daily living skills that are important for functional independence, health, and well-being. This department includes therapeutic EMG and/or hand therapy.

Occupational Therapy: Inpatient Mapping Guidelines

If your actual cost center's patient population is less than 95% occupational therapy for inpatients, this department may not be an appropriate choice. Another option might be the 04825 Occupational Therapy: Inpatient & Outpatient department.

Occupational Therapy: Inpatient Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs) represent billable workload which is routinely performed in rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet that can be accessed in the Support Tab.

Case Mix Group (CMG) Index

The average Case Mix Group relative weight, based on the most recently published CMS values, for all inpatients admitted to the Inpatient Rehabilitation Unit (IRF) during the reporting period. This value may be obtained through the data calculated by UDSmr or a similar vendor.

Note: This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).

Days of Operation per Week

Total number of days the department is open for operation during the week.

The maximum number that can be reported is 7.
Department Specific Billed Time Units (BTUs)

Department Specific Total Billed Time Units (BTUs) represent all billable workload performed by the department staff. These may include billable time units for which the department charges and captures on the worksheet, including any unlisted procedures. The Department Specific Billed Time Units (BTUs) count is the sum of all Department Specific Billed Time Units (BTUs) recorded on the Rehabilitation Services Worksheet available in the support tab.

Department Specific Evaluation Billed Timed Units (BTUs)

Represents the sum of the evaluation billed time units (BTUs) performed by the department staff as calculated on the Rehabilitation Services Worksheet. The sum of Department Specific Evaluation BTUs associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Department Specific BTUs.

Hours of Operation per Week

The average number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

Length of Stay (LOS) Efficiency

The aggregate Functional Independence Measurement instrument (FIM) point gain by all patients on acute rehabilitation unit divided by the total patient days on the unit. This value should correspond to the reporting quarter and may be obtained through the data calculated by UDSmr or a similar vendor.

Note: This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).

Missed Appointments

The number of missed patient appointments which occurred as a result of a patient, staff member(s) including a physician, provider, and/or specialist, equipment, room, and/or other resource that is unavailable, for any reason, at the scheduled time for a specific patient service.

This is a subset of Patient Appointments Scheduled.

Patient Appointments Scheduled

Total number of patient appointments scheduled for the reporting period. An appointment is defined as a distinct block of scheduled time for a specific patient service, which includes visits, procedures, treatments, consultations, education, and/or tests.
Patient No Shows

The total number of patients who did not appear, for any reason, for a scheduled appointment including cancellation, non appearance or reschedule less than 24 hours prior to the appointment during the reporting period.

This is a subset of Missed Appointments.

Patient Visits

Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

Pediatric Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs): Pediatric represent billable workload which was performed on pediatric patients by the rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet available on the Support Tab.

This is a component of Baseline Billed Time Units (BTUs).

Pediatric Evaluations

Total evaluations performed on pediatric patients by the department staff during the reporting period. The sum of the number of evaluations performed on pediatric patients associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Evaluations and Total Procedures.

Pediatric Procedures

Total count all procedures (including evaluations) performed on pediatric patients by the department for the reporting period. It is recommended that this value be populated by referring to the Rehabilitation Services Worksheet available on the Support Page.

This is a component of Total Procedures.
Pediatric Visits

Total separate pediatric patient encounters performed and/or supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

This is a subset of Patient Visits.

Pre and Post Activity Time Units

The number of 15-minute units a therapy professional spends preparing for a treatment/procedure and any post treatment/procedure time spent charting and report completion. This does not include face-to-face time with the patient. It is the sum of Pre and Post Activity Time Units recorded in Column 14 on the Rehabilitation Services Worksheet available on the Support Page.

Service Units

The number of 15-minute units necessary for the therapy professional to complete the service/treatment/procedure (face to face time with the patient). It is the result of column 6 Total Department-Specific BTUs divided by 15. Refer to the Rehabilitation Services Worksheet available on the Support Page for assistance in reporting this element.

Total Evaluations

Total evaluations performed by the department staff. The sum of the number of evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Procedures.

Total Procedures

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

Occupational Therapy: Inpatient Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.
Paid Hours: Physician Provider

Total hours paid by physicians/providers on the department's payroll who provide clinical services. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who are billed by the facility on a CMS 1500 Form. Include only physicians/providers on the facility payroll who spend 80% or more of their time in clinical or patient care activities. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or standby hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Patient Care Provider

Total hours worked by other patient care providers (e.g. rehab/therapy technician or aide, nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care department personnel.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.
**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Therapist**

Total hours worked by licensed therapists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Therapy Assistant**

Total hours worked by certified therapy assistants.

This is a subset of Worked Hours: Staff.

**Occupational Therapy: Inpatient Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.
**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and callback time; exclude expense for on call time.

This is a subset of Labor Expense.
**Physician Provider Professional Fee Expense**

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

**Occupational Therapy: Inpatient Mandatory Elements**

The following data elements are mandatory for this department:

- APC Relative Weight
- Days of Operation per Week
- Hours of Operation per Week
- Labor Expense
- Labor Expense: Physician Provider
- Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Total Procedures
- Worked Hours: Physician Provider
- Worked Hours: Staff
- Worked Hours: Therapist
Occupational Therapy: Inpatient Normalizations

Include the hours costs and volumes (where applicable) associated with:

- Personnel performing the functions of the department’s day to day managerial operations (Rehabilitation)

Exclude the hours costs and volumes (where applicable) associated with the

- Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program (Rehabilitation Services)
- Case Management (manages patient care while the patient is undergoing treatment)
- Insurance verification - initial time spent obtaining name and identification and pre-admission certification during the admission process
- Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
- Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
- Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture
- Patient reception, e.g., greeting, checking in of patients, answering phone calls (Rehabilitation)
- Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Rehabilitation)
- PPS (Prospective Payment System) Coordinator
- Rehab Services Patient Scheduling
- Repair and Maintenance of Clinical Equipment/Rooms
- Social Workers
- Transport of patients not requiring clinical escort
04822, Occupational Therapy: Outpatient

This department provides evaluation and treatment for outpatients with sensory-motor, perceptual, or neuromuscular trauma or dysfunction. Occupational therapy is designed to help people of all ages with physical, developmental, social, or emotional deficits regain and build daily living skills that are important for functional independence, health, and well-being. This department can include therapeutic EMG, work hardening, driving therapy and hand therapy.

Occupational Therapy: Outpatient Mapping Guidelines

If your actual cost center’s patient population is less than 95% occupational therapy for outpatients, this department may not be an appropriate choice. Another option might be the Occupational Therapy: Inpatient & Outpatient department.

Occupational Therapy: Outpatient Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs) represent billable workload which is routinely performed in rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet that can be accessed in the Support Tab.

Days of Operation per Week

Total number of days the department is open for operation during the week.

The maximum number that can be reported is 7.

Department Specific Billed Time Units (BTUs)

Department Specific Total Billed Time Units (BTUs) represent all billable workload performed by the department staff. These may include billable time units for which the department charges and captures on the worksheet, including any unlisted procedures. The Department Specific Billed Time Units (BTUs) count is the sum of all Department Specific Billed Time Units (BTUs) recorded on the Rehabilitation Services Worksheet available in the support tab.
**Department Specific Evaluation Billed Timed Units (BTUs)**

Represents the sum of the evaluation billed time units (BTUs) performed by the department staff as calculated on the Rehabilitation Services Worksheet. The sum of Department Specific Evaluation BTUs associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Department Specific BTUs.

**Hours of Operation per Week**

The average number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

**Missed Appointments**

The number of missed patient appointments which occurred as a result of a patient, staff member(s) including a physician, provider, and/or specialist, equipment, room, and/or other resource that is unavailable, for any reason, at the scheduled time for a specific patient service.

This is a subset of Patient Appointments Scheduled.

**Patient Appointments Scheduled**

Total number of patient appointments scheduled for the reporting period. An appointment is defined as a distinct block of scheduled time for a specific patient service, which includes visits, procedures, treatments, consultations, education, and/or tests.

**Patient No Shows**

The total number of patients who did not appear, for any reason, for a scheduled appointment including cancellation, non appearance or reschedule less than 24 hours prior to the appointment during the reporting period.

This is a subset of Missed Appointments.

**Patient Visits**

Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.
**Pediatric Baseline Billed Time Units (BTUs)**

Baseline Billed Time Units (BTUs): Pediatric represent billable workload which was performed on pediatric patients by the rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet available on the Support Tab.

This is a component of Baseline Billed Time Units (BTUs).

**Pediatric Evaluations**

Total evaluations performed on pediatric patients by the department staff during the reporting period. The sum of the number of evaluations performed on pediatric patients associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Evaluations and Total Procedures.

**Pediatric Procedures**

Total count all procedures (including evaluations) performed on pediatric patients by the department for the reporting period. It is recommended that this value be populated by referring to the Rehabilitation Services Worksheet available on the Support Page.

This is a component of Total Procedures.

**Pediatric Visits**

Total separate pediatric patient encounters performed and/or supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

This is a subset of Patient Visits.

**Pre and Post Activity Time Units**

The number of 15-minute units a therapy professional spends preparing for a treatment/procedure and any post treatment/procedure time spent charting and report completion. This does not include face-to-face time with the patient. It is the sum of Pre and Post Activity Time Units recorded in Column 14 on the Rehabilitation Services Worksheet available on the Support Page.
Service Units
The number of 15-minute units necessary for the therapy professional to complete the service/treatment/procedure (face to face time with the patient). It is the result of column 6 Total Department-Specific BTUs divided by 15. Refer to the Rehabilitation Services Worksheet available on the Support Page for assistance in reporting this element.

Total Evaluations
Total evaluations performed by the department staff. The sum of the number of evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Procedures.

Total Procedures
Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

Occupational Therapy: Outpatient Department Hours Elements

Paid Hours: Contract Labor
Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider
Total hours paid by physicians/providers on the department's payroll who provide clinical services. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who are billed by the facility on a CMS 1500 Form. Include only physicians/providers on the facility payroll who spend 80% or more of their time in clinical or patient care activities. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff
Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.
**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Patient Care Provider**

Total hours worked by other patient care providers (e.g. rehab/therapy technician or aide, nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care department personnel.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.
Worked Hours: Therapist

Total hours worked by licensed therapists.

This is a subset of Worked Hours: Staff.

Worked Hours: Therapy Assistant

Total hours worked by certified therapy assistants.

This is a subset of Worked Hours: Staff.

Occupational Therapy: Outpatient Expense Elements

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.
This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and callback time; exclude expense for on call time.

This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

**Occupational Therapy: Outpatient Mandatory Elements**

The following data elements are mandatory for this department:

- APC Relative Weight
- Days of Operation per Week
- Hours of Operation per Week
- Labor Expense
- Labor Expense: Physician Provider
- Medical Supply Expense
- Other Direct Operating Expense
• Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Physician Provider Professional Fee Expense
• Total Procedures
• Worked Hours: Physician Provider
• Worked Hours: Staff
• Worked Hours: Therapist

**Occupational Therapy: Outpatient Normalizations**

Include the hours costs and volumes (where applicable) associated with:

• Personnel performing the functions of the department’s day to day managerial operations (Rehabilitation)

Exclude the hours costs and volumes (where applicable) associated with the

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program (Rehabilitation Services)

• Case Management (manages patient care while the patient is undergoing treatment)

• Insurance verification - initial time spent obtaining name and identification and pre-admission certification during the admission process

• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Rehabilitation)

• Personnel performing the functions of administration and managerial oversight operations (Rehabilitation)
• PPS (Prospective Payment System) Coordinator
• Rehab Services Patient Scheduling
• Repair and Maintenance of Clinical Equipment/Rooms
• Social Workers
• Transport of patients not requiring clinical escort

04825, Occupational Therapy: Inpatient and Outpatient

This department provides evaluation and treatment for inpatients and outpatients with sensory-motor, perceptual, or neuromuscular trauma or dysfunction. Occupational therapy is designed to help people of all ages with physical, developmental, social, or emotional deficits regain and build daily living skills that are important for functional independence, health, and well-being. This department can include therapeutic EMG, work hardening, driving therapy and hand therapy.

Occupational Therapy: Inpatient and Outpatient Mapping Guidelines

If your actual cost center's patient population is less than 95% occupational therapy for inpatients and outpatients, this department may not be an appropriate choice. Other options might include creating the 04821 Occupational Therapy: Inpatient department and the 04822 Occupational Therapy: Outpatient departments, the 04870 PT/OT/SLP Combined: Inpatient & Outpatient, or the G4800 Other Rehabilitation Therapies Services. If you have a cost center specifically for pediatric patients, map it here and be sure to answer the corresponding characteristic survey questions regarding pediatric volumes.

Occupational Therapy: Inpatient and Outpatient Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs) represent billable workload which is routinely performed in rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet that can be accessed in the Support Tab.
**Case Mix Group (CMG) Index**

The average Case Mix Group relative weight, based on the most recently published CMS values, for all inpatients admitted to the Inpatient Rehabilitation Unit (IRF) during the reporting period. This value may be obtained through the data calculated by UDSmr or a similar vendor.

**Note:** This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).

**Days of Operation per Week**

Total number of days the department is open for operation during the week.

The maximum number that can be reported is 7.

**Department Specific Billed Time Units (BTUs)**

Department Specific Total Billed Time Units (BTUs) represent all billable workload performed by the department staff. These may include billable time units for which the department charges and captures on the worksheet, including any unlisted procedures. The Department Specific Billed Time Units (BTUs) count is the sum of all Department Specific Billed Time Units (BTUs) recorded on the Rehabilitation Services Worksheet available in the support tab.

**Department Specific Evaluation Billed Timed Units (BTUs)**

Represents the sum of the evaluation billed time units (BTUs) performed by the department staff as calculated on the Rehabilitation Services Worksheet. The sum of Department Specific Evaluation BTUs associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Department Specific BTUs.

**Hours of Operation per Week**

The average number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

**Inpatient Baseline Billed Time Units (BTUs)**

Baseline Billed Time Units (BTUs): Inpatients is the sum of all billable workload performed by the department staff in support of facility inpatients. Baseline BTUs represent the standard time value for workload performed in the department as recorded on the Rehabilitation Services Workload Computation Worksheet available in the Support Tab.

This is a subset of Total Baseline BTUs.
**Inpatient Department Specific Billed Time Units (BTUs)**

Department Specific Billed Time Units (BTUs): Inpatient is the sum of all billable workload performed by the department staff in support of facility inpatients. These Inpatient Department Specific BTUs may include billable items for which the department charges but which are not itemized on the Rehabilitation Services Workload Computation Worksheet available in the Support Tab.

This is a subset of Total Department Specific BTUs.

**Inpatient Dept Specific Evaluation Billed Time Units (BTUs)**

Billed time units (BTUs) for evaluations performed by department staff in support of facility inpatients. The value is the sum of the inpatient evaluation billed time units (BTUs) associated with the evaluation CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Department Specific Evaluation Billed Timed Units (BTUs).

**Inpatient Evaluations**

Total evaluations performed by the department staff in support of facility inpatients. The sum of the number of inpatient evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Evaluations.

**Inpatient Procedures**

Count all procedures performed on inpatients by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, as well as Procedure Counting here in the DRM for more information.

This is a subset of Total Procedures.

**Inpatient Visits**

Total patient encounters performed in support of facility inpatients.

This is a subset of Patient Visits.

**Length of Stay (LOS) Efficiency**

The aggregate Functional Independence Measurement instrument (FIM) point gain by all patients on acute rehabilitation unit divided by the total patient days on the unit. This value should correspond to the reporting quarter and may be obtained through the data calculated by UDSmr or a similar vendor.
**Note:** This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).

**Missed Appointments**

The number of missed patient appointments which occurred as a result of a patient, staff member(s) including a physician, provider, and/or specialist, equipment, room, and/or other resource that is unavailable, for any reason, at the scheduled time for a specific patient service.

This is a subset of Patient Appointments Scheduled.

**Patient Appointments Scheduled**

Total number of patient appointments scheduled for the reporting period. An appointment is defined as a distinct block of scheduled time for a specific patient service, which includes visits, procedures, treatments, consultations, education, and/or tests.

**Patient No Shows**

The total number of patients who did not appear, for any reason, for a scheduled appointment including cancellation, non appearance or reschedule less than 24 hours prior to the appointment during the reporting period.

This is a subset of Missed Appointments.

**Patient Visits**

Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

**Pediatric Baseline Billed Time Units (BTUs)**

Baseline Billed Time Units (BTUs): Pediatric represent billable workload which was performed on pediatric patients by the rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet available on the Support Tab.

This is a component of Baseline Billed Time Units (BTUs).

**Pediatric Evaluations**

Total evaluations performed on pediatric patients by the department staff during the reporting period. The sum of the number of evaluations performed on pediatric patients associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.
This is a component of Total Evaluations and Total Procedures.

**Pediatric Procedures**

Total count all procedures (including evaluations) performed on pediatric patients by the department for the reporting period. It is recommended that this value be populated by referring to the Rehabilitation Services Worksheet available on the Support Page.

This is a component of Total Procedures.

**Pediatric Visits**

Total separate pediatric patient encounters performed and/or supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

This is a subset of Patient Visits.

**Pre and Post Activity Time Units**

The number of 15-minute units a therapy professional spends preparing for a treatment/procedure and any post treatment/procedure time spent charting and report completion. This does not include face-to-face time with the patient. It is the sum of Pre and Post Activity Time Units recorded in Column 14 on the Rehabilitation Services Worksheet available on the Support Page.

**Service Units**

The number of 15-minute units necessary for the therapy professional to complete the service/treatment/procedure (face to face time with the patient). It is the result of column 6 Total Department-Specific BTUs divided by 15. Refer to the Rehabilitation Services Worksheet available on the Support Page for assistance in reporting this element.

**Total Evaluations**

Total evaluations performed by the department staff. The sum of the number of evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Procedures.
Total Procedures

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

Occupational Therapy: Inpatient and Outpatient Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider

Total hours paid by physicians/providers on the department's payroll who provide clinical services. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who are billed by the facility on a CMS 1500 Form. Include only physicians/providers on the facility payroll who spend 80% or more of their time in clinical or patient care activities. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Patient Care Provider

Total hours worked by other patient care providers (e.g. rehab/therapy technician or aide, nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care department personnel.

This is a subset of Worked Hours: Staff.
Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Physician Provider

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Worked Hours: Therapist

Total hours worked by licensed therapists.

This is a subset of Worked Hours: Staff.

Worked Hours: Therapy Assistant

Total hours worked by certified therapy assistants.

This is a subset of Worked Hours: Staff.

Occupational Therapy: Inpatient and Outpatient Expense Elements
Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and callback time; exclude expense for on call time.

This is a subset of Labor Expense.
Physician Provider Professional Fee Expense

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

Worked Hours: Occupational Therapist

Total hours worked by licensed occupational therapists.

This is a subset of Worked Hours: Staff.

Worked Hours: OT Assistant

Total hours worked by licensed occupational therapy assistants.

This is a subset of Worked Hours: Staff.

Occupational Therapy: Inpatient and Outpatient Mandatory Elements

The following data elements are mandatory for this department:

- APC Relative Weight
- Days of Operation per Week
- Hours of Operation per Week
- Inpatient Procedures
- Labor Expense
- Labor Expense: Physician Provider
- Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
• Paid Hours: Staff
• Physician Provider Professional Fee Expense
• Total Procedures
• Worked Hours: Physician Provider
• Worked Hours: Staff
• Worked Hours: Therapist

**Occupational Therapy: Inpatient and Outpatient Normalizations**

Include the hours costs and volumes (where applicable) associated with:

• Personnel performing the functions of the department’s day to day managerial operations (Rehabilitation)

Exclude the hours costs and volumes (where applicable) associated with the

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program (Rehabilitation Services)

• Case Management (manages patient care while the patient is undergoing treatment)

• Insurance verification - initial time spent obtaining name and identification and pre-admission certification during the admission process

• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture

• Patient reception, e.g., greeting, checking in of patients, answering phone calls (Rehabilitation)

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Rehabilitation)

• PPS (Prospective Payment System) Coordinator

• Rehab Services Patient Scheduling
• Repair and Maintenance of Clinical Equipment/Rooms
• Social Workers
• Transport of patients not requiring clinical escort

04830, Occupational Rehabilitation

This department provides diagnostic, preventive, curative, rehabilitative, and educational services for workers either at their place of employment or in the hospital setting. Occupational Rehabilitation is a field of preventive medicine concerned with the medical problems and practices relating to occupations and especially to the health of workers in various industries. Also included in this department is work hardening which is a highly structured, goal-oriented, individualized treatment program designed to maximize a person's ability to return to work. Work Hardening uses work (real or simulated) as a treatment modality.

Occupational Rehabilitation Mapping Guidelines

If your actual cost center's patient population is less than 80% occupational rehabilitation, this department may not be an appropriate choice.

Occupational Rehabilitation Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs) represent billable workload which is routinely performed in rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet that can be accessed in the Support Tab.

Days of Operation per Week

Total number of days the department is open for operation during the week.

The maximum number that can be reported is 7.
Department Specific Billed Time Units (BTUs)

Department Specific Total Billed Time Units (BTUs) represent all billable workload performed by the department staff. These may include billable time units for which the department charges and captures on the worksheet, including any unlisted procedures. The Department Specific Billed Time Units (BTUs) count is the sum of all Department Specific Billed Time Units (BTUs) recorded on the Rehabilitation Services Worksheet available in the support tab.

Department Specific Evaluation Billed Timed Units (BTUs)

Represents the sum of the evaluation billed time units (BTUs) performed by the department staff as calculated on the Rehabilitation Services Worksheet. The sum of Department Specific Evaluation BTUs associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Department Specific BTUs.

Hours of Operation per Week

The average number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

Missed Appointments

The number of missed patient appointments which occurred as a result of a patient, staff member(s) including a physician, provider, and/or specialist, equipment, room, and/or other resource that is unavailable, for any reason, at the scheduled time for a specific patient service.

This is a subset of Patient Appointments Scheduled.

Patient Appointments Scheduled

Total number of patient appointments scheduled for the reporting period. An appointment is defined as a distinct block of scheduled time for a specific patient service, which includes visits, procedures, treatments, consultations, education, and/or tests.

Patient No Shows

The total number of patients who did not appear, for any reason, for a scheduled appointment including cancellation, non appearance or reschedule less than 24 hours prior to the appointment during the reporting period.

This is a subset of Missed Appointments.
**Patient Visits**

Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

**Pediatric Baseline Billed Time Units (BTUs)**

Baseline Billed Time Units (BTUs): Pediatric represent billable workload which was performed on pediatric patients by the rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet available on the Support Tab.

This is a component of Baseline Billed Time Units (BTUs).

**Pediatric Evaluations**

Total evaluations performed on pediatric patients by the department staff during the reporting period. The sum of the number of evaluations performed on pediatric patients associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Evaluations and Total Procedures.

**Pediatric Procedures**

Total count all procedures (including evaluations) performed on pediatric patients by the department for the reporting period. It is recommended that this value be populated by referring to the Rehabilitation Services Worksheet available on the Support Page.

This is a component of Total Procedures.

**Pediatric Visits**

Total separate pediatric patient encounters performed and/or supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

This is a subset of Patient Visits.
Pre and Post Activity Time Units

The number of 15-minute units a therapy professional spends preparing for a treatment/procedure and any post treatment/procedure time spent charting and report completion. This does not include face-to-face time with the patient. It is the sum of Pre and Post Activity Time Units recorded in Column 14 on the Rehabilitation Services Worksheet available on the Support Page.

Service Units

The number of 15-minute units necessary for the therapy professional to complete the service/treatment/procedure (face to face time with the patient). It is the result of column 6 Total Department-Specific BTUs divided by 15. Refer to the Rehabilitation Services Worksheet available on the Support Page for assistance in reporting this element.

Total Evaluations

Total evaluations performed by the department staff. The sum of the number of evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Procedures.

Total Procedures

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

Occupational Rehabilitation Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider

Total hours paid by physicians/providers on the department's payroll who provide clinical services. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who are billed by the facility on a CMS 1500 Form. Include only physicians/providers on the facility payroll who spend 80% or more of their time in clinical or patient care activities. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.
Paid Hours: Staff
Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Exercise Physiologist
Total hours worked by exercise physiologists.
This is a subset of Worked Hours: Staff.

Worked Hours: Hand Therapist
Total hours worked by licensed hand therapists.
This is a component of Worked Hours: Therapist.

Worked Hours: Management
Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.
This is a subset of Worked Hours: Staff.

Worked Hours: Occupational Therapist
Total hours worked by licensed occupational therapists.
This is a component of Worked Hours: Therapist.

Worked Hours: OT Assistant
Total hours worked by licensed occupational therapy assistants.
This is a component of Worked Hours: Therapy Assistant.

Worked Hours: Other Patient Care Provider
Total hours worked by other patient care providers (e.g. rehab/therapy technician or aide, nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care department personnel.
This is a subset of Worked Hours: Staff.
Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Physical Therapist

Total hours worked by licensed physical therapists.

This is a component of Worked Hours: Therapist.

Worked Hours: Physician Provider

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

Worked Hours: PT Assistant

Total hours worked by licensed physical therapy assistants.

This is a component of Worked Hours: Therapy Assistant.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.
Worked Hours: Therapist

Total hours worked by licensed therapists.

This is a subset of Worked Hours: Staff.

Worked Hours: Therapy Assistant

Total hours worked by certified therapy assistants.

This is a subset of Worked Hours: Staff.

Worked Hours: Vocational Counselor

Total hours worked by licensed vocational counselors.

This is a subset of Worked Hours: Staff.

Occupational Rehabilitation Expense Elements

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.
Non Medical Supply Expense

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and callback time; exclude expense for on call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

Occupational Rehabilitation Mandatory Elements

The following data elements are mandatory for this department:

- APC Relative Weight
- Days of Operation per Week
- Hours of Operation per Week
- Labor Expense
- Labor Expense: Physician Provider
• Medical Supply Expense
• Other Direct Operating Expense
• Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Physician Provider Professional Fee Expense
• Total Procedures
• Worked Hours: Physician Provider
• Worked Hours: Staff
• Worked Hours: Therapist

Occupational Rehabilitation Normalizations

Include the hours costs and volumes (where applicable) associated with:

• Personnel performing the functions of the department’s day to day managerial operations (Rehabilitation)

Exclude the hours costs and volumes (where applicable) associated with the

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program (Rehabilitation Services)
• Case Management (manages patient care while the patient is undergoing treatment)
• Insurance verification - initial time spent obtaining name and identification and pre-admission certification during the admission process
• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
• Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture
• Patient reception, e.g., greeting, checking in of patients, answering phone calls (Rehabilitation)
• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Rehabilitation)
• PPS (Prospective Payment System) Coordinator
• Rehab Services Patient Scheduling
• Repair and Maintenance of Clinical Equipment/Rooms
• Social Workers
• Transport of patients not requiring clinical escort

04840, Sports Medicine Therapies

This department provides evaluation and treatment of outpatients, primarily injured athletes with sports-related injuries. The purpose of this department includes rehabilitating current injuries, improving athletes’ performance and helping maximize athletic potential.

Sports Medicine Mapping Guidelines

If your actual cost center’s patient population is less than 80% sports medicine, this department may not be an appropriate choice.

Sports Medicine Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs) represent billable workload which is routinely performed in rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet that can be accessed in the Support Tab.
Days of Operation per Week

Total number of days the department is open for operation during the week.

The maximum number that can be reported is 7.

Department Specific Billed Time Units (BTUs)

Department Specific Total Billed Time Units (BTUs) represent all billable workload performed by the department staff. These may include billable time units for which the department charges and captures on the worksheet, including any unlisted procedures. The Department Specific Billed Time Units (BTUs) count is the sum of all Department Specific Billed Time Units (BTUs) recorded on the Rehabilitation Services Worksheet available in the support tab.

Department Specific Evaluation Billed Timed Units (BTUs)

Represents the sum of the evaluation billed time units (BTUs) performed by the department staff as calculated on the Rehabilitation Services Worksheet. The sum of Department Specific Evaluation BTUs associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Department Specific BTUs.

Hours of Operation per Week

The average number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

Missed Appointments

The number of missed patient appointments which occurred as a result of a patient, staff member(s) including a physician, provider, and/or specialist, equipment, room, and/or other resource that is unavailable, for any reason, at the scheduled time for a specific patient service.

This is a subset of Patient Appointments Scheduled.

Patient Appointments Scheduled

Total number of patient appointments scheduled for the reporting period. An appointment is defined as a distinct block of scheduled time for a specific patient service, which includes visits, procedures, treatments, consultations, education, and/or tests.
Patient No Shows

The total number of patients who did not appear, for any reason, for a scheduled appointment including cancellation, non appearance or reschedule less than 24 hours prior to the appointment during the reporting period.

This is a subset of Missed Appointments.

Patient Visits

Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

Pediatric Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs): Pediatric represent billable workload which was performed on pediatric patients by the rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet available on the Support Tab.

This is a component of Baseline Billed Time Units (BTUs).

Pediatric Evaluations

Total evaluations performed on pediatric patients by the department staff during the reporting period. The sum of the number of evaluations performed on pediatric patients associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Evaluations and Total Procedures.

Pediatric Procedures

Total count all procedures (including evaluations) performed on pediatric patients by the department for the reporting period. It is recommended that this value be populated by referring to the Rehabilitation Services Worksheet available on the Support Page.

This is a component of Total Procedures.
**Pediatric Visits**

Total separate pediatric patient encounters performed and/or supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

This is a subset of Patient Visits.

**Pre and Post Activity Time Units**

The number of 15-minute units a therapy professional spends preparing for a treatment/procedure and any post treatment/procedure time spent charting and report completion. This does not include face-to-face time with the patient. It is the sum of Pre and Post Activity Time Units recorded in Column 14 on the Rehabilitation Services Worksheet available on the Support Page.

**Service Units**

The number of 15-minute units necessary for the therapy professional to complete the service/treatment/procedure (face to face time with the patient). It is the result of column 6 Total Department-Specific BTUs divided by 15. Refer to the Rehabilitation Services Worksheet available on the Support Page for assistance in reporting this element.

**Total Evaluations**

Total evaluations performed by the department staff. The sum of the number of evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Procedures.

**Total Procedures**

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

**Sports Medicine Department Hours Elements**

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.
**Paid Hours: Physician Provider**

Total hours paid by physicians/providers on the department's payroll who provide clinical services. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who are billed by the facility on a CMS 1500 Form. Include only physicians/providers on the facility payroll who spend 80% or more of their time in clinical or patient care activities. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: Athletic Trainer**

Total hours worked by athletic trainers.

This is a subset of Worked Hours: Staff.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Patient Care Provider**

Total hours worked by other patient care providers (e.g. rehab/therapy technician or aide, nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care department personnel.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Physician Provider

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Worked Hours: Therapist

Total hours worked by licensed therapists.

This is a subset of Worked Hours: Staff.

Worked Hours: Therapy Assistant

Total hours worked by certified therapy assistants.

This is a subset of Worked Hours: Staff.

Sports Medicine Expense Elements

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.
Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and callback time; exclude expense for on call time.

This is a subset of Labor Expense.
Physician Provider Professional Fee Expense

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

Sports Medicine Mandatory Elements

The following data elements are mandatory for this department:

- APC Relative Weight
- Days of Operation per Week
- Hours of Operation per Week
- Labor Expense
- Labor Expense: Physician Provider
- Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Total Procedures
- Worked Hours: Physician Provider
- Worked Hours: Staff
- Worked Hours: Therapist

Sports Medicine Normalizations
Include the hours costs and volumes (where applicable) associated with:

- Personnel performing the functions of the department's day to day managerial operations (Rehabilitation)

Exclude the hours costs and volumes (where applicable) associated with the

- Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program (Rehabilitation Services)
- Case Management
- Insurance verification - initial time spent obtaining name and identification and pre-admission certification during the admission process
- Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
- Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
- Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture
- Patient reception, e.g., greeting, checking in of patients, answering phone calls (Rehabilitation)
- Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Rehabilitation)
- PPS (Prospective Payment System) Coordinator
- Rehab Services Patient Scheduling
- Repair and Maintenance of Clinical Equipment/Rooms
- Social Workers
- Transport of patients not requiring clinical escort

04850, Recreational Therapy

This department provides social and physical rehabilitation or maintenance to acute rehab, long term and/or custodial patients through integration into recreational endeavors.
Recreational Therapy Mapping Guidelines

If your actual cost center's patient population is less than 80% recreational therapy, this department may not be an appropriate choice.

Recreational Therapy Workload

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs) represent billable workload which is routinely performed in rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet that can be accessed in the Support Tab.

Case Mix Group (CMG) Index

The average Case Mix Group relative weight, based on the most recently published CMS values, for all inpatients admitted to the Inpatient Rehabilitation Unit (IRF) during the reporting period. This value may be obtained through the data calculated by UDSmr or a similar vendor.

Note: This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).

Days of Operation per Week

Total number of days the department is open for operation during the week.

The maximum number that can be reported is 7.

Department Specific Billed Time Units (BTUs)

Department Specific Total Billed Time Units (BTUs) represent all billable workload performed by the department staff. These may include billable time units for which the department charges and captures on the worksheet, including any unlisted procedures. The Department Specific Billed Time Units (BTUs) count is the sum of all Department Specific Billed Time Units (BTUs) recorded on the Rehabilitation Services Worksheet available in the support tab.
Group Therapy Sessions
Total patient group therapy sessions supported by department staff. Group therapy sessions are the treatment of more than one patient concurrently. The total sessions are a count of the sessions not the patients.

Hours of Operation per Week
The average number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

Inpatient Baseline Billed Time Units (BTUs)
Baseline Billed Time Units (BTUs): Inpatients is the sum of all billable workload performed by the department staff in support of facility inpatients. Baseline BTUs represent the standard time value for workload performed in the department as recorded on the Rehabilitation Services Workload Computation Worksheet available in the Support Tab.

This is a subset of Total Baseline BTUs.

Inpatient Department Specific Billed Time Units (BTUs)
Department Specific Billed Time Units (BTUs): Inpatient is the sum of all billable workload performed by the department staff in support of facility inpatients. These Inpatient Department Specific BTUs may include billable items for which the department charges but which are not itemized on the Rehabilitation Services Workload Computation Worksheet available in the Support Tab.

This is a subset of Total Department Specific BTUs.

Inpatient Procedures
Count all procedures performed on inpatients by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, as well as Procedure Counting here in the DRM for more information.

This is a subset of Total Procedures.

Inpatient Visits
Total patient encounters performed in support of facility inpatients.

This is a subset of Patient Visits.
Length of Stay (LOS) Efficiency
The aggregate Functional Independence Measurement instrument (FIM) point gain by all patients on acute rehabilitation unit divided by the total patient days on the unit. This value should correspond to the reporting quarter and may be obtained through the data calculated by UDSmr or a similar vendor.

Note: This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).

Missed Appointments
The number of missed patient appointments which occurred as a result of a patient, staff member(s) including a physician, provider, and/or specialist, equipment, room, and/or other resource that is unavailable, for any reason, at the scheduled time for a specific patient service.

This is a subset of Patient Appointments Scheduled.

Patient Appointments Scheduled
Total number of patient appointments scheduled for the reporting period. An appointment is defined as a distinct block of scheduled time for a specific patient service, which includes visits, procedures, treatments, consultations, education, and/or tests.

Patient No Shows
The total number of patients who did not appear, for any reason, for a scheduled appointment including cancellation, non appearance or reschedule less than 24 hours prior to the appointment during the reporting period.

This is a subset of Missed Appointments.

Patient Visits
Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

Pediatric Baseline Billed Time Units (BTUs)
Baseline Billed Time Units (BTUs): Pediatric represent billable workload which was performed on pediatric patients by the rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet available on the Support Tab.

This is a component of Baseline Billed Time Units (BTUs).
Pediatric Procedures

Total count all procedures (including evaluations) performed on pediatric patients by the department for the reporting period. It is recommended that this value be populated by referring to the Rehabilitation Services Worksheet available on the Support Page.

This is a component of Total Procedures.

Pediatric Visits

Total separate pediatric patient encounters performed and/or supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

This is a subset of Patient Visits.

Pre and Post Activity Time Units

The number of 15-minute units a therapy professional spends preparing for a treatment/procedure and any post treatment/procedure time spent charting and report completion. This does not include face-to-face time with the patient. It is the sum of Pre and Post Activity Time Units recorded in Column 14 on the Rehabilitation Services Worksheet available on the Support Page.

Psychiatric Patient Days Served

Total number of psych patient days spent in units serviced by the department staff.

Rehabilitation Inpatient Visits

Total rehabilitation patient encounters performed in support of facility inpatients.

This is a subset of Inpatient Visits.

Rehabilitation Patient Days Served

Total number of rehab patient days spent in units serviced by department staff.

Service Units

The number of 15-minute units necessary for the therapy professional to complete the service/treatment/procedure (face to face time with the patient). It is the result of column 6 Total Department-Specific BTUs divided by 15. Refer to the Rehabilitation Services Worksheet available on the Support Page for assistance in reporting this element.
**Total Procedures**

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

**Recreational Therapy Department Hours Elements**

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Paid Hours: Physician Provider**

Total hours paid by physicians/providers on the department’s payroll who provide clinical services. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who are billed by the facility on a CMS 1500 Form. Include only physicians/providers on the facility payroll who spend 80% or more of their time in clinical or patient care activities. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: Exercise Physiologist**

Total hours worked by exercise physiologists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.
**Worked Hours: Other Patient Care Provider**

Total hours worked by other patient care providers (e.g. rehab/therapy technician or aide, nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care department personnel.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee’s normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Physical Therapist**

Total hours worked by licensed physical therapists.

This is a component of Worked Hours: Therapist.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: Recreation Therapist**

Total hours worked by licensed recreational therapists.
This is a component of Worked Hours: Therapists.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Therapist**

Total hours worked by licensed therapists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Therapy Assistant**

Total hours worked by certified therapy assistants.

This is a subset of Worked Hours: Staff.

**Recreational Therapy Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.
This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and callback time; exclude expense for on call time.

This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

**Recreational Therapy Mandatory Elements**

The following data elements are mandatory for this department:

- APC Relative Weight
- Days of Operation per Week
- Hours of Operation per Week
- Inpatient Procedures
Rehabilitation Services

- Labor Expense
- Labor Expense: Physician Provider
- Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Psychiatric Patient Days Served
- Rehabilitation Patient Days Served
- Total Procedures
- Worked Hours: Physician Provider
- Worked Hours: Staff
- Worked Hours: Therapist

Recreational Therapy Normalizations

Include the hours costs and volumes (where applicable) associated with:

- Personnel performing the functions of the department’s day to day managerial operations (Rehabilitation)

Exclude the hours costs and volumes (where applicable) associated with the

- Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program (Rehabilitation Services)
- Case Management (manages patient care while the patient is undergoing treatment)
- Insurance verification - initial time spent obtaining name and identification and pre-admission certification during the admission process
• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Rehabilitation)

• PPS (Prospective Payment System) Coordinator

• Rehab Services Patient Scheduling

• Repair and Maintenance of Clinical Equipment/Rooms

• Social Workers

• Transport of patients not requiring clinical escort

04860, Speech Language Pathology and Audiology Combined

This department provides evaluation and therapy to inpatients and/or outpatients of all ages with speech, language, and swallowing dysfunction and hearing dysfunction (i.e. speech language pathology and audiology functions).

Speech Language Pathology and Audiology Combined Mapping Guidelines

If your actual cost center's patient population is less than 80% related to communication disorders (speech language pathology and audiology), this department may not be an appropriate choice. Other options might be 04861 Speech Language Pathology: Inpatient & Outpatient, 04862 Audiology, and/or G4800 Other Rehabilitation Therapies Services.
Speech Language Pathology and Audiology Combined Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs) represent billable workload which is routinely performed in rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet that can be accessed in the Support Tab.

Case Mix Group (CMG) Index

The average Case Mix Group relative weight, based on the most recently published CMS values, for all inpatients admitted to the Inpatient Rehabilitation Unit (IRF) during the reporting period. This value may be obtained through the data calculated by UDSmr or a similar vendor.

Note: This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).

Days of Operation per Week

Total number of days the department is open for operation during the week.

The maximum number that can be reported is 7.

Department Specific Billed Time Units (BTUs)

Department Specific Total Billed Time Units (BTUs) represent all billable workload performed by the department staff. These may include billable time units for which the department charges and captures on the worksheet, including any unlisted procedures. The Department Specific Billed Time Units (BTUs) count is the sum of all Department Specific Billed Time Units (BTUs) recorded on the Rehabilitation Services Worksheet available in the support tab.

Department Specific Evaluation Billed Timed Units (BTUs)

Represents the sum of the evaluation billed time units (BTUs) performed by the department staff as calculated on the Rehabilitation Services Worksheet. The sum of Department Specific Evaluation BTUs associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Department Specific BTUs.
**Hours of Operation per Week**

The average number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

**Inpatient Baseline Billed Time Units (BTUs)**

Baseline Billed Time Units (BTUs): Inpatients is the sum of all billable workload performed by the department staff in support of facility inpatients. Baseline BTUs represent the standard time value for workload performed in the department as recorded on the Rehabilitation Services Workload Computation Worksheet available in the Support Tab.

This is a subset of Total Baseline BTUs.

**Inpatient Department Specific Billed Time Units (BTUs)**

Department Specific Billed Time Units (BTUs): Inpatient is the sum of all billable workload performed by the department staff in support of facility inpatients. These Inpatient Department Specific BTUs may include billable items for which the department charges but which are not itemized on the Rehabilitation Services Workload Computation Worksheet available in the Support Tab.

This is a subset of Total Department Specific BTUs.

**Inpatient Dept Specific Evaluation Billed Time Units (BTUs)**

Billed time units (BTUs) for evaluations performed by department staff in support of facility inpatients. The value is the sum of the inpatient evaluation billed time units (BTUs) associated with the evaluation CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Department Specific Evaluation Billed Timed Units (BTUs).

**Inpatient Evaluations**

Total evaluations performed by the department staff in support of facility inpatients. The sum of the number of inpatient evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Evaluations.

**Inpatient Procedures**

Count all procedures performed on inpatients by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, as well as Procedure Counting here in the DRM for more information.
This is a subset of Total Procedures.

**Inpatient Visits**

Total patient encounters performed in support of facility inpatients.

This is a subset of Patient Visits.

**Length of Stay (LOS) Efficiency**

The aggregate Functional Independence Measurement instrument (FIM) point gain by all patients on acute rehabilitation unit divided by the total patient days on the unit. This value should correspond to the reporting quarter and may be obtained through the data calculated by UDSmr or a similar vendor.

*Note:* This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).

**Missed Appointments**

The number of missed patient appointments which occurred as a result of a patient, staff member(s) including a physician, provider, and/or specialist, equipment, room, and/or other resource that is unavailable, for any reason, at the scheduled time for a specific patient service.

This is a subset of Patient Appointments Scheduled.

**Patient Appointments Scheduled**

Total number of patient appointments scheduled for the reporting period. An appointment is defined as a distinct block of scheduled time for a specific patient service, which includes visits, procedures, treatments, consultations, education, and/or tests.

**Patient No Shows**

The total number of patients who did not appear, for any reason, for a scheduled appointment including cancellation, non appearance or reschedule less than 24 hours prior to the appointment during the reporting period.

This is a subset of Missed Appointments.

**Patient Visits**

Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.
Pediatric Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs): Pediatric represent billable workload which was performed on pediatric patients by the rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet available on the Support Tab.

This is a component of Baseline Billed Time Units (BTUs).

Pediatric Evaluations

Total evaluations performed on pediatric patients by the department staff during the reporting period. The sum of the number of evaluations performed on pediatric patients associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Evaluations and Total Procedures.

Pediatric Procedures

Total count all procedures (including evaluations) performed on pediatric patients by the department for the reporting period. It is recommended that this value be populated by referring to the Rehabilitation Services Worksheet available on the Support Page.

This is a component of Total Procedures.

Pediatric Visits

Total separate pediatric patient encounters performed and/or supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

This is a subset of Patient Visits.

Pre and Post Activity Time Units

The number of 15-minute units a therapy professional spends preparing for a treatment/procedure and any post treatment/procedure time spent charting and report completion. This does not include face-to-face time with the patient. It is the sum of Pre and Post Activity Time Units recorded in Column 14 on the Rehabilitation Services Worksheet available on the Support Page.
Service Units

The number of 15-minute units necessary for the therapy professional to complete the service/treatment/procedure (face to face time with the patient). It is the result of column 6 Total Department-Specific BTUs divided by 15. Refer to the Rehabilitation Services Worksheet available on the Support Page for assistance in reporting this element.

Total Evaluations

Total evaluations performed by the department staff. The sum of the number of evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Procedures.

Total Procedures

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

Speech Language Pathology and Audiology Combined Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider

Total hours paid by physicians/providers on the department's payroll who provide clinical services. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who are billed by the facility on a CMS 1500 Form. Include only physicians/providers on the facility payroll who spend 80% or more of their time in clinical or patient care activities. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.
Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Occupational Therapist

Total hours worked by licensed occupational therapists.

This is a component of Worked Hours: Therapist.

Worked Hours: Other Patient Care Provider

Total hours worked by other patient care providers (e.g. rehab/therapy technician or aide, nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care department personnel.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Physician Provider

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.
This is a subset of Worked Hours: Staff.

**Worked Hours: Speech-Language Pathologists (non-MD)**

Total hours worked by licensed speech and/or language pathologists (non MD).

This is a component of Worked Hours: Therapist.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Therapist**

Total hours worked by licensed therapists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Therapy Assistant**

Total hours worked by certified therapy assistants.

This is a subset of Worked Hours: Staff.

**Speech Language Pathology and Audiology Combined Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.
Medical Supply Expense
Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense
Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense
Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense
Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and callback time; exclude expense for on call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense
Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

Speech Language Pathology and Audiology Combined Mandatory Elements
The following data elements are mandatory for this department:

- APC Relative Weight
• Days of Operation per Week
• Hours of Operation per Week
• Inpatient Procedures
• Labor Expense
• Labor Expense: Physician Provider
• Medical Supply Expense
• Other Direct Operating Expense
• Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Physician Provider Professional Fee Expense
• Total Procedures
• Worked Hours: Physician Provider
• Worked Hours: Staff
• Worked Hours: Therapist

**Speech Language Pathology and Audiology Combined Normalizations**

Include the hours costs and volumes associated with:

• Personnel performing the functions of the department’s day to day managerial operations (Rehabilitation)

Exclude the hours costs and volumes associated with:

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program (Rehabilitation Services)

• Case Management (manages patient care while the patient is undergoing treatment)

• Insurance verification - initial time spent obtaining name and identification and pre-admission certification during the admission process
• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture

• Patient reception, e.g., greeting, checking in of patients, answering phone calls (Rehabilitation)

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Rehabilitation)

• PPS (Prospective Payment System) Coordinator

• Rehab Services Patient Scheduling

• Repair and Maintenance of Clinical Equipment/Rooms

• Social Workers

• Transport of patients not requiring clinical escort

04861, Speech Language Pathology: Inpatient and Outpatient

This department provides evaluation and therapy to inpatients and/or outpatients with speech and/or swallowing dysfunction.

Speech Language Pathology: Inpatient and Outpatient Mapping Guidelines

If your actual cost center's patient population is less than 80% speech language pathology services for inpatients and outpatients, this department may not be an appropriate choice. Other options might include 04860 Communication Disorders department, 04862 Audiology, and/or G4800 Other Rehabilitation Therapies Services.
Speech Language Pathology: Inpatient and Outpatient Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs) represent billable workload which is routinely performed in rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet that can be accessed in the Support Tab.

Case Mix Group (CMG) Index

The average Case Mix Group relative weight, based on the most recently published CMS values, for all inpatients admitted to the Inpatient Rehabilitation Unit (IRF) during the reporting period. This value may be obtained through the data calculated by UDSmr or a similar vendor.

Note: This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).

Days of Operation per Week

Total number of days the department is open for operation during the week.

The maximum number that can be reported is 7.

Department Specific Billed Time Units (BTUs)

Department Specific Total Billed Time Units (BTUs) represent all billable workload performed by the department staff. These may include billable time units for which the department charges and captures on the worksheet, including any unlisted procedures. The Department Specific Billed Time Units (BTUs) count is the sum of all Department Specific Billed Time Units (BTUs) recorded on the Rehabilitation Services Worksheet available in the support tab.

Department Specific Evaluation Billed Timed Units (BTUs)

Represents the sum of the evaluation billed time units (BTUs) performed by the department staff as calculated on the Rehabilitation Services Worksheet. The sum of Department Specific Evaluation BTUs associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Department Specific BTUs.
**Hours of Operation per Week**

The average number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

**Inpatient Baseline Billed Time Units (BTUs)**

Baseline Billed Time Units (BTUs): Inpatients is the sum of all billable workload performed by the department staff in support of facility inpatients. Baseline BTUs represent the standard time value for workload performed in the department as recorded on the Rehabilitation Services Workload Computation Worksheet available in the Support Tab.

This is a subset of Total Baseline BTUs.

**Inpatient Department Specific Billed Time Units (BTUs)**

Department Specific Billed Time Units (BTUs): Inpatient is the sum of all billable workload performed by the department staff in support of facility inpatients. These Inpatient Department Specific BTUs may include billable items for which the department charges but which are not itemized on the Rehabilitation Services Workload Computation Worksheet available in the Support Tab.

This is a subset of Total Department Specific BTUs.

**Inpatient Dept Specific Evaluation Billed Time Units (BTUs)**

Billed time units (BTUs) for evaluations performed by department staff in support of facility inpatients. The value is the sum of the inpatient evaluation billed time units (BTUs) associated with the evaluation CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Department Specific Evaluation Billed Timed Units (BTUs).

**Inpatient Evaluations**

Total evaluations performed by the department staff in support of facility inpatients. The sum of the number of inpatient evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Evaluations.

**Inpatient Procedures**

Count all procedures performed on inpatients by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, as well as Procedure Counting here in the DRM for more information.
Inpatient Visits

Total patient encounters performed in support of facility inpatients.

This is a subset of Patient Visits.

Length of Stay (LOS) Efficiency

The aggregate Functional Independence Measurement instrument (FIM) point gain by all patients on acute rehabilitation unit divided by the total patient days on the unit. This value should correspond to the reporting quarter and may be obtained through the data calculated by UDSmr or a similar vendor.

Note: This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).

Missed Appointments

The number of missed patient appointments which occurred as a result of a patient, staff member(s) including a physician, provider, and/or specialist, equipment, room, and/or other resource that is unavailable, for any reason, at the scheduled time for a specific patient service.

This is a subset of Patient Appointments Scheduled.

Patient Appointments Scheduled

Total number of patient appointments scheduled for the reporting period. An appointment is defined as a distinct block of scheduled time for a specific patient service, which includes visits, procedures, treatments, consultations, education, and/or tests.

Patient No Shows

The total number of patients who did not appear, for any reason, for a scheduled appointment including cancellation, non appearance or reschedule less than 24 hours prior to the appointment during the reporting period.

This is a subset of Missed Appointments.

Patient Visits

Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.
**Pediatric Baseline Billed Time Units (BTUs)**

Baseline Billed Time Units (BTUs): Pediatric represent billable workload which was performed on pediatric patients by the rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet available on the Support Tab.

This is a component of Baseline Billed Time Units (BTUs).

**Pediatric Evaluations**

Total evaluations performed on pediatric patients by the department staff during the reporting period. The sum of the number of evaluations performed on pediatric patients associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Evaluations and Total Procedures.

**Pediatric Procedures**

Total count all procedures (including evaluations) performed on pediatric patients by the department for the reporting period. It is recommended that this value be populated by referring to the Rehabilitation Services Worksheet available on the Support Page.

This is a component of Total Procedures.

**Pediatric Visits**

Total separate pediatric patient encounters performed and/or supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

This is a subset of Patient Visits.

**Pre and Post Activity Time Units**

The number of 15-minute units a therapy professional spends preparing for a treatment/procedure and any post treatment/procedure time spent charting and report completion. This does not include face-to-face time with the patient. It is the sum of Pre and Post Activity Time Units recorded in Column 14 on the Rehabilitation Services Worksheet available on the Support Page.
**Service Units**

The number of 15-minute units necessary for the therapy professional to complete the service/treatment/procedure (face to face time with the patient). It is the result of column 6 Total Department-Specific BTUs divided by 15. Refer to the Rehabilitation Services Worksheet available on the Support Page for assistance in reporting this element.

**Total Evaluations**

Total evaluations performed by the department staff. The sum of the number of evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Procedures.

**Total Procedures**

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

**Speech Language Pathology: Inpatient and Outpatient Department Hour Elements**

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Paid Hours: Physician Provider**

Total hours paid by physicians/providers on the department’s payroll who provide clinical services. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who are billed by the facility on a CMS 1500 Form. Include only physicians/providers on the facility payroll who spend 80% or more of their time in clinical or patient care activities. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.
**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Occupational Therapist**

Total hours worked by licensed occupational therapists.

This is a component of Worked Hours: Therapist.

**Worked Hours: Other Patient Care Provider**

Total hours worked by other patient care providers (e.g. rehab/therapy technician or aide, nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care department personnel.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.
This is a subset of Worked Hours: Staff.

**Worked Hours: Speech-Language Pathologists (non-MD)**

Total hours worked by licensed speech and/or language pathologists (non MD).

This is a component of Worked Hours: Therapist.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Therapist**

Total hours worked by licensed therapists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Therapy Assistant**

Total hours worked by certified therapy assistants.

This is a subset of Worked Hours: Staff.

**Speech Language Pathology: Inpatient and Outpatient Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.
Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and callback time; exclude expense for on call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

Speech Language Pathology: Inpatient and Outpatient Mandatory Elements

The following data elements are mandatory for this department:

- APC Relative Weight
• Days of Operation per Week
• Hours of Operation per Week
• Inpatient Procedures
• Labor Expense
• Labor Expense: Physician Provider
• Medical Supply Expense
• Other Direct Operating Expense
• Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Physician Provider Professional Fee Expense
• Total Procedures
• Worked Hours: Physician Provider
• Worked Hours: Staff
• Worked Hours: Therapist

Speech Language Pathology: Inpatient and Outpatient Normalizations

Include the hours costs and volumes (where applicable) associated with:

• Personnel performing the functions of the department’s day to day managerial operations (Rehabilitation)

Exclude the hours costs and volumes (where applicable) associated with the

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program (Rehabilitation Services)

• Case Management (manages patient care while the patient is undergoing treatment)

• Insurance verification - initial time spent obtaining name and identification and pre-admission certification during the admission process
- Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

- Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

- Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture

- Patient reception, e.g., greeting, checking in of patients, answering phone calls (Rehabilitation)

- Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Rehabilitation)

- PPS (Prospective Payment System) Coordinator

- Rehab Services Patient Scheduling

- Repair and Maintenance of Clinical Equipment/Rooms

- Social Workers

- Transport of patients not requiring clinical escort

**04862, Audiology**

This department provides evaluation and therapy to inpatients and/or outpatients with hearing dysfunction.

**Audiology Mapping Guidelines**

If your actual cost center's patient population is less than 80% audiology services for inpatients and/or outpatients, this department may not be an appropriate choice. Other options might include 04860 Communication Disorders department, 04861 Speech Language Pathology: Inpatient & Outpatient, and/or G4800 Other Rehabilitation Therapies Services.

**Audiology Workload Volumes**

**APC Relative Weight**

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.
Baseline Billed Time Units (BTUs)
Baseline Billed Time Units (BTUs) represent billable workload which is routinely performed in rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet that can be accessed in the Support Tab.

Case Mix Group (CMG) Index
The average Case Mix Group relative weight, based on the most recently published CMS values, for all inpatients admitted to the Inpatient Rehabilitation Unit (IRF) during the reporting period. This value may be obtained through the data calculated by UDSmr or a similar vendor.

Note: This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).

Days of Operation per Week
Total number of days the department is open for operation during the week.

The maximum number that can be reported is 7.

Department Specific Billed Time Units (BTUs)
Department Specific Total Billed Time Units (BTUs) represent all billable workload performed by the department staff. These Inpatient Department Specific BTUs may include billable items for which the department charges but which are not itemized on the Rehabilitation Services Workload Computation Worksheet available in the Support Tab.

This is a subset of Total Department Specific BTUs.

Inpatient Dept Specific Evaluation Billed Time Units (BTUs)

Billed time units (BTUs) for evaluations performed by department staff in support of facility inpatients. The value is the sum of the inpatient evaluation billed time units (BTUs) associated with the evaluation CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Department Specific Evaluation Billed Timed Units (BTUs).

Inpatient Evaluations

Total evaluations performed by the department staff in support of facility inpatients. The sum of the number of inpatient evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Evaluations.

Inpatient Procedures

Count all procedures performed on inpatients by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, as well as Procedure Counting here in the DRM for more information.

This is a subset of Total Procedures.

Inpatient Visits

Total patient encounters performed in support of facility inpatients.
This is a subset of Patient Visits.

**Length of Stay (LOS) Efficiency**

The aggregate Functional Independence Measurement instrument (FIM) point gain by all patients on acute rehabilitation unit divided by the total patient days on the unit. This value should correspond to the reporting quarter and may be obtained through the data calculated by UDSmr or a similar vendor.

*Note:* This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).

**Missed Appointments**

The number of missed patient appointments which occurred as a result of a patient, staff member(s) including a physician, provider, and/or specialist, equipment, room, and/or other resource that is unavailable, for any reason, at the scheduled time for a specific patient service.

This is a subset of Patient Appointments Scheduled.

**Patient Appointments Scheduled**

Total number of patient appointments scheduled for the reporting period. An appointment is defined as a distinct block of scheduled time for a specific patient service, which includes visits, procedures, treatments, consultations, education, and/or tests.

**Patient No Shows**

The total number of patients who did not appear, for any reason, for a scheduled appointment including cancellation, non appearance or reschedule less than 24 hours prior to the appointment during the reporting period.

This is a subset of Missed Appointments.

**Patient Visits**

Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

**Pediatric Baseline Billed Time Units (BTUs)**

Baseline Billed Time Units (BTUs): Pediatric represent billable workload which was performed on pediatric patients by the rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet available on the Support Tab.
This is a component of Baseline Billed Time Units (BTUs).

**Pediatric Evaluations**

Total evaluations performed on pediatric patients by the department staff during the reporting period. The sum of the number of evaluations performed on pediatric patients associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Evaluations and Total Procedures.

**Pediatric Procedures**

Total count all procedures (including evaluations) performed on pediatric patients by the department for the reporting period. It is recommended that this value be populated by referring to the Rehabilitation Services Worksheet available on the Support Page.

This is a component of Total Procedures.

**Pediatric Visits**

Total separate pediatric patient encounters performed and/or supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

This is a subset of Patient Visits.

**Pre and Post Activity Time Units**

The number of 15-minute units a therapy professional spends preparing for a treatment/procedure and any post treatment/procedure time spent charting and report completion. This does not include face-to-face time with the patient. It is the sum of Pre and Post Activity Time Units recorded in Column 14 on the Rehabilitation Services Worksheet available on the Support Page.

**Service Units**

The number of 15-minute units necessary for the therapy professional to complete the service/treatment/procedure (face to face time with the patient). It is the result of column 6 Total Department-Specific BTUs divided by 15. Refer to the Rehabilitation Services Worksheet available on the Support Page for assistance in reporting this element.
Total Evaluations

Total evaluations performed by the department staff. The sum of the number of evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Procedures.

Total Procedures

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

Audiology Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider

Total hours paid by physicians/providers on the department's payroll who provide clinical services. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who are billed by the facility on a CMS 1500 Form. Include only physicians/providers on the facility payroll who spend 80% or more of their time in clinical or patient care activities. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.
Worked Hours: Other Patient Care Provider

Total hours worked by other patient care providers (e.g. rehab/therapy technician or aide, nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care department personnel.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Physician Provider

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Worked Hours: Therapist

Total hours worked by licensed therapists.

This is a subset of Worked Hours: Staff.
**Worked Hours: Therapy Assistant**

Total hours worked by certified therapy assistants.

This is a subset of Worked Hours: Staff.

**Audiology Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.
**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and callback time; exclude expense for on call time.

This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

**Audiology Mandatory Elements**

The following data elements are mandatory for this department:

- APC Relative Weight
- Days of Operation per Week
- Hours of Operation per Week
- Inpatient Procedures
- Labor Expense
- Labor Expense: Physician Provider
- Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Physician Provider Professional Fee Expense
• Total Procedures
• Worked Hours: Physician Provider
• Worked Hours: Staff
• Worked Hours: Therapist

Audiology Normalizations

Include the hours costs and volumes (where applicable) associated with:

• Personnel performing the functions of the department’s day to day managerial operations (Rehabilitation)

Exclude the hours costs and volumes (where applicable) associated with the

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program (Rehabilitation Services)
• Case Management (manages patient care while the patient is undergoing treatment)
• Insurance verification - initial time spent obtaining name and identification and pre-admission certification during the admission process
• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
• Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture
• Patient reception, e.g., greeting, checking in of patients, answering phone calls (Rehabilitation)
• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Rehabilitation)
• PPS (Prospective Payment System) Coordinator
• Rehab Services Patient Scheduling
• Repair and Maintenance of Clinical Equipment/Rooms
• Social Workers
• Transport of patients not requiring clinical escort

04863, Speech Language Pathology: Inpatient

This department provides evaluation and therapy to inpatients of all ages with speech, language, social communication, cognitive-communication, and/or swallowing disorders.

Speech Language Pathology: Inpatient Mapping Guidelines

If your actual cost center’s patient population is less than 95% speech language pathology services for inpatients only, this department may not be an appropriate choice. Other options might include 04861 Speech Language Pathology: Inpatient & Outpatient, 04860 Speech Language Pathology and Audiology Combined department, 04862 Audiology, and/or G4800 Other Rehabilitation Therapies Services.

Speech Language Pathology: Inpatient Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare & Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs) represent billable workload which is routinely performed in rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet that can be accessed in the support tab.

Case Mix Group (CMG) Index

The average Case Mix Group relative weight, based on the most recently published CMS values, for all inpatients admitted to the Inpatient Rehabilitation Unit (IRF) during the reporting period. This value may be obtained through the data calculated by UDSmr or a similar vendor. NOTE: This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).
Days of Operation per Week

Total number of days the department is open for operation during the week.

The maximum number that can be reported is 7.

Department Specific Billed Time Units (BTUs)

Department Specific Total Billed Time Units (BTUs) represent all billable workload performed by the department staff. These may include billable time units for which the department charges and captures on the worksheet, including any unlisted procedures. The Department Specific Billed Time Units (BTUs) count is the sum of all Department Specific Billed Time Units (BTUs) recorded on the Rehabilitation Services Worksheet available in the support tab.

Department Specific Evaluation Billed Timed Units (BTUs)

Represents the sum of the evaluation billed time units (BTUs) performed by the department staff as calculated on the Rehabilitation Services Worksheet. The sum of Department Specific Evaluation BTUs associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Department Specific BTUs.

Hours of Operation per Week

Total number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

Length of Stay (LOS) Efficiency

The aggregate Functional Independence Measurement instrument (FIM) point gain by all patients on acute rehabilitation unit divided by the total patient days on the unit. This value should correspond to the reporting quarter and may be obtained through the data calculated by UDSmr or a similar vendor. NOTE: This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).

Missed Appointments

The number of missed patient appointments which occurred as a result of a patient, staff member(s) including a physician, provider, and/or specialist, equipment, room, and/or other resource that is unavailable, for any reason, at the scheduled time for a specific patient service.

This is a subset of Patient Appointments Scheduled.
Patient Appointments Scheduled

Total number of patient appointments scheduled for the reporting period. An appointment is defined as a distinct block of scheduled time for a specific patient service, which includes visits, procedures, treatments, consultations, education, and/or tests.

Patient No Shows

The total number of patients who did not appear, for any reason, for a scheduled appointment including cancellation, non appearance or reschedule less than 24 hours prior to the appointment during the reporting period.

This is a subset of Missed Appointments.

Patient Visits

Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

Pediatric Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs): Pediatric represent billable workload which was performed on pediatric patients by the rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet available on the Support Tab.

This is a component of Baseline Billed Time Units (BTUs).

Pediatric Evaluations

Total evaluations performed on pediatric patients by the department staff during the reporting period. The sum of the number of evaluations performed on pediatric patients associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Evaluations and Total Procedures.

Pediatric Procedures

Total count all procedures (including evaluations) performed on pediatric patients by the department for the reporting period. It is recommended that this value be populated by referring to the Rehabilitation Services Worksheet available on the Support Page.

This is a component of Total Procedures.
Pediatric Visits

Total separate pediatric patient encounters performed and/or supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

This is a subset of Patient Visits.

Pre and Post Activity Time Units

The number of 15-minute units a therapy professional spends preparing for a treatment/procedure and any post treatment/procedure time spent charting and report completion. This does not include face-to-face time with the patient. It is the sum of Pre and Post Activity Time Units recorded in Column 14 on the Rehabilitation Services Worksheet available on the Support Page.

Service Units

The number of 15-minute units necessary for the therapy professional to complete the service/treatment/procedure (face to face time with the patient). It is the result of column 6 Total Department-Specific BTUs divided by 15. Refer to the Rehabilitation Services Worksheet available on the Support Page for assistance in reporting this element.

Total Evaluations

Total evaluations performed by the department staff. The sum of the number of evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Procedures.

Total Procedures

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, as well as the Procedure Counting section in the DRM for more information.

Speech Language Pathology: Inpatient Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.
Paid Hours: Physician Provider

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time-off hours. Exclude on-call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Occupational Therapist

Total hours worked by licensed occupational therapists.

This is a component of Worked Hours: Therapist.

Worked Hours: Other Patient Care Provider

Total hours worked by other patient care providers (e.g. rehab/therapy technician or aide, nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care department personnel.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: Speech-Language Pathologists (non-MD)**

Total hours worked by licensed speech and/or language pathologists (non MD).

This is a component of Worked Hours: Therapist.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Therapist**

Total hours worked by licensed therapists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Therapy Assistant**

Total hours worked by certified therapy assistants.

This is a subset of Worked Hours: Staff.
Speech Language Pathology: Inpatient Expense Elements

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total expense for the department non-medical operating supplies, e.g., office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense that includes professional fees, department supplies, equipment rental fees, operating leases for equipment, dues, travel and small (non-capitalized) equipment. Exclude depreciation, building rent expense, capitalized lease costs.
Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense

Speech Language Pathology: Inpatient Mandatory Elements

The following data elements are mandatory for this department:

- APC Relative Weight
- Days of Operation per Week
- Hours of Operation per Week
- Labor Expense
- Labor Expense: Physician Provider
- Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Procedures: Inpatient
• Total Procedures
• Worked Hours: Physician Provider
• Worked Hours: Staff
• Worked Hours: Therapist

Speech Language Pathology: Inpatient Normalizations

Include the hours costs and volumes (where applicable) associated with:

• Personnel performing the functions of the department’s day to day managerial operations (Rehabilitation)

Exclude the hours costs and volumes (where applicable) associated with the

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program (Rehabilitation Services)
• Case Management (manages patient care while the patient is undergoing treatment)
• Insurance verification - initial time spent obtaining name and identification and pre-admission certification during the admission process
• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

• Repair and Maintenance of Clinical Equipment/Rooms
• Social Workers
• Transport of patients not requiring clinical escort

04864, Speech Language Pathology: Outpatient

This department provides evaluation and therapy to outpatients of all ages with speech, language, social communication, cognitive-communication, and/or swallowing disorders.

Speech Language Pathology: Outpatient Mapping Guidelines

If your actual cost center’s patient population is less than 95% speech language pathology services for outpatients only, this department may not be an appropriate choice. Other options might include 04861 Speech Language Pathology: Inpatient & Outpatient, 04860 Speech Language Pathology and Audiology Combined department, 04862 Audiology, and/or G4800 Other Rehabilitation Therapies Services.

Speech Language Pathology: Outpatient Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare & Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time-off hours. Exclude on-call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Occupational Therapist

Total hours worked by licensed occupational therapists.

This is a component of Worked Hours: Therapist.

Worked Hours: Other Patient Care Provider

Total hours worked by other patient care providers (e.g. rehab/therapy technician or aide, nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care department personnel.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee’s normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: Speech-Language Pathologists (non-MD)**

Total hours worked by licensed speech and/or language pathologists (non MD).

This is a component of Worked Hours: Therapist.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Therapist**

Total hours worked by licensed therapists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Therapy Assistant**

Total hours worked by certified therapy assistants.

This is a subset of Worked Hours: Staff.
Speech Language Pathology: Outpatient Expense Elements

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total expense for the department non-medical operating supplies, e.g., office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense that includes professional fees, department supplies, equipment rental fees, operating leases for equipment, dues, travel and small (non-capitalized) equipment. Exclude depreciation, building rent expense, capitalized lease costs.
Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

Speech Language Pathology: Outpatient Mandatory Elements

The following data elements are mandatory for this department:

- APC Relative Weight
- Days of Operation per Week
- Hours of Operation per Week
- Labor Expense
- Labor Expense: Physician Provider
- Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Total Procedures
• Worked Hours: Physician Provider

• Worked Hours: Staff

• Worked Hours: Therapist

**Speech Language Pathology: Outpatient Normalizations**

Include the hours costs and volumes (where applicable) associated with:

• Personnel performing the functions of the department’s day to day managerial operations (Rehabilitation)

Exclude the hours costs and volumes (where applicable) associated with the:

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program (Rehabilitation Services)

• Case Management (manages patient care while the patient is undergoing treatment)

• Insurance verification - initial time spent obtaining name and identification and pre-admission certification during the admission process

• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture

• Patient reception, e.g., greeting, checking in of patients, answering phone calls (Rehabilitation)

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Rehabilitation)

• PPS (Prospective Payment System) Coordinator

• Rehab Services Patient Scheduling

• Repair and Maintenance of Clinical Equipment/Rooms

• Social Workers

• Transport of patients not requiring clinical escort
**04870, PT/OT/SLP Combined: Inpatient and Outpatient**

This department provides inpatient and outpatient rehabilitation therapy for all modalities, including but not limited to, physical therapy, occupational therapy, and speech language pathology.

**PT/OT/SLP Combined: Inpatient and Outpatient Mapping Guidelines**

If your actual cost center's patient population is less than 80% inpatient and/or outpatient rehabilitation therapies for physical, occupational and speech modalities combined, this department may not be an appropriate choice. Other options might include the G4800, Other Rehabilitation Therapies Services department.

**PT/OT/SLP Combined: Inpatient and Outpatient Workload Volumes**

**APC Relative Weight**

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

**Baseline Billed Time Units (BTUs)**

Baseline Billed Time Units (BTUs) represent billable workload which is routinely performed in rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet that can be accessed in the Support Tab.

**Case Mix Group (CMG) Index**

The average Case Mix Group relative weight, based on the most recently published CMS values, for all inpatients admitted to the Inpatient Rehabilitation Unit (IRF) during the reporting period. This value may be obtained through the data calculated by UDSmr or a similar vendor.

**Note:** This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).

**Days of Operation per Week**

Total number of days the department is open for operation during the week.

The maximum number that can be reported is 7.
Department Specific Billed Time Units (BTUs)

Department Specific Total Billed Time Units (BTUs) represent all billable workload performed by the department staff. These may include billable time units for which the department charges and captures on the worksheet, including any unlisted procedures. The Department Specific Billed Time Units (BTUs) count is the sum of all Department Specific Billed Time Units (BTUs) recorded on the Rehabilitation Services Worksheet available in the support tab.

Department Specific Evaluation Billed Timed Units (BTUs)

Represents the sum of the evaluation billed time units (BTUs) performed by the department staff as calculated on the Rehabilitation Services Worksheet. The sum of Department Specific Evaluation BTUs associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Department Specific BTUs.

Hours of Operation per Week

The average number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

Inpatient Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs): Inpatients is the sum of all billable workload performed by the department staff in support of facility inpatients. Baseline BTUs represent the standard time value for workload performed in the department as recorded on the Rehabilitation Services Workload Computation Worksheet available in the Support Tab.

This is a subset of Total Baseline BTUs.

Inpatient Department Specific Billed Time Units (BTUs)

Department Specific Billed Time Units (BTUs): Inpatient is the sum of all billable workload performed by the department staff in support of facility inpatients. These Inpatient Department Specific BTUs may include billable items for which the department charges but which are not itemized on the Rehabilitation Services Workload Computation Worksheet available in the Support Tab.

This is a subset of Total Department Specific BTUs.

Inpatient Dept Specific Evaluation Billed Time Units (BTUs)

Billed time units (BTUs) for evaluations performed by department staff in support of facility inpatients. The value is the sum of the inpatient evaluation billed time units (BTUs) associated with the evaluation CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.
This is a subset of Department Specific Evaluation Billed Timed Units (BTUs).

Inpatient Evaluations
Total evaluations performed by the department staff in support of facility inpatients. The sum of the number of inpatient evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Evaluations.

Inpatient Procedures
Count all procedures performed on inpatients by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, as well as Procedure Counting here in the DRM for more information.

This is a subset of Total Procedures.

Inpatient Visits
Total patient encounters performed in support of facility inpatients.

This is a subset of Patient Visits.

Length of Stay (LOS) Efficiency
The aggregate Functional Independence Measurement instrument (FIM) point gain by all patients on acute rehabilitation unit divided by the total patient days on the unit. This value should correspond to the reporting quarter and may be obtained through the data calculated by UDSmr or a similar vendor.

Note: This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).

Missed Appointments
The number of missed patient appointments which occurred as a result of a patient, staff member(s) including a physician, provider, and/or specialist, equipment, room, and/or other resource that is unavailable, for any reason, at the scheduled time for a specific patient service.

This is a subset of Patient Appointments Scheduled.

Patient Appointments Scheduled
Total number of patient appointments scheduled for the reporting period. An appointment is defined as a distinct block of scheduled time for a specific patient service, which includes visits, procedures, treatments, consultations, education, and/or tests.
Patient No Shows

The total number of patients who did not appear, for any reason, for a scheduled appointment including cancellation, non appearance or reschedule less than 24 hours prior to the appointment during the reporting period.

This is a subset of Missed Appointments.

Patient Visits

Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

Pediatric Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs): Pediatric represent billable workload which was performed on pediatric patients by the rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet available on the Support Tab.

This is a component of Baseline Billed Time Units (BTUs).

Pediatric Evaluations

Total evaluations performed on pediatric patients by the department staff during the reporting period. The sum of the number of evaluations performed on pediatric patients associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Evaluations and Total Procedures.

Pediatric Procedures

Total count all procedures (including evaluations) performed on pediatric patients by the department for the reporting period. It is recommended that this value be populated by referring to the Rehabilitation Services Worksheet available on the Support Page.

This is a component of Total Procedures.
Pediatric Visits

Total separate pediatric patient encounters performed and/or supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

This is a subset of Patient Visits.

Pre and Post Activity Time Units

The number of 15-minute units a therapy professional spends preparing for a treatment/procedure and any post treatment/procedure time spent charting and report completion. This does not include face-to-face time with the patient. It is the sum of Pre and Post Activity Time Units recorded in Column 14 on the Rehabilitation Services Worksheet available on the Support Page.

Service Units

The number of 15-minute units necessary for the therapy professional to complete the service/treatment/procedure (face to face time with the patient). It is the result of column 6 Total Department-Specific BTUs divided by 15. Refer to the Rehabilitation Services Worksheet available on the Support Page for assistance in reporting this element.

Total Evaluations

Total evaluations performed by the department staff. The sum of the number of evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Procedures.

Total Procedures

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

PT/OT/SLP Combined: Inpatient and Outpatient Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.
Paid Hours: Physician Provider

Total hours paid by physicians/providers on the department's payroll who provide clinical services. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who are billed by the facility on a CMS 1500 Form. Include only physicians/providers on the facility payroll who spend 80% or more of their time in clinical or patient care activities. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Occupational Therapist

Total hours worked by licensed occupational therapists.

This is a component of Worked Hours: Therapist.

Worked Hours: OT Assistant

Total hours worked by licensed occupational therapy assistants.

This is a component of Worked Hours: Therapy Assistant.

Worked Hours: Other Patient Care Provider

Total hours worked by other patient care providers (e.g. rehab/therapy technician or aide, nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care department personnel.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.
This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non-physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Physical Therapist**

Total hours worked by licensed physical therapists.

This is a component of Worked Hours: Therapist.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: PT Assistant**

Total hours worked by licensed physical therapy assistants.

This is a component of Worked Hours: Therapy Assistant.

**Worked Hours: Recreation Therapist**

Total hours worked by licensed recreational therapists.

This is a component of Worked Hours: Therapist.

**Worked Hours: Speech-Language Pathologists (non-MD)**

Total hours worked by licensed speech and/or language pathologists (non MD).
This is a component of Worked Hours: Therapist.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Therapist**

Total hours worked by licensed therapists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Therapy Assistant**

Total hours worked by certified therapy assistants.

This is a subset of Worked Hours: Staff.

**PT/OT/SLP Combined: Inpatient and Outpatient Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.
This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and callback time; exclude expense for on call time.

This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

**PT/OT/SLP Combined: Inpatient and Outpatient Mandatory Elements**

The following data elements are mandatory for this department:

- APC Relative Weight
- Days of Operation per Week
- Hours of Operation per Week
- Inpatient Procedures
• Labor Expense
• Labor Expense: Physician Provider
• Medical Supply Expense
• Other Direct Operating Expense
• Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Physician Provider Professional Fee Expense
• Total Procedures
• Worked Hours: Physician Provider
• Worked Hours: Staff
• Worked Hours: Therapist

**PT/OT/SLP Combined: Inpatient and Outpatient Normalizations**

Include the hours costs and volumes (where applicable) associated with:

• Personnel performing the functions of the department’s day to day managerial operations (Rehabilitation)

Exclude the hours costs and volumes (where applicable) associated with the

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program (Rehabilitation Services)

• Case Management (manages patient care while the patient is undergoing treatment)

• Insurance verification - initial time spent obtaining name and identification and pre-admission certification during the admission process

• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
- Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture
- Patient reception, e.g., greeting, checking in of patients, answering phone calls (Rehabilitation)
- Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Rehabilitation)
- PPS (Prospective Payment System) Coordinator
- Rehab Services Patient Scheduling
- Repair and Maintenance of Clinical Equipment/Rooms
- Social Workers
- Transport of patients not requiring clinical escort

**04871, PT/OT/SLP Combined: Inpatient**

This department provides inpatient rehabilitation therapy for all modalities, including but not limited to, physical therapy, occupational therapy, and speech language pathology.

**PT/OT/SLP Combined: Inpatient Mapping Guidelines**

If your actual cost center’s patient population is less than 95% inpatient rehabilitation therapies for physical, occupational and speech modalities combined, this department may not be an appropriate choice. Other options might include the G4800, Other Rehabilitation Therapies Services department.

**PT/OT/SLP Combined: Inpatient Workload Volumes**

The following data elements are mandatory for this department:

- Baseline Billed Time Units (BTUs)
- Department Specific Billed Time Units (BTUs)
- Labor Expense
- Labor Expense: Physician Provider
- Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Total Procedures
- Worked Hours: Physician Provider
- Worked Hours: Staff
- Worked Hours: Therapist

**APC Relative Weight**

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

**Baseline Billed Time Units (BTUs)**

Baseline Billed Time Units (BTUs) represent billable workload which is routinely performed in rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet that can be accessed in the Support Tab.

**Case Mix Group (CMG) Index**

The average Case Mix Group relative weight, based on the most recently published CMS values, for all inpatients admitted to the Inpatient Rehabilitation Unit (IRF) during the reporting period. This value may be obtained through the data calculated by UDSmr or a similar vendor.

**Note:** This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).

**Days of Operation per Week**

Total number of days the department is open for operation during the week.

The maximum number that can be reported is 7.
Department Specific Billed Time Units (BTUs)

Department Specific Total Billed Time Units (BTUs) represent all billable workload performed by the department staff. These may include billable time units for which the department charges and captures on the worksheet, including any unlisted procedures. The Department Specific Billed Time Units (BTUs) count is the sum of all Department Specific Billed Time Units (BTUs) recorded on the Rehabilitation Services Worksheet available in the support tab.

Department Specific Evaluation Billed Timed Units (BTUs)

Represents the sum of the evaluation billed time units (BTUs) performed by the department staff as calculated on the Rehabilitation Services Worksheet. The sum of Department Specific Evaluation BTUs associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Department Specific BTUs.

Hours of Operation per Week

The average number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

Length of Stay (LOS) Efficiency

The aggregate Functional Independence Measurement instrument (FIM) point gain by all patients on acute rehabilitation unit divided by the total patient days on the unit. This value should correspond to the reporting quarter and may be obtained through the data calculated by UDSmr or a similar vendor.

Note: This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).

Missed Appointments

The number of missed patient appointments which occurred as a result of a patient, staff member(s) including a physician, provider, and/or specialist, equipment, room, and/or other resource that is unavailable, for any reason, at the scheduled time for a specific patient service.

This is a subset of Patient Appointments Scheduled.

Patient Appointments Scheduled

Total number of patient appointments scheduled for the reporting period. An appointment is defined as a distinct block of scheduled time for a specific patient service, which includes visits, procedures, treatments, consultations, education, and/or tests.
Patient No Shows

The total number of patients who did not appear, for any reason, for a scheduled appointment including cancellation, non appearance or reschedule less than 24 hours prior to the appointment during the reporting period.

This is a subset of Missed Appointments.

Patient Visits

Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

Pediatric Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs): Pediatric represent billable workload which was performed on pediatric patients by the rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet available on the Support Tab.

This is a component of Baseline Billed Time Units (BTUs).

Pediatric Evaluations

Total evaluations performed on pediatric patients by the department staff during the reporting period. The sum of the number of evaluations performed on pediatric patients associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Evaluations and Total Procedures.

Pediatric Procedures

Total count all procedures (including evaluations) performed on pediatric patients by the department for the reporting period. It is recommended that this value be populated by referring to the Rehabilitation Services Worksheet available on the Support Page.

This is a component of Total Procedures.
Pediatric Visits

Total separate pediatric patient encounters performed and/or supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

This is a subset of Patient Visits.

Pre and Post Activity Time Units

The number of 15-minute units a therapy professional spends preparing for a treatment/procedure and any post treatment/procedure time spent charting and report completion. This does not include face-to-face time with the patient. It is the sum of Pre and Post Activity Time Units recorded in Column 14 on the Rehabilitation Services Worksheet available on the Support Page.

Service Units

The number of 15-minute units necessary for the therapy professional to complete the service/treatment/procedure (face to face time with the patient). It is the result of column 6 Total Department-Specific BTUs divided by 15. Refer to the Rehabilitation Services Worksheet available on the Support Page for assistance in reporting this element.

Total Evaluations

Total evaluations performed by the department staff. The sum of the number of evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Procedures.

Total Procedures

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

PT/OT/SLP Combined: Inpatient Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.
Paid Hours: Physician Provider

Total hours paid by physicians/providers on the department's payroll who provide clinical services. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who are billed by the facility on a CMS 1500 Form. Include only physicians/providers on the facility payroll who spend 80% or more of their time in clinical or patient care activities. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Occupational Therapist

Total hours worked by licensed occupational therapists.

This is a component of Worked Hours: Therapist.

Worked Hours: OT Assistant

Total hours worked by licensed occupational therapy assistants.

This is a component of Worked Hours: Therapy Assistant.

Worked Hours: Other Patient Care Provider

Total hours worked by other patient care providers (e.g. rehab/therapy technician or aide, nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care department personnel.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.
This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Physical Therapist**

Total hours worked by licensed physical therapists.

This is a component of Worked Hours: Therapist.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: PT Assistant**

Total hours worked by licensed physical therapy assistants.

This is a component of Worked Hours: Therapy Assistant.

**Worked Hours: Recreation Therapist**

Total hours worked by licensed recreational therapists.

This is a component of Worked Hours: Therapist.

**Worked Hours: Speech-Language Pathologists (non-MD)**

Total hours worked by licensed speech and/or language pathologists (non MD).
This is a component of Worked Hours: Therapist.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Therapist**

Total hours worked by licensed therapists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Therapy Assistant**

Total hours worked by certified therapy assistants.

This is a subset of Worked Hours: Staff.

**PT/OT/SLP Combined: Inpatient Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.
This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and callback time; exclude expense for on call time.

This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

**PT/OT/SLP Combined: Inpatient Mandatory Elements**

The following data elements are mandatory for this department:

- APC Relative Weight
- Days of Operation per Week
- Hours of Operation per Week
- Labor Expense
• Labor Expense: Physician Provider
• Medical Supply Expense
• Other Direct Operating Expense
• Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Physician Provider Professional Fee Expense
• Total Procedures
• Worked Hours: Physician Provider
• Worked Hours: Staff
• Worked Hours: Therapist

**PT/OT/SLP Combined: Inpatient Normalizations**

Include the hours costs and volumes (where applicable) associated with:

• Personnel performing the functions of the department's day to day managerial operations (Rehabilitation)

Exclude the hours costs and volumes (where applicable) associated with the

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program (Rehabilitation Services)

• Case Management (manages patient care while the patient is undergoing treatment)

• Insurance verification - initial time spent obtaining name and identification and pre-admission certification during the admission process

• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
• Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture

• Patient reception, e.g., greeting, checking in of patients, answering phone calls (Rehabilitation)

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Rehabilitation)

• PPS (Prospective Payment System) Coordinator

• Rehab Services Patient Scheduling

• Repair and Maintenance of Clinical Equipment/Rooms

• Social Workers

• Transport of patients not requiring clinical escort

04872, PT/OT/SLP Combined: Outpatient

This department provides outpatient rehabilitation therapy for all modalities, including but not limited to, physical therapy, occupational therapy, and speech language pathology.

PT/OT/SLP Combined: Outpatient Mapping Guidelines

If your actual cost center's patient population is less than 95% outpatient rehabilitation therapies for physical, occupational and speech modalities combined, this department may not be an appropriate choice. Other options might include the G4800, Other Rehabilitation Therapies Services department.

PT/OT/SLP Combined: Outpatient Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs) represent billable workload which is routinely performed in rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet that can be accessed in the Support Tab.
Days of Operation per Week

Total number of days the department is open for operation during the week.

The maximum number that can be reported is 7.

Department Specific Billed Time Units (BTUs)

Department Specific Total Billed Time Units (BTUs) represent all billable workload performed by the department staff. These may include billable time units for which the department charges and captures on the worksheet, including any unlisted procedures. The Department Specific Billed Time Units (BTUs) count is the sum of all Department Specific Billed Time Units (BTUs) recorded on the Rehabilitation Services Worksheet available in the support tab.

Department Specific Evaluation Billed Timed Units (BTUs)

Represents the sum of the evaluation billed time units (BTUs) performed by the department staff as calculated on the Rehabilitation Services Worksheet. The sum of Department Specific Evaluation BTUs associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Department Specific BTUs.

Hours of Operation per Week

The average number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

Missed Appointments

The number of missed patient appointments which occurred as a result of a patient, staff member(s) including a physician, provider, and/or specialist, equipment, room, and/or other resource that is unavailable, for any reason, at the scheduled time for a specific patient service.

This is a subset of Patient Appointments Scheduled.

Patient Appointments Scheduled

Total number of patient appointments scheduled for the reporting period. An appointment is defined as a distinct block of scheduled time for a specific patient service, which includes visits, procedures, treatments, consultations, education, and/or tests.
**Patient No Shows**

The total number of patients who did not appear, for any reason, for a scheduled appointment including cancellation, non appearance or reschedule less than 24 hours prior to the appointment during the reporting period.

This is a subset of Missed Appointments.

**Patient Visits**

Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

**Pediatric Baseline Billed Time Units (BTUs)**

Baseline Billed Time Units (BTUs): Pediatric represent billable workload which was performed on pediatric patients by the rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet available on the Support Tab.

This is a component of Baseline Billed Time Units (BTUs).

**Pediatric Evaluations**

Total evaluations performed on pediatric patients by the department staff during the reporting period. The sum of the number of evaluations performed on pediatric patients associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Evaluations and Total Procedures.

**Pediatric Procedures**

Total count all procedures (including evaluations) performed on pediatric patients by the department for the reporting period. It is recommended that this value be populated by referring to the Rehabilitation Services Worksheet available on the Support Page.

This is a component of Total Procedures.
**Pediatric Visits**

Total separate pediatric patient encounters performed and/or supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

This is a subset of Patient Visits.

**Pre and Post Activity Time Units**

The number of 15-minute units a therapy professional spends preparing for a treatment/procedure and any post treatment/procedure time spent charting and report completion. This does not include face-to-face time with the patient. It is the sum of Pre and Post Activity Time Units recorded in Column 14 on the Rehabilitation Services Worksheet available on the Support Page.

**Service Units**

The number of 15-minute units necessary for the therapy professional to complete the service/treatment/procedure (face to face time with the patient). It is the result of column 6 Total Department-Specific BTUs divided by 15. Refer to the Rehabilitation Services Worksheet available on the Support Page for assistance in reporting this element.

**Total Evaluations**

Total evaluations performed by the department staff. The sum of the number of evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Procedures.

**Total Procedures**

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

**PT/OT/SLP Combined: Outpatient Department Hour Elements**

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.
Paid Hours: Physician Provider
Total hours paid by physicians/providers on the department's payroll who provide clinical services. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who are billed by the facility on a CMS 1500 Form. Include only physicians/providers on the facility payroll who spend 80% or more of their time in clinical or patient care activities. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff
Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management
Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Occupational Therapist
Total hours worked by licensed occupational therapists.

This is a component of Worked Hours: Therapist.

Worked Hours: OT Assistant
Total hours worked by licensed occupational therapy assistants.

This is a component of Worked Hours: Therapy Assistant.

Worked Hours: Other Patient Care Provider
Total hours worked by other patient care providers (e.g. rehab/therapy technician or aide, nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care department personnel.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff
Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.
This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Physical Therapist

Total hours worked by licensed physical therapists.

This is a component of Worked Hours: Therapist.

Worked Hours: Physician Provider

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

Worked Hours: PT Assistant

Total hours worked by licensed physical therapy assistants.

This is a component of Worked Hours: Therapy Assistant.

Worked Hours: Recreation Therapist

Total hours worked by licensed recreational therapists.

This is a component of Worked Hours: Therapist.

Worked Hours: Speech-Language Pathologists (non-MD)

Total hours worked by licensed speech and/or language pathologists (non MD).
This is a component of Worked Hours: Therapist.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Therapist**

Total hours worked by licensed therapists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Therapy Assistant**

Total hours worked by certified therapy assistants.

This is a subset of Worked Hours: Staff.

**PT/OT/SLP Combined: Outpatient Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.
This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and callback time; exclude expense for on call time.

This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

**PT/OT/SLP Combined: Outpatient Mandatory Elements**

The following data elements are mandatory for this department:

- APC Relative Weight
- Days of Operation per Week
- Hours of Operation per Week
- Labor Expense
- Labor Expense: Physician Provider
- Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Total Procedures
- Worked Hours: Physician Provider
- Worked Hours: Staff
- Worked Hours: Therapist

**PT/OT/SLP Combined: Outpatient Normalizations**

Include the hours costs and volumes (where applicable) associated with:

- Personnel performing the functions of the department’s day to day managerial operations (Rehabilitation)

Exclude the hours costs and volumes (where applicable) associated with the

- Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program (Rehabilitation Services)
- Case Management (manages patient care while the patient is undergoing treatment)
- Insurance verification - initial time spent obtaining name and identification and pre-admission certification during the admission process
- Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
- Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
• Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture

• Patient reception, e.g., greeting, checking in of patients, answering phone calls (Rehabilitation)

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Rehabilitation)

• PPS (Prospective Payment System) Coordinator

• Rehab Services Patient Scheduling

• Repair and Maintenance of Clinical Equipment/Rrooms

• Social Workers

• Transport of patients not requiring clinical escort

04899, Rehabilitation Services Administration and Support

This department performs the overall administrative and general support tasks for the entire Rehabilitation Services series. These tasks and functions include but are not limited to, administration, clerical, reception, and scheduling.

Rehabilitation Services Administration and Support Mapping Guidelines

If your actual cost center(s) capture less than 80% of the administration and support activities and expenses for all of Rehabilitation therapies, this department may not be an appropriate choice. Other options might include the G4800, Other Rehabilitation Therapies Services department.

Rehabilitation Services Administration and Support Workload Volumes

APC Relative Weight Supported

The APC Relative Weight Supported is based on the weights published by The Centers for Medicare & Medicaid Services (CMS). Report relative weights for procedures supported by the department. This value is unable to be populated using the Key Volume Element Population data file. Therefore, use the sum of the APC weights for the departments utilized within this series. For additional assistance refer to the APC and Work RVU Workbook available on the Support Page.
Baseline Billed Time Units (BTUs) Supported

Total baseline billed time units (BTUs) performed by all rehabilitation services departments and supported by this department staff. The baseline billed time unit count is the sum of all Baseline Billed Time Units recorded in Column 9 of the Rehabilitation Services Worksheet which can be found on the Support Page of ActionOI.

Department Specific Billed Time Units (BTUs) Supported

Total Department Billed Time Units (BTUs) performed by all rehabilitation services departments and supported by this department staff. The Department Billed Time Unit count is the sum of all Department Billed Time Units recorded in Column 6 on the Rehabilitation Services Worksheet that can be found on the Support tab of ActionOI.

Inpatient Procedures Supported

Count all procedures supported performed on inpatients by the department for the reporting period. This value is unable to be populated using the Key Volume Element Population data file. Therefore, use the sum of the inpatient procedures for the departments utilized within this series. For additional assistance refer to the APC and Work RVU Workbook available on the Support Page.

This is a subset of Procedures Supported.

Missed Appointments

The number of missed patient appointments which occurred as a result of a patient, staff member(s) including a physician, provider, and/or specialist, equipment, room, and/or other resource that is unavailable, for any reason, at the scheduled time for a specific patient service.

This is a subset of Patient Appointments Scheduled.

Patient Appointments Scheduled

Total number of patient appointments scheduled for the reporting period. An appointment is defined as a distinct block of scheduled time for a specific patient service, which includes visits, procedures, treatments, consultations, education, and/or tests.

Patient No Shows

The total number of patients who did not appear, for any reason, for a scheduled appointment including cancellation, non appearance or reschedule less than 24 hours prior to the appointment during the reporting period.

This is a subset of Missed Appointments.
Patient Visits Supported

Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, dietitian, social worker) during the same visit the count should be recorded as one visit.

Procedures Supported

Count all procedures that are supported by the department for the reporting period. This value is unable to be populated using the Key Volume Element Population data file. Therefore, use the sum of the total procedures for the departments utilized within this series. For additional assistance refer to the APC and Work RVU Workbook available on the Support Page.

Service Units Supported

Total service units performed by all rehabilitation services departments and supported by this department staff. The service unit count is the sum of all Service Units recorded in Column 12 of the Rehabilitation Services Worksheet available on the Support Page.

Rehabilitation Services Administration and Support Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider

Total hours paid by physicians/providers on the department's payroll who provide clinical services. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who are billed by the facility on a CMS 1500 Form. Include only physicians/providers on the facility payroll who spend 80% or more of their time in clinical or patient care activities. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.
Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Patient Care Provider

Total hours worked by other patient care providers (e.g. rehab/therapy technician or aide, nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care department personnel.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Physician Provider

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.
**Worked Hours: Therapist**

Total hours worked by licensed therapists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Therapy Assistant**

Total hours worked by certified therapy assistants.

This is a subset of Worked Hours: Staff.

**Rehabilitation Services Administration and Support Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.
This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and callback time; exclude expense for on call time.

This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

**Rehabilitation Services Administration and Support Mandatory Elements**

The following data elements are mandatory for this department:

- APC Relative Weight
- APC Relative Weight Supported
- Inpatient Procedures Supported
- Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
• Paid Hours: Staff
• Physician Provider Professional Fee Expense
• Procedures Supported
• Worked Hours: Physician Provider
• Worked Hours: Staff

Rehabilitation Services Administration and Support Normalizations

Include the hours, costs and volumes (where applicable) associated with the

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program (Rehabilitation Services)
• Patient reception, e.g., greeting, checking in of patients, answering phone calls (Rehabilitation)
• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Rehabilitation)
• PPS (Prospective Payment System) Coordinator
• Rehab Services Patient Scheduling

Exclude the hours costs and volumes (where applicable) associated with the

• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
• Personnel performing the functions of the department’s day to day managerial operations (Rehabilitation)
• Repair and Maintenance of Clinical Equipment/Rooms

F4800, Rehabilitation Therapies Functional Rollup

This department includes all rehabilitation services administration, physical medicine (such as physical therapy, occupational therapy, and speech language pathology), and clinical and non-clinical support functions dedicated to patient rehabilitation regardless of reporting relationship.
Rehabilitation Therapies Functional Rollup Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs) represent billable workload which is routinely performed in rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet that can be accessed in the Support Tab.

Case Mix Group (CMG) Index

The average Case Mix Group relative weight, based on the most recently published CMS values, for all inpatients admitted to the Inpatient Rehabilitation Unit (IRF) during the reporting period. This value may be obtained through the data calculated by UDSmr or a similar vendor.

Note: This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).

Department Specific Billed Time Units (BTUs)

Department Specific Total Billed Time Units (BTUs) represent all billable workload performed by the department staff. These may include billable time units for which the department charges and captures on the worksheet, including any unlisted procedures. The Department Specific Billed Time Units (BTUs) count is the sum of all Department Specific Billed Time Units (BTUs) recorded on the Rehabilitation Services Worksheet available in the support tab.

Department Specific Evaluation Billed Timed Units (BTUs)

Represents the sum of the evaluation billed time units (BTUs) performed by the department staff as calculated on the Rehabilitation Services Worksheet. The sum of Department Specific Evaluation BTUs associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Department Specific BTUs.

Group Therapy Sessions

Total patient group therapy sessions supported by department staff. Group therapy sessions are the treatment of more than one patient concurrently. The total sessions are a count of the sessions not the patients.
Inpatient Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs): Inpatients is the sum of all billable workload performed by the department staff in support of facility inpatients. Baseline BTUs represent the standard time value for workload performed in the department as recorded on the Rehabilitation Services Workload Computation Worksheet available in the Support Tab.

This is a subset of Total Baseline BTUs.

Inpatient Department Specific Billed Time Units (BTUs)

Department Specific Billed Time Units (BTUs): Inpatient is the sum of all billable workload performed by the department staff in support of facility inpatients. These Inpatient Department Specific BTUs may include billable items for which the department charges but which are not itemized on the Rehabilitation Services Workload Computation Worksheet available in the Support Tab.

This is a subset of Total Department Specific BTUs.

Inpatient Dept Specific Evaluation Billed Time Units (BTUs)

Billed time units (BTUs) for evaluations performed by department staff in support of facility inpatients. The value is the sum of the inpatient evaluation billed time units (BTUs) associated with the evaluation CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Department Specific Evaluation Billed Timed Units (BTUs).

Inpatient Evaluations

Total evaluations performed by the department staff in support of facility inpatients. The sum of the number of inpatient evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Evaluations.

Inpatient Procedures

Count all procedures performed on inpatients by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, as well as Procedure Counting here in the DRM for more information.

This is a subset of Total Procedures.

Inpatient Visits

Total patient encounters performed in support of facility inpatients.
This is a subset of Patient Visits.

**Length of Stay (LOS) Efficiency**

The aggregate Functional Independence Measurement instrument (FIM) point gain by all patients on acute rehabilitation unit divided by the total patient days on the unit. This value should correspond to the reporting quarter and may be obtained through the data calculated by UDSmr or a similar vendor.

**Note:** This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).

**Missed Appointments**

The number of missed patient appointments which occurred as a result of a patient, staff member(s) including a physician, provider, and/or specialist, equipment, room, and/or other resource that is unavailable, for any reason, at the scheduled time for a specific patient service.

This is a subset of Patient Appointments Scheduled.

**Patient Appointments Scheduled**

Total number of patient appointments scheduled for the reporting period. An appointment is defined as a distinct block of scheduled time for a specific patient service, which includes visits, procedures, treatments, consultations, education, and/or tests.

**Patient No Shows**

The total number of patients who did not appear, for any reason, for a scheduled appointment including cancellation, non appearance or reschedule less than 24 hours prior to the appointment during the reporting period.

This is a subset of Missed Appointments.

**Patient Visits**

Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

**Pediatric Baseline Billed Time Units (BTUs)**

Baseline Billed Time Units (BTUs): Pediatric represent billable workload which was performed on pediatric patients by the rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet available on the Support Tab.
This is a component of Baseline Billed Time Units (BTUs).

**Pediatric Evaluations**

Total evaluations performed on pediatric patients by the department staff during the reporting period. The sum of the number of evaluations performed on pediatric patients associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Evaluations and Total Procedures.

**Pediatric Procedures**

Total count all procedures (including evaluations) performed on pediatric patients by the department for the reporting period. It is recommended that this value be populated by referring to the Rehabilitation Services Worksheet available on the Support Page.

This is a component of Total Procedures.

**Pediatric Visits**

Total separate pediatric patient encounters performed and/or supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

This is a subset of Patient Visits.

**Pre and Post Activity Time Units**

The number of 15-minute units a therapy professional spends preparing for a treatment/procedure and any post treatment/procedure time spent charting and report completion. This does not include face-to-face time with the patient. It is the sum of Pre and Post Activity Time Units recorded in Column 14 on the Rehabilitation Services Worksheet available on the Support Page.

**Rehabilitation Inpatient Visits**

Total rehabilitation patient encounters performed in support of facility inpatients.

This is a subset of Inpatient Visits.
Service Units

The number of 15-minute units necessary for the therapy professional to complete the service/treatment/procedure (face to face time with the patient). It is the result of column 6 Total Department-Specific BTUs divided by 15. Refer to the Rehabilitation Services Worksheet available on the Support Page for assistance in reporting this element.

Total Evaluations

Total evaluations performed by the department staff. The sum of the number of evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Procedures.

Total Procedures

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

Rehabilitation Therapies Functional Rollup Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider

Total hours paid by physicians/providers on the department's payroll who provide clinical services. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who are billed by the facility on a CMS 1500 Form. Include only physicians/providers on the facility payroll who spend 80% or more of their time in clinical or patient care activities. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.
Worked Hours: Athletic Trainer

Total hours worked by athletic trainers.

This is a subset of Worked Hours: Staff.

Worked Hours: Exercise Physiologist

Total hours worked by exercise physiologists.

This is a subset of Worked Hours: Staff.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Patient Care Provider

Total hours worked by other patient care providers (e.g. rehab/therapy technician or aide, nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care department personnel.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.
**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Therapist**

Total hours worked by licensed therapists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Therapy Assistant**

Total hours worked by certified therapy assistants.

This is a subset of Worked Hours: Staff.

**Worked Hours: Vocational Counselor**

Total hours worked by licensed vocational counselors.

This is a subset of Worked Hours: Staff.

**Rehabilitation Therapies Functional Rollup Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.
Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals orconsults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical/surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and callback time; exclude expense for on call time.

This is a subset of Labor Expense.
**Physician Provider Professional Fee Expense**

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

**Rehabilitation Therapies Functional Rollup Mandatory Elements**

The following data elements are mandatory for this department:

- APC Relative Weight
- Inpatient Procedures
- Labor Expense
- Labor Expense: Physician Provider
- Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Total Procedures
- Worked Hours: Physician Provider
- Worked Hours: Staff
- Worked Hours: Therapist
G4800, Other Rehabilitation Therapies Services

This generic department includes all cost centers belonging to Rehabilitation Services that cannot be mapped to individual rehabilitation therapy departments.

Other Rehabilitation Therapies Services Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs) represent billable workload which is routinely performed in rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet that can be accessed in the Support Tab.

Case Mix Group (CMG) Index

The average Case Mix Group relative weight, based on the most recently published CMS values, for all inpatients admitted to the Inpatient Rehabilitation Unit (IRF) during the reporting period. This value may be obtained through the data calculated by UDSmr or a similar vendor.

Note: This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).

Days of Operation per Week

Total number of days the department is open for operation during the week.

The maximum number that can be reported is 7.

Department Specific Billed Time Units (BTUs)

Department Specific Total Billed Time Units (BTUs) represent all billable workload performed by the department staff. These may include billable time units for which the department charges and captures on the worksheet, including any unlisted procedures. The Department Specific Billed Time Units (BTUs) count is the sum of all Department Specific Billed Time Units (BTUs) recorded on the Rehabilitation Services Worksheet available in the support tab.
**Department Specific Evaluation Billed Timed Units (BTUs)**

Represents the sum of the evaluation billed time units (BTUs) performed by the department staff as calculated on the Rehabilitation Services Worksheet. The sum of Department Specific Evaluation BTUs associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Department Specific BTUs.

**Group Therapy Sessions**

Total patient group therapy sessions supported by department staff. Group therapy sessions are the treatment of more than one patient concurrently. The total sessions are a count of the sessions not the patients.

**Hours of Operation per Week**

The average number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

**Inpatient Baseline Billed Time Units (BTUs)**

Baseline Billed Time Units (BTUs): Inpatients is the sum of all billable workload performed by the department staff in support of facility inpatients. Baseline BTUs represent the standard time value for workload performed in the department as recorded on the Rehabilitation Services Workload Computation Worksheet available in the Support Tab.

This is a subset of Total Baseline BTUs.

**Inpatient Department Specific Billed Time Units (BTUs)**

Department Specific Billed Time Units (BTUs): Inpatient is the sum of all billable workload performed by the department staff in support of facility inpatients. These Inpatient Department Specific BTUs may include billable items for which the department charges but which are not itemized on the Rehabilitation Services Workload Computation Worksheet available in the Support Tab.

This is a subset of Total Department Specific BTUs.

**Inpatient Dept Specific Evaluation Billed Time Units (BTUs)**

Billed time units (BTUs) for evaluations performed by department staff in support of facility inpatients. The value is the sum of the inpatient evaluation billed time units (BTUs) associated with the evaluation CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Department Specific Evaluation Billed Timed Units (BTUs).
Inpatient Evaluations

Total evaluations performed by the department staff in support of facility inpatients. The sum of the number of inpatient evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Evaluations.

Inpatient Procedures

Count all procedures performed on inpatients by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, as well as Procedure Counting here in the DRM for more information.

This is a subset of Total Procedures.

Inpatient Visits

Total patient encounters performed in support of facility inpatients.

This is a subset of Patient Visits.

Length of Stay (LOS) Efficiency

The aggregate Functional Independence Measurement instrument (FIM) point gain by all patients on acute rehabilitation unit divided by the total patient days on the unit. This value should correspond to the reporting quarter and may be obtained through the data calculated by UDSmr or a similar vendor.

Note: This value should be BLANK if your facility does not have an Inpatient Rehabilitation Unit (IRF).

Missed Appointments

The number of missed patient appointments which occurred as a result of a patient, staff member(s) including a physician, provider, and/or specialist, equipment, room, and/or other resource that is unavailable, for any reason, at the scheduled time for a specific patient service.

This is a subset of Patient Appointments Scheduled.

Patient Appointments Scheduled

Total number of patient appointments scheduled for the reporting period. An appointment is defined as a distinct block of scheduled time for a specific patient service, which includes visits, procedures, treatments, consultations, education, and/or tests.
Patient No Shows

The total number of patients who did not appear, for any reason, for a scheduled appointment including cancellation, non appearance or reschedule less than 24 hours prior to the appointment during the reporting period.

This is a subset of Missed Appointments.

Patient Visits

Total separate patient encounters supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

Pediatric Baseline Billed Time Units (BTUs)

Baseline Billed Time Units (BTUs): Pediatric represent billable workload which was performed on pediatric patients by the rehabilitation departments. The Baseline Billed Time Unit count is the sum of all Baseline Billed Time Units recorded on the Rehabilitation Services Worksheet available on the Support Tab.

This is a component of Baseline Billed Time Units (BTUs).

Pediatric Evaluations

Total evaluations performed on pediatric patients by the department staff during the reporting period. The sum of the number of evaluations performed on pediatric patients associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a component of Total Evaluations and Total Procedures.

Pediatric Procedures

Total count all procedures (including evaluations) performed on pediatric patients by the department for the reporting period. It is recommended that this value be populated by referring to the Rehabilitation Services Worksheet available on the Support Page.

This is a component of Total Procedures.
Pediatric Visits

Total separate pediatric patient encounters performed and/or supported by department staff. Such encounters might include initial examination, treatment or educational sessions, and follow-up visits for continuing treatment of the same malady or complaint. Exclude group therapy sessions. If the patient is seen by multiple providers (e.g., physician, therapist, dietitian, social worker) during the same visit the count should be recorded as one visit.

This is a subset of Patient Visits.

Pre and Post Activity Time Units

The number of 15-minute units a therapy professional spends preparing for a treatment/procedure and any post treatment/procedure time spent charting and report completion. This does not include face-to-face time with the patient. It is the sum of Pre and Post Activity Time Units recorded in Column 14 on the Rehabilitation Services Worksheet available on the Support Page.

Rehabilitation Inpatient Visits

Total rehabilitation patient encounters performed in support of facility inpatients.

This is a subset of Inpatient Visits.

Service Units

The number of 15-minute units necessary for the therapy professional to complete the service/treatment/procedure (face to face time with the patient). It is the result of column 6 Total Department-Specific BTUs divided by 15. Refer to the Rehabilitation Services Worksheet available on the Support Page for assistance in reporting this element.

Total Evaluations

Total evaluations performed by the department staff. The sum of the number of evaluations associated with CPT codes designated with an asterisk (*) in Column Evaluation codes in the Rehabilitation Services Worksheet available in the Support Tab.

This is a subset of Total Procedures.

Total Procedures

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.
Other Rehabilitation Therapies Services Department Hours Elements

Paid Hours: Contract Labor
Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider
Total hours paid by physicians/providers on the department's payroll who provide clinical services. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who are billed by the facility on a CMS 1500 Form. Include only physicians/providers on the facility payroll who spend 80% or more of their time in clinical or patient care activities. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff
Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Athletic Trainer
Total hours worked by athletic trainers.

This is a subset of Worked Hours: Staff.

Worked Hours: Exercise Physiologist
Total hours worked by exercise physiologists.

This is a subset of Worked Hours: Staff.

Worked Hours: Hand Therapist
Total hours worked by licensed hand therapists.

This is a component of Worked Hours: Therapist.
**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Occupational Therapist**

Total hours worked by licensed occupational therapists.

This is a component of Worked Hours: Therapist.

**Worked Hours: OT Assistant**

Total hours worked by licensed occupational therapy assistants.

This is a component of Worked Hours: Therapy Assistant.

**Worked Hours: Other Patient Care Provider**

Total hours worked by other patient care providers (e.g. rehab/therapy technician or aide, nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care department personnel.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee’s normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.
**Worked Hours: Physical Therapist**

Total hours worked by licensed physical therapists.

This is a component of Worked Hours: Therapist.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: PT Assistant**

Total hours worked by licensed physical therapy assistants.

This is a component of Worked Hours: Therapy Assistant.

**Worked Hours: Recreation Therapist**

Total hours worked by licensed recreational therapists.

This is a component of Worked Hours: Therapist.

**Worked Hours: Speech-Language Pathologists (non-MD)**

Total hours worked by licensed speech and/or language pathologists (non MD).

This is a component of Worked Hours: Therapist.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Therapist**

Total hours worked by licensed therapists.

This is a subset of Worked Hours: Staff.
Worked Hours: Therapy Assistant
  Total hours worked by certified therapy assistants.

  This is a subset of Worked Hours: Staff.

Worked Hours: Vocational Counselor
  Total hours worked by licensed vocational counselors.

  This is a subset of Worked Hours: Staff.

Other Rehabilitation Therapies Services Expense Elements

Labor Expense
  Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider
  Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

  This is a subset of Labor Expense.

Medical Supply Expense
  Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

  This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense
  Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.
This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and callback time; exclude expense for on call time.

This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

**Other Rehabilitation Therapies Services Mandatory Elements**

The following data elements are mandatory for this department:

- APC Relative Weight
- Days of Operation per Week
- Hours of Operation per Week
- Inpatient Procedures
- Labor Expense
- Labor Expense: Physician Provider
- Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Total Procedures
- Worked Hours: Physician Provider
- Worked Hours: Staff
- Worked Hours: Therapist

**Other Rehabilitation Therapies Services Normalizations**

Include the hours costs and volumes (where applicable) associated with:

- Personnel performing the functions of the department’s day to day managerial operations (Rehabilitation)

Exclude the hours costs and volumes (where applicable) associated with the

- Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program (Rehabilitation Services)
- Case Management (manages patient care while the patient is undergoing treatment)
- Insurance verification - initial time spent obtaining name and identification and pre-admission certification during the admission process
- Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
- Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
- Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture
- Patient reception, e.g., greeting, checking in of patients, answering phone calls (Rehabilitation)
• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Rehabilitation)

• PPS (Prospective Payment System) Coordinator

• Rehab Services Patient Scheduling

• Repair and Maintenance of Clinical Equipment/Rooms

• Social Workers

• Transport of patients not requiring clinical escort

Rehabilitation Services Worksheet

The Workload Computation worksheets are used to calculate staff output. The worksheets calculate procedure activity for the calculation of BTUs (billed time units). Count only actual procedures (relevant CPT codes) for the procedure count. Non-procedure charges such as supply, time charges, set-up charges, computer processing charges or other miscellaneous non-procedure charges should not be counted. Do not include physician service codes in the procedure count.

The worksheets are Microsoft Excel spreadsheets. The worksheets contain all necessary computational formulas.

The following worksheet can be found on the Support tab of ActionOI.

• Rehabilitation Services Worksheet
Chapter 36. Respiratory and Pulmonary Care Services

For an annotated list of Characteristic Questions for this series, please see the ActionOI support page.

This chapter includes the following sections:

- 04110, Respiratory Care 2043
- 04120, Pulmonary Diagnostics 2054
- 04130, Respiratory Care and Pulmonary Diagnostics Combined 2062
- 04199 Respiratory and Pulmonary Care Administration and Support 2072
- F4100, Respiratory and Pulmonary Care Services Functional Rollup 2076
- G4100, Other Respiratory/Pulmonary Services 2085
- Respiratory and Pulmonary Care Services Worksheets 2093

04110, Respiratory Care

This department provides services to patients of all ages with cardiorespiratory impairments in the acute care setting. Services consist of treatment interventions to administer aerosolized medication and facilitate secretion clearance, to support ventilation through invasive and non-invasive devices, and to provide critical monitoring inclusive of gas exchange, oxygenation, and other physiologic metrics. Department activities include, but are not limited to: (1) Diagnostic testing (i.e. Blood Gas, Bronchoscopy, sputum induction, PFT, etc.); (2) Therapeutic modalities: (i.e. bronchial hygiene, chest physiotherapy, etc.); (3) Administration of inhaled medications including oxygen; (4) Airway management; (5) Management of invasive and non-invasive ventilation including intra- and inter-hospital transport; and (6) Patient evaluation, care planning, and teaching. Support functions such as respiratory research, biomedical equipment repair, program management for respiratory care outside of the department, and medical informatics should be excluded.
Respiratory Care Mapping Guidelines

To map to this department, at least 80% of procedures (billable and non-billable) must be respiratory therapy. If more than 20% of procedures are pulmonary diagnostic, map your cost center(s) to the 04130, Respiratory Care and Pulmonary Diagnostics Combined department.

Respiratory Care Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Bedside Pulmonary Function Procedures

Total number of bedside pulmonary function procedures performed for this reporting period.

This is a component of Pulmonary Function Procedures.

Body Plethysmography Procedures

Total number of Body Plethysmograph procedures performed for the reporting period. Body plethysmography is used for measuring thoracic gas volume and airways resistance.

This is a component of Pulmonary Function Procedures.

Bronchial Hygiene Procedures

Total number of Bronchial Hygiene procedures performed for this reporting period. Bronchial hygiene activities are intended to improve the distribution of ventilation, including the application of technology and methods to facilitate removal of secretions from the airways, and/or the delivery of aerosolized medications.

This is a component of Billable Procedures.

Chest Physiotherapy Procedures

The number of Chest Physiotherapy (CPT) Treatments (such as HFCWA, IPV, Sonic therapy) performed for the reporting period.

This is a component of Total Procedures.
Days of Operation per Week
Total number of days per week that the department is open for routine business.

The maximum number that can be reported is 7.

Diffusion Capacity Procedures
Total number of Diffusion Capacity procedures performed for the reporting period. Diffusion capacity is a measurement of the lung's ability to transfer gases.

This is a component of Pulmonary Function Procedures.

Electrocardiography Procedures
Total number of Electrocardiography (ECG or EKG) procedures performed for the reporting period. Electrocardiography is a method of graphic tracing of the electric current generated by the heart muscle during a heartbeat. The tracing is recorded with an electrocardiograph and it provides information on the condition and performance of the heart.

This is a component of Total Procedures.

Hours Nitric Oxide Used
Total number of hours Nitric Oxide was used during the reporting period.

Hours of Operation per Week
Total number of hours per week that the department is open for routine business.

The maximum number that can be reported is 168.

In House Transports (15 mins)
Total number of in house transports for the reporting period. Count any patient accompanied by a respiratory therapist and transported throughout the facility (e.g., for diagnostic or interventional testing, operating room, admit from the ER to the floor, etc.). The duration/length of an in house transport can vary from facility to facility, so be sure to adjust your count based on 15-minute intervals.

Inpatient Procedures
Count all procedures performed on inpatients by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, as well as Procedure Counting for more information.

This is a subset of Total Procedures.
Nitrogen Washout Procedures

Total number of nitrogen washout procedures performed for the reporting period. Nitrogen washout procedures are used to measure dead space in the lung during a respiratory cycle.

This is a component of Pulmonary Function Procedures.

Number of Unlisted Procedures

Number of procedures reported for CPT Codes 94799 and 37799.

This is a component of Total Procedures.

Off Site Transports

Total number of off site transports for the reporting period. An off site transport is when a patient is accompanied out of the facility for treatment (i.e. to another Medical Center or facility). Each round trip transport counts as one.

Patient Days Supported: Neonate Level III

Total patient days supported for Level III neonates. According to the American Academy of Pediatrics (AAP), Level III (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks' gestation and birth weight less than 1500 g. and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO).

Patient Days Supported: Neonate Level IV

Total patient days supported for Level IV neonates. According to the American Academy of Pediatrics (AAP), Level IV (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks' gestation and birth weight less than 1500 g. and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO). These neonates are being treated in an institution with the capability to provide surgical repair of complex congenital or acquired conditions, with immediate on-site access to pediatric medical and surgical subspecialists and pediatric anesthesiologists.

Peak Flow Procedures

Total number of procedures performed for the reporting period which use a peak flow meter. Peak Flow Meters are used to measure air flow which provides patients with an early indication of an oncoming attack, for example, of exercise induced asthma, a type of asthma typically triggered by exercise.

This is a component of Pulmonary Function Procedures.
Pulmonary Function Procedures

Total number of Pulmonary Function (PFT) procedures performed for the reporting period. Include in this count any breathing tests that assist in the determination of how much air the lungs can hold, how quickly air moves in and out of the lungs, or how well the lungs exchange oxygen and carbon dioxide. PFTs included in the count may include but are not limited to tests that determine lung volumes, lung capacities and flow rates.

This is a component of Total Procedures.

Responses to Codes

Report the total number of emergency codes responded to by the department for any patient with cardio-respiratory distress or 'impending cardio-respiratory arrest.'

Spirometry Procedures

Total number of Spirometry procedures performed for the reporting period. Spirometry procedures produce a recording of the patient's ventilation under conditions involving both normal and maximal effort. The recording includes but is not limited to information regarding the volume of air moved and the rate at which it travels into and out of the lungs. Exclude Incentive Spirometry procedures from this count.

This is a component of Pulmonary Function Procedures.

Total Clinical Activities Time Standards (CATS)

Report the Total Clinical Activity Time Standards (CATS) for the department as calculated on the Respiratory and Pulmonary Care Minimum Data Set Worksheet located on the Support Page. For more information, please refer to the AARC Uniform Reporting Manual for Acute Care Hospitals - Fifth Edition, (Copyright 2012).

Total Procedures

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

Unlisted Procedures

Total number of procedures recorded for the reporting period for CPT Codes 37799 and 94799.

This is a component of Total Procedures.
**Ventilator Dependent Patient Days**

Total patient days requiring a ventilator support device (invasive and/or non-invasive), such as a Positive or Negative Pressure ventilator, a High Frequency Ventilator, BiPAP, or CPAP, to mechanically support or assist in the movement of air into the lungs, with or without an artificial airway.

For ActionOI purposes, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500 4 hour increments during the reporting period, the conversion would be $500 / 6 = 83.3$ Vent Days. If the department billed in 8 hour increments, the conversion would be $500 / 3 = 166.6$ Vent Days, if the department billed in 12 hour increments, the conversion would be $500 / 2 = 250$ etc. If you are unable to convert to 24 hour days, please leave this measure blank.

**Ventilator Dependent Patient Days: Invasive**

Total initial and subsequent patient days requiring an invasive ventilator support device to mechanically support or assist in the movement of air into the lungs. For ActionOI purposes, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500 4 hour increments during the reporting period, the conversion would be $500 / 6 = 83.3$ Vent Days. If the department billed in 8 hour increments, the conversion would be $500 / 3 = 166.6$ Vent Days, if the department billed in 12 hour increments, the conversion would be $500 / 2 = 250$ etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Ventilator Dependent Patient Days.

**Ventilator Dependent Patient Days: Non-Invasive**

Total initial and subsequent patient days requiring noninvasive ventilation (i.e. CPAP (acute), Bipap, and OSA) to mechanically support or assist in the movement of air into the lungs. For ActionOI purposes, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500 4 hour increments during the reporting period, the conversion would be $500 / 6 = 83.3$ Vent Days. If the department billed in 8 hour increments, the conversion would be $500 / 3 = 166.6$ Vent Days, if the department billed in 12 hour increments, the conversion would be $500 / 2 = 250$ etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Ventilator Dependent Patient Days.

**Ventilator Patients**

Report the total number of patients who required a ventilator support device (invasive and/or non-invasive) during the reporting period.
Respiratory Care Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Clinical Staff

Hours worked by other clinical support staff including but not limited to hours worked by educators and aides.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
**Worked Hours: Overtime**

Overtime is the total worked hours paid for overtime. Include hours worked on an overtime basis during orientation or for educational purposes. Exclude premium hours, non worked hours, or callback hours for which an employee is reimbursed at a regular pay rate based on shift differential or scheduling needs.

This is a subset of Worked Hours: Staff.

**Worked Hours: Respiratory Therapist**

Total hours worked by registered respiratory therapists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Technician**

Total hours worked by technicians in the department. A technician generally holds a two year associates degree, and may have completed a certified training program.

This is a subset of Worked Hours: Staff.

**Respiratory Care Revenue Elements**

**Gross Inpatient Charges**

Report the total gross charges for inpatients only for the reporting period. Report charges as the actual dollar amount. Exclude physician fees.

This is a subset of Gross Patient Charges.
Gross Patient Charges

Report the total gross patient charges for the reporting period. Include inpatient and outpatient charges. Report charges as the actual dollar amount. Exclude physician fees.

Respiratory Care Expense Elements

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical, surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Nitric Oxide Expense

Total Nitric Oxide Expense for the reporting period.

This is a subset of Medical Supply Expense.

Non Medical Supply Expense

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.
Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Respiratory Care Mandatory Elements

The following data elements are mandatory for this department:

- APC Relative Weight
- Inpatient Procedures
- Labor Expense
- Labor Expense: Physician Provider
- Non Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Total Procedures
• Worked Hours: Physician Provider

• Worked Hours: Staff

**Respiratory Care Normalizations**

Include the hours costs and volumes (where applicable) associated with the

• Cleaning of ventilators

• Personnel performing the functions of the department’s day to day managerial operations (Respiratory and Pulmonary)

Exclude the hours costs and volumes (where applicable) associated with the

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, outreach services, residency program (Respiratory and Pulmonary)

• Anesthetic gases (e.g. nitrous oxide, sevoflurane, desflurane, isoflurane, and halothane)

• Community Education and/or Outreach Events, e.g., coordinates and delivers health fairs and health screening programs, speakers bureaus and presentations

• Employee formal facility wide training programs, e.g., fire safety, CPR, hand washing

• Grant or research funded services

• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

• Operating a hospital based School of Respiratory Care, e.g., administration and or teaching of students in a formal classroom setting to achieve a degree in a specialized field

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Patient Education (formal classes like Asthma, Smoking Cessation, COPD Education)

• Patient Scheduling includes management of inbound and outbound calls, faxes, and or electronic communications to ensure an appointment is generated for the patient-related activity

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Respiratory and Pulmonary)

• Repair and Maintenance of Clinical Equipment/Rooms

• Sleep studies
04120, Pulmonary Diagnostics

This department provides specialized diagnostic testing to identify the level of impairment of diseases that impact the pulmonary system, such as asthma, emphysema, pneumonia and other pulmonary diseases. Diagnostic tests include, but are not limited to measures of airflow, volume, pressure, as well as the diffusion and exchange of inhaled/exhaled gases. Department staff may be required to assist during bronchoscopy procedures.

Pulmonary Diagnostics Mapping Guidelines

To map to this department, at least 80% of procedures (billable and non-billable) must be pulmonary function tests, inclusive of inpatient and outpatient services. If more than 20% of procedures are respiratory therapy, map your cost center(s) to the 04130, Respiratory Care and Pulmonary Diagnostics Combined department.

Pulmonary Diagnostics Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Bedside Pulmonary Function Procedures

Total number of bedside pulmonary function procedures performed for this reporting period.

This is a component of Pulmonary Function Procedures.

Body Plethysmography Procedures

Total number of Body Plethysmograph procedures performed for the reporting period. Body plethysmography is used for measuring thoracic gas volume and airways resistance.

This is a component of Pulmonary Function Procedures.

Bronchial Hygiene Procedures

Total number of Bronchial Hygiene procedures performed for this reporting period. Bronchial hygiene activities are intended to improve the distribution of ventilation, including the application of technology and methods to facilitate removal of secretions from the airways, and/or the delivery of aerosolized medications.
This is a component of Billable Procedures.

**Chest Physiotherapy Procedures**

The number of Chest Physiotherapy (CPT) Treatments (such as HFCWA, IPV, Sonic therapy) performed for the reporting period.

This is a component of Total Procedures.

**Days of Operation per Week**

Total number of days per week that the department is open for routine business.

The maximum number that can be reported is 7.

**Diffusion Capacity Procedures**

Total number of Diffusion Capacity procedures performed for the reporting period. Diffusion capacity is a measurement of the lung's ability to transfer gases.

This is a component of Pulmonary Function Procedures.

**Electrocardiography Procedures**

Total number of Electrocardiography (ECG or EKG) procedures performed for the reporting period. Electrocardiography is a method of graphic tracing of the electric current generated by the heart muscle during a heartbeat. The tracing is recorded with an electrocardiograph and it provides information on the condition and performance of the heart.

This is a component of Total Procedures.

**Hours of Operation per Week**

Total number of hours per week that the department is open for routine business.

The maximum number that can be reported is 168.

**Inpatient Procedures**

Count all procedures performed on inpatients by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, as well as Procedure Counting for more information.

This is a subset of Total Procedures.
Nitrogen Washout Procedures

Total number of nitrogen washout procedures performed for the reporting period. Nitrogen washout procedures are used to measure dead space in the lung during a respiratory cycle.

This is a component of Pulmonary Function Procedures.

Number of Unlisted Procedures

Number of procedures reported for CPT Codes 94799 and 37799.

This is a component of Total Procedures.

Peak Flow Procedures

Total number of procedures performed for the reporting period which use a peak flow meter. Peak Flow Meters are used to measure air flow which provides patients with an early indication of an oncoming attack, for example, of exercise induced asthma, a type of asthma typically triggered by exercise.

This is a component of Pulmonary Function Procedures.

Pulmonary Function Procedures

Total number of Pulmonary Function (PFT) procedures performed for the reporting period. Include in this count any breathing tests that assist in the determination of how much air the lungs can hold, how quickly air moves in and out of the lungs, or how well the lungs exchange oxygen and carbon dioxide. PFTs included in the count may include but are not limited to tests that determine lung volumes, lung capacities and flow rates.

This is a component of Total Procedures.

Spirometry Procedures

Total number of Spirometry procedures performed for the reporting period. Spirometry procedures produce a recording of the patient's ventilation under conditions involving both normal and maximal effort. The recording includes but is not limited to information regarding the volume of air moved and the rate at which it travels into and out of the lungs. Exclude Incentive Spirometry procedures from this count.

This is a component of Pulmonary Function Procedures.

Total Procedures

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.
Unlisted Procedures

Total number of procedures recorded for the reporting period for CPT Codes 37799 and 94799.

This is a component of Total Procedures.

Pulmonary Diagnostics Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Clinical Staff

Hours worked by other clinical support staff including but not limited to hours worked by educators and aides.

This is a subset of Worked Hours: Staff.
**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Overtime is the total worked hours paid for overtime. Include hours worked on an overtime basis during orientation or for educational purposes. Exclude premium hours, non worked hours, or callback hours for which an employee is reimbursed at a regular pay rate based on shift differential or scheduling needs.

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: Respiratory Therapist**

Total hours worked by registered respiratory therapists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Technician**

Total hours worked by technicians in the department. A technician generally holds a two year associates degree, and may have completed a certified training program.

This is a subset of Worked Hours: Staff.

**Pulmonary Diagnostics Revenue Elements**
Gross Inpatient Charges

Report the total gross charges for inpatients only for the reporting period. Report charges as the actual dollar amount. Exclude physician fees.

This is a subset of Gross Patient Charges.

Gross Patient Charges

Report the total gross patient charges for the reporting period. Include inpatient and outpatient charges. Report charges as the actual dollar amount. Exclude physician fees.

Pulmonary Diagnostics Expense Elements

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical, surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.
This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Pulmonary Diagnostics Mandatory Elements**

The following data elements are mandatory for this department:

- APC Relative Weight
- Billable Procedures (old)
- Inpatient Procedures
- Labor Expense
- Labor Expense: Physician Provider
- Non Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
• Physician Provider Professional Fee Expense
• Total Procedures
• Worked Hours: Physician Provider
• Worked Hours: Staff

**Pulmonary Diagnostics Normalizations**

Include the hours and costs associated with the following function:

• Personnel performing the functions of the department’s day to day managerial operations (Respiratory and Pulmonary)

Exclude the hours and costs associated with the following function:

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, outreach services, residency program (Respiratory and Pulmonary)

• Community Education and/or Outreach Events, e.g., coordinates and delivers health fairs and health screening programs, speakers bureaus and presentations

• Employee formal facility wide training programs, e.g., fire safety, CPR, hand washing

• Grant or research funded services

• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Patient Education (formal classes like Asthma, Smoking Cessation, COPD Education)

• Patient Scheduling includes management of inbound and outbound calls, faxes, and or electronic communications to ensure an appointment is generated for the patient-related activity

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Respiratory and Pulmonary)

• Repair and Maintenance of Clinical Equipment/Rooms

• Sleep studies
04130, Respiratory Care and Pulmonary Diagnostics Combined

This department provides services to patients of all ages with respiratory and pulmonary impairments in the acute care setting. Department activities include, but are not limited to:

1. Diagnostic testing (i.e. Blood Gas, Bronchoscopy, sputum induction, PFT, measures of airflow, volume, pressure, as well as the diffusion and exchange of inhaled/exhaled gases, etc.)
2. Therapeutic modalities: (i.e. bronchial hygiene, chest physiotherapy, etc.)
3. Administration of inhaled medications including oxygen
4. Airway management
5. Management of invasive and non-invasive ventilation including intra- and inter-hospital transport
6. Patient evaluation, care planning, and teaching.

Department staff may be required to assist during bronchoscopy procedures. Support functions such as respiratory research, biomedical equipment repair, program management for respiratory care outside of the department, and medical informatics should be excluded.

Respiratory Care and Pulmonary Diagnostics Combined Mapping Guidelines

To map to this department, at least 90% of procedures (billable and non-billable) must be a combination of respiratory therapy and/or pulmonary diagnostic. If you have separate and distinct cost centers for Respiratory Care and Pulmonary Diagnostics, you should map them individually to the 04110, Respiratory Care department and the 04120, Pulmonary Diagnostic department.

Respiratory Care and Pulmonary Diagnostics Combined Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Bedside Pulmonary Function Procedures

Total number of bedside pulmonary function procedures performed for this reporting period.

This is a component of Pulmonary Function Procedures.
**Body Plethysmography Procedures**

Total number of Body Plethysmograph procedures performed for the reporting period. Body plethysmography is used for measuring thoracic gas volume and airways resistance.

This is a component of Pulmonary Function Procedures.

**Bronchial Hygiene Procedures**

Total number of Bronchial Hygiene procedures performed for this reporting period. Bronchial hygiene activities are intended to improve the distribution of ventilation, including the application of technology and methods to facilitate removal of secretions from the airways, and/or the delivery of aerosolized medications.

This is a component of Billable Procedures.

**Chest Physiotherapy Procedures**

The number of Chest Physiotherapy (CPT) Treatments (such as HFCWA, IPV, Sonic therapy) performed for the reporting period.

This is a component of Total Procedures.

**Days of Operation per Week**

Total number of days per week that the department is open for routine business.

The maximum number that can be reported is 7.

**Electrocardiography Procedures**

Total number of Electrocardiography (ECG or EKG) procedures performed for the reporting period. Electrocardiography is a method of graphic tracing of the electric current generated by the heart muscle during a heartbeat. The tracing is recorded with an electrocardiograph and it provides information on the condition and performance of the heart.

This is a component of Total Procedures.

**Hours Nitric Oxide Used**

Total number of hours Nitric Oxide was used during the reporting period.

**Hours of Operation per Week**

Total number of hours per week that the department is open for routine business.
The maximum number that can be reported is 168.

**In House Transports (15 mins)**

Total number of in house transports for the reporting period. Count any patient accompanied by a respiratory therapist and transported throughout the facility (e.g., for diagnostic or interventional testing, operating room, admit from the ER to the floor, etc.). The duration/length of an in house transport can vary from facility to facility, so be sure to adjust your count based on 15-minute intervals.

**Inpatient Procedures**

Count all procedures performed on inpatients by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, as well as Procedure Counting for more information.

This is a subset of Total Procedures.

**Nitric Oxide Patients**

Total number of patients receiving nitric oxide therapy during the reporting period.

**Nitrogen Washout Procedures**

Total number of nitrogen washout procedures performed for the reporting period. Nitrogen washout procedures are used to measure dead space in the lung during a respiratory cycle.

This is a component of Pulmonary Function Procedures.

**Number of Unlisted Procedures**

Number of procedures reported for CPT Codes 94799 and 37799.

This is a component of Total Procedures.

**Off Site Transports**

Total number of off site transports for the reporting period. An off site transport is when a patient is accompanied out of the facility for treatment (i.e. to another Medical Center or facility). Each round trip transport counts as one.
Patient Days Supported: Neonate Level III

Total patient days supported for Level III neonates. According to the American Academy of Pediatrics (AAP), Level III (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks’ gestation and birth weight less than 1500 g. and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO).

Patient Days Supported: Neonate Level IV

Total patient days supported for Level IV neonates. According to the American Academy of Pediatrics (AAP), Level IV (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks’ gestation and birth weight less than 1500 g. and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO). These neonates are being treated in an institution with the capability to provide surgical repair of complex congenital or acquired conditions, with immediate on-site access to pediatric medical and surgical subspecialists and pediatric anesthesiologists.

Peak Flow Procedures

Total number of procedures performed for the reporting period which use a peak flow meter. Peak Flow Meters are used to measure air flow which provides patients with an early indication of an oncoming attack, for example, of exercise induced asthma, a type of asthma typically triggered by exercise.

This is a component of Pulmonary Function Procedures.

Pulmonary Function Procedures

Total number of Pulmonary Function (PFT) procedures performed for the reporting period. Include in this count any breathing tests that assist in the determination of how much air the lungs can hold, how quickly air moves in and out of the lungs, or how well the lungs exchange oxygen and carbon dioxide. PFTs included in the count may include but are not limited to tests that determine lung volumes, lung capacities and flow rates.

This is a component of Total Procedures.

Responses to Codes

Report the total number of emergency codes responded to by the department for any patient with cardio-respiratory distress or ‘impending cardio-respiratory arrest.’

Spirometry Procedures

Total number of Spirometry procedures performed for the reporting period. Spirometry procedures produce a recording of the patient’s ventilation under conditions involving both normal and maximal effort. The recording includes but is not limited to information regarding the volume of air moved and the rate at which it travels into and out of the lungs. Exclude Incentive Spirometry procedures from this count.
This is a component of Pulmonary Function Procedures.

**Total Clinical Activities Time Standards (CATS)**

Report the Total Clinical Activity Time Standards (CATS) for the department as calculated on the Respiratory and Pulmonary Care Minimum Data Set Worksheet located on the Support Page. For more information, please refer to the AARC Uniform Reporting Manual for Acute Care Hospitals - Fifth Edition, (Copyright 2012).

**Total Procedures**

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

**Unlisted Procedures**

Total number of procedures recorded for the reporting period for CPT Codes 37799 and 94799.

This is a component of Total Procedures.

**Ventilator Dependent Patient Days**

Total patient days requiring a ventilator support device (invasive and/or non-invasive), such as a Positive or Negative Pressure ventilator, a High Frequency Ventilator, BiPAP, or CPAP, to mechanically support or assist in the movement of air into the lungs, with or without an artificial airway.

For ActionOI purposes, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.

**Ventilator Dependent Patient Days: Invasive**

Total initial and subsequent patient days requiring an invasive ventilator support device to mechanically support or assist in the movement of air into the lungs. For ActionOI purposes, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.
This is a subset of Ventilator Dependent Patient Days.

**Ventilator Dependent Patient Days: Non-Invasive**

Total initial and subsequent patient days requiring noninvasive ventilation (i.e. CPAP (acute), Bipap, and OSA) to mechanically support or assist in the movement of air into the lungs. For ActionOI purposes, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Ventilator Dependent Patient Days.

**Ventilator Patients**

Report the total number of patients who required a ventilator support device (invasive and/or non-invasive) during the reporting period.

**Respiratory Care and Pulmonary Diagnostics Combined Department Hour Elements**

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Paid Hours: Physician Provider**

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.
Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Clinical Staff

Hours worked by other clinical support staff including but not limited to hours worked by educators and aides.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Overtime is the total worked hours paid for overtime. Include hours worked on an overtime basis during orientation or for educational purposes. Exclude premium hours, non worked hours, or callback hours for which an employee is reimbursed at a regular pay rate based on shift differential or scheduling needs.

This is a subset of Worked Hours: Staff.

Worked Hours: Physician Provider

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

Worked Hours: Respiratory Therapist

Total hours worked by registered respiratory therapists.

This is a subset of Worked Hours: Staff.
**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Technician**

Total hours worked by technicians in the department. A technician generally holds a two year associates degree, and may have completed a certified training program.

This is a subset of Worked Hours: Staff.

**Respiratory Care and Pulmonary Diagnostics Combined Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical, surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

**Nitric Oxide Expense**

Total Nitric Oxide Expense for the reporting period.

This is a subset of Medical Supply Expense.
Non Medical Supply Expense

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Respiratory Care and Pulmonary Diagnostics Combined Mandatory Elements

The following data elements are mandatory for this department:

- APC Relative Weight
- Inpatient Procedures
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Total Procedures
- Worked Hours: Physician Provider
- Worked Hours: Staff

**Respiratory Care and Pulmonary Diagnostics Combined Normalizations**

Include the hours costs and volumes (where applicable) associated with the

- Cleaning of ventilators
- Personnel performing the functions of the department’s day to day managerial operations (Respiratory and Pulmonary)

Exclude the hours costs and volumes (where applicable) associated with the

- Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, outreach services, residency program (Respiratory and Pulmonary)
- Anesthetic gases (e.g. nitrous oxide, sevoflurane, desflurane, isoflurane, and halothane)
- Community Education and/or Outreach Events, e.g., coordinates and delivers health fairs and health screening programs, speakers bureaus and presentations
- Employee formal facility wide training programs, e.g., fire safety, CPR, hand washing
- Grant or research funded services
- Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
- Operating a hospital based School of Respiratory Care, e.g., administration and or teaching of students in a formal classroom setting to achieve a degree in a specialized field
- Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
- Patient Education (formal classes like Asthma, Smoking Cessation, COPD Education)
- Patient Scheduling includes management of inbound and outbound calls, faxes, and or electronic communications to ensure an appointment is generated for the patient-related activity
- Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Respiratory and Pulmonary)
- Repair and Maintenance of Clinical Equipment/Rooms
- Sleep studies

**04199 Respiratory and Pulmonary Care Administration and Support**

This department performs the overall administrative and general support tasks for the entire Respiratory and Pulmonary Care Services series. These tasks and functions include but are not limited to residency programs, medical informatics, research programs, and the associated management of these support activities.

**Respiratory and Pulmonary Care Administration and Support Workload Volumes**

**APC Relative Weight Supported**

The APC Relative Weight Supported is based on the weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures supported by the department. This value is unable to be populated using the Key Volume Element Population data file. Therefore, use the sum of the APC weights for the departments utilized within this series. For additional assistance refer to the APC and Work RVU Workbook available on the Support Page.

**Inpatient Procedures Supported**

Count all procedures supported performed on inpatients by the department for the reporting period. This value is unable to be populated using the Key Volume Element Population data file. Therefore, use the sum of the inpatient procedures for the departments utilized within this series. For additional assistance refer to the APC and Work RVU Workbook available on the Support Page.

This is a subset of Total Procedures Supported.

**Total Clinical Activity Time Standards (CATS) Supported**

Total Clinical Activity Time Standards (CATS) performed by all departments within this series and supported by this department staff.
Total Procedures Supported

Count all procedures that are supported by the department for the reporting period. This value is unable to be populated using the Key Volume Element Population data file. Therefore, use the sum of the total procedures for the departments utilized within this series. For additional assistance refer to the APC and Work RVU Workbook available on the Support Page.

Respiratory and Pulmonary Care Administration and Support Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Clinical Staff

Hours worked by other clinical support staff including but not limited to hours worked by educators and aides.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
**Worked Hours: Overtime**

Overtime is the total worked hours paid for overtime. Include hours worked on an overtime basis during orientation or for educational purposes. Exclude premium hours, non worked hours, or callback hours for which an employee is reimbursed at a regular pay rate based on shift differential or scheduling needs.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

---

**Respiratory and Pulmonary Care Administration and Support Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical, surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.
This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Respiratory and Pulmonary Care Administration and Support Mandatory Elements**

The following data elements are mandatory for this department:

- APC Relative Weight Supported
- Inpatient Procedures Supported
- Labor Expense
- Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Total Procedures Supported
- Worked Hours: Staff

**Respiratory and Pulmonary Care Administration and Support Normalizations**

Include the hours costs and volumes (where applicable) associated with the

- Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, outreach services, residency program (Respiratory and Pulmonary)
- Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Respiratory and Pulmonary)
Exclude the hours costs and volumes (where applicable) associated with the

- Community Education and/or Outreach Events, e.g., coordinates and delivers health fairs and health screening programs, speakers bureaus and presentations
- Employee formal facility wide training programs, e.g., fire safety, CPR, hand washing
- Grant or research funded services
- Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
- Operating a hospital based School of Respiratory Care, e.g., administration and or teaching of students in a formal classroom setting to achieve a degree in a specialized field
- Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
- Patient Education (formal classes like Asthma, Smoking Cessation, COPD Education)
- Patient Scheduling includes management of inbound and outbound calls, faxes, and or electronic communications to ensure an appointment is generated for the patient-related activity
- Repair and Maintenance of Clinical Equipment/Rooms

F4100, Respiratory and Pulmonary Care Services
Functional Rollup

This department includes all Respiratory Care departments, Pulmonary Diagnostics departments, and administrative and support functions regardless of reporting relationship.

Respiratory and Pulmonary Care Services Functional Rollup Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.
Bedside Pulmonary Function Procedures

Total number of bedside pulmonary function procedures performed for this reporting period.

This is a component of Pulmonary Function Procedures.

Bronchial Hygiene Procedures

Total number of Bronchial Hygiene procedures performed for this reporting period. Bronchial hygiene activities are intended to improve the distribution of ventilation, including the application of technology and methods to facilitate removal of secretions from the airways, and/or the delivery of aerosolized medications.

This is a component of Billable Procedures.

Chest Physiotherapy Procedures

The number of Chest Physiotherapy (CPT) Treatments (such as HFCWA, IPV, Sonic therapy) performed for the reporting period.

This is a component of Total Procedures.

Electrocardiography Procedures

Total number of Electrocardiography (ECG or EKG) procedures performed for the reporting period. Electrocardiography is a method of graphic tracing of the electric current generated by the heart muscle during a heartbeat. The tracing is recorded with an electrocardiograph and it provides information on the condition and performance of the heart.

This is a component of Total Procedures.

Hours Nitric Oxide Used

Total number of hours Nitric Oxide was used during the reporting period.

In House Transports (15 mins)

Total number of in house transports for the reporting period. Count any patient accompanied by a respiratory therapist and transported throughout the facility (e.g., for diagnostic or interventional testing, operating room, admit from the ER to the floor, etc.). The duration/length of an in house transport can vary from facility to facility, so be sure to adjust your count based on 15-minute intervals.
Inpatient Procedures

Count all procedures performed on inpatients by the department for the reporting period. This value should automatically populate after the rollup and calc process has been completed and the standard departments within the series utilize the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value for each of the departments within the series, refer to the APC and Work RVU Workbook available on the Support Page and utilize the volumes for all departments within the series.

This is a subset of Total Procedures.

Number of Unlisted Procedures

Number of procedures reported for CPT Codes 94799 and 37799.

This is a component of Total Procedures.

Off Site Transports

Total number of off site transports for the reporting period. An off site transport is when a patient is accompanied out of the facility for treatment (i.e. to another Medical Center or facility). Each round trip transport counts as one.

Patient Days Supported: Neonate Level III

Total patient days supported for Level III neonates. According to the American Academy of Pediatrics (AAP), Level III (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks' gestation and birth weight less than 1500 g. and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO).

Patient Days Supported: Neonate Level IV

Total patient days supported for Level IV neonates. According to the American Academy of Pediatrics (AAP), Level IV (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks' gestation and birth weight less than 1500 g. and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO). These neonates are being treated in an institution with the capability to provide surgical repair of complex congenital or acquired conditions, with immediate on-site access to pediatric medical and surgical subspecialists and pediatric anesthesiologists.
**Pulmonary Function Procedures**  
Total number of Pulmonary Function (PFT) procedures performed for the reporting period. Include in this count any breathing tests that assist in the determination of how much air the lungs can hold, how quickly air moves in and out of the lungs, or how well the lungs exchange oxygen and carbon dioxide. PFTs included in the count may include but are not limited to tests that determine lung volumes, lung capacities and flow rates.

This is a component of Total Procedures.

**Responses to Codes**  
Report the total number of emergency codes responded to by the department for any patient with cardio-respiratory distress or 'impending cardio-respiratory arrest.'

**Total Clinical Activities Time Standards (CATS)**  
Report the Total Clinical Activity Time Standards (CATS) for the department as calculated on the Respiratory and Pulmonary Care Minimum Data Set Worksheet located on the Support Page. For more information, please refer to the AARC Uniform Reporting Manual for Acute Care Hospitals - Fifth Edition, (Copyright 2012).

**Total Procedures**  
Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

**Unlisted Procedures**  
Total number of procedures recorded for the reporting period for CPT Codes 37799 and 94799.

This is a component of Total Procedures.

**Ventilator Dependent Patient Days**  
Total patient days requiring a ventilator support device (invasive and/or non-invasive), such as a Positive or Negative Pressure ventilator, a High Frequency Ventilator, BiPAP, or CPAP, to mechanically support or assist in the movement of air into the lungs, with or without an artificial airway.

For ActionOI purposes, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500 4 hour increments during the reporting period, the conversion would be 500 / 6 = 83.3 Vent Days. If the department billed in 8 hour increments, the conversion would be 500 / 3 = 166.6 Vent Days, if the department billed in 12 hour increments, the conversion would be 500 / 2 = 250 etc. If you are unable to convert to 24 hour days, please leave this measure blank.
Ventilator Dependent Patient Days: Invasive

Total initial and subsequent patient days requiring an invasive ventilator support device to mechanically support or assist in the movement of air into the lungs. For ActionOI purposes, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500 4 hour increments during the reporting period, the conversion would be $500 / 6 = 83.3$ Vent Days. If the department billed in 8 hour increments, the conversion would be $500 / 3 = 166.6$ Vent Days, if the department billed in 12 hour increments, the conversion would be $500 / 2 = 250$ etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Ventilator Dependent Patient Days.

Ventilator Dependent Patient Days: Non-Invasive

Total initial and subsequent patient days requiring noninvasive ventilation (i.e. CPAP (acute), Bipap, and OSA) to mechanically support or assist in the movement of air into the lungs. For ActionOI purposes, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500 4 hour increments during the reporting period, the conversion would be $500 / 6 = 83.3$ Vent Days. If the department billed in 8 hour increments, the conversion would be $500 / 3 = 166.6$ Vent Days, if the department billed in 12 hour increments, the conversion would be $500 / 2 = 250$ etc. If you are unable to convert to 24 hour days, please leave this measure blank.

This is a subset of Ventilator Dependent Patient Days.

Ventilator Patients

Report the total number of patients who required a ventilator support device (invasive and/or non-invasive) during the reporting period.

Respiratory and Pulmonary Care Services Functional Rollup Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.
Paid Hours: Physician Provider

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Clinical Staff

Hours worked by other clinical support staff including but not limited to hours worked by educators and aides.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Overtime is the total worked hours paid for overtime. Include hours worked on an overtime basis during orientation or for educational purposes. Exclude premium hours, non worked hours, or callback hours for which an employee is reimbursed at a regular pay rate based on shift differential or scheduling needs.

This is a subset of Worked Hours: Staff.
**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: Respiratory Therapist**

Total hours worked by registered respiratory therapists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Technician**

Total hours worked by technicians in the department. A technician generally holds a two year associates degree, and may have completed a certified training program.

This is a subset of Worked Hours: Staff.

**Respiratory and Pulmonary Care Functional Rollup Revenue Elements**

**Gross Inpatient Charges**

Report the total gross charges for inpatients only for the reporting period. Report charges as the actual dollar amount. Exclude physician fees.

This is a subset of Gross Patient Charges.

**Gross Patient Charges**

Report the total gross patient charges for the reporting period. Include inpatient and outpatient charges. Report charges as the actual dollar amount. Exclude physician fees.
Respiratory and Pulmonary Care Services Functional Rollup Expense Elements

Labor Expense
Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider
Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense
Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical, surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Nitric Oxide Expense
Total Nitric Oxide Expense for the reporting period.

This is a subset of Medical Supply Expense.

Non Medical Supply Expense
Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.
Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Respiratory and Pulmonary Care Services Functional Rollup Mandatory Elements

The following data elements are mandatory for this department:

- APC Relative Weight
- Inpatient Procedures
- Labor Expense
- Labor Expense: Physician Provider
- Non Medical Supply Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Total Procedures
• Worked Hours: Physician Provider

• Worked Hours: Staff

G4100, Other Respiratory/Pulmonary Services

This generic department includes all cost centers belonging to Respiratory and Pulmonary Services that cannot be mapped to individual respiratory care or pulmonary diagnostic departments.

Other Respiratory/Pulmonary Services Workload Volumes

APC Relative Weight

The APC Relative Weight is based on weights published by The Centers for Medicare and Medicaid Services (CMS). Report relative weights for procedures where the majority of the cost is provided by the department. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page.

Bedside Pulmonary Function Procedures

Total number of bedside pulmonary function procedures performed for this reporting period.

This is a component of Pulmonary Function Procedures.

Bronchial Hygiene Procedures

Total number of Bronchial Hygiene procedures performed for this reporting period. Bronchial hygiene activities are intended to improve the distribution of ventilation, including the application of technology and methods to facilitate removal of secretions from the airways, and/or the delivery of aerosolized medications.

This is a component of Billable Procedures.

Chest Physiotherapy Procedures

The number of Chest Physiotherapy (CPT) Treatments (such as HFCWA, IPV, Sonic therapy) performed for the reporting period.

This is a component of Total Procedures.
Electrocardiography Procedures

Total number of Electrocardiography (ECG or EKG) procedures performed for the reporting period. Electrocardiography is a method of graphic tracing of the electric current generated by the heart muscle during a heartbeat. The tracing is recorded with an electrocardiograph and it provides information on the condition and performance of the heart.

This is a component of Total Procedures.

Hours Nitric Oxide Used

Total number of hours Nitric Oxide was used during the reporting period.

Inpatient Procedures

Count all procedures performed on inpatients by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, as well as Procedure Counting for more information.

This is a subset of Total Procedures.

Number of Unlisted Procedures

Number of procedures reported for CPT Codes 94799 and 37799.

This is a component of Total Procedures.

Off Site Transports

Total number of off site transports for the reporting period. An off site transport is when a patient is accompanied out of the facility for treatment (i.e. to another Medical Center or facility). Each round trip transport counts as one.

Patient Days Supported: Neonate Level III

Total patient days supported for Level III neonates. According to the American Academy of Pediatrics (AAP), Level III (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks’ gestation and birth weight less than 1500 g. and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO).
Patient Days Supported: Neonate Level IV

Total patient days supported for Level IV neonates. According to the American Academy of Pediatrics (AAP), Level IV (subspecialty) refers to postnatal care of extremely high-risk newborn infants and those with complex and critical illness requiring continuous life support and comprehensive care for infants less than 32 weeks’ gestation and birth weight less than 1500 g. and all critically ill infants. Continuous life support is provided by conventional mechanical ventilation, high-frequency ventilation and inhaled nitric oxide, and/or extracorporeal membrane oxygenation (ECMO). These neonates are being treated in an institution with the capability to provide surgical repair of complex congenital or acquired conditions, with immediate on-site access to pediatric medical and surgical subspecialists and pediatric anesthesiologists.

Pulmonary Function Procedures

Total number of Pulmonary Function (PFT) procedures performed for the reporting period. Include in this count any breathing tests that assist in the determination of how much air the lungs can hold, how quickly air moves in and out of the lungs, or how well the lungs exchange oxygen and carbon dioxide. PFTs included in the count may include but are not limited to tests that determine lung volumes, lung capacities and flow rates.

This is a component of Total Procedures.

Total Clinical Activities Time Standards (CATS)

Report the Total Clinical Activity Time Standards (CATS) for the department as calculated on the Respiratory and Pulmonary Care Minimum Data Set Worksheet located on the Support Page. For more information, please refer to the AARC Uniform Reporting Manual for Acute Care Hospitals - Fifth Edition, (Copyright 2012).

Total Procedures

Count all procedures performed by the department for the reporting period. This value should be populated using the Key Volume Element Population data file. If you are unable to use the Key Volume Element Population data file to upload this value, refer to the APC and Work RVU Workbook available on the Support Page, and Procedure Counting here in the DRM for more information.

Unlisted Procedures

Total number of procedures recorded for the reporting period for CPT Codes 37799 and 94799.

This is a component of Total Procedures.

Ventilator Dependent Patient Days

Total patient days requiring a ventilator support device (invasive and/or non-invasive), such as a Positive or Negative Pressure ventilator, a High Frequency Ventilator, BiPAP, or CPAP, to mechanically support or assist in the movement of air into the lungs, with or without an artificial airway.
For ActionOI purposes, a vent day is defined as one 24 hour period. Depending on your method of billing, you may need to perform a conversion to calculate days. The conversion would be the number of individual billings, divided by the number needed to multiply that billing increment by to get 24 hours. For example, if billing is done in 4 hour increments, and the department billed a total of 500 4 hour increments during the reporting period, the conversion would be $\frac{500}{6} = 83.3$ Vent Days. If the department billed in 8 hour increments, the conversion would be $\frac{500}{3} = 166.6$ Vent Days, if the department billed in 12 hour increments, the conversion would be $\frac{500}{2} = 250$ etc. If you are unable to convert to 24 hour days, please leave this measure blank.

**Ventilator Patients**

Report the total number of patients who required a ventilator support device (invasive and/or non-invasive) during the reporting period.

**Other Respiratory/Pulmonary Services Department Hours Elements**

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Paid Hours: Physician Provider**

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.
**Worked Hours: Other Clinical**

Hours worked by other clinical support staff including but not limited to hours worked by technicians, educators, and aides.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Overtime is the total worked hours paid for overtime. Include hours worked on an overtime basis during orientation or for educational purposes. Exclude premium hours, non worked hours, or callback hours for which an employee is reimbursed at a regular pay rate based on shift differential or scheduling needs.

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: Respiratory Therapist**

Total hours worked by registered respiratory therapists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.
Worked Hours: Technician

Total hours worked by technicians in the department. A technician generally holds a two year associates degree, and may have completed a certified training program.

This is a subset of Worked Hours: Staff.

Other Respiratory/Pulmonary Services Revenue Elements

Gross Inpatient Charges

Report the total gross charges for inpatients only for the reporting period. Report charges as the actual dollar amount. Exclude physician fees.

This is a subset of Gross Patient Charges.

Gross Patient Charges

Report the total gross patient charges for the reporting period. Include inpatient and outpatient charges. Report charges as the actual dollar amount. Exclude physician fees.

Other Respiratory/Pulmonary Services Expense Elements

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.
Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical, surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Nitric Oxide Expense

Total Nitric Oxide Expense for the reporting period.

This is a subset of Medical Supply Expense.

Non Medical Supply Expense

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense

Total contract expense for physicians/providers and physician groups which provide professional services to the department. Include licensed physicians, interns and residents, nurse practitioners who work as physician extenders, and other physician extenders or professionals who bill on a CMS 1500 Form. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Other Respiratory/Pulmonary Services Mandatory Elements

The following data elements are mandatory for this department:

- APC Relative Weight
• Inpatient Procedures
• Labor Expense
• Labor Expense: Physician Provider
• Non Medical Supply Expense
• Other Direct Operating Expense
• Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Physician Provider Professional Fee Expense
• Total Procedures
• Worked Hours: Physician Provider
• Worked Hours: Staff

Other Respiratory/Pulmonary Services Normalizations

Include the hours costs and volumes (where applicable) associated with:

• Personnel performing the functions of the department’s day to day managerial operations (Respiratory and Pulmonary)

Exclude the hours costs and volumes (where applicable) associated with:

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, outreach services, residency program (Respiratory and Pulmonary)
• Anesthetic gases (e.g. nitrous oxide, sevoflurane, desflurane, isoflurane, and halothane)
• Community Education and/or Outreach Events, e.g., coordinates and delivers health fairs and health screening programs, speakers bureaus and presentations
• Employee formal facility wide training programs, e.g., fire safety, CPR, hand washing
• Grant or research funded services
• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

• Operating a hospital based School of Respiratory Care, e.g., administration and or teaching of students in a formal classroom setting to achieve a degree in a specialized field

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Patient Education (formal classes like Asthma, Smoking Cessation, COPD Education)

• Patient Scheduling includes management of inbound and outbound calls, faxes, and or electronic communications to ensure an appointment is generated for the patient-related activity

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Respiratory and Pulmonary)

• Repair and Maintenance of Clinical Equipment/Rooms

• Sleep studies

Respiratory and Pulmonary Care Services Worksheets

Use the following worksheets for this department. These worksheets can be found on the Support tab of ActionOI.

• CAT and RW Worksheet
Chapter 37. Revenue Cycle Management

This chapter includes the following sections:

- 05602, Patient Financial Services  2094
- 05608, Centralized Scheduling  2102
- 05609, Admitting and Registration  2107
- 05611, Inpatient Admitting  2112
- 05612, Outpatient Registration  2117
- 05620, Financial Counseling Services  2122
- 05630, Medical Plan Contracting Services  2126
- 05640, Health Information Management with Medical Transcription  2129
- 05641, Health Information Management without Transcription  2139
- 05642, Medical Transcription  2147
- 05645, Disease Registries  2151
- 05670, Patient Accounting Services  2155
- 05671, Credit and Collections  2161
- 05672, Consolidated Business Office  2164
- F5601, Revenue Cycle Management Functional Rollup  2171
- G5601, Other Revenue Cycle Management  2182

05602, Patient Financial Services

This department includes all inpatient and outpatient registration functions and patient claims processing functions, including claims preparation, submission, financial counseling, denial management and other follow-up services.
Patient Financial Services Mapping Guidelines

If your organization has separate and distinct cost centers for admitting and registration, patient claims processing, financial management, denial management and other followup services, map to the appropriate individual departments. If you use this department, do not create a primary instance of: department 05609, Admitting and Registration department; 05611, Inpatient Admitting department; 05612, Outpatient Admitting department; 05620, Financial Counseling Services department; 05670, Patient Accounting Services department; 05671, Credit and Collections department; or 05672, Consolidated Business Office department.

Patient Financial Services Workload Volumes

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Cycle Time - Number of days

Number of days from the date of patient discharge to when the claim is submitted to the payer.

Gross Dollars in Final Bill not Submitted to Payer

Total gross dollars included in the final patient bill but have not been submitted to the payer for the reporting period.

Gross Revenue Supported

Total dollar revenue receivable for inpatient, outpatient, non patient and external services and products supported by the department. Include revenue (non-operating) not directly related to patient care or generated in the day to day operations of the business units (donations, interest income from investments of unrestricted funds, gains on sale of property, grants, gifts and bonds, research funds, etc.).

Inpatient Accounts Billed

The total separate bills issued to payer sources for payment of inpatient services. Count only inpatient (i.e., patients with room charges) primary, secondary (or more) payers billed. Include each time a bill is sent as an Inpatient Accounts Billed, including rebills and billing of secondary payers. Exclude normal newborn accounts from the count.

This is a subset of Total Accounts Billed.
Inpatient Preadmissions

The total inpatients processed through a preregistration regimen. Exclude Emergency department admissions. Count all inpatients processed through a preregistration regimen (to gather demographic, insurance information, etc.) except those referred from the ED. Be sure to include preregistrations performed for urgent admissions referred to the department with less than 24 hours notice. Count preregistrations initiated by the physician's office if the information gathered (e.g., demographic material, insurance coverage information) benefits the Admitting department, not just the physician.

This is a subset of Patient Registrations.

Inpatient Registrations

The total inpatients processed through a preregistration regimen. Exclude Emergency department admissions. Count all inpatients processed through a preregistration regimen (to gather demographic, insurance information, etc.) except those referred from the ED. Be sure to include preregistrations performed for urgent admissions referred to the department with less than 24 hours notice. Count preregistrations initiated by the physician's office if the information gathered (e.g., demographic material, insurance coverage information) benefits the Admitting department, not just the physician.

This is a subset of Patient Registrations.

Original Claims

The total original claims (unique billing episode) submitted to a payer source. Include only first claims. For accounts with multiple cycles, such as long-term accounts, count only the first claims in the cycles. If you bill multiple payer sources, be sure to include each payer source in the count.

This is a subset of Total Accounts Billed.

Other Outpatient Registrations

The total registrations of all outpatients who do not fall into Special Outpatient Registrations category: generally for outpatient clinics and/or referrals (e.g., laboratory or radiology procedures). They may or may not use serial registration. Special Outpatient Registrations plus Other Outpatient Registrations should equal Total Outpatient Registrations. Each pre-registration or each "quick registration" that creates a patient encounter should be counted as an individual registration.

This is a subset of Patient Registrations.
Patient Registrations

The total patient registrations resulting in a separate patient account number. Exclude normal newborns. This includes all inpatient and outpatient registrations during the reporting period. Each registration creates a separate patient account number or equivalent identifier ultimately used by patient accounting to produce patient bills. Outpatient registrations may be either for one-time use or long-term use (i.e., serial). Outpatient serial registrations count as one registration, regardless of the number of times the patient returns for subsequent treatments/visits. The facility may have the patient stop by on subsequent visits to update financial information or just to review registration data for accuracy, but this does not affect the count if a new registration is not created. Do not include registrations for lab specimens (where only the specimens come to the hospital, and not the patient) in this count. Each pre-registration or each "quick registration" that creates a patient encounter should be counted as an individual registration.

Serial Registrations

The total outpatient registrations that are valid over a specified length of time regardless of the number of visits. Count those registrations that are not for one-time use. Typically, the patient registration is created at the first visit. On subsequent visits, the patient goes directly to the point of service without being registered again. The patient therefore has one account number associated with all of the visits. The facility may have the patient stop by on subsequent visits to update financial information or review registration data for accuracy, but this does not affect the count. This is a registration methodology, not a type of outpatient service (as in Special Outpatient Registrations). Therefore, you may record outpatient registrations in this category as well as in Involved Outpatient Registrations or Other Outpatient Registrations.

This is a subset of Patient Registrations.

Special Outpatient Registrations

The total outpatient registrations for the Emergency department, ambulatory surgery, cardiac cath lab, endoscopy lab, and other areas requiring patient consent for treatment. This includes registrations that require more intensive medical records involvement. Although patient consent is obtained for other types of accounts (e.g., clinic visits), this category includes patients that are treated in an ambulatory non-clinic, non-referral setting. There frequently are additional consent forms requir

This is a subset of Patient Registrations.

Total Accounts Billed

The total separate bills issued to payer sources for payment. A payer source may be primary, secondary, or tertiary. Count the total of all bills issued to payers. Include both electronic and hand-prepared bills, including rebills. If you send a bill to more than one payer, be sure to include all in the count. For example, a bill to a primary and a secondary carrier counts as two bills. Exclude billings performed on behalf of physicians when physicians receive the resulting reimbursement directly payable to them (i.e., split billing). For these types of billings, only the hospital-related bill should be included in the count. However, do count physician-related billings that are received by the hospital, credited as revenue, and then expensed as payment to physicians (i.e., combined billing). Note: For inpatient accounts, you may cycle bill long-term patient admissions. For outpatient accounts, you may have long life accounts used for some form of serial billing. Each cycle bill counts toward Accounts Billed using the above methodologies. Do not include data mailers in the count of Total Accounts Billed.
Total Claims Accepted
Total claims accepted into claims scrubber tool for editing prior to submission for the reporting period.

Total Claims Audited
Total number of claims audited for the reporting period. This will include claims that had requests for additional information that results in a delayed payment.

Total Claims Denied
Total number of claims that have been denied for the reporting period. This will include claims that have received payments for less than the full expected reimbursement amount.

Total Claims Remitted
Total number of claims remitted for the reporting period.

Total Claims that Pass Edits
Total number of claims that pass edits requiring no manual intervention by department staff for the reporting period.

Total Dollars Collected
Total dollars collected (both third party and patient co-pays) during the reporting period. This includes all cash collections from all sources related to patient accounts.

Total Zero Paid Claims Denied
Total number of zero paid claims denied for the reporting period.

Patient Financial Services Department Hour Elements

Paid Hours: Contract Labor
Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff
Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.
**Worked Hours: Billing Staff**

Total hours worked by staff performing billing, follow-up, and collections activities.

This is a subset of Worked Hours: Staff.

**Worked Hours: Credit and Collections Staff**

Total hours worked by staff performing revenue collections activities.

This is a subset of Worked Hours: Staff.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee’s normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Patient Registration and Admitting Staff**

Total hours worked by patient admitting and registration staff.

This is a subset of Worked Hours: Staff.
**Worked Hours: PreCertification, Financial Counseling Staff**

Total hours worked by patient precertification staff that are responsible for obtaining and presenting documentation to payers in an effort to obtain admission authorization and ensure reimbursement for hospital services and financial counseling staff that review cost of hospital services and payment options with patients.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Patient Financial Services Expense Elements**

**Contract Service Expense**

Total expense for services (e.g. collections, transcription, release of information, coding, etc.) provided by outside contractors.

This is a subset of Other Direct Operating Expense.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

**Supply Expense**

Total expense for department operating supplies.

This is a subset of Other Direct Operating Expense.
Patient Financial Services Mandatory Elements

The following data elements are mandatory for this department:

- Labor Expense
- Original Claims
- Other Direct Operating Expense
- Overtime Salary Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Patient Registrations
- Worked Hours: Staff

Patient Financial Services Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Cashiering services, e.g., collection of payments for previously billed services
- Collection fees, e.g., fees paid to a outside party to collect outstanding bills owed
- Credit screening, e.g., gathering and validation of patient financial information
- Financial assistance counseling, e.g., financial clearance processing, providing price estimates, completion of Medicaid, Charity and Disability applications
- Legal fees incurred for collection of patient accounts
- Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture.
- Pre-admission certification, e.g., communicating with insurance companies to gain approval for a person to be admitted to the hospital, granted prior to admission

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Administration of Indigent Drug Program, e.g., assisting patients to help qualify for assistance to be able to receive prescription medications; indigent drug programs (Revenue Cycle Management)
- Billing for mail order prescriptions
• Hospital chargemaster maintenance

• Insurance verification (concurrent review phase)—time spent obtaining certification for continued services while patient is in-house such as obtaining authorization for another day of stay or additional procedures

• Physician billing, unless combined on same bill with hospital services, e.g., processing the claim for reimbursement by third party payer

### 05608, Centralized Scheduling

This department manages inbound and outbound calls, faxes, and or electronic communications for many types of modalities throughout the hospital, to ensure an appointment is generated for the patient-related activity.

### Centralized Scheduling Mapping Guidelines

If the cost center performs only rehabilitative and or surgical services scheduling within the facility, this department is not an appropriate choice. Rehabilitative services scheduling should utilize the 04899, Rehabilitation Services Administration department, and Surgical services scheduling should utilize the 03099, Surgical Services Administration department.

### Centralized Scheduling Workload Volumes

#### Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

#### Inbound Calls

This represents the number of telephone calls initiated by the customer whom the facility typically offers support, handle problematic questions, and offer suggestions, with the intention to solve the issue of the customers.

#### Inbound Communications

This represents the number of communications initiated by the customer whom the facility typically offers support, handle problematic questions, and offer suggestions, with the intention to solve the issues of the customers. This value is the sum of “inbound calls” and “inbound other” communications.
**Other Inbound Communications**

This represents the number of other communications such as but not limited to: faxes, emails, online requests that are initiated by the customer whom the facility typically offers support, handle problematic questions, and offer suggestions, with the intention to solve the issues of the customers.

**Other Outbound Communications**

This represents the number of other communications such as but not limited to: faxes, emails, online requests that are initiated by the organization.

**Outbound Calls**

This represents the number of telephone calls initiated by the organization.

**Outbound Communications**

This represents the number of communications initiated by the organization, reaching customers that are typically not expecting this form of communication. This value is the sum of “outbound calls” and “outbound other” communications.

**Service Level Percent of Call**

This number represents the actual service level for the reporting period. Example: With the above level goal you were expect to achieve 85 percent but you actually achieved 92 percent, please enter 92.

**Service Level Percentage Goal**

This number represents the percent for which your facility identifies that a call should be answered within the service level time it should answer a call. Example: The service level of time is 45 seconds and your facility should answer 85 percent of the calls within that time, you would enter 85.

**Service Level Time**

This number represents the time that your facility has deemed sufficient for a call to be answered. Please report this value in seconds.

**Total Abandoned Calls**

Total number of calls where the caller hangs up after being placed on hold while waiting to speak to a representative during the reporting period.

This is a subset of Total Inbound Calls.
Total Appointment Activity
Total number of patient appointments added, moved, or cancelled during the reporting period. An appointment is defined as a distinct block of scheduled time for a specific patient service, which includes visits, procedures, treatments, consultations, education, and/or tests.

Total Communications
This represents the total communications that are related to appointments within the organization. This value is the sum of “inbound communications” and “outbound communications.”

Centralized Scheduling Department Hour Elements

Paid Hours: Contract Labor
Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff
Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Data Analyst
Total hours worked by data analyst technical staff responsible for extracting data from information systems and performing statistical analysis.

This is a subset of Worked Hours: Staff.

Worked Hours: Management
Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff
Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Registration Staff**

Total hours worked by patient admitting and registration staff performing registration activities.

This is a subset of Worked Hours: Staff

**Worked Hours: Scheduling Staff**

Total hours worked by a schedulers responsible for generating a distinct block of time for a patient to receive a service.

This is a subset of Worked Hours: Staff

**Worked Hours: Scheduling/Registration Staff**

Total hours worked by a scheduler/registrar responsible for generating a distinct block of time and completing a registrations for a patient to receive a service within the hospital.

This is a subset of Worked Hours: Staff

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Centralized Scheduling Expense Elements**

**Contract Service Expense**

Total expense for services (e.g. collections, transcription, release of information, coding, etc.) provided by outside contractors.

This is a subset of Other Direct Operating Expense.
**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

**Supply Expense**

Total expense for department operating supplies.

This is a subset of Other Direct Operating Expense.

**Centralized Scheduling Mandatory Elements**

The following data elements are mandatory for this department:

- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Total Appointment Activity
- Total Communications
- Worked Hours: Staff

**Centralized Scheduling Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:
- Patient Scheduling includes management of inbound and outbound calls, faxes, and or electronic communications to ensure an appointment is generated for the patient-related activity

**05609, Admitting and Registration**

This department performs all patient admitting and patient registration functions, including but not limited to the Emergency Department.

**Admitting and Registration Mapping Guidelines**

If your organization has separate cost centers for inpatient admitting and outpatient registration, map instead to the 05611, Inpatient Admitting department and the 05612, Outpatient Registration department. If you use this department, do not create a primary instance of Inpatient Admitting or Outpatient Registration.

**Admitting and Registration Workload Volumes**

**Adjusted Discharges Supported**

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

**Inpatient Preadmissions**

The total inpatients processed through a preregistration regimen. Exclude Emergency department admissions. Count all inpatients processed though a preregistration regimen (to gather demographic, insurance information, etc.) except those referred from the ED. Be sure to include preregistrations performed for urgent admissions referred to the department with less than 24 hours notice. Count preregistrations initiated by the physician's office if the information gathered (e.g., demographic material, insurance coverage information) benefits the Admitting department, not just the physician.

This is a subset of Inpatient Registrations.
Inpatient Registrations

The total inpatients processed through a preregistration regimen. Exclude Emergency department admissions. Count all inpatients processed through a preregistration regimen (to gather demographic, insurance information, etc.) except those referred from the ED. Be sure to include preregistrations performed for urgent admissions referred to the department within less than 24 hours notice. Count preregistrations initiated by the physician's office if the information gathered (e.g., demographic material, insurance coverage information) benefits the Admitting department, not just the physician.

This is a subset of Patient Registrations.

Other Outpatient Registrations

The total registrations of all outpatients who do not fall into Special Outpatient Registrations category: generally for outpatient clinics and/or referrals (e.g., laboratory or radiology procedures). They may or may not use serial registration. Special Outpatient Registrations plus Other Outpatient Registrations should equal Total Outpatient Registrations. Each pre-registration or each "quick registration" that creates a patient encounter should be counted as an individual registration.

This is a subset of Patient Registrations.

Patient Registrations

The total patient registrations resulting in a separate patient account number. Exclude normal newborns. This includes all inpatient and outpatient registrations during the reporting period. Each registration creates a separate patient account number or equivalent identifier ultimately used by patient accounting to produce patient bills. Outpatient registrations may be either for one-time use or long-term use (i.e., serial). Outpatient serial registrations count as one registration, regardless of the number of times the patient returns for subsequent treatments/visits. The facility may have the patient stop by on subsequent visits to update financial information or just to review registration data for accuracy, but this does not affect the count if a new registration is not created. Do not include registrations for lab specimens (where only the specimens come to the hospital, and not the patient) in this count. Each pre-registration or each "quick registration" that creates a patient encounter should be counted as an individual registration.

Serial Registrations

The total outpatient registrations that are valid over a specified length of time regardless of the number of visits. Count those registrations that are not for one-time use. Typically, the patient registration is created at the first visit. On subsequent visits, the patient goes directly to the point of service without being registered again. The patient therefore has one account number associated with all of the visits. The facility may have the patient stop by on subsequent visits to update financial information or review registration data for accuracy, but this does not affect the count. This is a registration methodology, not a type of outpatient service (as in Special Outpatient Registrations). Therefore, you may record outpatient registrations in this category as well as in Involved Outpatient Registrations or Other Outpatient Registrations.

This is a subset of Patient Registrations.
Special Outpatient Registrations

The total outpatient registrations for the Emergency department, ambulatory surgery, cardiac cath lab, endoscopy lab, and other areas requiring patient consent for treatment. This includes registrations that require more intensive medical records involvement. Although patient consent is obtained for other types of accounts (e.g., clinic visits), this category includes patients that are treated in an ambulatory non-clinic, non-referral setting. There frequently are additional consent forms requir

This is a subset of Patient Registrations.

Admitting and Registration Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.
Worked Hours: PreCertification, Financial Counseling Staff

Total hours worked by patient precertification staff that are responsible for obtaining and presenting documentation to payers in an effort to obtain admission authorization and ensure reimbursement for hospital services and financial counseling staff that review cost of hospital services and payment options with patients.

This is a subset of Worked Hours: Staff.

Worked Hours: Registration Staff

Total hours worked by patient admitting and registration staff performing registration activities.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Admitting and Registration Expense Elements

Contract Service Expense

Total expense for services (e.g. collections, transcription, release of information, coding, etc.) provided by outside contractors.

This is a subset of Other Direct Operating Expense.

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.
Supply Expense

Total expense for department operating supplies.

This is a subset of Other Direct Operating Expense.

Admitting and Registration Mandatory Elements

The following data elements are mandatory for this department:

- Inpatient Registrations
- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Patient Registrations
- Worked Hours: Staff

Admitting and Registration Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Admitting and registration activities, e.g., receipt of reservation request, collection of patient identification data/insurance information, assignment of patient account numbers
- Ambulatory Surgery Registrations-for hospital based Ambulatory Surgery departments
- Emergency Room Registrations
- Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
- Patient reception, e.g., greeting, checking in of patients, answering phone calls
- Registration Desk
- Urgent Care Registrations- for hospital based Urgent Care departments

Exclude the hours, costs and volumes (where applicable) associated with the following functions:
• Birth certificate preparation - the time needed to complete and submit the documentation required by
the state
• Credit screening, e.g., gathering and validation of patient financial information
• Financial assistance counseling, e.g., financial clearance processing, providing price estimates,
completion of Medicaid, Charity and Disability applications
• Information Desk
• Insurance verification - initial time spent obtaining name and identification and pre-admission
certification during the admission process
• Insurance verification (billing phase)—include time spent on validation of coverage
• Lab Specimen Registration
• Patient billing - the processing of patient claims for reimbursement, submission of claims to payer.
This does not include charge capture.
• Patient Scheduling includes management of inbound and outbound calls, faxes, and or electronic
communications to ensure an appointment is generated for the patient-related activity
• Pre-admission Certification (follow-up) while patient is in-house or retrospective review, e.g., to assist
with managing providers to ensure they are not treating patients with too many services
• Pre-admission certification, e.g., communicating with insurance companies to gain approval for a
person to be admitted to the hospital, granted prior to admission
• Registration services for Ambulatory Care Clinics, e.g., departments mapped to the 022XX series
• Surgical procedure scheduling (e.g. generating preference cards, assigning staff and surgical rooms
based on the type of case)

05611, Inpatient Admitting

This department performs inpatient admitting functions.

Inpatient Admitting Mapping Guidelines

If less than 80% of the cost center’s activity relates to inpatient admitting, use an alternate department. If
the department includes outpatient registration functions, use the 05609, Admitting and Registration
department. If you use this department, do not create a primary instance of Admitting and Registration.
Inpatient Admitting Workload Volumes

Adjusted Discharges Supported
Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non-hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Emergency Department Referred Admissions
Total inpatient admissions referred through Emergency Department.

This is a subset of Inpatient Admissions.

Inpatient Admissions
Total facility inpatient admissions. Exclude normal newborns.

Inpatient Preadmissions
The total inpatients processed through a preregistration regimen. Exclude Emergency department admissions. Count all inpatients processed through a preregistration regimen (to gather demographic, insurance information, etc.) except those referred from the ED. Be sure to include preregistrations performed for urgent admissions referred to the department with less than 24 hours notice. Count preregistrations initiated by the physician's office if the information gathered (e.g., demographic material, insurance coverage information) benefits the Admitting department, not just the physician.

This is a subset of Inpatient Admissions.

Urgent Inpatient Admissions
The total inpatients referred for admission within 24 hours of notice. Count all patients referred for admission within 24 hours notice; exclude ED referrals. This category may overlap with inpatient preadmissions for those preadmissions referred with less than 24 hours notice. In this situation, include cases in both categories.

This is a subset of Inpatient Admissions.
Inpatient Admitting Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Admitting Staff

Total hours worked by patient admitting staff performing registration activities.

This is a subset of Worked Hours: Staff.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee’s normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.
**Worked Hours: PreCertification, Financial Counseling Staff**

Total hours worked by patient precertification staff that are responsible for obtaining and presenting documentation to payers in an effort to obtain admission authorization and ensure reimbursement for hospital services and financial counseling staff that review cost of hospital services and payment options with patients.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Inpatient Admitting Expense Elements**

**Contract Service Expense**

Total expense for services (e.g. collections, transcription, release of information, coding, etc.) provided by outside contractors.

This is a subset of Other Direct Operating Expense.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

**Supply Expense**

Total expense for department operating supplies.

This is a subset of Other Direct Operating Expense.
Inpatient Admitting Mandatory Elements

The following data elements are mandatory for this department:

- Inpatient Admissions
- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Worked Hours: Staff

Inpatient Admitting Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Admitting and registration activities, e.g., receipt of reservation request, collection of patient identification data/insurance information, assignment of patient account numbers
- Patient reception, e.g., greeting, checking in of patients, answering phone calls
- Registration Desk

05612, Outpatient Registration

This department performs outpatient registration functions, including Emergency Department patient registration.

Outpatient Registration Mapping Guidelines

If less than 80% of the cost center's activity relates to outpatient registration, use an alternate department. If the department includes inpatient admitting functions, use the 05609, Admitting and Registration department. If you use this department, do not create a primary instance of Admitting and Registration.

Outpatient Registration Workload Volumes

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non-hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Other Outpatient Registrations

The total registrations of all outpatients who do not fall into Special Outpatient Registrations category: generally for outpatient clinics and/or referrals (e.g., laboratory or radiology procedures). They may or may not use serial registration. Special Outpatient Registrations plus Other Outpatient Registrations should equal Total Outpatient Registrations. Each pre-registration or each "quick registration" that creates a patient encounter should be counted as an individual registration.

This is a subset of Patient Registrations.
Outpatient Registrations

The total outpatient registrations resulting in a separate patient account number. This includes all outpatient registrations (emergency, referred, observation, ambulatory surgery, etc.) created during the reporting period. Do not include registrations for lab specimens (where only the specimens come to the hospital, and not the patient) in this count. Serial patient registrations may be included in this count. Each pre-registration or each "quick registration" that creates a patient encounter should be counted as an individual registration.

Serial Registrations

The total outpatient registrations that are valid over a specified length of time regardless of the number of visits. Count those registrations that are not for one-time use. Typically, the patient registration is created at the first visit. On subsequent visits, the patient goes directly to the point of service without being registered again. This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**
Total hours worked, include regular and overtime hours. Exclude on call stand by hours.
Outpatient Registration Expense Elements

Contract Service Expense
Total expense for services (e.g. collections, transcription, release of information, coding, etc.) provided by outside contractors.

This is a subset of Other Direct Operating Expense.

Labor Expense
Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Other Direct Operating Expense
Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense
Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Supply Expense
Total expense for department operating supplies.

This is a subset of Other Direct Operating Expense.

Outpatient Registration Mandatory Elements
The following data elements are mandatory for this department:

- Labor Expense
- Other Direct Operating Expense
- Outpatient Registrations
- Paid Hours: Contract Labor
Paid Hours: Staff

Worked Hours: Staff

**Outpatient Registration Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Ambulatory Surgery Registrations for hospital based Ambulatory Surgery departments
- Emergency Room Registrations
- Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
- Patient reception, e.g., greeting, checking in of patients, answering phone calls
- Urgent Care Registrations for hospital based Urgent Care departments

- Registration services for Ambulatory Care Clinics, e.g., departments mapped to the 022XX series
- Surgical procedure scheduling (e.g. generating preference cards, assigning staff and surgical rooms based on the type of case)
05620, Financial Counseling Services

This department performs financial counseling services which may include providing financial clearance processing for planned inpatient and ambulatory admissions including insurance verification and pre-authorization, collection of co-pays, setting up payment plans for self pay patients, providing price estimates, completion of Medicaid, Charity and Disability applications and coordination of Medicaid spend down requirements.

Financial Counseling Services Workload Volumes

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Charity Care Applications Facilitated

Total number of initial charity care applications received by department staff for the reporting period. This does not include follow-up requests for information.

This is a subset of Total Patients Counseled.

Disability Applications Facilitated

Total number of initial disability applications facilitated by department staff for the reporting period.

This is a subset of Total Patients Counseled.

Gross Revenue Supported

Total dollar revenue receivable for inpatient, outpatient, non patient and external services and products supported by the department. Include revenue (non-operating) not directly related to patient care or generated in the day to day operations of the business units (donations, interest income from investments of unrestricted funds, gains on sale of property, grants, gifts and bonds, research funds, etc.).

Medicaid Applications Facilitated

Total number of initial medicaid applications facilitated by department staff for the reporting period.

This is a subset of Total Patients Counseled.
Self Pay Patients Reviewed
Total number of patients registered as self pay patients only and reviewed by department staff for the reporting period. Do not include balance after insurance of denials for non-coverage of service.

This is a subset of Total Patients Counseled.

Total Patients Counseled
Total number of initial charity care, medicaid and disability applications facilitated as well as self pay patient accounts reviewed during the reporting period.

Financial Counseling Services Department Hour Elements

Paid Hours: Contract Labor
Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff
Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Admitting Staff
Total hours worked by patient admitting staff performing registration activities.

This is a subset of Worked Hours: Staff.

Worked Hours: Financial Counseling staff
Total hours worked by financial counseling staff that review cost of hospital services and payment options with patients.

This is a subset of Worked Hours: Staff.

Worked Hours: Management
Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.
Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Pre Certification Staff

Total hours worked by patient pre-certification staff that are responsible for obtaining and presenting documentation to payers in an effort to obtain admission authorization and ensure reimbursement for hospital services.

This is a subset of Worked Hours: Staff.

Worked Hours: PreCertification, Financial Counseling Staff

Total hours worked by patient pre-certification staff that are responsible for obtaining and presenting documentation to payers in an effort to obtain admission authorization and ensure reimbursement for hospital services and financial counseling staff that review cost of hospital services and payment options with patients.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Financial Counseling Services Expense Elements

Contract Service Expense

Total expense for services (e.g. collections, transcription, release of information, coding, etc.) provided by outside contractors.

This is a subset of Other Direct Operating Expense.
Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Supply Expense

Total expense for department operating supplies.

This is a subset of Other Direct Operating Expense.

Financial Counseling Services Mandatory Elements

The following data elements are mandatory for this department.

- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Total Patients Counseled
- Worked Hours: Staff

Financial Counseling Services Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:
- Credit screening, e.g., gathering and validation of patient financial information
- Financial assistance counseling, e.g., financial clearance processing, providing price estimates, completion of Medicaid, Charity and Disability applications
- Insurance verification - initial time spent obtaining name and identification and pre-admission certification during the admission process
- Pre-admission certification, e.g., communicating with insurance companies to gain approval for a person to be admitted to the hospital, granted prior to admission

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Insurance verification (concurrent review phase)—time spent obtaining certification for continued services while patient is in-house such as obtaining authorization for another day of stay or additional procedures
- Pre-admission Certification (follow-up) while patient is in-house or retrospective review, e.g., to assist with managing providers to ensure they are not treating patients with too many services

**05630, Medical Plan Contracting Services**

This department performs medical plan service contract management (i.e. Managed Care, Commercial Plan contracts) which may include contract preparation, financial and contract analysis, revenue projections, contract modeling, utilization and outcomes analysis, strategic planning (not market research) and contract negotiations.

**Medical Plan Contracting Services Mapping Guidelines**

If less than 80% of the cost center’s activity relates to medical plan contracting, use an alternate department. Options include G5600, Other Revenue Cycle Management department.

**Medical Plan Contracting Services Workload Volumes**

**Adjusted Discharges Supported**

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.
Gross Revenue Supported

Total dollar revenue receivable for inpatient, outpatient, non patient and external services and products supported by the department. Include revenue (non-operating) not directly related to patient care or generated in the day to day operations of the business units (donations, interest income from investments of unrestricted funds, gains on sale of property, grants, gifts and bonds, research funds, etc.).

Total Payment Contract Proposals

The total service reimbursement contract proposals prepared. They may take the form of capitated, case based, discounted payment, or per diem reimbursement and may be with HMOs or PPOs, or other government agencies. The proposal may or may not have resulted in a contractual agreement. Do not count the number of times the proposal may have been reworked, just the final proposal.

Medical Plan Contracting Services Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Analyst

Total hours worked by analysis staff that track financial status by monitoring variances from contracts and budgets, assemble and summarize data and prepare reports of findings, analyses, and recommendations.

This is a subset of Worked Hours: Staff.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Marketing and Negotiating Staff

Total hours worked by marketing and contract negotiating staff.

This is a subset of Worked Hours: Staff.
**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee’s normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Medical Plan Contracting Services Expense Elements**

**Contract Service Expense**

Total expense for services (e.g. collections, transcription, release of information, coding, etc.) provided by outside contractors.

This is a subset of Other Direct Operating Expense.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.
This is a subset of Labor Expense.

**Supply Expense**

Total expense for department operating supplies.

This is a subset of Other Direct Operating Expense.

**Medical Plan Contracting Services Mandatory Elements**

The following data elements are mandatory for this department.

- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Total Payment Contract Proposals
- Worked Hours: Staff

**Medical Plan Contracting Services Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Medical Plan Contracting - The contracting, tracking of contracts, and financial support for negotiations

**05640, Health Information Management with Medical Transcription**

This department includes the staff responsible for assembling, scanning, indexing, analyzing, filing, retrieving, coding, clinical documentation improvement, copying, archiving, storage, release of information, maintaining the integrity of the Master Patient Index and general administration, maintenance, and utilization of patient records and medical transcription.
Health Information Management with Medical Transcription Mapping Guidelines

If your cost center(s) do not include medical transcription, another option might be the Health Information Management without Transcription department.

Health Information Management with Medical Transcription Workload Volumes

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Average Daily Discharges Not Final Billed (DNFB)

This number is derived by adding the daily number of Discharges Not Final Billed for each day of the reporting period and dividing by the Days in Period.

Average Daily Discharges Not Final Coded (DNFC)

This number is derived by adding the daily number of Discharges Not Final Coded for each day of the reporting period and dividing by the Days in Period.

Charts Abstracted

The total number of charts abstracted by the department staff for the reporting period. Count charts abstracted as one chart per episode of care for which abstraction is needed unless it is a chart abstraction specific to a cancer type. In that case, count one chart abstracted per type of cancer. For example, if Mary Jones has breast cancer and lung cancer and was treated for both cancers during one inpatient stay, it would count as two charts abstracted.

Clinic Medical Records Completed

The total number of Ambulatory Clinic medical records completed during the reporting period. Completed refers to records that contain, at a minimum, a signed history/physical history and physical, operative reports (if appropriate), and discharge summary.

This is a subset of Patient Records Completed.
Documents Scanned
The total number of documents scanned per period.

Duplicate or Erroneous Patient Numbers Corrected
The total number of duplicate or erroneous patient record numbers corrected by department personnel.

Emergency Department Records Coded
Total number of patient records coded for Emergency Department visits.
This is a subset of Patient Records Coded.

Inpatient Admissions
The total facility inpatient admissions. Exclude normal newborns.

Inpatient Record Completion Time (Days)
The average inpatient record completion time (in days). Calculate this by using the Medical Records Worksheet. This worksheet uses a sampling of 30 records.

Inpatient Records Coded
The total number of patient records coded for inpatient stays.
This is a subset of Patient Records Coded.

Inpatient Records Completed
The total medical records of facility inpatients completed. Exclude normal newborns. Count only inpatient records. Do not include intensive ambulatory records, such as surgery, cardiac catheterization, emergency, etc.
This is a subset of Patient Records Completed.

Lines of Transcription Outsourced
The total transcribed lines purchased from an external contract service(s). If the department does not internally purchase transcription, enter "0." If the data is not available, leave the field blank. If keystrokes are maintained, divide by 65 to convert to lines of transcription.
This is a subset of Lines of Transcription Provided.
Lines of Transcription Produced Internally

The total transcribed lines produced by department staff. If the department does not internally produce transcription, enter "0." If the data is not available, leave the field blank. If keystrokes are maintained, divide by 65 to convert to lines of transcription.

This is a subset of Lines of Transcription Provided.

Lines of Transcription Provided

The total lines of transcription provided (either produced and/or purchased). If for externally purchased transcription only dollars are available, obtain the average dollar per line rate charged by the contract source to estimate the transcribed lines (charged dollars / average rate = lines). If the department produces and purchases transcription and one of the values cannot be provided, leave this field blank. If keystrokes are maintained, divide by 65 to convert to lines of transcription.

Number of Follow-up Queries

The number of follow-up queries conducted for active patients in the disease database.

Number of Medical Records Requested

Total number of medical records requested by departments for patient appointments for the reporting period.

Number of Medical Records Retrieved

Total number of medical records retrieved by departments for patient appointments for the reporting period.

Observation Medical Records Completed

Total number of observation patient medical records completed during the reporting period. Completed refers to records that contain, at a minimum, a signed history/physical history and physical, operative reports (if appropriate) and discharge summary.

This is a subset of Patient Records Completed.

Observation Records Coded

Total number of medical records coded for patients admitted for observation only. These patients may be admitted as an inpatient.

This is a subset of Patient Records Coded.
Outpatient Ancillary Medical Records Completed

The total number of outpatient ancillary medical records completed during the reporting period. Completed refers to records that contain a physician order, medication list and drug reactions, allergy list and results retrieval for laboratory, radiology, and other testing results.

This is a subset of Patient Records Completed.

Outpatient Ancillary Service Records Coded

Total number of outpatient ancillary service records coded for tests and procedures. Do not include ED, Same Day Surgery or Outpatient Clinic Visits.

This is a subset of Patient Records Coded.

Outpatient Clinic Records Coded

Total number of outpatient records coded for outpatient clinic visits.

This is a subset of Patient Records Coded.

Outpatient Registrations

The total outpatient registrations resulting in a separate patient account number. This includes all outpatient registrations (emergency, clinic, referred, etc.) created during the reporting period. Do not include registrations for lab specimens (where only the specimens come to the hospital, and not the patient) in this count.

Patient Records Coded

The total number of patient medical records coded by all payer types, including normal newborns. Count all patient medical records (inpatient, Ambulatory clinic, observation, outpatient ancillary, same day surgery, and emergency patients) coded during the reporting period.

Patient Records Completed

The total discrete patient medical records (i.e., charts) completed, excluding normal newborns. Count all patient medical records (inpatient, Ambulatory clinic, observation, outpatient ancillary, same day surgery, and emergency patients) completed during the reporting period. The medical record must have had some action taken (e.g., coding, reviewing for completeness), not merely filing a document in a folder or indexing for electronic storage.
Patient Records Completed (inc Newborns)

The total discrete patient medical records (i.e., charts) completed, including normal newborns. Count all patient medical records (inpatient, Ambulatory clinic, observation, outpatient ancillary, same day surgery, and emergency patients) completed during the reporting period. The medical record must have had some action taken (e.g., coding, reviewing for completeness), not merely filing a document in a folder or indexing for electronic storage.

Records Filed

The total medical records filed and refiled. Count documents pulled on user requests and refiled after their return as well as records filed for the first time. For example, a record requested, pulled, and refiled upon return counts as one record filed.

Requests for Information Processed

The total number of release of information requests processed by the department for the reporting period. This value should include all requests for both in-house and outsourced work.

Same Day Surgery (SDS) Medical Records Completed

The total number of same day surgery/ambulatory surgery medical records completed during the reporting period. Completed refers to records that contain, at a minimum, signed history and physical, operative reports (if appropriate) and discharge summary.

This is a subset of Patient Records Completed.

Same Day Surgery Records Coded

Total number of medical records coded for same day surgical procedures.

This is a subset of Patient Records Coded.

Third Party Audit Requests Processed

The total number of third party audit requests including RAC requests processed by the department for the reporting period. This value should include all requests for both in-house and outsourced work.

This is a subset of Requests for Information Processed.

Total Incomplete Medical Records Greater Than 30 Days

The total number of medical records greater than 30 days incomplete during the reporting period. These are defined as records missing documents, physician signature or not in the permanent file.
Turnaround Time for Release of Information Req Processed
The number of days from receipt of requests through time of mailing, emailing or faxing.

Turnaround Time for Transcribed Discharge Summaries
The number of hours from receipt of dictated discharge summary to indexing or placement in the medical record.

Turnaround Time for Transcribed History and Physicals
The number of hours from receipt of dictated history and physical to indexing or placement in the medical record.

Turnaround Time for Transcribed Operative Reports
The number of hours from receipt of dictated operative report to indexing or placement in the medical record.

Turnaround Time for Transcribed Progress Notes
The number of hours from receipt of dictated progress note to indexing or placement in the medical record.

Health Information Management with Medical Transcription Department

Hour Elements

Paid Hours: Contract Labor
Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff
Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Clinical Documentation Improvement Specialist
Total number of hours worked by all Clinical Documentation Improvement Specialists.

This is a subset of Worked Hours: Staff.
**Worked Hours: Coder**

Total number of hours worked by medical coding professionals for all payer types.

This is a subset of Worked Hours: Staff.

**Worked Hours: Disease Registry Abstractor**

Total number of hours worked by all disease registry personnel. Include worked hours for all registries which reside in the department with the exception of Birth or Trauma Registry.

This is a subset of Worked Hours: Staff.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee’s normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Records Scanning Specialist Staff**

Total number of hours worked by staff who perform imaging or scanning of medical records and convert paper documents into digital format.

This is a subset of Worked Hours: Staff.
Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Worked Hours: Transcriptionist and Transcriptionist Editor

Total hours worked by medical transcriptionist staff.

This is a subset of Worked Hours: Staff.

Health Information Management with Medical Transcription Expense Elements

Contract Service Expense

Total expense for services (e.g. collections, transcription, release of information, coding, etc.) provided by outside contractors.

This is a subset of Other Direct Operating Expense.

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Supply Expense

Total expense for department operating supplies.

This is a subset of Other Direct Operating Expense.
Health Information Management with Medical Transcription Mandatory Elements

The following elements are mandatory for this department.

- Labor Expense
- Lines of Transcription Produced Internally
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Patient Records Completed (inc Newborns)
- Worked Hours: Staff

Health Information Management with Medical Transcription Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Audit of coding for patient charges/billing
- Birth certificate preparation - the time needed to complete and submit the documentation required by the state
- Clinical Documentation Improvement (CDI), e.g., activities that facilitate the accurate representation of a patient's clinical status which is translated into coded data
- Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
- Medical records transcription, e.g., lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments into this department
- Tumor Registry - the activities involved in capturing history, diagnosis, treatment and health status for tumor patients

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Corporate Compliance Officer - activities related to overseeing and managing regulatory compliance issues within the organization
- Hospital Quality Assurance, e.g., activities surrounding the collecting and disseminating of data to monitor and improve patient care at the facility (hospital level quality management)
• Medical Library functions, e.g., Librarian

• Maintaining Medical records (the systematic documentation of a single patient's medical history and care across time) for Ambulatory Care Clinics (if onsite patient records)

• Medical records transcription, e.g., lines produced internally or outsourced (Imaging)

• Medical records transcription, e.g., lines produced internally or outsources (Laboratory). This includes transcription from dictation capture to document distribution and storage, including associate transcription.

• Privacy Officer - activities related to the development, implementation, maintenance of, and adherence to policies and procedures covering the privacy of, and access to, patient health information in compliance with federal and state laws

05641, Health Information Management without Transcription

This department includes the staff responsible for assembling, scanning, indexing, analyzing, filing, retrieving, coding, clinical documentation improvement, copying, archiving, storage, release of information, maintaining the integrity of the Master Patient Index and general administration, maintenance, and utilization of patient records.

Health Information Management without Transcription Mapping Guidelines

If your cost center(s) include medical transcription, another option might be the Health Information Management with Transcription department.

Health Information Management without Transcription Workload Volumes

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Average Daily Discharges Not Final Billed (DNFB)

This number is derived by adding the daily number of Discharges Not Final Billed for each day of the reporting period and dividing by the Days in Period.
Average Daily Discharges Not Final Coded (DNFC)
This number is derived by adding the daily number of Discharges Not Final Coded for each day of the reporting period and dividing by the Days in Period.

Charts Abstracted
The total number of charts abstracted by the department staff for the reporting period. Count charts abstracted as one chart per episode of care for which abstraction is needed unless it is a chart abstraction specific to a cancer type. In that case, count one chart abstracted per type of cancer. For example, if Mary Jones has breast cancer and lung cancer and was treated for both cancers during one inpatient stay, it would count as two charts abstracted.

Clinic Medical Records Completed
The total number of Ambulatory Clinic medical records completed during the reporting period. Completed refers to records that contain, at a minimum, a signed history/physical history and physical, operative reports (if appropriate), and discharge summary.

This is a subset of Patient Records Completed.

Documents Scanned
The total number of documents scanned per period.

Duplicate or Erroneous Patient Numbers Corrected
The total number of duplicate or erroneous patient record numbers corrected by department personnel.

Emergency Department Records Coded
Total number of patient records coded for Emergency Department visits.

This is a subset of Patient Records Coded.

Inpatient Admissions
The total facility inpatient admissions. Exclude normal newborns.

Inpatient Record Completion Time (Days)
The average inpatient record completion time (in days). Calculate this by using the Medical Records Worksheet. This worksheet uses a sampling of 30 records.
**Inpatient Records Coded**

The total number of patient records coded for inpatient stays.

This is a subset of Patient Records Coded.

**Inpatient Records Completed**

The total medical records of facility inpatients completed. Exclude normal newborns. Count only inpatient records. Do not include intensive ambulatory records, such as surgery, cardiac catheterization, emergency, etc.

This is a subset of Patient Records Completed.

**Number of Follow-up Queries**

The number of follow-up queries conducted for active patients in the disease database.

**Number of Medical Records Requested**

Total number of medical records requested by departments for patient appointments for the reporting period.

**Number of Medical Records Retrieved**

Total number of medical records retrieved by departments for patient appointments for the reporting period.

**Observation Medical Records Completed**

Total number of observation patient medical records completed during the reporting period. Completed refers to records that contain, at a minimum, a signed history/physical history and physical, operative reports (if appropriate) and discharge summary.

This is a subset of Patient Records Completed.

**Observation Records Coded**

Total number of medical records coded for patients admitted for observation only. These patients may be admitted as an inpatient.

This is a subset of Patient Records Coded.
Outpatient Ancillary Medical Records Completed

The total number of outpatient ancillary medical records completed during the reporting period. Completed refers to records that contain a physician order, medication list and drug reactions, allergy list and results retrieval for laboratory, radiology, and other testing results.

This is a subset of Patient Records Completed.

Outpatient Ancillary Service Records Coded

Total number of outpatient ancillary service records coded for tests and procedures. Do not include ED, Same Day Surgery or Outpatient Clinic Visits.

This is a subset of Patient Records Coded.

Outpatient Clinic Records Coded

Total number of outpatient records coded for outpatient clinic visits.

This is a subset of Patient Records Coded.

Outpatient Registrations

The total outpatient registrations resulting in a separate patient account number. This includes all outpatient registrations (emergency, clinic, referred, etc.) created during the reporting period. Do not include registrations for lab specimens (where only the specimens come to the hospital, and not the patient) in this count.

Patient Records Coded

The total number of patient medical records coded by all payer types, including normal newborns. Count all patient medical records (inpatient, Ambulatory clinic, observation, outpatient ancillary, same day surgery, and emergency patients) coded during the reporting period.

Patient Records Completed

The total discrete patient medical records (i.e., charts) completed, excluding normal newborns. Count all patient medical records (inpatient, Ambulatory clinic, observation, outpatient ancillary, same day surgery, and emergency patients) completed during the reporting period. The medical record must have had some action taken (e.g., coding, reviewing for completeness), not merely filing a document in a folder or indexing for electronic storage.
Patient Records Completed (inc Newborns)

The total discrete patient medical records (i.e., charts) completed, including normal newborns. Count all patient medical records (inpatient, Ambulatory clinic, observation, outpatient ancillary, same day surgery, and emergency patients) completed during the reporting period. The medical record must have had some action taken (e.g., coding, reviewing for completeness), not merely filing a document in a folder or indexing for electronic storage.

Records Filed

The total medical records filed and refiled. Count documents pulled on user requests and refiled after their return as well as records filed for the first time. For example, a record requested, pulled, and refiled upon return counts as one record filed.

Requests for Information Processed

The total number of release of information requests processed by the department for the reporting period. This value should include all requests for both in-house and outsourced work.

Same Day Surgery (SDS) Medical Records Completed

The total number of same day surgery/ambulatory surgery medical records completed during the reporting period. Completed refers to records that contain, at a minimum, signed history and physical, operative reports (if appropriate) and discharge summary.

This is a subset of Patient Records Completed.

Same Day Surgery Records Coded

Total number of medical records coded for same day surgical procedures.

This is a subset of Patient Records Coded.

Third Party Audit Requests Processed

The total number of third party audit requests including RAC requests processed by the department for the reporting period. This value should include all requests for both in-house and outsourced work.

This is a subset of Requests for Information Processed.

Total Incomplete Medical Records Greater Than 30 Days

The total number of medical records greater than 30 days incomplete during the reporting period. These are defined as records missing documents, physician signature or not in the permanent file.
Turnaround Time for Release of Information Req Processed

The number of days from receipt of requests through time of mailing, emailing or faxing.

Turnaround Time for Transcribed Progress Notes

The number of hours from receipt of dictated progress note to indexing or placement in the medical record.

Health Information Management without Transcription Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Clinical Documentation Improvement Specialist

Total number of hours worked by all Clinical Documentation Improvement Specialists.

This is a subset of Worked Hours: Staff.

Worked Hours: Coder

Total number of hours worked by medical coding professionals for all payer types.

This is a subset of Worked Hours: Staff.

Worked Hours: Disease Registry Abstractor

Total number of hours worked by all disease registry personnel. Include worked hours for all registries which reside in the department with the exception of Birth or Trauma Registry.

This is a subset of Worked Hours: Staff.
**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Health Information Management without Transcription Expense Elements**

**Contract Service Expense**

Total expense for services (e.g. collections, transcription, release of information, coding, etc.) provided by outside contractors.

This is a subset of Other Direct Operating Expense.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.
Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Supply Expense

Total expense for department operating supplies.

This is a subset of Other Direct Operating Expense.

Health Information Management without Transcription Mandatory Elements

The following elements are mandatory for this department.

- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Patient Records Completed (inc Newborns)
- Worked Hours: Staff

Health Information Management without Transcription Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Audit of coding for patient charges/billing
- Birth certificate preparation - the time needed to complete and submit the documentation required by the state
• Clinical Documentation Improvement (CDI), e.g., activities that facilitate the accurate representation of a patient's clinical status which is translated into coded data

• Medical records coding (e.g. the use of medical charts and documentation from health care professionals to generate billing codes to be invoiced to patients and insurance companies)

• Tumor Registry - the activities involved in capturing history, diagnosis, treatment and health status for tumor patients

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Corporate Compliance Officer - activities related to overseeing and managing regulatory compliance issues within the organization

• Hospital Quality Assurance, e.g., activities surrounding the collecting and disseminating of data to monitor and improve patient care at the facility (hospital level quality management)

• Medical Library functions, e.g., Librarian

• Maintaining Medical records (the systematic documentation of a single patient's medical history and care across time) for Ambulatory Care Clinics (if onsite patient records)

• Privacy Officer - activities related to the development, implementation, maintenance of, and adherence to policies and procedures covering the privacy of, and access to, patient health information in compliance with federal and state laws

05642, Medical Transcription

This department includes the staff responsible for and/or the expenses related to the medical transcription function. Do not include health information management functions.

Medical Transcription Mapping Guidelines

If your cost center(s) include health information management functions, another option might be the Health Information Management with Transcription department.

Medical Transcription Workload Volumes
Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Lines of Transcription Produced Internally

The total transcribed lines produced by department staff. If the department does not internally produce transcription, enter "0." If the data is not available, leave the field blank. If keystrokes are maintained, divide by 65 to convert to lines of transcription.

This is a subset of Lines of Transcription Provided.

Lines of Transcription Provided

The total lines of transcription provided (either produced and/or purchased). If for externally purchased transcription only dollars are available, obtain the average dollar per line rate charged by the contract source to estimate the transcribed lines (charged dollars / average rate = lines). If the department produces and purchases transcription and one of the values cannot be provided, leave this field blank. If keystrokes are maintained, divide by 65 to convert to lines of transcription.

Lines of Transcription Outsourced

The total transcribed lines purchased from an external contract service(s). If the department does not internally purchase transcription, enter "0." If the data is not available, leave the field blank. If keystrokes are maintained, divide by 65 to convert to lines of transcription.

This is a subset of Lines of Transcription Provided.

Turnaround Time for Transcribed Discharge Summaries

The number of hours from receipt of dictated discharge summary to indexing or placement in the medical record.

Turnaround Time for Transcribed History and Physicals

The number of hours from receipt of dictated history and physical to indexing or placement in the medical record.

Turnaround Time for Transcribed Operative Reports

The number of hours from receipt of dictated operative report to indexing or placement in the medical record.
Turnaround Time for Transcribed Progress Notes

The number of hours from receipt of dictated progress note to indexing or placement in the medical record.

Medical Transcription Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.
Worked Hours: Transcriptionist and Transcriptionist Editor

Total hours worked by medical transcriptionist staff.

This is a subset of Worked Hours: Staff.

Medical Transcription Expense Elements

Contract Service Expense

Total expense for services (e.g. collections, transcription, release of information, coding, etc.) provided by outside contractors.

This is a subset of Other Direct Operating Expense.

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Supply Expense

Total expense for department operating supplies.

This is a subset of Other Direct Operating Expense.

Medical Transcription Mandatory Elements

The following elements are mandatory for this department:

- Labor Expense
• Lines of Transcription Produced Internally
• Lines of Transcription Provided
• Other Direct Operating Expense
• Paid Hours: Contract Labor
• Paid Hours: Staff
• Worked Hours: Staff

**Medical Transcription Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Medical records transcription, e.g., lines produced internally or outsourced (Imaging)

• Medical records transcription, e.g., lines produced internally or outsources (Laboratory). This includes transcription from dictation capture to document distribution and storage, including associate transcription.

**05645, Disease Registries**

This department includes staff responsible for maintaining cancer/tumor, stroke, cardiac or other disease registries. Do not include Birth or Trauma Registry.

**Disease Registries Mapping Guidelines**

If your cost center(s), includes other HIM functions, such as release of information, maintaining the integrity of the master patient index and document scanning, another option might be Health Information Management with or without Medical Transcription.
### Disease Registries Workload Volumes

**Adjusted Discharges Supported**

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

**Charts Abstracted**

The total number of charts abstracted by the department staff for the reporting period. Count charts abstracted as one chart per episode of care for which abstraction is needed unless it is a chart abstraction specific to a cancer type. In that case, count one chart abstracted per type of cancer. For example, if Mary Jones has breast cancer and lung cancer and was treated for both cancers during one inpatient stay, it would count as two charts abstracted.

**Number of Follow-up Queries**

The number of follow-up queries conducted for active patients in the disease database.

### Disease Registries Department Hour Elements

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: Disease Registry Abstractor**

Total number of hours worked by all disease registry personnel. Include worked hours for all registries which reside in the department with the exception of Birth or Trauma Registry.

This is a subset of Worked Hours: Staff.
Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Disease Registries Expense Elements

Contract Service Expense

Total expense for services (e.g. collections, transcription, release of information, coding, etc.) provided by outside contractors.

This is a subset of Other Direct Operating Expense.

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.
Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Supply Expense

Total expense for department operating supplies.

This is a subset of Other Direct Operating Expense.

Disease Registries Mandatory Elements

The following elements are mandatory for this department.

- Charts Abstracted
- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Worked Hours: Staff

Disease Registries Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Tumor Registry - the activities involved in capturing history, diagnosis, treatment and health status for tumor patients

Exclude the hours, costs and volumes (where applicable) associated with the following functions:
• Medical records coding (e.g. the use of medical charts and documentation from health care professionals to generate billing codes to be invoiced to patients and insurance companies)

05670, Patient Accounting Services

This department performs patient claims processing functions, including claims preparation, submission, follow-up services and judicial affairs functions such as collection efforts including wage and tax refund garnishments, cash posting, co-pay collecting.

Patient Accounting Services Mapping Guidelines

If less than 80% of the cost center's activity relates to Patient Accounting Services, use an alternate department. Options include the 05602, Patient Financial Services department; 05672, Consolidated Business Office department; or G5600, Other Revenue Cycle Management Services department.

Patient Accounting Services Workload Volumes

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Cycle Time - Number of days

Number of days from the date of patient discharge to when the claim is submitted to the payer.

Gross Dollars in Final Bill not Submitted to Payer

Total gross dollars included in the final patient bill but have not been submitted to the payer for the reporting period.

Gross Revenue Supported

Total dollar revenue receivable for inpatient, outpatient, non patient and external services and products supported by the department. Include revenue (non-operating) not directly related to patient care or generated in the day to day operations of the business units (donations, interest income from investments of unrestricted funds, gains on sale of property, grants, gifts and bonds, research funds, etc.).
Inpatient Accounts Billed

The total separate bills issued to payer sources for payment of inpatient services. Count only inpatient (i.e., patients with room charges) primary, secondary (or more) payers billed. Include each time a bill is sent as an Inpatient Accounts Billed, including rebills and billing of secondary payers. Exclude normal newborn accounts from the count.

This is a subset of Total Accounts Billed.

Inpatient Registrations Supported

Total facility inpatient registrations.

This is a subset of Patient Registrations Supported.

Original Claims

The total original claims (unique billing episode) submitted to a payer source. Include only first claims. For accounts with multiple cycles, such as long-term accounts, count only the first claims in the cycles. If you bill multiple payer sources, be sure to include each payer source in the count.

This is a subset of Total Accounts Billed.

Patient Registrations Supported

The total patient registrations resulting in a separate patient account number. Exclude normal newborns. This includes all inpatient and outpatient registrations during the reporting period. Each registration creates a separate patient account number or equivalent identifier ultimately used by patient accounting to produce patient bills. Outpatient registrations may be either for one-time use or long-term use (i.e., serial). Outpatient serial registrations count as one registration, regardless of the number of times the patient returns for subsequent treatments/visits. The facility may have the patient stop by on subsequent visits to update financial information or just to review registration data for accuracy, but this does not affect the count if a new registration is not created. Do not include registrations for lab specimens (where only the specimens come to the hospital, and not the patient) in this count. Each pre-registration or each "quick registration" that creates a patient encounter should be counted as an individual registration.

Serial Registrations Supported

Total outpatient registrations which are valid over a specified length of time regardless of the number of visits.

This is a subset of Outpatient Registrations Supported.
Total Accounts Billed

The total separate bills issued to payer sources for payment. A payer source may be primary, secondary, or tertiary. Count the total of all bills issued to payers. Include both electronic and hand-prepared bills, including rebills. If you send a bill to more than one payer, be sure to include all in the count. For example, a bill to a primary and a secondary carrier counts as two bills. Exclude billings performed on behalf of physicians when physicians receive the resulting reimbursement directly payable to them (i.e., split billing). For these types of billings, only the hospital-related bill should be included in the count. However, do count physician-related billings that are received by the hospital, credited as revenue, and then expensed as payment to physicians (i.e., combined billing). Note: For inpatient accounts, you may cycle bill long-term patient admissions. For outpatient accounts, you may have long life accounts used for some form of serial billing. Each cycle bill counts toward Accounts Billed using the above methodologies. Do not include data mailers in the count of Total Accounts Billed.

Total Claims Accepted

Total claims accepted into claims scrubber tool for editing prior to submission for the reporting period.

Total Claims Audited

Total number of claims audited for the reporting period. This will include claims that had requests for additional information that results in a delayed payment.

Total Claims Denied

Total number of claims that have been denied for the reporting period. This will include claims that have received payments for less than the full expected reimbursement amount.

Total Claims Remitted

Total number of claims remitted for the reporting period.

Total Claims that Pass Edits

Total number of claims that pass edits requiring no manual intervention by department staff for the reporting period.

Total Dollars Collected

Total dollars collected (both third party and patient co-pays) during the reporting period. This includes all cash collections from all sources related to patient accounts.

Total Zero Paid Claims Denied

Total number of zero paid claims denied for the reporting period.
Patient Accounting Services Department Hour Elements

**Paid Hours: Contract Labor**
Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Paid Hours: Staff**
Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: Billing Staff**
Total hours worked by staff performing billing, follow-up, and collections activities.

This is a subset of Worked Hours: Staff.

**Worked Hours: Management**
Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**
Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**
Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**
Total hours worked, include regular and overtime hours. Exclude on call stand by hours.
Patient Accounting Services Expense Elements

Contract Service Expense
Total expense for services (e.g. collections, transcription, release of information, coding, etc.) provided by outside contractors.

This is a subset of Other Direct Operating Expense.

Labor Expense
Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Other Direct Operating Expense
Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense
Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Supply Expense
Total expense for department operating supplies.

This is a subset of Other Direct Operating Expense.

Patient Accounting Services Mandatory Elements
The following data elements are mandatory for this department.

- Labor Expense
- Original Claims
- Other Direct Operating Expense
- Paid Hours: Contract Labor
• Paid Hours: Staff
• Worked Hours: Staff

Patient Accounting Services Normalizations

Include the hours, costs and volumes (where applicable) associated with the following functions:

• Cashiering services, e.g., collection of payments for previously billed services
• Collection fees, e.g., fees paid to a outside party to collect outstanding bills owed
• Insurance verification (billing phase)—include time spent on validation of coverage
• Legal fees incurred for collection of patient accounts
• Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture.

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

• Administration of Indigent Drug Program, e.g., assisting patients to help qualify for assistance to be able to receive prescription medications; indigent drug programs (Revenue Cycle Management)
• Admitting and registration activities, e.g., receipt of reservation request, collection of patient identification data/insurance information, assignment of patient account numbers
• Billing for mail order prescriptions
• Credit and collections, e.g., recovering outstanding patient account balances after third party payments have been applied
• Credit screening, e.g., gathering and validation of patient financial information
• Financial assistance counseling, e.g., financial clearance processing, providing price estimates, completion of Medicaid, Charity and Disability applications
• Hospital chargemaster maintenance
• Insurance verification - initial time spent obtaining name and identification and pre-admission certification during the admission process
• Insurance verification (concurrent review phase)—time spent obtaining certification for continued services while patient is in-house such as obtaining authorization for another day of stay or additional procedures
• Physician billing, unless combined on same bill with hospital services, e.g., processing the claim for reimbursement by third party payer
05671, Credit and Collections

This department performs the revenue collection function, including denial management.

Credit and Collections Mapping Guidelines

If less than 80% of the cost center’s activity relates to Credit and Collection, use an alternate department. Options include the 05670, Patient Accounting department or G5600, Other Revenue Cycle Management Services department.

Credit and Collections Workload Volumes

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Gross Revenue Supported

Total dollar revenue receivable for inpatient, outpatient, non patient and external services and products supported by the department. Include revenue (non-operating) not directly related to patient care or generated in the day to day operations of the business units (donations, interest income from investments of unrestricted funds, gains on sale of property, grants, gifts and bonds, research funds, etc.).

Inpatient Accounts Supported

Total separate bills issued to payer sources for payment of inpatient services.

This is a subset of Total accounts supported.

Original Claims Supported

Total original claims unique billing episode submitted to a payer source.

This is a subset of Total accounts supported.
Total Accounts Supported

The total separate bills issued to payer sources for payment. A payer source may be primary, secondary, or tertiary. Count the total of all bills issued to payers. Include both electronic and hand-prepared bills, including rebills. If you send a bill to more than one payer, be sure to include all in the count. For example, a bill to a primary and a secondary carrier counts as two bills. Exclude billings performed on behalf of physicians when physicians receive the resulting reimbursement directly payable to them (i.e., split billing). For these types of billings, only the hospital-related bill should be included in the count. However, do count physician-related billings that are received by the hospital, credited as revenue, and then expensed as payment to physicians (i.e., combined billing). Note: For inpatient accounts, you may cycle bill long-term patient admissions. For outpatient accounts, you may have long life accounts used for some form of serial billing. Each cycle bill counts toward Accounts Supported using the above methodologies. Do not include data mailers in the count of Total Accounts Supported.

Credit and Collections Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Credit and Collections Staff

Total hours worked by staff performing revenue collections activities.

This is a subset of Worked Hours: Staff.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
**Worked Hours: Overtime**

Represents the sum of non-physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Credit and Collections Expense Elements**

**Contract Service Expense**

Total expense for services (e.g. collections, transcription, release of information, coding, etc.) provided by outside contractors.

This is a subset of Other Direct Operating Expense.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

**Supply Expense**

Total expense for department operating supplies.
This is a subset of Other Direct Operating Expense.

**Credit and Collections Mandatory Elements**

The following data elements are mandatory for this department.

- Labor Expense
- Original Claims Supported
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Worked Hours: Staff

**Credit and Collections Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Credit and collections, e.g., recovering outstanding patient account balances after third party payments have been applied

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Financial assistance counseling, e.g., financial clearance processing, providing price estimates, completion of Medicaid, Charity and Disability applications

**05672, Consolidated Business Office**

This department performs patient claims processing and revenue collection activities as a consolidated function, including claims preparation, submission, follow-up services, denial management and judicial affairs functions such as collection efforts including wage garnishments and taking tax refunds.

**Consolidated Business Office Mapping Guidelines**

If your organization has separate and distinct cost centers for Patient Accounting and Credit and Collections, map to the appropriate individual departments. If you use this department, do not create a primary instance of 05670, Patient Accounting Services department or 05671, Credit and Collections department.
Consolidated Business Office Workload Volumes

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non-hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Appealed Claims

A request to a payer for additional payment, whether filed through an online website or sent on paper, when the claim has been paid inaccurately.

This is a subset of Total Accounts Billed.

Cycle Time - Number of days

Number of days from the date of patient discharge to when the claim is submitted to the payer.

Gross Dollars in Final Bill not Submitted to Payer

Total gross dollars included in the final patient bill but have not been submitted to the payer for the reporting period.

Gross Revenue Supported

Total dollar revenue receivable for inpatient, outpatient, non patient and external services and products supported by the department. Include revenue (non-operating) not directly related to patient care or generated in the day to day operations of the business units (donations, interest income from investments of unrestricted funds, gains on sale of property, grants, gifts and bonds, research funds, etc.).

Inpatient Accounts Billed

The total separate bills issued to payer sources for payment of inpatient services. Count only inpatient (i.e., patients with room charges) primary, secondary (or more) payers billed. Include each time a bill is sent as an Inpatient Accounts Billed, including rebills and billing of secondary payers. Exclude normal newborn accounts from the count.

This is a subset of Total Accounts Billed.

Inpatient Registrations Supported

Total facility inpatient registrations.
This is a subset of Patient Registrations Supported.

**Original Claims**

The total original claims (unique billing episode) submitted to a payer source. Include only first claims. For accounts with multiple cycles, such as long-term accounts, count only the first claims in the cycles. If you bill multiple payer sources, be sure to include each payer source in the count.

This is a subset of Total Accounts Billed.

**Patient Registrations Supported**

The total patient registrations resulting in a separate patient account number. Exclude normal newborns. This includes all inpatient and outpatient registrations during the reporting period. Each registration creates a separate patient account number or equivalent identifier ultimately used by patient accounting to produce patient bills. Outpatient registrations may be either for one-time use or long-term use (i.e., serial). Outpatient serial registrations count as one registration, regardless of the number of times the patient returns for subsequent treatments/visits. The facility may have the patient stop by on subsequent visits to update financial information or just to review registration data for accuracy, but this does not affect the count if a new registration is not created. Do not include registrations for lab specimens (where only the specimens come to the hospital, and not the patient) in this count. Each pre-registration or each "quick registration" that creates a patient encounter should be counted as an individual registration.

**Patient Statements**

A bill generated to a patient for services rendered. Include self pay statements as well as statements for the balance due from the patient after insurance has paid.

This is a subset of Total Accounts Billed.

**Rebilled Claims**

A resubmission of an original claim sent to a payer for reconsideration. Both electronic and paper submissions should be counted.

This is a subset of Total Accounts Billed.

**Serial Registrations Supported**

Total outpatient registrations which are valid over a specified length of time regardless of the number of visits.

This is a subset of Outpatient Registrations Supported.
Total Accounts Billed

The total separate bills issued to payer sources for payment. A payer source may be primary, secondary, or tertiary. Count the total of all bills issued to payers. Include both electronic and hand-prepared bills, including rebills. If you send a bill to more than one payer, be sure to include all in the count. For example, a bill to a primary and a secondary carrier counts as two bills. Exclude billings performed on behalf of physicians when physicians receive the resulting reimbursement directly payable to them (i.e., split billing). For these types of billings, only the hospital-related bill should be included in the count. However, do count physician-related billings that are received by the hospital, credited as revenue, and then expensed as payment to physicians (i.e., combined billing). Note: For inpatient accounts, you may cycle bill long-term patient admissions. For outpatient accounts, you may have long life accounts used for some form of serial billing. Each cycle bill counts toward Accounts Billed using the above methodologies. Do not include data mailers in the count of Total Accounts Billed.

Total Claims Accepted

Total claims accepted into claims scrubber tool for editing prior to submission for the reporting period.

Total Claims Audited

Total number of claims audited for the reporting period. This will include claims that had requests for additional information that results in a delayed payment.

Total Claims Denied

Total number of claims that have been denied for the reporting period. This will include claims that have received payments for less than the full expected reimbursement amount.

Total Claims Remitted

Total number of claims remitted for the reporting period.

Total Claims that Pass Edits

Total number of claims that pass edits requiring no manual intervention by department staff for the reporting period.

Total Dollars Collected

Total dollars collected (both third party and patient co-pays) during the reporting period. This includes all cash collections from all sources related to patient accounts.

Total Zero Paid Claims Denied

Total number of zero paid claims denied for the reporting period.
Consolidated Business Office Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Billing Staff

Total hours worked by staff performing billing, follow-up, and collections activities.

This is a subset of Worked Hours: Staff.

Worked Hours: Credit and Collections Staff

Total hours worked by staff performing revenue collections activities.

This is a subset of Worked Hours: Staff.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee’s normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).
This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Consolidated Business Office Expense Elements**

**Contract Service Expense**

Total expense for services (e.g. collections, transcription, release of information, coding, etc.) provided by outside contractors.

This is a subset of Other Direct Operating Expense.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

**Supply Expense**

Total expense for department operating supplies.

This is a subset of Other Direct Operating Expense.

**Consolidated Business Office Mandatory Elements**

The following data elements are mandatory for this department.
- Labor Expense
- Original Claims
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Worked Hours: Staff

**Consolidated Business Office Normalizations**

Include the hours, costs and volumes (where applicable) associated with the following functions:

- Cashiering services, e.g., collection of payments for previously billed services
- Collection fees, e.g., fees paid to a outside party to collect outstanding bills owed
- Insurance verification (billing phase)—include time spent on validation of coverage
- Legal fees incurred for collection of patient accounts
- Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture.

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Administration of Indigent Drug Program, e.g., assisting patients to help qualify for assistance to be able to receive prescription medications; indigent drug programs (Revenue Cycle Management)
- Admitting and registration activities, e.g., receipt of reservation request, collection of patient identification data/insurance information, assignment of patient account numbers
- Billing for mail order prescriptions
- Credit screening, e.g., gathering and validation of patient financial information
- Financial assistance counseling, e.g., financial clearance processing, providing price estimates, completion of Medicaid, Charity and Disability applications
- Hospital chargemaster maintenance
- Insurance verification - initial time spent obtaining name and identification and pre-admission certification during the admission process
- Insurance verification (concurrent review phase)—time spent obtaining certification for continued services while patient is in-house such as obtaining authorization for another day of stay or additional procedures

- Physician billing, unless combined on same bill with hospital services, e.g., processing the claim for reimbursement by third party payer

**F5601, Revenue Cycle Management Functional Rollup**

This rollup department includes all revenue cycle management services, admitting and registration, inpatient admitting, outpatient admitting, centralized scheduling, financial counseling, patient accounting, credit and collections, medical plan contracting regardless of reporting relationship.

**Revenue Cycle Management Functional Rollup Workload Volumes**

**Adjusted Discharges Supported**

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

**Appealed Claims**

A request to a payer for additional payment, whether filed through an online website or sent on paper, when the claim has been paid inaccurately.

This is a subset of Total Accounts Billed.

**Charity Care Applications Facilitated**

Total number of initial charity care applications received by department staff for the reporting period. This does not include follow-up requests for information.

This is a subset of Total Patients Counseled.
Charts Abstracted

The total number of charts abstracted by the department staff for the reporting period. Count charts abstracted as one chart per episode of care for which abstraction is needed unless it is a chart abstraction specific to a cancer type. In that case, count one chart abstracted per type of cancer. For example, if Mary Jones has breast cancer and lung cancer and was treated for both cancers during one inpatient stay, it would count as two charts abstracted.

Cycle Time - Number of days

Number of days from the date of patient discharge to when the claim is submitted to the payer.

Disability Applications Facilitated

Total number of initial disability applications facilitated by department staff for the reporting period.

This is a subset of Total Patients Counseled.

Gross Dollars in Final Bill not Submitted to Payer

Total gross dollars included in the final patient bill but have not been submitted to the payer for the reporting period.

Gross Revenue Supported

Total dollar revenue receivable for inpatient, outpatient, non patient and external services and products supported by the department. Include revenue (non-operating) not directly related to patient care or generated in the day to day operations of the business units (donations, interest income from investments of unrestricted funds, gains on sale of property, grants, gifts and bonds, research funds, etc.).

Inbound Communications

This represents the number of communications initiated by the customer whom the facility typically offers support, handle problematic questions, and offer suggestions, with the intention to solve the issues of the customers. This value is the sum of “inbound calls” and “inbound other” communications.

Inpatient Accounts Billed

The total separate bills issued to payer sources for payment of inpatient services. Count only inpatient (i.e., patients with room charges) primary, secondary (or more) payers billed. Include each time a bill is sent as an Inpatient Accounts Billed, including rebills and billing of secondary payers. Exclude normal newborn accounts from the count.

This is a subset of Total Accounts Billed.
Inpatient Preadmissions

The total inpatients processed through a preregistration regimen. Exclude Emergency department admissions. Count all inpatients processed through a preregistration regimen (to gather demographic, insurance information, etc.) except those referred from the ED. Be sure to include preregistrations performed for urgent admissions referred to the department with less than 24 hours notice. Count preregistrations initiated by the physician's office if the information gathered (e.g., demographic material, insurance coverage information) benefits the Admitting department, not just the physician.

This is a subset of Patient Registrations.

Inpatient Registrations

The total inpatients processed through a preregistration regimen. Exclude Emergency department admissions. Count all inpatients processed through a preregistration regimen (to gather demographic, insurance information, etc.) except those referred from the ED. Be sure to include preregistrations performed for urgent admissions referred to the department with less than 24 hours notice. Count preregistrations initiated by the physician's office if the information gathered (e.g., demographic material, insurance coverage information) benefits the Admitting department, not just the physician.

This is a subset of Patient Registrations.

Lines of Transcription Produced Internally

The total transcribed lines produced by department staff. If the department does not internally produce transcription, enter "0." If the data is not available, leave the field blank. If keystrokes are maintained, divide by 65 to convert to lines of transcription.

This is a subset of Lines of Transcription Provided.

Lines of Transcription Provided

The total lines of transcription provided (either produced and/or purchased). If for externally purchased transcription only dollars are available, obtain the average dollar per line rate charged by the contract source to estimate the transcribed lines (charged dollars / average rate = lines). If the department produces and purchases transcription and one of the values cannot be provided, leave this field blank. If keystrokes are maintained, divide by 65 to convert to lines of transcription.

Medicaid Applications Facilitated

Total number of initial medicaid applications facilitated by department staff for the reporting period.

This is a subset of Total Patients Counseled.
Original Claims

The total original claims (unique billing episode) submitted to a payer source. Include only first claims. For accounts with multiple cycles, such as long-term accounts, count only the first claims in the cycles. If you bill multiple payer sources, be sure to include each payer source in the count.

This is a subset of Total Accounts Billed.

Other Outpatient Registrations

The total registrations of all outpatients who do not fall into Special Outpatient Registrations category: generally for outpatient clinics and/or referrals (e.g., laboratory or radiology procedures). They may or may not use serial registration. Special Outpatient Registrations plus Other Outpatient Registrations should equal Total Outpatient Registrations. Each pre-registration or each "quick registration" that creates a patient encounter should be counted as an individual registration.

This is a subset of Patient Registrations.

Outbound Communications

This represents the number of communications initiated by the organization, reaching customers that are typically not expecting this form of communication. This value is the sum of “outbound calls” and “outbound other” communications.

Patient Records Completed (inc Newborns)

The total discrete patient medical records (i.e., charts) completed, including normal newborns. Count all patient medical records (inpatient, Ambulatory clinic, observation, outpatient ancillary, same day surgery, and emergency patients) completed during the reporting period. The medical record must have had some action taken (e.g., coding, reviewing for completeness), not merely filing a document in a folder or indexing for electronic storage.

Patient Registrations

The total patient registrations resulting in a separate patient account number. Exclude normal newborns. This includes all inpatient and outpatient registrations during the reporting period. Each registration creates a separate patient account number or equivalent identifier ultimately used by patient accounting to produce patient bills. Outpatient registrations may be either for one-time use or long-term use (i.e., serial). Outpatient serial registrations count as one registration, regardless of the number of times the patient returns for subsequent treatments/visits. The facility may have the patient stop by on subsequent visits to update financial information or just to review registration data for accuracy, but this does not affect the count if a new registration is not created. Do not include registrations for lab specimens (where only the specimens come to the hospital, and not the patient) in this count. Each pre-registration or each "quick registration" that creates a patient encounter should be counted as an individual registration.

Patient Statements

A bill generated to a patient for services rendered. Include self pay statements as well as statements for the balance due from the patient after insurance has paid.
This is a subset of Total Accounts Billed.

**Rebilled Claims**

A resubmission of an original claim sent to a payer for reconsideration. Both electronic and paper submissions should be counted.

This is a subset of Total Accounts Billed.

**Self Pay Patients Reviewed**

Total number of patients registered as self pay patients only and reviewed by department staff for the reporting period. Do not include balance after insurance of denials for non-coverage of service.

This is a subset of Total Patients Counseled.

**Serial Registrations**

The total outpatient registrations that are valid over a specified length of time regardless of the number of visits. Count those registrations that are not for one-time use. Typically, the patient registration is created at the first visit. On subsequent visits, the patient goes directly to the point of service without being registered again. The patient therefore has one account number associated with all of the visits. The facility may have the patient stop by on subsequent visits to update financial information or review registration data for accuracy, but this does not affect the count. This is a registration methodology, not a type of outpatient service (as in Special Outpatient Registrations). Therefore, you may record outpatient registrations in this category as well as in Involved Outpatient Registrations or Other Outpatient Registrations.

This is a subset of Patient Registrations.

**Special Outpatient Registrations**

The total outpatient registrations for the Emergency department, ambulatory surgery, cardiac cath lab, endoscopy lab, and other areas requiring patient consent for treatment. This includes registrations that require more intensive medical records involvement. Although patient consent is obtained for other types of accounts (e.g., clinic visits), this category includes patients that are treated in an ambulatory non-clinic, non-referral setting. There frequently are additional consent forms requir

This is a subset of Patient Registrations.
Total Accounts Billed

The total separate bills issued to payer sources for payment. A payer source may be primary, secondary, or tertiary. Count the total of all bills issued to payers. Include both electronic and hand-prepared bills, including rebills. If you send a bill to more than one payer, be sure to include all in the count. For example, a bill to a primary and a secondary carrier counts as two bills. Exclude billings performed on behalf of physicians when physicians receive the resulting reimbursement directly payable to them (i.e., split billing). For these types of billings, only the hospital-related bill should be included in the count. However, do count physician-related billings that are received by the hospital, credited as revenue, and then expensed as payment to physicians (i.e., combined billing). Note: For inpatient accounts, you may cycle bill long-term patient admissions. For outpatient accounts, you may have long life accounts used for some form of serial billing. Each cycle bill counts toward Accounts Billed using the above methodologies. Do not include data mailers in the count of Total Accounts Billed.

Total Appointment Activity

Total number of patient appointments added, moved, or cancelled during the reporting period. An appointment is defined as a distinct block of scheduled time for a specific patient service, which includes visits, procedures, treatments, consultations, education, and/or tests.

Total Claims Accepted

Total claims accepted into claims scrubber tool for editing prior to submission for the reporting period.

Total Claims Audited

Total number of claims audited for the reporting period. This will include claims that had requests for additional information that results in a delayed payment.

Total Claims Denied

Total number of claims that have been denied for the reporting period. This will include claims that have received payments for less than the full expected reimbursement amount.

Total Claims Remitted

Total number of claims remitted for the reporting period.

Total Claims that Pass Edits

Total number of claims that pass edits requiring no manual intervention by department staff for the reporting period.

Total Communications

This represents the total communications that are related to appointments within the organization. This value is the sum of "inbound communications" and "outbound communications."
Total Dollars Collected

Total dollars collected (both third party and patient co-pays) during the reporting period. This includes all cash collections from all sources related to patient accounts.

Total Patients Counseled

Total number of initial charity care, medicaid and disability applications facilitated as well as self pay patient accounts reviewed during the reporting period.

Total Payment Contract Proposals

The total service reimbursement contract proposals prepared. They may take the form of capitated, case based, discounted payment, or per diem reimbursement and may be with HMOs or PPOs, or other government agencies. The proposal may or may not have resulted in a contractual agreement. Do not count the number of times the proposal may have been reworked, just the final proposal.

Total Zero Paid Claims Denied

Total number of zero paid claims denied for the reporting period.

Revenue Cycle Management Functional Rollup Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Admitting Staff

Total hours worked by patient admitting staff performing registration activities.

This is a subset of Worked Hours: Staff.

Worked Hours: Analyst

Total hours worked by analysis staff that track financial status by monitoring variances from contracts and budgets, assemble and summarize data and prepare reports of findings, analyses, and recommendations.

This is a subset of Worked Hours: Staff.
**Worked Hours: Billing Staff**

Total hours worked by staff performing billing, follow-up, and collections activities.

This is a subset of Worked Hours: Staff.

**Worked Hours: Clinical Documentation Improvement Specialist**

Total number of hours worked by all Clinical Documentation Improvement Specialists.

This is a subset of Worked Hours: Staff.

**Worked Hours: Coder**

Total number of hours worked by medical coding professionals for all payer types.

This is a subset of Worked Hours: Staff.

**Worked Hours: Credit and Collections Staff**

Total hours worked by staff performing revenue collections activities.

This is a subset of Worked Hours: Staff.

**Worked Hours: Disease Registry Abstractor**

Total number of hours worked by all disease registry personnel. Include worked hours for all registries which reside in the department with the exception of Birth or Trauma Registry.

This is a subset of Worked Hours: Staff.

**Worked Hours: Financial Counseling Staff**

Total hours worked by financial counseling staff that review cost of hospital services and payment options with patients.

This is a subset of Worked Hours: Staff.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.
Worked Hours: Marketing and Negotiating Staff
Total hours worked by marketing and contract negotiating staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff
Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime
 Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee’s normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Patient Registration and Admitting Staff
Total hours worked by patient admitting and registration staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Pre Certification Staff
Total hours worked by patient pre-certification staff that are responsible for obtaining and presenting documentation to payers in an effort to obtain admission authorization and ensure reimbursement for hospital services.

This is a subset of Worked Hours: Staff.

Worked Hours: PreCertification, Financial Counseling Staff
Total hours worked by patient precertification staff that are responsible for obtaining and presenting documentation to payers in an effort to obtain admission authorization and ensure reimbursement for hospital services and financial counseling staff that review cost of hospital services and payment options with patients.

This is a subset of Worked Hours: Staff.
Worked Hours: Records Scanning Specialist Staff

Total number of hours worked by staff who perform imaging or scanning of medical records and convert paper documents into digital format.

This is a subset of Worked Hours: Staff.

Worked Hours: Registration Staff

Total hours worked by patient admitting and registration staff performing registration activities.

This is a subset of Worked Hours: Staff.

Worked Hours: Scheduling Staff

Total hours worked by a schedulers responsible for generating a distinct block of time for a patient to receive a service.

Worked Hours: Scheduling/Registration Staff

Total hours worked by a scheduler/registrar responsible for generating a distinct block of time and completing a registrations for a patient to receive a service within the hospital.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Worked Hours: Transcriptionist and Transcriptionist Editor

Total hours worked by medical transcriptionist staff.

This is a subset of Worked Hours: Staff.

Revenue Cycle Management Functional Rollup Expense Elements

Contract Service Expense

Total expense for services (e.g. collections, transcription, release of information, coding, etc.) provided by outside contractors.

This is a subset of Other Direct Operating Expense.
**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

**Supply Expense**

Total expense for department operating supplies.

This is a subset of Other Direct Operating Expense.

**Revenue Cycle Management Functional Rollup Mandatory Elements**

The following data elements are mandatory for this department.

- Charts Abstracted
- Labor Expense
- Original Claims
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Patient Registrations
- Total Appointment Activity
- Total Communications
• Total Patients Counseled

• Total Payment Contract Proposals

• Worked Hours: Staff

**G5601, Other Revenue Cycle Management**

This generic department includes cost centers belonging to Revenue Cycle Management that do not meet the current standard department definition and therefore cannot be mapped directly to an individual standard department.

**Other Revenue Cycle Management Workload Volumes**

**Adjusted Discharges Supported**

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

**Appealed Claims**

A request to a payer for additional payment, whether filed through an online website or sent on paper, when the claim has been paid inaccurately.

This is a subset of Total Accounts Billed.

**Charity Care Applications Facilitated**

Total number of initial charity care applications received by department staff for the reporting period. This does not include follow-up requests for information.

This is a subset of Total Patients Counseled.

**Charts Abstracted**

The total number of charts abstracted by the department staff for the reporting period. Count charts abstracted as one chart per episode of care for which abstraction is needed unless it is a chart abstraction specific to a cancer type. In that case, count one chart abstracted per type of cancer. For example, if Mary Jones has breast cancer and lung cancer and was treated for both cancers during one inpatient stay, it would count as two charts abstracted.
Cycle Time - Number of days
Number of days from the date of patient discharge to when the claim is submitted to the payer.

Disability Applications Facilitated
Total number of initial disability applications facilitated by department staff for the reporting period.
This is a subset of Total Patients Counseled.

Gross Dollars in Final Bill not Submitted to Payer
Total gross dollars included in the final patient bill but have not been submitted to the payer for the reporting period.

Gross Revenue Supported
Total dollar revenue receivable for inpatient, outpatient, non patient and external services and products supported by the department. Include revenue (non-operating) not directly related to patient care or generated in the day to day operations of the business units (donations, interest income from investments of unrestricted funds, gains on sale of property, grants, gifts and bonds, research funds, etc.).

Inbound Communications
This represents the number of communications initiated by the customer whom the facility typically offers support, handle problematic questions, and offer suggestions, with the intention to solve the issues of the customers. This value is the sum of "inbound calls" and "inbound other" communications.

Inpatient Accounts Billed
The total separate bills issued to payer sources for payment of inpatient services. Count only inpatient (i.e., patients with room charges) primary, secondary (or more) payers billed. Include each time a bill is sent as an Inpatient Accounts Billed, including rebills and billing of secondary payers. Exclude normal newborn accounts from the count.
This is a subset of Total Accounts Billed.

Inpatient Preadmissions
The total inpatients processed through a preregistration regimen. Exclude Emergency department admissions. Count all inpatients processed though a preregistration regimen (to gather demographic, insurance information, etc.) except those referred from the ED. Be sure to include preregistrations performed for urgent admissions referred to the department with less than 24 hours notice. Count preregistrations initiated by the physician's office if the information gathered (e.g., demographic material, insurance coverage information) benefits the Admitting department, not just the physician.
This is a subset of Patient Registrations.
Inpatient Registrations

The total inpatients processed through a preregistration regimen. Exclude Emergency department admissions. Count all inpatients processed though a preregistration regimen (to gather demographic, insurance information, etc.) except those referred from the ED. Be sure to include preregistrations performed for urgent admissions referred to the department with less than 24 hours notice. Count preregistrations initiated by the physician's office if the information gathered (e.g., demographic material, insurance coverage information) benefits the Admitting department, not just the physician.

This is a subset of Patient Registrations.

Lines of Transcription Produced Internally

The total transcribed lines produced by department staff. If the department does not internally produce transcription, enter "0." If the data is not available, leave the field blank. If keystrokes are maintained, divide by 65 to convert to lines of transcription.

This is a subset of Lines of Transcription Provided.

Lines of Transcription Provided

The total lines of transcription provided (either produced and/or purchased). If for externally purchased transcription only dollars are available, obtain the average dollar per line rate charged by the contract source to estimate the transcribed lines (charged dollars / average rate = lines). If the department produces and purchases transcription and one of the values cannot be provided, leave this field blank. If keystrokes are maintained, divide by 65 to convert to lines of transcription.

Medicaid Applications Facilitated

Total number of initial medicaid applications facilitated by department staff for the reporting period.

This is a subset of Total Patients Counseled.

Original Claims

The total original claims (unique billing episode) submitted to a payer source. Include only first claims. For accounts with multiple cycles, such as long-term accounts, count only the first claims in the cycles. If you bill multiple payer sources, be sure to include each payer source in the count.

This is a subset of Total Accounts Billed.

Other Outpatient Registrations

The total registrations of all outpatients who do not fall into Special Outpatient Registrations category: generally for outpatient clinics and/or referrals (e.g., laboratory or radiology procedures). They may or may not use serial registration. Special Outpatient Registrations plus Other Outpatient Registrations should equal Total Outpatient Registrations. Each pre-registration or each "quick registration" that creates a patient encounter should be counted as an individual registration.
This is a subset of Patient Registrations.

**Outbound Communications**

This represents the number of communications initiated by the organization, reaching customers that are typically not expecting this form of communication. This value is the sum of “outbound calls” and “outbound other” communications.

**Patient Records Completed (inc Newborns)**

The total discrete patient medical records (i.e., charts) completed, including normal newborns. Count all patient medical records (inpatient, Ambulatory clinic, observation, outpatient ancillary, same day surgery, and emergency patients) completed during the reporting period. The medical record must have had some action taken (e.g., coding, reviewing for completeness), not merely filing a document in a folder or indexing for electronic storage.

**Patient Registrations**

The total patient registrations resulting in a separate patient account number. Exclude normal newborns. This includes all inpatient and outpatient registrations during the reporting period. Each registration creates a separate patient account number or equivalent identifier ultimately used by patient accounting to produce patient bills. Outpatient registrations may be either for one-time use or long-term use (i.e., serial). Outpatient serial registrations count as one registration, regardless of the number of times the patient returns for subsequent treatments/visits. The facility may have the patient stop by on subsequent visits to update financial information or just to review registration data for accuracy, but this does not affect the count if a new registration is not created. Do not include registrations for lab specimens (where only the specimens come to the hospital, and not the patient) in this count. Each pre-registration or each “quick registration” that creates a patient encounter should be counted as an individual registration.

**Patient Statements**

A bill generated to a patient for services rendered. Include self pay statements as well as statements for the balance due from the patient after insurance has paid.

This is a subset of Total Accounts Billed.

**Rebilled Claims**

A resubmission of an original claim sent to a payer for reconsideration. Both electronic and paper submissions should be counted.

This is a subset of Total Accounts Billed.

**Self Pay Patients Reviewed**

Total number of patients registered as self pay patients only and reviewed by department staff for the reporting period. Do not include balance after insurance of denials for non-coverage of service.
This is a subset of Total Patients Counseled.

**Serial Registrations**

The total outpatient registrations that are valid over a specified length of time regardless of the number of visits. Count those registrations that are not for one-time use. Typically, the patient registration is created at the first visit. On subsequent visits, the patient goes directly to the point of service without being registered again. The patient therefore has one account number associated with all of the visits. The facility may have the patient stop by on subsequent visits to update financial information or review registration data for accuracy, but this does not affect the count. This is a registration methodology, not a type of outpatient service (as in Special Outpatient Registrations). Therefore, you may record outpatient registrations in this category as well as in Involved Outpatient Registrations or Other Outpatient Registrations.

This is a subset of Patient Registrations.

**Special Outpatient Registrations**

The total outpatient registrations for the Emergency department, ambulatory surgery, cardiac cath lab, endoscopy lab, and other areas requiring patient consent for treatment. This includes registrations that require more intensive medical records involvement. Although patient consent is obtained for other types of accounts (e.g., clinic visits), this category includes patients that are treated in an ambulatory non-clinic, non-referral setting. There frequently are additional consent forms requir

This is a subset of Patient Registrations.

**Total Accounts Billed**

The total separate bills issued to payer sources for payment. A payer source may be primary, secondary, or tertiary. Count the total of all bills issued to payers. Include both electronic and hand-prepared bills, including rebills. If you send a bill to more than one payer, be sure to include all in the count. For example, a bill to a primary and a secondary carrier counts as two bills. Exclude billings performed on behalf of physicians when physicians receive the resulting reimbursement directly payable to them (i.e., split billing). For these types of billings, only the hospital-related bill should be included in the count. However, do count physician-related billings that are received by the hospital, credited as revenue, and then expensed as payment to physicians (i.e., combined billing). Note: For inpatient accounts, you may cycle bill long-term patient admissions. For outpatient accounts, you may have long life accounts used for some form of serial billing. Each cycle bill counts toward Accounts Billed using the above methodologies. Do not include data mailers in the count of Total Accounts Billed.

**Total Appointment Activity**

Total number of patient appointments added, moved, or cancelled during the reporting period. An appointment is defined as a distinct block of scheduled time for a specific patient service, which includes visits, procedures, treatments, consultations, education, and/or tests.

**Total Claims Accepted**

Total claims accepted into claims scrubber tool for editing prior to submission for the reporting period.
Total Claims Audited
Total number of claims audited for the reporting period. This will include claims that had requests for additional information that results in a delayed payment.

Total Claims Denied
Total number of claims that have been denied for the reporting period. This will include claims that have received payments for less than the full expected reimbursement amount.

Total Claims Remitted
Total number of claims remitted for the reporting period.

Total Claims that Pass Edits
Total number of claims that pass edits requiring no manual intervention by department staff for the reporting period.

Total Communications
This represents the total communications that are related to appointments within the organization. This value is the sum of “inbound communications” and “outbound communications.”

Total Dollars Collected
Total dollars collected (both third party and patient co-pays) during the reporting period. This includes all cash collections from all sources related to patient accounts.

Total Patients Counseled
Total number of initial charity care, medicaid and disability applications facilitated as well as self pay patient accounts reviewed during the reporting period.

Total Payment Contract Proposals
The total service reimbursement contract proposals prepared. They may take the form of capitated, case based, discounted payment, or per diem reimbursement and may be with HMOs or PPOs, or other government agencies. The proposal may or may not have resulted in a contractual agreement. Do not count the number of times the proposal may have been reworked, just the final proposal.

Total Zero Paid Claims Denied
Total number of zero paid claims denied for the reporting period.
Other Revenue Cycle Management  Department Hour Elements

Paid Hours: Contract Labor
Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff
Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Admitting Staff
Total hours worked by patient admitting staff performing registration activities.
This is a subset of Worked Hours: Staff.

Worked Hours: Analyst
Total hours worked by analysis staff that track financial status by monitoring variances from contracts and budgets, assemble and summarize data and prepare reports of findings, analyses, and recommendations.
This is a subset of Worked Hours: Staff.

Worked Hours: Billing Staff
Total hours worked by staff performing billing, follow-up, and collections activities.
This is a subset of Worked Hours: Staff.

Worked Hours: Clinical Documentation Improvement Specialist
Total number of hours worked by all Clinical Documentation Improvement Specialists.
This is a subset of Worked Hours: Staff.

Worked Hours: Coder
Total number of hours worked by medical coding professionals for all payer types.
This is a subset of Worked Hours: Staff.
Worked Hours: Credit and Collections Staff

Total hours worked by staff performing revenue collections activities.

This is a subset of Worked Hours: Staff.

Worked Hours: Disease Registry Abstractor

Total number of hours worked by all disease registry personnel. Include worked hours for all registries which reside in the department with the exception of Birth or Trauma Registry.

This is a subset of Worked Hours: Staff.

Worked Hours: Financial Counseling Staff

Total hours worked by financial counseling staff that review cost of hospital services and payment options with patients.

This is a subset of Worked Hours: Staff.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Marketing and Negotiating Staff

Total hours worked by marketing and contract negotiating staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Patient Registration and Admitting Staff

Total hours worked by patient admitting and registration staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Pre Certification Staff

Total hours worked by patient precertification staff that are responsible for obtaining and presenting documentation to payers in an effort to obtain admission authorization and ensure reimbursement for hospital services.

This is a subset of Worked Hours: Staff.

Worked Hours: PreCertification, Financial Counseling Staff

Total hours worked by patient precertification staff that are responsible for obtaining and presenting documentation to payers in an effort to obtain admission authorization and ensure reimbursement for hospital services and financial counseling staff that review cost of hospital services and payment options with patients.

This is a subset of Worked Hours: Staff.

Worked Hours: Records Scanning Specialist Staff

Total number of hours worked by staff who perform imaging or scanning of medical records and convert paper documents into digital format.

This is a subset of Worked Hours: Staff.

Worked Hours: Registration Staff

Total hours worked by patient admitting and registration staff performing registration activities.

This is a subset of Worked Hours: Staff.
Worked Hours: Scheduling Staff

Total hours worked by a schedulers responsible for generating a distinct block of time for a patient to receive a service.

This is a subset of Worked Hours: Staff.

Worked Hours: Scheduling/Registration Staff

Total hours worked by a scheduler/registrar responsible for generating a distinct block of time and completing a registrations for a patient to receive a service within the hospital.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Worked Hours: Transcriptionist and Transcriptionist Editor

Total hours worked by medical transcriptionist staff.

This is a subset of Worked Hours: Staff.

Other Revenue Cycle Management Expense Elements

Contract Service Expense

Total expense for services (e.g. collections, transcription, release of information, coding, etc.) provided by outside contractors.

This is a subset of Other Direct Operating Expense.

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.
Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Supply Expense

Total expense for department operating supplies.

This is a subset of Other Direct Operating Expense.

Other Revenue Cycle Management Mandatory Elements

- Worked Hours: Staff

Other Revenue Cycle Management Normalizations
Include the hours, costs and volumes (where applicable) associated with the following functions:

- Credit screening, e.g., gathering and validation of patient financial information
- Financial assistance counseling, e.g., financial clearance processing, providing price estimates, completion of Medicaid, Charity and Disability applications
- Hospital chargemaster maintenance
- Medical Plan Contracting - The contracting, tracking of contracts, and financial support for negotiations
- Medical records transcription (e.g., lines produced internally or outsourced; do not include transcription services from Laboratory and Imaging Services Departments)
- Pre-admission certification, e.g., communicating with insurance companies to gain approval for a person to be admitted to the hospital, granted prior to admission
- Rate-Setting, e.g., develop and implement rates for the organization
- Tumor Registry - the activities involved in capturing history, diagnosis, treatment and health status for tumor patients

Exclude the hours, costs and volumes (where applicable) associated with the following functions:

- Administration of Indigent Drug Program, e.g., assisting patients to help qualify for assistance to be able to receive prescription medications; indigent drug programs (Revenue Cycle Management)
- Clinical Documentation Improvement (CDI), e.g., activities that facilitate the accurate representation of a patient's clinical status which is translated into coded data
- Medical Library functions, e.g., Librarian
- Maintaining Medical records (the systematic documentation of a single patient's medical history and care across time) for Ambulatory Care Clinics (if onsite patient records)
- Medical records transcription, e.g., lines produced internally or outsourced (Imaging)
- Medical records transcription, e.g., lines produced internally or outsources (Laboratory). This includes transcription from dictation capture to document distribution and storage, including associate transcription.
- Physician billing, unless combined on same bill with hospital services, e.g., processing the claim for reimbursement by third party payer
- Pre-admission Certification (follow-up) while patient is in-house or retrospective review, e.g., to assist with managing providers to ensure they are not treating patients with too many services
Chapter 38. Supply Chain Services

For an annotated list of Characteristic Questions for this series, please see the ActionOI support page.

This chapter includes the following sections:

- 05301, Combined Procurement, Receiving and Warehousing 2194
- 05310, Procurement 2202
- 05320, Receiving and Warehousing 2207
- 05342, Courier Service 2214
- 05399, Supply Chain Services Administration and Support 2218
- F5300, Supply Chain Services Functional Rollup 2224
- G5300, Other Supply Chain Services 2232

05301, Combined Procurement, Receiving and Warehousing

This department is responsible for the tactical functions of purchasing for the organization once vendors have been sourced. Functions may include, but are not limited to: acquiring or buying, requiring vendors meet their contracted or negotiated prices, tracking and validating goods and services. This department is also responsible for checking the quality, quantity, and condition of incoming supplies and equipment as well as the storage and distribution of goods and materials. These functions include but are not limited to identification, inspection, verification, putting away, and retrieval for issue.

Combined Procurement, Receiving and Warehousing Mapping Guidelines

If your organization has separate and distinct cost centers for procurement, receiving and warehousing, map to the appropriate individual departments. If you use this department, do not create a primary instance of 05310, Procurement department or 05320, Receiving and Warehousing department.
Combined Procurement, Receiving and Warehousing Workload Volumes

Acquisition Value

The amount entered for Acquisition Value represents the total dollar value of only the acquisitions purchased through the procurement department. Therefore, do not include amounts that may have been purchased within other departments like Food and Nutrition Services and or Pharmacy. This amount may be greater than the facility's total Other Direct Operating Expense reported on the General Facility Department (00100) due to capital asset or inventory purchases that do not fully hit Direct Operating Expense within the reporting period.

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

CMI Weighted Adjusted Discharges Supported

The value entered for Case Mix Index Weighted Adjusted Discharges Supported represents a summed value for organizations that have one department that services multiple facilities. For example, if the Receiving and Warehousing department within this facility ID supports 5 hospitals, then the value entered would be the sum of the values submitted for Case Mix Index Weighted Adjusted Discharges for all 5 entities being reporting on their respective General Facility Departments (00100). Note: in addition to the sum of the 5 facilities this value may also include amounts of facilities not utilized within ActionOI. If this facility ID represents a single-standalone facility, enter zero and ActionOI will utilize the information submitted within the current General Facility Department (00100) in the appropriate calculations.

CMI Weighted Adjusted Patient Days Supported

The value entered for Case Mix Index Weighted Adjusted Patient Days Supported represents a summed value for organizations that have one department that services multiple facilities. For example, if the Receiving and Warehousing department within this facility ID supports 5 hospitals, then the value entered would be the sum of the values submitted for Case Mix Index Weighted Adjusted Patient Days for all 5 entities being reporting on their respective General Facility Departments (00100). Note: in addition to the sum of the 5 facilities this value may also include amounts of facilities not utilized within ActionOI. If this facility ID represents a single-standalone facility, enter zero and ActionOI will utilize the information submitted within the current General Facility Department (00100) in the appropriate calculations.

Fill Rates from Perpetual Inventory

This number represents the percent of items requested that are filled on the first try.
Initial Orders Processed

The total original purchase orders issued by the department. Count all one time, standing, and master purchase orders processed against a master purchase order created/issued during the reporting period. Also count standing purchase orders, such as an automatic shipment of goods or provision of services without Supply Chain staff intervention, only once. Do not count the automatic shipments/provisions for service covered by the order. Orders may be for stocked and non stocked supplies, services, capital equipment items, and any other item purchased through Supply Chain.

This is a subset of Release Orders Processed.

Items Issued

Total items issued or distributed to the end user by the receiving and warehousing department staff. If the end user requests 2 boxes of pencils, then the amount submitted is 2. If the end users orders 10 pencils then the amount submitted would be 10.

Items Put Away

Total items that have been placed into a storage containment unit located outside of the receiving and warehousing department so the products can be directly pulled by the end user.

Items Received

Total items received from suppliers by the receiving/warehousing department staff. Count the number of items that is representative of the purchased units. For example, if a shipment has received 50 cases of pencils and there are 100 boxes to each case with 10 pencils contained within each box, the amount submitted is 50.

Line Items Stocked in Perpetual Inventory (SKU)

The total number of individual products stocked and maintained in Receiving and Warehouse inventory. Do not include those that are managed by other end users. This represents the number stock keeping units (SKU). This count should be significantly less than Items Handled.

Offsite Distribution Locations

The number of offsite distribution locations serviced by the Materials Mgmt department (i.e. clinics, physician offices, etc.)
Release Orders Processed

Total purchase orders and supply release documents issued through the department. The total includes all purchase orders prepared and release orders processed against a master purchase order created/issued during the reporting period. Count standing purchase orders, such as automatic shipment of goods or provision of services without Supply Chain staff intervention, only once. Do not count the automatic shipments/provisions for service covered by the order. Count the initial master order for release orders and each release order issued. Orders may be for stocked and non-stocked supplies, services, capital equipment items, and any other item purchased through Supply Chain. They may be either hand prepared or driven by automated systems.

Stock Inventory Turns

The total number of stock inventory turns managed. Count the average turnover rate of inventory. Using your inventory balance as of the end of the reporting period, divide the total of inventory purchases by the inventory balance. This equals the number of times in the reporting period that stock was replenished.

For example, the hospital has a $1,000,000 inventory as of 09/30/2004. For the reporting period from 07/01/2004 to 09/30/2004, the facility purchases of inventory items totaled $6,000,000. Dividing $6,000,000 (in purchases) by $1,000,000 (the inventory value) equals 6. The inventory turned over 6 times in the reporting period. If your inventory balance fluctuated widely during the reporting period, average the inventory balances rather than using the ending balance.

Total PAR Lines (non stock)

Total number of line items/stock keeping units (SKU) in all non-stocked PAR locations.

Total PAR Lines (stock)

Total number of line items/stock keeping units (SKU) in all stocked PAR locations from perpetual inventory.

Total PAR locations (non-stock)

Total number of non-stock Periodic Automated Replenishment (PAR) locations serviced by the receiving/warehousing department.

Total PAR locations (stock)

Total number of Periodic Automated Replenishment (PAR) locations filled from perpetual inventory serviced by the receiving/warehousing department.
Combined Procurement, Receiving and Warehousing Department Hour Elements

Paid Hours: Contract Labor
Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff
Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Buyer
Total hours worked by materials acquisition staff.
This is a subset of Worked Hours: Staff.

Worked Hours: Data Analyst
Total hours worked by data analyst technical staff responsible for extracting data from information systems and performing statistical analysis.
This is a subset of Worked Hours: Staff.

Worked Hours: Inventory Analyst
Total hours worked by staff responsible for reviewing and analyzing inventory received and distributed throughout the facility.
This is a subset of Worked Hours: Staff.

Worked Hours: Management
Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.
This is a subset of Worked Hours: Staff.

Worked Hours: Material Control
Total hours worked for inventory control staff.
This is a subset of Worked Hours: Staff.

**Worked Hours: Material Handling**

Total hours worked for receiving, warehousing, distribution, and courier staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Sourcing**

Total hours worked by staff performing the function of sourcing. Functions include but are not limited to initial vendor contract negotiations, request for quotes, identification of potential suppliers, validation of processes, quality, systems and safety of the goods and services utilized by the organization.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Systems Analyst (ie. MMIS)**

Total hours worked by staff responsible for creating, updating and or maintaining the facilities materials management information systems.

This is a subset of Worked Hours: Staff.
Combined Procurement, Receiving and Warehousing Expense Elements

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

**Operating Lease Expense**

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.
Combined Procurement, Receiving and Warehousing Mandatory Elements

The following data elements are mandatory for this department:

- Acquisition Value
- Items Issued
- Items Put Away
- Items Received
- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Release Orders Processed
- Total PAR Lines (non stock)
- Total PAR Lines (stock)
- Total PAR locations (non-stock)
- Total PAR locations (stock)
- Worked Hours: Staff

Combined Procurement, Receiving and Warehousing Normalizations

Include the hours, costs and volumes (where applicable) associated with the

- Personnel performing the functions of the department’s day to day managerial operations (Supply Chain)

- Purchasing, Receiving, Warehousing and Inventory Control. This normalization is applicable if you utilize the Combined Procurement, Receiving and Warehousing department (Excludes food and pharmaceuticals)

Exclude the hours costs and volumes (where applicable) associated with the
• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, outreach service to attract new business (Supply Chain)

• Contract negotiations, analysis, and monitoring (Supply Chain)

• Courier Services, e.g., transporting of goods and supplies to and from facility and/or off-site locations. Do not include the lab courier function

• Information System Logistics (execute supply chain transactions, manage supplier relationships, and control associated business processes)

• Lab Courier Service (Courier services specific to lab specimens only e.g. in house runners, external - remote pickup)

• Mail Room

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Supply Chain)

• Print Shop/Copy Center for the facility

• Sourcing (initial vendor contract negotiations, request for quotes, identification of potential suppliers, validation of processes, quality, systems and safety of the goods and services utilized by the organization, capital projects)

• Sterile Processing (depending upon the type of department)

• Value Analysis (identifies and selects the best value alternatives for designs, materials, processes, and systems)

• Vendor Relationships (improve trust and collaboration among supply chain partners, thus improving inventory visibility and the velocity of inventory movement)

05310, Procurement

This department is responsible for the tactical functions of purchasing for the organization once vendors have been sourced. These functions may include, but are not limited to: acquiring or buying, requiring vendors meet their contracted or negotiated prices, and tracking and validating goods and services.

Procurement Mapping Guidelines

If your cost center includes the receiving and warehousing functions, this department may not be an appropriate choice. Another option might be the 05301, Combined Procurement, Receiving and Warehousing department. If you use this department, do not create a primary instance of 05301, Combined Procurement, Receiving and Warehousing department.
Procurement Workload Volumes

Acquisition Value

The amount entered for Acquisition Value represents the total dollar value of only the acquisitions purchased through the procurement department. Therefore, do not include amounts that may have been purchased within other departments like Food and Nutrition Services and or Pharmacy. This amount may be greater than the facility's total Other Direct Operating Expense reported on the General Facility Department (00100) due to capital asset or inventory purchases that do not fully hit Direct Operating Expense within the reporting period.

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

CMI Weighted Adjusted Discharges Supported

The value entered for Case Mix Index Weighted Adjusted Discharges Supported represents a summed value for organizations that have one department that services multiple facilities. For example, if the Receiving and Warehousing department within this facility ID supports 5 hospitals, then the value entered would be the sum of the values submitted for Case Mix Index Weighted Adjusted Discharges for all 5 entities being reporting on their respective General Facility Departments (00100). Note: in addition to the sum of the 5 facilities this value may also include amounts of facilities not utilized within ActionOI. If this facility ID represents a single-standalone facility, enter zero and ActionOI will utilize the information submitted within the current General Facility Department (00100) in the appropriate calculations.

CMI Weighted Adjusted Patient Days Supported

The value entered for Case Mix Index Weighted Adjusted Patient Days Supported represents a summed value for organizations that have one department that services multiple facilities. For example, if the Receiving and Warehousing department within this facility ID supports 5 hospitals, then the value entered would be the sum of the values submitted for Case Mix Index Weighted Adjusted Patient Days for all 5 entities being reporting on their respective General Facility Departments (00100). Note: in addition to the sum of the 5 facilities this value may also include amounts of facilities not utilized within ActionOI. If this facility ID represents a single-standalone facility, enter zero and ActionOI will utilize the information submitted within the current General Facility Department (00100) in the appropriate calculations.
Initial Orders Processed

The total original purchase orders issued by the department. Count all one time, standing, and master purchase orders processed against a master purchase order created/issued during the reporting period. Also count standing purchase orders, such as an automatic shipment of goods or provision of services without Supply Chain staff intervention, only once. Do not count the automatic shipments/provisions for service covered by the order. Orders may be for stocked and non-stocked supplies, services, capital equipment items, and any other item purchased through Supply Chain.

This is a subset of Release Orders Processed.

Release Orders Processed

Total purchase orders and supply release documents issued through the department. The total includes all purchase orders prepared and release orders processed against a master purchase order created/issued during the reporting period. Count standing purchase orders, such as automatic shipment of goods or provision of services without Supply Chain staff intervention, only once. Do not count the automatic shipments/provisions for service covered by the order. Count the initial master order for release orders and each release order issued. Orders may be for stocked and non-stocked supplies, services, capital equipment items, and any other item purchased through Supply Chain. They may be either hand prepared or driven by automated systems.

Procurement Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Buyer

Total hours worked by materials acquisition staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.
**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non-physician worked hours that are paid on an overtime basis (hours worked over the employee’s normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Sourcing**

Total hours worked by staff performing the function of sourcing. Functions include but are not limited to initial vendor contract negotiations, request for quotes, identification of potential suppliers, validation of processes, quality, systems and safety of the goods and services utilized by the organization.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Procurement Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.
**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

**Operating Lease Expense**

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.

**Procurement Mandatory Elements**

The following data elements are mandatory for this department:

- Acquisition Value
- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Release Orders Processed
- Worked Hours: Staff
Procurement Normalizations

Include the hours costs and volumes (where applicable) associated with the

- Personnel performing the functions of the department’s day to day managerial operations (Supply Chain)
- Purchasing - acquiring or buying, require vendors met their contracted or negotiated prices, tracking and validating goods and services. This normalization is applicable if you utilize the Procurement department (Excludes food and pharmaceuticals)

Exclude the hours costs and volumes (where applicable) associated with the

- Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, outreach service to attract new business (Supply Chain)
- Contract negotiations, analysis, and monitoring (Supply Chain)
- Information System Logistics (execute supply chain transactions, manage supplier relationships, and control associated business processes)
- Lab Courier Service (Courier services specific to lab specimens only e.g. in house runners, external - remote pickup)
- Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Supply Chain)
- Sourcing (initial vendor contract negotiations, request for quotes, identification of potential suppliers, validation of processes, quality, systems and safety of the goods and services utilized by the organization, capital projects)
- Value Analysis (identifies and selects the best value alternatives for designs, materials, processes, and systems)
- Vendor Relationships (improve trust and collaboration among supply chain partners, thus improving inventory visibility and the velocity of inventory movement)

05320, Receiving and Warehousing

This department is responsible for checking the quality, quantity, and condition of incoming supplies and equipment and is also responsible for the storage and distribution of goods and materials for the organization. These functions include, but are not limited to: identification, inspection, verification, putting away, and retrieval for issue.
Receiving and Warehousing Mapping Guidelines

If your cost center includes the procurement function, this department may not be an appropriate choice. Another option might be the 05301, Combined Procurement, Receiving and Warehousing department. If you use this department, do not create a primary instance of 05301, Combined Procurement, Receiving and Warehousing department.

Receiving and Warehousing Workload Volumes

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department that provides services and support to more than one business unit (hospital and non-hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

CMI Weighted Adjusted Discharges Supported

The value entered for Case Mix Index Weighted Adjusted Discharges Supported represents a summed value for organizations that have one department that services multiple facilities. For example, if the Receiving and Warehousing department within this facility ID supports 5 hospitals, then the value entered would be the sum of the values submitted for Case Mix Index Weighted Adjusted Discharges for all 5 entities being reporting on their respective General Facility Departments (00100). Note: in addition to the sum of the 5 facilities this value may also include amounts of facilities not utilized within ActionOI. If this facility ID represents a single-standalone facility, enter zero and ActionOI will utilize the information submitted within the current General Facility Department (00100) in the appropriate calculations.

CMI Weighted Adjusted Patient Days Supported

The value entered for Case Mix Index Weighted Adjusted Patient Days Supported represents a summed value for organizations that have one department that services multiple facilities. For example, if the Receiving and Warehousing department within this facility ID supports 5 hospitals, then the value entered would be the sum of the values submitted for Case Mix Index Weighted Adjusted Patient Days for all 5 entities being reporting on their respective General Facility Departments (00100). Note: in addition to the sum of the 5 facilities this value may also include amounts of facilities not utilized within ActionOI. If this facility ID represents a single-standalone facility, enter zero and ActionOI will utilize the information submitted within the current General Facility Department (00100) in the appropriate calculations.

Fill Rates from Perpetual Inventory

This number represents the percent of items requested that are filled on the first try.
**Items Issued**

Total items issued or distributed to the end user by the receiving and warehousing department staff. If the end user requests 2 boxes of pencils, then the amount submitted is 2. If the end user orders 10 pencils then the amount submitted would be 10.

**Items Put Away**

Total items that have been placed into a storage containment unit located outside of the receiving and warehousing department so the products can be directly pulled by the end user.

**Items Received**

Total items received from suppliers by the receiving/warehousing department staff. Count the number of items that is representative of the purchased units. For example, if a shipment has received 50 cases of pencils and there are 100 boxes to each case with 10 pencils contained within each box, the amount submitted is 50.

**Line Items Stocked in Perpetual Inventory (SKU)**

The total number of individual products stocked and maintained in Receiving and Warehouse inventory. Do not include those that are managed by other end users. This represents the number stock keeping units (SKU). This count should be significantly less than Items Handled.

**Offsite Distribution Locations**

The number of offsite distribution locations serviced by the Materials Mgmt department (i.e. clinics, physician offices, etc.)

**Stock Inventory Turns**

The total number of stock inventory turns managed. Count the average turnover rate of inventory. Using your inventory balance as of the end of the reporting period, divide the total of inventory purchases by the inventory balance. This equals the number of times in the reporting period that stock was replenished.

For example, the hospital has a $1,000,000 inventory as of 09/30/2004. For the reporting period from 07/01/2004 to 09/30/2004, the facility purchases of inventory items totaled $6,000,000. Dividing $6,000,000 (in purchases) by $1,000,000 (the inventory value) equals 6. The inventory turned over 6 times in the reporting period. If your inventory balance fluctuated widely during the reporting period, average the inventory balances rather than using the ending balance.

**Total PAR Lines (non stock)**

Total number of line items(stock keeping units (SKU) in all non-stocked PAR locations.
Total PAR Lines (stock)
Total number of line items/stock keeping units (SKU) in all stocked PAR locations from perpetual inventory.

Total PAR locations (non-stock)
Total number of non-stock Periodic Automated Replenishment (PAR) locations serviced by the receiving and warehousing department.

Total PAR locations (stock)
Total number of Periodic Automated Replenishment (PAR) locations filled from perpetual inventory serviced by the receiving/warehousing department.

Receiving and Warehousing Department Hours Elements

Paid Hours: Contract Labor
Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff
Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Data Analyst
Total hours worked by data analyst technical staff responsible for extracting data from information systems and performing statistical analysis.
This is a subset of Worked Hours: Staff.

Worked Hours: Inventory Analyst
Total hours worked by staff responsible for reviewing and analyzing inventory received and distributed throughout the facility.
This is a subset of Worked Hours: Staff.

Worked Hours: Management
Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.
This is a subset of Worked Hours: Staff.

**Worked Hours: Material Control**

Total hours worked for inventory control staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Material Handling**

Total hours worked for receiving, warehousing, and distribution staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Systems Analyst (ie. MMIS)**

Total hours worked by staff responsible for creating, updating and or maintaining the facilities materials management information systems.

This is a subset of Worked Hours: Staff.
Receiving and Warehousing Expense Elements

Labor Expense
Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Medical Supply Expense
Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense
Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

Operating Lease Expense
Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense
Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense
Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.
Receiving and Warehousing Mandatory Elements

The following data elements are mandatory for this department:

- Items Issued
- Items Put Away

Receiving and Warehousing Normalizations

Include the hours, costs and volumes (where applicable) associated with the

- Inventory Control, e.g., checking the quality, quantity, and condition of incoming supplies and equipment, responsible for the storage and distribution of goods and materials
- Personnel performing the functions of the department’s day to day managerial operations (Supply Chain)

Exclude the hours costs and volumes (where applicable) associated with the

- Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, outreach service to attract new business (Supply Chain)
- Contract negotiations, analysis, and monitoring (Supply Chain)
• Courier Services, e.g., transporting of goods and supplies to and from facility and/or off-site locations. Do not include the lab courier function

• Information System Logistics (execute supply chain transactions, manage supplier relationships, and control associated business processes)

• Lab Courier Service (Courier services specific to lab specimens only e.g. in house runners, external - remote pickup)

• Mail Room

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Supply Chain)

• Print Shop/Copy Center for the facility

• Sourcing (initial vendor contract negotiations, request for quotes, identification of potential suppliers, validation of processes, quality, systems and safety of the goods and services utilized by the organization, capital projects)

• Sterile Processing (depending upon the type of department)

• Value Analysis (identifies and selects the best value alternatives for designs, materials, processes, and systems)

• Vendor Relationships (improve trust and collaboration among supply chain partners, thus improving inventory visibility and the velocity of inventory movement)

05342, Courier Service

This department includes functions related to picking up and delivering messages, orders, medical records, supplies and equipment, and medication to and from facilities or between departments.

Courier Service Mapping Guidelines

If your cost center is responsible for the couriering for only Laboratory services map to the 03399, Laboratory Services Administration department.
Courier Service Workload Volumes

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Miles Traveled

Total miles logged by department vehicles in support of specific requests. Include miles traveled obtained from vehicle trips or maintenance logs. If maintenance logs are used, be sure to prorate for beginning/end of year mileage readings.

Pick Ups Performed

Total separate (one way) pick ups performed.

Round Trips Performed

Total separate round trips performed.

Courier Service Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Courier Driver

Total hours worked for courier drivers.
Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Courier Service Expense Elements

Contract Service Expense

Total expense for services (e.g., courier service) purchased from outside contractors.

This is a subset of Other Direct Operating Expense.

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Non Medical Supply Expense

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.
This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.

**Vehicle Expense**

Total expense for vehicle maintenance.

This is a subset of Other Direct Operating Expense.

**Courier Service Mandatory Elements**

The following data elements are mandatory for this department:

- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Pick Ups Performed
- Round Trips Performed
- Worked Hours: Staff

**Courier Service Normalizations**

Include the hours, costs and volumes (where applicable) associated with the
• Courier Services, e.g., transporting of goods and supplies to and from facility and/or off-site locations. Do not include the lab courier function

• Personnel performing the functions of the department’s day to day managerial operations (Supply Chain)

Exclude the hours, costs and volumes (where applicable) associated with the

• Lab Courier Service (Courier services specific to lab specimens only e.g. in house runners, external - remote pickup)

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Supply Chain)

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, outreach service to attract new business (Supply Chain)

05399, Supply Chain Services Administration and Support

This department performs the overall administrative and general support tasks for the entire Supply Chain Services series. This department is responsible for analyzing, controlling, designing, executing, monitoring, and planning activities within this supply chain series. The objectives of the department are to create net value, leverage logistics, create efficient and effective infrastructures, and to match supply with demand while measuring performance. Functions include but are not limited to: Contract negotiations, analysis, and monitoring; Information System Logistics (execute supply chain transactions, manage supplier relationships, and control associated business processes); Sourcing (initial vendor contract negotiations, request for quotes, identification of potential suppliers, validation of processes, quality, systems and safety of the goods and services utilized by the organization, and capital projects); Value Analysis (identifies and selects the best value alternatives for designs, materials, processes, and systems); Vendor Relationships (improves trust and collaboration among supply chain partners, thus improving inventory visibility and the velocity of inventory movement).

Supply Chain Services Administration and Support Workload Volumes

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.
Analytic Hours Worked

This number represents the total hours worked by staff performing the function of analytics. Functions include but are not limited to the discovery and communication of meaningful patterns in data. Analytics uses this insight to recommend action or to guide decision making - communication.

CMI Weighted Adjusted Discharges Supported

The value entered for Case Mix Index Weighted Adjusted Discharges Supported represents a summed value for organizations that have one department that services multiple facilities. For example, if the Receiving and Warehousing department within this facility ID supports 5 hospitals, then the value entered would be the sum of the values submitted for Case Mix Index Weighted Adjusted Discharges for all 5 entities being reporting on their respective General Facility Departments (00100). Note: in addition to the sum of the 5 facilities this value may also include amounts of facilities not utilized within ActionOI. If this facility ID represents a single-standalone facility, enter zero and ActionOI will utilize the information submitted within the current General Facility Department (00100) in the appropriate calculations.

CMI Weighted Adjusted Patient Days Supported

The value entered for Case Mix Index Weighted Adjusted Patient Days Supported represents a summed value for organizations that have one department that services multiple facilities. For example, if the Receiving and Warehousing department within this facility ID supports 5 hospitals, then the value entered would be the sum of the values submitted for Case Mix Index Weighted Adjusted Patient Days for all 5 entities being reporting on their respective General Facility Departments (00100). Note: in addition to the sum of the 5 facilities this value may also include amounts of facilities not utilized within ActionOI. If this facility ID represents a single-standalone facility, enter zero and ActionOI will utilize the information submitted within the current General Facility Department (00100) in the appropriate calculations.

Dollars Spent Under Contract

This number represents the dollar amount of the percent under contract. The amount that one should submit for this element can be collected by taking the facilities contract amount minus actual spend. This dollar amount may then be used to assist in the evaluation of the departments efficiency and effectiveness.

Savings Actual

This number represents the actual amount of the savings reached during the reporting period that corresponds to the identified Savings Goal.

Savings Goal

This number represents the amount of money identified by the organization as a targeted supply cost reduction within the current fiscal year.
**Sourcing Hours Worked**

This number represents the total hours worked by staff performing the function of sourcing. Functions include but are not limited to initial vendor contract negotiations, request for quotes, identification of potential suppliers, validation of processes, quality, systems and safety of the goods and services utilized by the organization.

**Value Analysis Hours Worked**

This number represents the total hours worked by staff performing the function of value analysis. Functions include but are not limited to providing a point of entry and screening process for the consideration of new products, analyze, evaluate and monitor all trials of new supplies or equipment, recommend standardization of products, control and oversee the entry of sample products into the hospital and utilize the value analysis process for product selection and implementation, creating and providing financial and contractual analysis studies, insuring compliance with policies with regard to product utilization, handling and distribution for the purposes of maximizing cost containment and reimbursement.

**Supply Chain Services Administration and Support Department Hour Elements**

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: Data Analyst**

Total hours worked by data analyst technical staff responsible for extracting data from information systems and performing statistical analysis.

This is a subset of Worked Hours: Staff.

**Worked Hours: Inventory Analyst**

Total hours worked by staff responsible for reviewing and analyzing inventory received and distributed throughout the facility.

This is a subset of Worked Hours: Staff.
Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Sourcing

Total hours worked by staff performing the function of sourcing. Functions include but are not limited to initial vendor contract negotiations, request for quotes, identification of potential suppliers, validation of processes, quality, systems and safety of the goods and services utilized by the organization.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Worked Hours: Systems Analyst (ie. MMIS)

Total hours worked by staff responsible for creating, updating and or maintaining the facilities materials management information systems.

This is a subset of Worked Hours: Staff.
Supply Chain Services Administration and Support Expense Elements

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

**Operating Lease Expense**

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.

Supply Chain Services Administration and Support Mandatory Elements

The following elements are mandatory for this department:

- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
• Paid Hours: Staff
• Worked Hours: Staff

Supply Chain Services Administration and Support Normalizations

Include the hours, costs and volumes (where applicable) associated with the

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, outreach service to attract new business (Supply Chain)

• Contract negotiations, analysis, and monitoring (Supply Chain)

• Information System Logistics (execute supply chain transactions, manage supplier relationships, and control associated business processes)

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Supply Chain)

• Sourcing (initial vendor contract negotiations, request for quotes, identification of potential suppliers, validation of processes, quality, systems and safety of the goods and services utilized by the organization, capital projects)

• Value Analysis (identifies and selects the best value alternatives for designs, materials, processes, and systems)

• Vendor Relationships (improve trust and collaboration among supply chain partners, thus improving inventory visibility and the velocity of inventory movement)

Exclude the hours, costs and volumes (where applicable) associated with the

• Courier Services, e.g., transporting of goods and supplies to and from facility and/or off-site locations. Do not include the lab courier function

• Inventory Control, e.g., checking the quality, quantity, and condition of incoming supplies and equipment, responsible for the storage and distribution of goods and materials

• Lab Courier Service (Courier services specific to lab specimens only e.g. in house runners, external - remote pickup)

• Mail Room

• Personnel performing the functions of the department's day to day managerial operations (Supply Chain)

• Print Shop/Copy Center for the facility
• Purchasing - acquiring or buying, require vendors met their contracted or negotiated prices, tracking and validating goods and services. This normalization is applicable if you utilize the Procurement department (Excludes food and pharmaceuticals)

• Purchasing, Receiving, Warehousing and Inventory Control. This normalization is applicable if you utilize the Combined Procurement, Receiving and Warehousing department (Excludes food and pharmaceuticals)

F5300, Supply Chain Services Functional Rollup

This rollup department includes all Supply Chain Services functions: administrative and support, courier, mail room, printing, procurement, receiving, warehousing and other supply chain services functions regardless of facilities internal reporting relationships.

Supply Chain Services Functional Rollup Workload Volumes

Acquisition Value

The amount entered for Acquisition Value represents the total dollar value of only the acquisitions purchased through the procurement department. Therefore, do not include amounts that may have been purchased within other departments like Food and Nutrition Services and or Pharmacy. This amount may be greater than the facility’s total Other Direct Operating Expense reported on the General Facility Department (00100) due to capital asset or inventory purchases that do not fully hit Direct Operating Expense within the reporting period.

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Analytic Hours Worked

This number represents the total hours worked by staff performing the function of analytics. Functions include but are not limited to the discovery and communication of meaningful patterns in data. Analytics uses this insight to recommend action or to guide decision making - communication.
**CMI Weighted Adjusted Discharges Supported**

The value entered for Case Mix Index Weighted Adjusted Discharges Supported represents a summed value for organizations that have one department that services multiple facilities. For example, if the Receiving and Warehousing department within this facility ID supports 5 hospitals, then the value entered would be the sum of the values submitted for Case Mix Index Weighted Adjusted Discharges for all 5 entities being reporting on their respective General Facility Departments (00100). Note: in addition to the sum of the 5 facilities this value may also include amounts of facilities not utilized within ActionOI. If this facility ID represents a single-standalone facility, enter zero and ActionOI will utilize the information submitted within the current General Facility Department (00100) in the appropriate calculations.

**CMI Weighted Adjusted Patient Days Supported**

The value entered for Case Mix Index Weighted Adjusted Patient Days Supported represents a summed value for organizations that have one department that services multiple facilities. For example, if the Receiving and Warehousing department within this facility ID supports 5 hospitals, then the value entered would be the sum of the values submitted for Case Mix Index Weighted Adjusted Patient Days for all 5 entities being reporting on their respective General Facility Departments (00100). Note: in addition to the sum of the 5 facilities this value may also include amounts of facilities not utilized within ActionOI. If this facility ID represents a single-standalone facility, enter zero and ActionOI will utilize the information submitted within the current General Facility Department (00100) in the appropriate calculations.

**Dollars Spent Under Contract**

This number represents the dollar amount of the percent under contract. The amount that one should submit for this element can be collected by taking the facilities contract amount minus actual spend. This dollar amount may then be used to assist in the evaluation of the department's efficiency and effectiveness.

**Fill Rates from Perpetual Inventory**

This number represents the percent of items requested that are filled on the first try.

**Initial Orders Processed**

The total original purchase orders issued by the department. Count all one time, standing, and master purchase orders processed against a master purchase order created/issued during the reporting period. Also count standing purchase orders, such as an automatic shipment of goods or provision of services without Supply Chain staff intervention, only once. Do not count the automatic shipments/provisions for service covered by the order. Orders may be for stocked and non stocked supplies, services, capital equipment items, and any other item purchased through Supply Chain.

This is a subset of Release Orders Processed.

**Items Issued**

Total items issued or distributed to the end user by the receiving and warehousing department staff. If the end user requests 2 boxes of pencils, then the amount submitted is 2. If the end user orders 10 pencils, then the amount submitted would be 10.
Items Put Away

Total items that have been placed into a storage containment unit located outside of the receiving and warehousing department so the products can be directly pulled by the end user.

Items Received

Total items received from suppliers by the receiving/warehousing department staff. Count the number of items that is representative of the purchased units. For example, if a shipment has received 50 cases of pencils and there are 100 boxes to each case with 10 pencils contained within each box, the amount submitted is 50.

Line Items Stocked in Perpetual Inventory (SKU)

The total number of individual products stocked and maintained in Receiving and Warehouse inventory. Do not include those that are managed by other end users. This represents the number stock keeping units (SKU). This count should be significantly less than Items Handled.

Miles Traveled

Total miles logged by department vehicles in support of specific requests. Include miles traveled obtained from vehicle trips or maintenance logs. If maintenance logs are used, be sure to prorate for beginning/end of year mileage readings.

Offsite Distribution Locations

The number of offsite distribution locations serviced by the Materials Mgmt department (i.e. clinics, physician offices, etc.)

Pick Ups Performed

Total separate (one way) pick ups performed.

Release Orders Processed

Total purchase orders and supply release documents issued through the department. The total includes all purchase orders prepared and release orders processed against a master purchase order created/issued during the reporting period. Count standing purchase orders, such as automatic shipment of goods or provision of services without Supply Chain staff intervention, only once. Do not count the automatic shipments/provisions for service covered by the order. Count the initial master order for release orders and each release order issued. Orders may be for stocked and non-stocked supplies, services, capital equipment items, and any other item purchased through Supply Chain. They may be either hand prepared or driven by automated systems.

Round Trips Performed

Total separate round trips performed.
Savings Actual

This number represents the actual amount of the savings reached during the reporting period that corresponds to the identified Savings Goal.

Savings Goal

This number represents the amount of money identified by the organization as a targeted supply cost reduction within the current fiscal year.

Sourcing Hours Worked

This number represents the total hours worked by staff performing the function of sourcing. Functions include but are not limited to initial vendor contract negotiations, request for quotes, identification of potential suppliers, validation of processes, quality, systems and safety of the goods and services utilized by the organization.

Stock Inventory Turns

The total number of stock inventory turns managed. Count the average turnover rate of inventory. Using your inventory balance as of the end of the reporting period, divide the total of inventory purchases by the inventory balance. This equals the number of times in the reporting period that stock was replenished.

For example, the hospital has a $1,000,000 inventory as of 09/30/2004. For the reporting period from 07/01/2004 to 09/30/2004, the facility purchases of inventory items totaled $6,000,000. Dividing $6,000,000 (in purchases) by $1,000,000 (the inventory value) equals 6. The inventory turned over 6 times in the reporting period. If your inventory balance fluctuated widely during the reporting period, average the inventory balances rather than using the ending balance.

Total PAR Lines (non stock)

Total number of line items/stock keeping units (SKU) in all non-stocked PAR locations.

Total PAR Lines (stock)

Total number of line items/stock keeping units (SKU) in all stocked PAR locations from perpetual inventory.

Total PAR locations (non-stock)

Total number of non-stock Periodic Automated Replenishment (PAR) locations serviced by the receiving/warehousing department.

Total PAR locations (stock)

Total number of Periodic Automated Replenishment (PAR) locations filled from perpetual inventory serviced by the receiving/warehousing department.
Value Analysis Hours Worked

This number represents the total hours worked by staff performing the function of value analysis. Functions include but are not limited to providing a point of entry and screening process for the consideration of new products, analyze, evaluate and monitor all trials of new supplies or equipment, recommend standardization of products, control and oversee the entry of sample products into the hospital and utilize the value analysis process for product selection and implementation, creating and providing financial and contractual analysis studies, insuring compliance with policies with regard to product utilization, handling and distribution for the purposes of maximizing cost containment and reimbursement.

Supply Chain Services Functional Rollup Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Buyer

Total hours worked by materials acquisition staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Courier Driver

Total hours worked for courier drivers.

Worked Hours: Data Analyst

Total hours worked by data analyst technical staff responsible for extracting data from information systems and performing statistical analysis.

This is a subset of Worked Hours: Staff.

Worked Hours: Inventory Analyst

Total hours worked by staff responsible for reviewing and analyzing inventory received and distributed throughout the facility.

This is a subset of Worked Hours: Staff.
Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Material Control

Total hours worked for inventory control staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Material Handling

Total hours worked for receiving, warehousing, distribution, messenger, courier, and patient escort staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee’s normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Sourcing

Total hours worked by staff performing the function of sourcing. Functions include but are not limited to initial vendor contract negotiations, request for quotes, identification of potential suppliers, validation of processes, quality, systems and safety of the goods and services utilized by the organization.

This is a subset of Worked Hours: Staff.
**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Systems Analyst (ie. MMIS)**

Total hours worked by staff responsible for creating, updating and or maintaining the facilities materials management information systems.

This is a subset of Worked Hours: Staff.

**Supply Chain Services Functional Rollup Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

**Operating Lease Expense**

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.
Overtime Salary Expense

Total expense for overtime hours accrued by materials management staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.

Supply Chain Services Functional Rollup Mandatory Elements

The following data elements are mandatory for this department:

- Acquisition Value
- Items Issued
- Items Put Away
- Items Received
- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Pick Ups Performed
- Release Orders Processed
- Round Trips Performed
- Total PAR Lines (non stock)
- Total PAR Lines (stock)
- Total PAR locations (non-stock)
- Total PAR locations (stock)
- Worked Hours: Staff
G5300, Other Supply Chain Services

This generic department includes cost centers belonging to Supply Chain Services that do not meet the current standard department definition and therefore cannot be mapped directly to an individual standard department.

Other Supply Chain Services Functional Rollup Mapping Guidelines

If your facility has separate cost centers for a mail room and or print shop functions, please utilize this generic department so that it may be present on the Supply Chain Functional Rollup Department report.

Other Supply Chain Services Workload Volumes

Acquisition Value

The amount entered for Acquisition Value represents the total dollar value of only the acquisitions purchased through the procurement department. Therefore, do not include amounts that may have been purchased within other departments like Food and Nutrition Services and or Pharmacy. This amount may be greater than the facility's total Other Direct Operating Expense reported on the General Facility Department (00100) due to capital asset or inventory purchases that do not fully hit Direct Operating Expense within the reporting period.

Adjusted Discharges Supported

Total number of Adjusted Discharges Supported by the department for the reporting period. This element is intended for a department which provides services and support to more than one business unit (hospital and non hospital). This value should be derived by taking the sum of the Total Gross Patient Revenue (for all the business units) divided by Total Gross Inpatient Revenue (for all business units) multiplied by the Total Discharges (for all business units). This value might be different than the Adjusted Discharge value calculated in the 00100, General Facility. Please review Adjusted Discharges Supported in the Guiding Principles section.

Analytic Hours Worked

This number represents the total hours worked by staff performing the function of analytics. Functions include but are not limited to the discovery and communication of meaningful patterns in data. Analytics uses this insight to recommend action or to guide decision making - communication.
CMI Weighted Adjusted Discharges Supported

The value entered for Case Mix Index Weighted Adjusted Discharges Supported represents a summed value for organizations that have one department that services multiple facilities. For example, if the Receiving and Warehousing department within this facility ID supports 5 hospitals, then the value entered would be the sum of the values submitted for Case Mix Index Weighted Adjusted Discharges for all 5 entities being reporting on their respective General Facility Departments (00100). Note: in addition to the sum of the 5 facilities this value may also include amounts of facilities not utilized within ActionOI. If this facility ID represents a single-standalone facility, enter zero and ActionOI will utilize the information submitted within the current General Facility Department (00100) in the appropriate calculations.

CMI Weighted Adjusted Patient Days Supported

The value entered for Case Mix Index Weighted Adjusted Patient Days Supported represents a summed value for organizations that have one department that services multiple facilities. For example, if the Receiving and Warehousing department within this facility ID supports 5 hospitals, then the value entered would be the sum of the values submitted for Case Mix Index Weighted Adjusted Patient Days for all 5 entities being reporting on their respective General Facility Departments (00100). Note: in addition to the sum of the 5 facilities this value may also include amounts of facilities not utilized within ActionOI. If this facility ID represents a single-standalone facility, enter zero and ActionOI will utilize the information submitted within the current General Facility Department (00100) in the appropriate calculations.

Department Consignment Used

Number of departments for which consignment is utilized.

Dollars Spent Under Contract

This number represents the dollar amount of the percent under contract. The amount that one should submit for this element can be collected by taking the facilities contract amount minus actual spend. This dollar amount may then be used to assist in the evaluation of the department's efficiency and effectiveness.

Fill Rates from Perpetual Inventory

This number represents the percent of items requested that are filled on the first try.

Initial Orders Processed

The total original purchase orders issued by the department. Count all one time, standing, and master purchase orders processed against a master purchase order created/issued during the reporting period. Also count standing purchase orders, such as an automatic shipment of goods or provision of services without Supply Chain staff intervention, only once. Do not count the automatic shipments/provisions for service covered by the order. Orders may be for stocked and non stocked supplies, services, capital equipment items, and any other item purchased through Supply Chain.

This is a subset of Release Orders Processed.
Items Issued
Total items issued or distributed to the end user by the receiving and warehousing department staff. If the end user requests 2 boxes of pencils, then the amount submitted is 2. If the end user orders 10 pencils then the amount submitted would be 10.

Items Put Away
Total items that have been placed into a storage containment unit located outside of the receiving and warehousing department so the products can be directly pulled by the end user.

Items Received
Total items received from suppliers by the receiving/warehousing department staff. Count the number of items that is representative of the purchased units. For example, if a shipment has received 50 cases of pencils and there are 100 boxes to each case with 10 pencils contained within each box, the amount submitted is 50.

Line Items Stocked in Perpetual Inventory (SKU)
The total number of individual products stocked and maintained in Receiving and Warehouse inventory. Do not include those that are managed by other end users. This represents the number stock keeping units (SKU). This count should be significantly less than Items Handled.

Miles Traveled
Total miles logged by department vehicles in support of specific requests. Include miles traveled obtained from vehicle trips or maintenance logs. If maintenance logs are used, be sure to prorate for beginning/end of year mileage readings.

Offsite Distribution Locations
The number of offsite distribution locations serviced by the Materials Mgmt department (i.e. clinics, physician offices, etc.)

Pick Ups Performed
Total separate (one way) pick ups performed.
Release Orders Processed

Total purchase orders and supply release documents issued through the department. The total includes all purchase orders prepared and release orders processed against a master purchase order created/issued during the reporting period. Count standing purchase orders, such as automatic shipment of goods or provision of services without Supply Chain staff intervention, only once. Do not count the automatic shipments/provisions for service covered by the order. Count the initial master order for release orders and each release order issued. Orders may be for stocked and non-stocked supplies, services, capital equipment items, and any other item purchased through Supply Chain. They may be either hand prepared or driven by automated systems.

Round Trips Performed

Total separate round trips performed.

Savings Actual

This number represents the actual amount of the savings reached during the reporting period that corresponds to the identified Savings Goal.

Savings Goal

This number represents the amount of money identified by the organization as a targeted supply cost reduction within the current fiscal year.

Sourcing Hours Worked

This number represents the total hours worked by staff performing the function of sourcing. Functions include but are not limited to initial vendor contract negotiations, request for quotes, identification of potential suppliers, validation of processes, quality, systems and safety of the goods and services utilized by the organization.

Stock Inventory Turns

The total number of stock inventory turns managed. Count the average turnover rate of inventory. Using your inventory balance as of the end of the reporting period, divide the total of inventory purchases by the inventory balance. This equals the number of times in the reporting period that stock was replenished.

For example, the hospital has a $1,000,000 inventory as of 09/30/2004. For the reporting period from 07/01/2004 to 09/30/2004, the facility purchases of inventory items totaled $6,000,000. Dividing $6,000,000 (in purchases) by $1,000,000 (the inventory value) equals 6. The inventory turned over 6 times in the reporting period. If your inventory balance fluctuated widely during the reporting period, average the inventory balances rather than using the ending balance.

Total PAR Lines (non stock)

Total number of line items/stock keeping units (SKU) in all non-stocked PAR locations.
**Total PAR Lines (stock)**

Total number of line items/stock keeping units (SKU) in all stocked PAR locations from perpetual inventory.

**Total PAR locations (non-stock)**

Total number of non-stock Periodic Automated Replenishment (PAR) locations serviced by the receiving/warehousing department.

**Total PAR locations (stock)**

Total number of Periodic Automated Replenishment (PAR) locations filled from perpetual inventory serviced by the receiving/warehousing department.

**Value Analysis Hours Worked**

This number represents the total hours worked by staff performing the function of value analysis. Functions include but are not limited to providing a point of entry and screening process for the consideration of new products, analyze, evaluate and monitor all trials of new supplies or equipment, recommend standardization of products, control and oversee the entry of sample products into the hospital and utilize the value analysis process for product selection and implementation, creating and providing financial and contractual analysis studies, insuring compliance with policies with regard to product utilization, handling and distribution for the purposes of maximizing cost containment and reimbursement.

**Other Supply Chain Services Department Hours Elements**

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: Buyer**

Total hours worked by materials acquisition staff.

This is a subset of Worked Hours: Staff.
Worked Hours: Courier Driver

Total hours worked for courier drivers.

Worked Hours: Data Analyst

Total hours worked by data analyst technical staff responsible for extracting data from information systems and performing statistical analysis.

This is a subset of Worked Hours: Staff.

Worked Hours: Inventory Analyst

Total hours worked by staff responsible for reviewing and analyzing inventory received and distributed throughout the facility.

This is a subset of Worked Hours: Staff.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Material Control

Total hours worked for inventory control staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Material Handling

Total hours worked for receiving, warehousing, distribution, messenger, courier, and patient escort staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
**Worked Hours: Overtime**

Represents the sum of non-physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Sourcing**

Total hours worked by staff performing the function of sourcing. Functions include but are not limited to initial vendor contract negotiations, request for quotes, identification of potential suppliers, validation of processes, quality, systems and safety of the goods and services utilized by the organization.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Systems Analyst (ie. MMIS)**

Total hours worked by staff responsible for creating, updating and or maintaining the facilities materials management information systems.

This is a subset of Worked Hours: Staff.

**Other Supply Chain Services Expense Elements**

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical / surgical supplies and pharmaceuticals.

This is a subset of Other Direct Operating Expense.
Non Medical Supply Expense

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

Operating Lease Expense

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense for professional fees, department supplies, equipment rental fees and operating lease expenses, dues, travel, small (non-capitalized) equipment, etc. Exclude depreciation, building rent expense, capitalized lease costs.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.

Other Supply Chain Services Mandatory Elements

The following data elements are mandatory for this department:

- Acquisition Value
- Items Issued
- Items Put Away
- Items Received
- Labor Expense
- Other Direct Operating Expense
- Paid Hours: Contract Labor
• Paid Hours: Staff
• Pick Ups Performed
• Release Orders Processed
• Round Trips Performed
• Total PAR Lines (non stock)
• Total PAR Lines (stock)
• Total PAR locations (non-stock)
• Total PAR locations (stock)
• Worked Hours: Staff

Other Supply Chain Services Normalizations

Include the hours, costs and volumes (where applicable) associated with the

• Mail Room
• Personnel performing the functions of the department’s day to day managerial operations (Supply Chain)
• Print Shop/Copy Center for the facility

Exclude the hours costs and volumes (where applicable) associated with the

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, outreach service to attract new business (Supply Chain)
• Contract negotiations, analysis, and monitoring (Supply Chain)
• Courier Services, e.g., transporting of goods and supplies to and from facility and/or off-site locations. Do not include the lab courier function
• Information System Logistics (execute supply chain transactions, manage supplier relationships, and control associated business processes)
• Lab Courier Service (Courier services specific to lab specimens only e.g. in house runners, external - remote pickup)
• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Supply Chain)

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens (infants may require heel sticks) which are sent to the laboratory for analysis and testing. Does not include line draws.

• Sourcing (initial vendor contract negotiations, request for quotes, identification of potential suppliers, validation of processes, quality, systems and safety of the goods and services utilized by the organization, capital projects)

• Sterile Processing (depending upon the type of department)

• Value Analysis (identifies and selects the best value alternatives for designs, materials, processes, and systems)

• Vendor Relationships (improve trust and collaboration among supply chain partners, thus improving inventory visibility and the velocity of inventory movement)
Chapter 39. Surgical Services

For an annotated list of Characteristic Questions for this series, please see the ActionOI support page.

This chapter includes the following sections:

- 03001, Surgical Services Combined Without Anesthesia 2242
- 03011, Operating Room 2259
- 03012, Cardiac Operating Room 2273
- 03020, Post Anesthesia Care Unit (PACU) 2285
- 03030, Surgery Pre Op and Post Recovery Only 2292
- 03035, Pre Op/PACU/Post-Op Combined 2301
- 03040, Ambulatory Surgery Center 2311
- 03060, Anesthesia 2321
- 03070, Central Sterile Services 2331
- 03071, Central Sterile Services without Distribution 2340
- 03099, Surgical Services Administration 2350
- F3000, Surgical Services Functional Rollup Department 2354
- G3000, Other Surgical Services 2367

03001, Surgical Services Combined Without Anesthesia

This department includes all operating room functions, PACU, central sterile supply, ambulatory surgery, and perfusion services. It does not include anesthesia or anesthesia support. Do not report departments 03011, 03012, 03013, 03020, 03040, 03070, 03071 if you report this department.
Surgical Services Combined Without Anesthesia Mapping Guidelines

If you have a single cost center that represents all of the services as defined, map to this profile. If you have separate cost centers for the individual components (i.e. one for the Operating Room, another for PACU, another for Ambulatory Surgery) it is best to map to the specific individual profile. If your cost center includes Anesthesia, this may not be an appropriate department. Another option might be G3000 Other Surgical Services.

Surgical Services Combined Without Anesthesia Workload Volumes

Ambulatory Surgery Cases

The total ambulatory or outpatient surgery cases performed in the operating room during the reporting period. A case may involve more than one surgical procedure as long as all of the procedures are performed during the same visit to the operating room. “Ambulatory” or “Outpatient” typically refers to patients who are not expected to stay greater than 24 hours (i.e. not admitted as inpatient). An ambulatory or outpatient case counted and reported in this element may also qualify to be counted in another subset element.

This is a component of Operating Room Cases.

Bariatric Cases

The total bariatric surgery cases performed in the operating room during the reporting period. Bariatric surgery is defined as a surgical bariatric intervention for individuals who have a body mass index (BMI) of greater than 40 kg/m2 or have a BMI greater than 35 kg/m2 with significant comorbidities.

This is a component of Operating Room Cases.

Bone Marrow Transplant Cases

The total Bone Marrow Transplant cases performed in the operating room during the reporting period.

This is a component of Operating Room Cases.

Days of Operation per Week

The average number of days per week that the department is open for routine business (i.e. has at least 50% of its "staff ready operating rooms" open for routine business).

The maximum number that can be reported is 7.
**Education and Orientation Hours**

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

**GI Endoscopy Cases**

The total GI Endoscopy Cases performed in this department during the reporting period. Endoscopy is the examination of a body cavity by means of an endoscope, a tube like instrument with lenses and a light source attached. Do not include cases performed by another department or in a separate Endoscopy suite reported in ActionOI under the 04630, Endoscopy department.

This is a component of Operating Room Cases.

**Heart Cases**

The total heart cases performed in the operating room during the reporting period. This would include procedures such as ventricular assisted device (VAD), total artificial heart (TAH) and transcatheter aortic valve replacement (TAVR). Do not include heart transplant cases as these cases are reported under Solid Organ Transplant Cases. Do not include heart cases performed by another department (i.e. Cath Lab, Invasive Cardiology) or in a separate cardiology suite.

This is a component of Operating Room Cases.

**Hip Replacement Cases**

The total hip replacement cases (excluding endoprothesis due to hip fracture) performed in the operating room during the reporting period.

This is a subset of Major Joint Cases.

**Hours of Operation per Week**

The average number of hours per week that the department is open for routine business (i.e. has at least 50% of its "staff ready operating rooms" open for routine business).

The maximum number that can be reported is 168.
Items Processed

The total number of items processed by the department during the reporting period. Items refers to the total individually wrapped units decontaminated, high level disinfected, and sterilized by department staff including trays, sets, and individual instruments along with mobile patient care equipment. A unit (wrap, set, tray) is based on an item recipe or order from the customer of the department. A customer can be surgery, labor and delivery, or other clinical area that requires the "unit" based on professional determination from that department. This unit can be one instrument. When more than one instrument is in a tray, set, or wrap, the unit is one that includes several instruments or items as designated by the recipe. Do not count a unit one time after decontamination and a second time after disinfection or sterilization.

Refer to the CSSD Processing Intensity Score Worksheet for assistance in reporting this element.

Knee Replacement Cases

The total knee replacement cases (including uni or partial knee) performed in the operating room during the reporting period.

This is a subset of Major Joint Cases.

Major Joint Cases

The total major joint cases performed in the operating room during the reporting period. Major Joint cases may include, but are not limited to: knees, hips, shoulders, elbows and ankles.

This is a subset of Orthopedic Cases.

Neuro and Ortho Spine Cases

The total Neuro Ortho Spine cases performed in the operating room during the reporting period.

This is a component of Operating Room Cases.

Neurosurgery Cases

The total neurosurgery cases performed in the operating room during the reporting period. Neurosurgery is the surgical treatment of disorders of the nervous system. Do not include Neuro Ortho Spine Cases in this category.

This is a component of Operating Room Cases.

Operating Room Capacity

The total number of operating rooms designed and equipped for surgical operations, which are licensed by the state. Such rooms may support general surgery or specialized cases, such as open heart, eye surgery or cystoscopies.
**Operating Room Cases**

The total cases performed by department staff during the reporting period. A case may involve more than one surgical procedure as long as all of the procedures are performed during the same visit to the operating room. The value reported for cases should correspond with the value reported for Operating Room Minutes. Do not include incomplete cases if you are not able to accurately report the corresponding minutes for these cases.

Total of components may be greater than case total.

**Operating Room Emergency Cases**

The total emergency cases performed in the operating room during the reporting period. "Emergency" typically refers to an immediate threat and must be performed at the earliest opportunity to minimize risk to life, limb, and or sight. Do not include urgent cases (must be started within 3 hours) as they should be counted in Operating Room Urgent Cases.

This is a component of Operating Room Cases.

**Operating Room Minutes**

The total elapsed time in minutes from the time a patient enters the operating room until the time the patient leaves. This time is routinely recorded in the operating room log and should correspond with the value reported for Operating Room Cases.

**Operating Room Pediatric Cases**

The total number of pediatric cases performed by the department during the reporting period. A pediatric case is one that is performed on a patient younger than 18 years of age.

This is a component of Operating Room Cases.

**Operating Room Pediatric Minutes**

The total elapsed time in minutes from the time a pediatric patient enters the operating room until the time the patient leaves. A pediatric patient is one that is younger than 18 years of age.

This is a component of Operating Room Minutes.

**Operating Room Perfusion Minutes**

The total elapsed time in minutes a surgery patient receives perfusion treatment in the operating room during the reporting period. This time is routinely recorded in the operating room log.

This is a component of Operating Room Minutes.
Operating Room Robotic Minutes
The total elapsed time in minutes from the time a robotic surgery patient enters the operating room until the time the patient leaves. This time is routinely recorded in the operating room log.

This is a component of Operating Room Minutes.

Operating Room Trauma Cases
The total emergency cases identified as trauma performed in the operating room during the reporting period. "Trauma" typically refers to a serious or critical bodily injury, wound, or shock. Your facility is not required to be a designated trauma center to report this element.

This is a component of Operating Room Emergency Cases.

Operating Room Urgent Cases
The total urgent cases performed in the operating room during the reporting period. "Urgent" typically refers to a case that must be started within 3 hours to minimize risk to life, limb and or sight. Do not include emergency cases (must be started at the earliest opportunity or immediately) as they should be counted in Operating Room Emergency Cases.

This is a component of Operating Room Cases.

Ophthalmology Cases
The total number of ophthalmology cases performed by the department during the reporting period. Ophthalmology cases includes but is not limited to laser eye surgery, cataract surgery, glaucoma surgery, refractive surgery and corneal surgery.

This is a component of Operating Room Cases.

Orthopedic Cases
The total orthopedic cases performed in the operating room during the reporting period. Orthopedics is the branch of surgery concerned with disorders of bones and joints and the muscles, tendons, and ligaments associated with them. Do not report Neuro Ortho Spine cases in this category.

This is a component of Operating Room Cases.

Recovery Room Cases
The total number of PACU cases. This may include surgical patients, patients referred from labor and delivery, radiology, the GI lab, and the cath lab, and patients receiving blood transfusions or nerve blocks. Include patients seen through discrete visits, such as ambulatory, inpatient, or outpatient surgery.
PACU Inpatient Cases
The total number of inpatient PACU cases. Include inpatients seen through discrete visits.

This is a component of PACU Cases.

PACU Minutes
The total amount of PACU minutes (includes Phase I, Phase II and pre operative holding case minutes) measured by when the patient enters the department to when the patient leaves the department. Do not include the time spent by Border Patients.

PACU Pediatric Cases
The total number of pediatric PACU cases supported by the department during the reporting period. A pediatric case is one that is performed on a patient younger than 18 years of age.

This is a component of PACU Cases.

PACU Pediatric Minutes
The total elapsed time in minutes from the time a pediatric patient enters the department until the patient leaves. A pediatric patient is one that is younger than 18 years of age.

This is a component of PACU Minutes.

Phase 1 Case Minutes
The total number of Phase I Post Anesthesia Care Unit (PACU) case minutes. Phase I PACU is a critical care area providing post anesthesia nursing care for patients immediately after operative and invasive procedures prior to discharge to the Phase II ambulatory setting, the inpatient surgical unit or the Intensive Care Unit for continued care.

This is a component of PACU Minutes. A patient may also move to Phase 2 and would be counted in that element as well.

Phase 1 Cases
The total number of Phase I Post Anesthesia Care Unit (PACU) cases. Phase I PACU is a critical care area providing post anesthesia nursing care for patients immediately after operative and invasive procedures prior to discharge to the Phase II ambulatory setting, the inpatient surgical unit or the Intensive Care Unit for continued care.

This is a component of PACU Cases. A patient may also move to Phase 2 and would be counted in that element as well.
**Phase 2 Case Minutes**

The total Phase II Post Anesthesia Care Unit (PACU) case minutes. Phase II PACU provides post anesthesia nursing care for patients immediately after operative procedures that utilized monitored anesthesia care (MAC), local anesthesia and for patients that have met the discharge criteria for Phase I. The primary nursing role during this phase is to focus on preparing the patient and the patient's caregiver for care in the home after discharge. Do not include the time Boarder Patients stay in the department, as the time would be counted in the element Boarder Hours.

This is a component of PACU Minutes. A patient may also move to Phase 1 and would be counted in that element as well.

**Phase 2 Cases**

The total number of Phase II Post Anesthesia Care Unit (PACU) cases. Phase II PACU provides post anesthesia nursing care for patients immediately after operative procedures that utilized monitored anesthesia care (MAC), local anesthesia and for patients that have met the discharge criteria for Phase I. The primary nursing role during this phase is to focus on preparing the patient and the patient's caregiver for care in the home after discharge, or an extended care environment. Do not include Boarder Patients as they would be counted in the element Boarder Patients.

This is a component of PACU Cases. A patient may have been counted in the Phase 1 element as well.

**Preoperative Visits**

Total number of preoperative visits to this department. If preoperative visits occur in another department, or another location such as a community based testing center, do not include these visits in the ambulatory surgery preoperative visits.

**Robotic Surgical Cases**

The total number of robotic cases performed by the department during the reporting period.

This is a component of Operating Room Cases.

**Solid Organ Transplant Cases**

The total solid organ transplant cases (including heart transplant procedures) performed in the operating room during the reporting period. Do not include cases involving only organ retrieval procedures. Bone Marrow Transplant cases are not to be included in this element and should be reported separately under the element Bone Marrow Transplant Cases.

This is a component of Operating Room Cases.
Staff Ready Operating Rooms

The total number of separate operating rooms designed and equipped for surgical operations which have staff available (in house). Such rooms may support general surgery or specialized cases, such as open heart, eye surgery or cystoscopies. Do not include rooms that are not ready for surgical use.

This is a subset of Operating Room Capacity.

TAVR Surgical Cases

The total number of transcatheter aortic valve replacement (TAVR) surgical cases performed during the reporting period.

This is a component of Heart Cases.

Turnover Time

The average time (expressed in minutes) that the operating room(s) cannot be used due to necessary cleaning between sequentially scheduled cases (patient out to patient in). Do not include time where there is a planned break or gap between cases when calculating the average (i.e. no case schedule during a 4-hour planned break).

VAD/TAH Surgical Cases

The total number of ventricular assisted device (VAD) and total artificial heart (TAH) surgical cases performed during the reporting period.

This is a component of Heart Cases.

Surgical Services Combined Without Anesthesia Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.
Paid Hours: Physician Provider

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Anesthesia Technician

Total hours worked by anesthesia technicians.

This is a subset of Worked Hours: Staff.

Worked Hours: Central Sterile Technician

Total hours worked by Central Sterile Technicians.

This is a subset of Worked Hours: Staff.

Worked Hours: LPN, LVN

Hours worked by licensed practical nurse, licensed vocational nurses providing patient care services in the department.

This is a subset of Worked Hours: Staff.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.
Worked Hours: Other Patient Care Provider

Total hours worked by other patient care providers (e.g. LPN/LVN, nursing assistant, nursing technician, etc.) who provide basic care under the direct supervision of patient care personnel.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Perfusionist

Total hours worked by perfusionist staff on the payroll.

This is a subset of Worked Hours: Staff.

Worked Hours: Physician Provider

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

Worked Hours: RN

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.
This is a subset of Worked Hours: Staff.

**Worked Hours: RNFA, SA**

Total hours worked by registered nurse first assistants and surgical assistants.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Surgical Technician**

Total hours worked by certified and non-certified Surgical Technicians.

This is a subset of Worked Hours: Staff.

**Surgical Services Combined Without Anesthesia Expense Elements**

**Anesthesia Supply Expense**

Total anesthesia, pharmaceuticals, and anesthesia supplies expense used in surgery, labor and delivery or other areas.

This is a subset of Medical Supply Expense.

**Endomechanical Supply Expense**

Total expense for disposable instrumentation and suture for endoscopic procedures, endomechanical staples, etc.

This is a subset of Medical Supply Expense.

**Equipment Repair And Maintenance Expense**

Total expense to repair and maintain major equipment charged to this department. Include fee-for-service labor and parts expense, service contract costs, and other related costs.

This is a subset of Other Direct Operating Expense.
**Implants Expense**

Total surgical supply expense for replacement, substitutes, or aids to body parts. Including but not limited to joint replacements, screws, plates, wires, mesh and pins. Exclude organ acquisition expenses.

This is a subset of Medical Supply Expense.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Perfusionist**

Total expense for perfusionists on the department's payroll.

This is a subset of Labor Expense.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Major Joint Implant Expense**

Total surgical supply expense for major joint implants (replacement, substitutes, or aids to body parts) including, but not limited to the knee, hip, shoulder, elbow and or ankle.

This is a subset of Implant Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical and or surgical supplies and pharmaceuticals. Exclude organ acquisition expenses.

This is a subset of Other Direct Operating Expense.
Non Medical Supply Expense
Total expense for the department non-medical operating supplies, e.g., office supplies and non-capitalized equipment.
This is a subset of Other Direct Operating Expense.

Operating Lease Expense
Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.
This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense
Total other direct operating expense that includes professional fees, department supplies, equipment rental fees, operating leases for equipment, dues, travel and small (non-capitalized) equipment. Exclude depreciation, building rent expense, capitalized lease costs and organ acquisition expenses.

Overtime Salary Expense
Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and callback time; exclude expense for on call time.
This is a subset of Labor Expense.

Perfusion Contract Expense
Total expense for contract perfusionists.
This is a subset of Other Direct Operating Expense.

Perfusion Supply Expense
Total expense for medical supplies used for activities related to the perfusion procedure.
This is a subset of Medical Supply Expense.
Physician Provider Professional Fee Expense

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

Robotic Supply Expense

Total surgical supply expense for robotic supplies.

This is a subset of Medical Supply Expense.

Spine Implant Expense

Total surgical supply expense for spine implants (replacements, substitutes, or aids to body parts). Including but not limited to screws, plates, wires, mesh and pins.

Suture Supply Expense

Total expense for skin staples, sutures, etc.

This is a subset of Medical Supply Expense.

TAVR Implant Expense

Total surgical supply expense for transcatheter aortic valve (TAVR) implants.

This is a subset of Implant Expense.

VAD/TAH Implant Expense

Total surgical supply expense for ventricular assisted devices (VAD) and total artificial heart (TAH) implants.

This is a subset of Implant Expense.

Surgical Services Combined Without Anesthesia Mandatory Elements

The following data elements are mandatory for this department:
• Days of Operation per Week
• Hours of Operation per Week
• Items Processed
• Labor Expense
• Labor Expense: Physician Provider
• Operating Room Capacity
• Operating Room Cases
• Operating Room Minutes
• Operating Room Minutes: Pediatric
• Operating Room Pediatric Cases
• Other Direct Operating Expense
• Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Physician Provider Professional Fee Expense
• Worked Hours: Physician Provider
• Worked Hours: Staff

**Surgical Services Combined Without Anesthesia Normalizations**

Include the hours, costs and volumes (where applicable) associated with the

• First Assistants (include RNFAs, Physician Assistants and other non-MDs functioning as First Assistants)
• Personnel performing the functions of the department’s day to day managerial operations (Surgical)
• Surgical Services procedure room cleaning between patients (e.g. pick up trash, disinfect surfaces, replace soiled linens)

Exclude the hours costs and volumes (where applicable) associated with the
• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, scheduling, residency program. (Surgical Services)

• Daily or terminal cleaning and wall washing for ancillary patient procedure areas

• Medical records coding (e.g. the use of medical charts and documentation from health care professionals to generate billing codes to be invoiced to patients and insurance companies)

• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture.

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Surgical)

• Preoperative care: including preop orders, testing, education

• Repair and Maintenance of Clinical Equipment/Rooms

• Surgical patient scheduling (e.g. scheduling the patients date and time of surgery)

• Surgical procedure scheduling (e.g. generating preference cards, assigning staff and surgical rooms based on the type of case)

• Anesthetic gases (e.g. nitrous oxide, sevoflurane, desflurane, isoflurane, and halothane)

• Cleaning and processing of scopes or instruments used by the Endoscopy-GI Lab department

• Employee training programs (e.g. formal classroom training, lectures, textbooks, didactic training)

• Organ procurement or acquisition expenses

• Post-procedure recovery for Endoscopy GI studies and related procedures (phase 1 and 2)

• Pre-procedure assessment and patient preparation for Endoscopy GI studies and related procedures

• Procedure assessment, patient preparation and post-procedure recovery for Sleep disorder studies and related procedures

• Purchasing - acquiring or buying, require vendors met their contracted or negotiated prices, tracking and validating goods and services. This normalization is applicable if you utilize the Procurement department (Excludes food and pharmaceuticals)
• Purchasing, Receiving, Warehousing and Inventory Control. This normalization is applicable if you utilize the Combined Procurement, Receiving and Warehousing

• Surgical Clinical Reviewer (SCR) for the National Surgical Quality Improvement Program (NSQIP)

• Transport of patients not requiring clinical escort

03011, Operating Room

This department includes all functions related to operating room services, including intraoperative patient care. It also includes perfusion services, inpatient and/or outpatient services, and other operating room support functions. It does not include PACU, anesthesia functions, pre op holding, and/or central sterile functions.

Operating Room Mapping Guidelines

If your cost center includes the pre op holding, PACU, post op recovery, anesthesia functions, O.R. Sterile Processing and/or Central Sterile Supply and Distribution functions, this department may not be an appropriate choice. Other options would include the 03001 Surgical Services Combined Without Anesthesia department. If you have a separate cost center for a Cardiac Operating Room, map it to the 03012 Cardiac Operating Room profile.

Operating Room Workload Volumes

Ambulatory Surgery Cases

The total ambulatory or outpatient surgery cases performed in the operating room during the reporting period. A case may involve more than one surgical procedure as long as all of the procedures are performed during the same visit to the operating room. “Ambulatory” or “Outpatient” typically refers to patients who are not expected to stay greater than 24 hours (i.e. not admitted as inpatient). An ambulatory or outpatient case counted and reported in this element may also qualify to be counted in another subset element.

This is a component of Operating Room Cases.

Bariatric Cases

The total bariatric surgery cases performed in the operating room during the reporting period. Bariatric surgery is defined as a surgical bariatric intervention for individuals who have a body mass index (BMI) of greater than 40 kg/m2 or have a BMI greater than 35 kg/m2 with significant comorbidities.

This is a component of Operating Room Cases.
**Bone Marrow Transplant Cases**

The total Bone Marrow Transplant cases performed in the operating room during the reporting period.

This is a component of Operating Room Cases.

**Days of Operation per Week**

The average number of days per week that the department is open for routine business (i.e. has at least 50% of its "staff ready operating rooms" open for routine business).

The maximum number that can be reported is 7.

**Education and Orientation Hours**

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

**GI Endoscopy Cases**

The total GI Endoscopy Cases performed in this department during the reporting period. Endoscopy is the examination of a body cavity by means of an endoscope, a tube like instrument with lenses and a light source attached. Do not include cases performed by another department or in a separate Endoscopy suite reported in ActionOI under the 04630, Endoscopy department.

This is a component of Operating Room Cases.

**Heart Cases**

The total heart cases performed in the operating room during the reporting period. This would include procedures such as ventricular assisted device (VAD), total artificial heart (TAH) and transcatheter aortic valve replacement (TAVR). Do not include heart transplant cases as these cases are reported under Solid Organ Transplant Cases. Do not include heart cases performed by another department (i.e. Cath Lab, Invasive Cardiology) or in a separate cardiology suite.

This is a component of Operating Room Cases.

**Hip Replacement Cases**

The total hip replacement cases (excluding endoprosthesis due to hip fracture) performed in the operating room during the reporting period.

This is a subset of Major Joint Cases.
Hours of Operation per Week

The average number of hours per week that the department is open for routine business (i.e. has at least 50% of its "staff ready operating rooms" open for routine business).

The maximum number that can be reported is 168.

Knee Replacement Cases

The total knee replacement cases (including uni or partial knee) performed in the operating room during the reporting period.

This is a subset of Major Joint Cases.

Major Joint Cases

The total major joint cases performed in the operating room during the reporting period. Major Joint cases may include, but are not limited to: knees, hips, shoulders, elbows and ankles.

This is a subset of Orthopedic Cases.

Multiple Solid Organ Transplant Cases

The total multiple solid organ transplant cases supported by department staff. A multiple solid organ transplants must include the transplant of more than one solid organ. The organs transplanted may include but are not limited to kidney, liver, heart, and lung.

This is a subset of Solid Organ Transplants.

Neuro and Ortho Spine Cases

The total Neuro Ortho Spine cases performed in the operating room during the reporting period.

This is a component of Operating Room Cases.

Neurosurgery Cases

The total neurosurgery cases performed in the operating room during the reporting period. Neurosurgery is the surgical treatment of disorders of the nervous system. Do not include Neuro Ortho Spine Cases in this category.

This is a component of Operating Room Cases.
Operating Room Capacity

The total number of operating rooms designed and equipped for surgical operations, which are licensed by the state. Such rooms may support general surgery or specialized cases, such as open heart, eye surgery or cystoscopies.

Operating Room Cases

The total cases performed by department staff during the reporting period. A case may involve more than one surgical procedure as long as all of the procedures are performed during the same visit to the operating room. The value reported for cases should correspond with the value reported for Operating Room Minutes. Do not include incomplete cases if you are not able to accurately report the corresponding minutes for these cases.

Total of components may be greater than case total.

Operating Room Emergency Cases

The total emergency cases performed in the operating room during the reporting period. "Emergency" typically refers to an immediate threat and must be performed at the earliest opportunity to minimize risk to life, limb, and or sight. Do not include urgent cases (must be started within 3 hours) as they should be counted in Operating Room Urgent Cases.

This is a component of Operating Room Cases.

Operating Room Minutes

The total elapsed time in minutes from the time a patient enters the operating room until the time the patient leaves. This time is routinely recorded in the operating room log and should correspond with the value reported for Operating Room Cases.

Operating Room Pediatric Cases

The total number of pediatric cases performed by the department during the reporting period. A pediatric case is one that is performed on a patient younger than 18 years of age.

This is a component of Operating Room Cases.

Operating Room Pediatric Minutes

The total elapsed time in minutes from the time a pediatric patient enters the operating room until the time the patient leaves. A pediatric patient is one that is younger than 18 years of age.

This is a component of Operating Room Minutes.
**Operating Room Perfusion Minutes**

The total elapsed time in minutes a surgery patient receives perfusion treatment in the operating room during the reporting period. This time is routinely recorded in the operating room log.

This is a component of Operating Room Minutes.

**Operating Room Robotic Minutes**

The total elapsed time in minutes from the time a robotic surgery patient enters the operating room until the time the patient leaves. This time is routinely recorded in the operating room log.

This is a component of Operating Room Minutes.

**Operating Room Trauma Cases**

The total emergency cases identified as trauma performed in the operating room during the reporting period. "Trauma" typically refers to a serious or critical bodily injury, wound, or shock. Your facility is not required to be a designated trauma center to report this element.

This is a component of Operating Room Emergency Cases.

**Operating Room Urgent Cases**

The total urgent cases performed in the operating room during the reporting period. "Urgent" typically refers to a case that must be started within 3 hours to minimize risk to life, limb and or sight. Do not include emergency cases (must be started at the earliest opportunity or immediately) as they should be counted in Operating Room Emergency Cases.

This is a component of Operating Room Cases.

**Ophthalmology Cases**

The total number of ophthalmology cases performed by the department during the reporting period. Ophthalmology cases includes but is not limited to laser eye surgery, cataract surgery, glaucoma surgery, refractive surgery and corneal surgery.

This is a component of Operating Room Cases.

**Orthopedic Cases**

The total orthopedic cases performed in the operating room during the reporting period. Orthopedics is the branch of surgery concerned with disorders of bones and joints and the muscles, tendons, and ligaments associated with them. Do not report Neuro Ortho Spine cases in this category.

This is a component of Operating Room Cases.
Robotic Surgical Cases
The total number of robotic cases performed by the department during the reporting period.

This is a component of Operating Room Cases.

Solid Organ Transplant Cases
The total solid organ transplant cases (including heart transplant procedures) performed in the operating room during the reporting period. Do not include cases involving only organ retrieval procedures. Bone Marrow Transplant cases are not to be included in this element and should be reported separately under the element Bone Marrow Transplant Cases.

This is a component of Operating Room Cases.

Solid Organs Harvested
The total number of solid organs harvested. Each organ should be counted separately even if they are harvested from a single donor.

Staff Ready Operating Rooms
The total number of separate operating rooms designed and equipped for surgical operations which have staff available (in house). Such rooms may support general surgery or specialized cases, such as open heart, eye surgery or cystoscopies. Do not include rooms that are not ready for surgical use.

This is a subset of Operating Room Capacity.

TAVR Surgical Cases
The total number of transcatheter aortic valve replacement (TAVR) surgical cases performed during the reporting period.

This is a component of Heart Cases.

Turnover Time
The average time (expressed in minutes) that the operating room(s) cannot be used due to necessary cleaning between sequentially scheduled cases (patient out to patient in). Do not include time where there is a planned break or gap between cases when calculating the average (i.e. no case schedule during a 4-hour planned break).

VAD/TAH Surgical Cases
The total number of ventricular assisted device (VAD) and total artificial heart (TAH) surgical cases performed during the reporting period.
This is a component of Heart Cases.

**Operating Room Department Hours Elements**

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

**Paid Hours: Physician Provider**

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of **Paid Hours: Staff**.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Worked Hours: Anesthesia Technician**

Total hours worked by anesthesia technicians.

This is a subset of **Worked Hours: Staff**.

**Worked Hours: LPN, LVN**

Hours worked by licensed practical nurse, licensed vocational nurses providing patient care services in the department.

This is a subset of **Worked Hours: Staff**.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.
This is a subset of Worked Hours: Staff.

**Worked Hours: Other Patient Care Provider**

Total hours worked by other patient care providers (e.g. nursing assistant, nursing technician, mental health/psychiatric aide, etc.) who provide basic care under the direct supervision of patient care personnel.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee’s normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Perfusionist**

Total hours worked by perfusionist staff on the payroll.

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.
Worked Hours: RN

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

Worked Hours: RNFA, SA

Total hours worked by registered nurse first assistants and surgical assistants.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Worked Hours: Surgical Technician

Total hours worked by certified and non-certified Surgical Technicians.

This is a subset of Worked Hours: Staff.

Operating Room Expense Elements

Anesthesia Supply Expense

Total anesthesia, pharmaceuticals, and anesthesia supplies expense used in surgery, labor and delivery, or other areas.

This is a subset of Medical Supply Expense.

Endomechanical Supply Expense

Total expense for disposable instrumentation and suture for endoscopic procedures, endomechanical staples, etc.

This is a subset of Medical Supply Expense.

Equipment Repair And Maintenance Expense

Total expense to repair and maintain major equipment charged to this department. Include fee-for-service labor and parts expense, service contract costs, and other related costs.

This is a subset of Other Direct Operating Expense.
Implants Expense
Total surgical supply expense for replacement, substitutes, or aids to body parts. Including but not limited to joint replacements, screws, plates, wires, mesh and pins. Exclude organ acquisition expenses.

This is a subset of Medical Supply Expense.

Labor Expense
Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Perfusionist
Total expense for perfusionists on the department's payroll.

This is a subset of Labor Expense.

Labor Expense: Physician Provider
Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Major Joint Implant Expense
Total surgical supply expense for major joint implants (replacement, substitutes, or aids to body parts) including, but not limited to the knee, hip, shoulder, elbow and or ankle.

This is a subset of Implant Expense.

Medical Supply Expense
Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical and or surgical supplies and pharmaceuticals. Exclude organ acquisition expenses.

This is a subset of Other Direct Operating Expense.
Non Medical Supply Expense

Total expense for the department non-medical operating supplies, e.g., office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

Operating Lease Expense

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense that includes professional fees, department supplies, equipment rental fees, operating leases for equipment, dues, travel and small (non-capitalized) equipment. Exclude depreciation, building rent expense, capitalized lease costs and organ acquisition expenses.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.

Perfusion Contract Expense

Total expense for contract perfusionists.

This is a subset of Other Direct Operating Expense.

Perfusion Supply Expense

Total expense for medical supplies used for activities related to the perfusion procedure.

This is a subset of Medical Supply Expense.
Physician Provider Professional Fee Expense

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

Robotic Supply Expense

Total surgical supply expense for robotic supplies.

This is a subset of Medical Supply Expense.

Spine Implant Expense

Total surgical supply expense for spine implants (replacements, substitutes, or aids to body parts). Including but not limited to screws, plates, wires, mesh and pins.

This is a subset of Implant Expense.

Suture Supply Expense

Total expense for skin staples, sutures, etc.

This is a subset of Medical Supply Expense.

TAVR Implant Expense

Total surgical supply expense for transcatheter aortic valve (TAVR) implants.

This is a subset of Implant Expense.

VAD/TAH Implant Expense

Total surgical supply expense for ventricular assisted devices (VAD) and total artificial heart (TAH) implants.

This is a subset of Implant Expense.

Operating Room Mandatory Elements
The following data elements are mandatory for this department:

- Days of Operation per Week
- Hours of Operation per Week
- Labor Expense
- Labor Expense: Physician Provider
- Operating Room Capacity
- Operating Room Cases
- Operating Room Minutes
- Operating Room Minutes: Pediatric
- Operating Room Pediatric Cases
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff

**Operating Room Normalizations**

Include the hours, costs and volumes (where applicable) associated with the

- First Assistants (include RNFAs, Physician Assistants and other non-MDs functioning as First Assistants)
- Personnel performing the functions of the department’s day to day managerial operations (Surgical)
- Surgical Services procedure room cleaning between patients (e.g. pick up trash, disinfect surfaces, replace soiled linens)

Exclude the hours costs and volumes (where applicable) associated with the
• Daily or terminal cleaning and wall washing for ancillary patient procedure areas
• Instrument Decontamination, Pack Assembly, Terminal Sterilization
• Medical records coding (e.g. the use of medical charts and documentation from health care professionals to generate billing codes to be invoiced to patients and insurance companies)
• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
• Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture.
• Personnel performing the functions of administration and managerial oversight operations (Surgical)
• Preoperative care: including preop orders, testing, education
• Repair and Maintenance of Clinical Equipment/Rooms
• Staff that maintain/repair flash sterilizers (e.g. testing, cleaning) or any sterilization equipment (e.g. disinfectors, washers).
• Surgical patient scheduling (e.g. scheduling the patients date and time of surgery)
• Surgical procedure scheduling (e.g. generating preference cards, assigning staff and surgical rooms based on the type of case)
• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program. (Surgical Services)
• Anesthetic gases (e.g. nitrous oxide, sevoflurane, desflurane, isoflurane, and halothane)
• Employee training programs (e.g. formal classroom training, lectures, textbooks, didactic training)
• Organ procurement or acquisition expenses
• Phase 1 Post operative recovery
• Phase 2 Post operative recovery (does not include boarders)
• Post-procedure recovery for Endoscopy GI studies and related procedures (phase 1 and 2)
• Pre-Op Holding and Post-Procedure Recovery
• Pre-procedure assessment and patient preparation for Endoscopy GI studies and related procedures
- Procedure assessment, patient preparation and post-procedure recovery for Sleep disorder studies and related procedures

- Purchasing - acquiring or buying, require vendors met their contracted or negotiated prices, tracking and validating goods and services. This normalization is applicable if you utilize the Procurement department (Excludes food and pharmaceuticals)

- Purchasing, Receiving, Warehousing and Inventory Control. This normalization is applicable if you utilize the Combined Procurement, Receiving and Warehousing

- Sterile Processing (depending upon the type of department)

- Surgical Clinical Reviewer (SCR) for the National Surgical Quality Improvement Program (NSQIP)

- Transport of patients not requiring clinical escort

03012, Cardiac Operating Room

This department includes all functions related to cardiac operating room services, including intraoperative patient care. It also includes perfusion services, inpatient and/or outpatient services, and other operating room support functions. It does not include PACU, anesthesia functions, pre op holding, and/or central sterile functions.

Cardiac Operating Room Mapping Guidelines

If your cost center includes the pre op holding, PACU, post op recovery, anesthesia functions, O.R. Sterile Processing and/or Central Sterile Supply and Distribution functions, this department may not be an appropriate choice. Other options would include the 03001 Surgical Services Combined Without Anesthesia department. If you do not have a separate cost center for a Cardiac Operating Room, another option would be the 03011 Operating Room profile.

Cardiac Operating Room Workload Volumes

Ambulatory Surgery Cases

The total ambulatory or outpatient surgery cases performed in the operating room during the reporting period. A case may involve more than one surgical procedure as long as all of the procedures are performed during the same visit to the operating room. "Ambulatory" or "Outpatient" typically refers to patients who are not expected to stay greater than 24 hours (i.e. not admitted as inpatient). An ambulatory or outpatient case counted and reported in this element may also qualify to be counted in another subset element.

This is a component of Operating Room Cases.
**Days of Operation per Week**

The average number of days per week that the department is open for routine business (i.e. has at least 50% of its "staff ready operating rooms" open for routine business).

The maximum number that can be reported is 7.

**Education and Orientation Hours**

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

**Heart Cases**

The total heart cases performed in the operating room during the reporting period. This would include procedures such as ventricular assisted device (VAD), total artificial heart (TAH) and transcatheter aortic valve replacement (TAVR). Do not include heart transplant cases as these cases are reported under Solid Organ Transplant Cases. Do not include heart cases performed by another department (i.e. Cath Lab, Invasive Cardiology) or in a separate cardiology suite.

This is a component of Operating Room Cases.

**Hours of Operation per Week**

The average number of hours per week that the department is open for routine business (i.e. has at least 50% of its "staff ready operating rooms" open for routine business).

The maximum number that can be reported is 168.

**Operating Room Capacity**

The total number of operating rooms designed and equipped for surgical operations, which are licensed by the state. Such rooms may support general surgery or specialized cases, such as open heart, eye surgery or cystoscopies.

**Operating Room Cases**

The total cases performed by department staff during the reporting period. A case may involve more than one surgical procedure as long as all of the procedures are performed during the same visit to the operating room. The value reported for cases should correspond with the value reported for Operating Room Minutes. Do not include incomplete cases if you are not able to accurately report the corresponding minutes for these cases.

Total of components may be greater than case total.
Operating Room Emergency Cases

The total emergency cases performed in the operating room during the reporting period. "Emergency" typically refers to an immediate threat and must be performed at the earliest opportunity to minimize risk to life, limb, and or sight. Do not include urgent cases (must be started within 3 hours) as they should be counted in Operating Room Urgent Cases.

This is a component of Operating Room Cases.

Operating Room Minutes

The total elapsed time in minutes from the time a patient enters the operating room until the time the patient leaves. This time is routinely recorded in the operating room log and should correspond with the value reported for Operating Room Cases.

Operating Room Pediatric Cases

The total number of pediatric cases performed by the department during the reporting period. A pediatric case is one that is performed on a patient younger than 18 years of age.

This is a component of Operating Room Cases.

Operating Room Pediatric Minutes

The total elapsed time in minutes from the time a pediatric patient enters the operating room until the time the patient leaves. A pediatric patient is one that is younger than 18 years of age.

This is a component of Operating Room Minutes.

Operating Room Perfusion Minutes

The total elapsed time in minutes a surgery patient receives perfusion treatment in the operating room during the reporting period. This time is routinely recorded in the operating room log.

This is a component of Operating Room Minutes.

Operating Room Robotic Minutes

The total elapsed time in minutes from the time a robotic surgery patient enters the operating room until the time the patient leaves. This time is routinely recorded in the operating room log.

This is a component of Operating Room Minutes.
Operating Room Trauma Cases

The total emergency cases identified as trauma performed in the operating room during the reporting period. "Trauma" typically refers to a serious or critical bodily injury, wound, or shock. Your facility is not required to be a designated trauma center to report this element.

This is a component of Operating Room Emergency Cases.

Operating Room Urgent Cases

The total urgent cases performed in the operating room during the reporting period. "Urgent" typically refers to a case that must be started within 3 hours to minimize risk to life, limb and or sight. Do not include emergency cases (must be started at the earliest opportunity or immediately) as they should be counted in Operating Room Emergency Cases.

This is a component of Operating Room Cases.

Robotic Surgical Cases

The total number of robotic cases performed by the department during the reporting period.

This is a component of Operating Room Cases.

Staff Ready Operating Rooms

The total number of separate operating rooms designed and equipped for surgical operations which have staff available (in house). Such rooms may support general surgery or specialized cases, such as open heart, eye surgery or cystoscopies. Do not include rooms that are not ready for surgical use.

This is a subset of Operating Room Capacity.

TAVR Surgical Cases

The total number of transcatheter aortic valve replacement (TAVR) surgical cases performed during the reporting period.

This is a component of Heart Cases.

Turnover Time

The average time (expressed in minutes) that the operating room(s) cannot be used due to necessary cleaning between sequentially scheduled cases (patient out to patient in). Do not include time where there is a planned break or gap between cases when calculating the average (i.e. no case schedule during a 4-hour planned break).
VAD/TAH Surgical Cases

The total number of ventricular assisted device (VAD) and total artificial heart (TAH) surgical cases performed during the reporting period.

This is a component of Heart Cases.

Cardiac Operating Room Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Anesthesia Technician

Total hours worked by anesthesia technicians.

This is a subset of Worked Hours: Staff.

Worked Hours: LPN, LVN

Hours worked by licensed practical nurse, licensed vocational nurses providing patient care services in the department.

This is a subset of Worked Hours: Staff.
**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Patient Care Provider**

Total hours worked by other patient care providers (e.g. LPN/LVN, nursing assistant, nursing technician, etc.) who provide basic care under the direct supervision of patient care personnel.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee’s normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Perfusionist**

Total hours worked by perfusionist staff on the payroll.

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.
This is a subset of Worked Hours: Staff.

**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

**Worked Hours: RNFA, SA**

Total hours worked by registered nurse first assistants and surgical assistants.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Surgical Technician**

Total hours worked by certified and non-certified Surgical Technicians.

This is a subset of Worked Hours: Staff.

**Cardiac Operating Room Expense Elements**

**Anesthesia Supply Expense**

Total anesthesia, pharmaceuticals, and anesthesia supplies expense used in surgery, labor and delivery or other areas.

This is a subset of Medical Supply Expense.

**Endomechanical Supply Expense**

Total expense for disposable instrumentation and suture for endoscopic procedures, endomechanical staples, etc.

This is a subset of Medical Supply Expense.
**Equipment Repair And Maintenance Expense**

Total expense to repair and maintain major equipment charged to this department. Include fee-for-service labor and parts expense, service contract costs, and other related costs.

This is a subset of Other Direct Operating Expense.

**Implants Expense**

Total surgical supply expense for replacement, substitutes, or aids to body parts. Including but not limited to joint replacements, screws, plates, wires, mesh and pins. Exclude organ acquisition expenses.

This is a subset of Medical Supply Expense.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Perfusionist**

Total expense for perfusionists on the department's payroll.

This is a subset of Labor Expense.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical and or surgical supplies and pharmaceuticals. Exclude organ acquisition expenses.

This is a subset of Other Direct Operating Expense.
Non Medical Supply Expense

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

Operating Lease Expense

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense that includes professional fees, department supplies, equipment rental fees, operating leases for equipment, dues, travel and small (non-capitalized) equipment. Exclude depreciation, building rent expense, capitalized lease costs and organ acquisition expenses.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

Perfusion Contract Expense

Total expense for contract perfusionists.

This is a subset of Other Direct Operating Expense.

Perfusion Contract Expense

Total expense for contract perfusionists.

This is a subset of Other Direct Operating Expense.

Perfusion Supply Expense

Total expense for medical supplies used for activities related to the perfusion procedure.

This is a subset of Medical Supply Expense.
Physician Provider Professional Fee Expense

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

Suture Supply Expense

Total expense for skin staples, sutures, etc.

This is a subset of Medical Supply Expense.

TAVR Implant Expense

Total surgical supply expense for transcatheter aortic valve (TAVR) implants.

This is a subset of Implant Expense.

VAD/TAH Implant Expense

Total surgical supply expense for ventricular assisted devices (VAD) and total artificial heart (TAH) implants.

This is a subset of Implant Expense.

Cardiac Operating Room Mandatory Elements

The following data elements are mandatory for this department:

- Days of Operation per Week
- Hours of Operation per Week
- Labor Expense
- Labor Expense: Physician Provider
- Operating Room Capacity
- Operating Room Cases
Operating Room Minutes

Operating Room Minutes: Pediatric

Operating Room Pediatric Cases

Other Direct Operating Expense

Paid Hours: Contract Labor

Paid Hours: Physician Provider

Paid Hours: Staff

Physician Provider Professional Fee Expense

Worked Hours: Physician Provider

Worked Hours: Staff

Cardiac Operating Room Normalizations

Include the hours, costs and volumes (where applicable) associated with the

- First Assistants (include RNFAs, Physician Assistants and other non-MDs functioning as First Assistants)
- Personnel performing the functions of the department’s day to day managerial operations (Surgical)
- Surgical Services procedure room cleaning between patients (e.g. pick up trash, disinfect surfaces, replace soiled linens)

Exclude the hours costs and volumes (where applicable) associated with the

- Daily or terminal cleaning and wall washing for ancillary patient procedure areas
- Instrument Decontamination, Pack Assembly, Terminal Sterilization
- Medical records coding (e.g. the use of medical charts and documentation from health care professionals to generate billing codes to be invoiced to patients and insurance companies)
- Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
- Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
• Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture.

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Surgical)

• Preoperative care: including preop orders, testing, education

• Repair and Maintenance of Clinical Equipment/Roos

• Staff that maintain/repair flash sterilizers (e.g. testing, cleaning) or any sterilization equipment (e.g. disinfectors, washers).

• Surgical patient scheduling (e.g. scheduling the patients date and time of surgery)

• Surgical procedure scheduling (e.g. generating preference cards, assigning staff and surgical rooms based on the type of case)

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program. (Surgical Services)

• Anesthetic gases (e.g. nitrous oxide, sevoflurane, desflurane, isoflurane, and halothane

• Employee training programs (e.g. formal classroom training, lectures, textbooks, didactic training)

• Organ procurement or acquisition expenses

• Phase 1 Post operative recovery

• Phase 2 Post operative recovery (does not include boarders)

• Post-procedure recovery for Endoscopy GI studies and related procedures (phase 1 and 2)

• Pre-Op Holding and Post-Procedure Recovery

• Pre-procedure assessment and patient preparation for Endoscopy GI studies and related procedures

• Procedure assessment, patient preparation and post-procedure recovery for Sleep disorder studies and related procedures

• Purchasing - acquiring or buying, require vendors met their contracted or negotiated prices, tracking and validating goods and services. This normalization is applicable if you utilize the Procurement department (Excludes food and pharmaceuticals)

• Purchasing, Receiving, Warehousing and Inventory Control. This normalization is applicable if you utilize the Combined Procurement, Receiving and Warehousing

• Sterile Processing (depending upon the type of department)
• Surgical Clinical Reviewer (SCR) for the National Surgical Quality Improvement Program (NSQIP)
• Transport of patients not requiring clinical escort

03020, Post Anesthesia Care Unit (PACU)

The Post Anesthesia Care Unit (PACU) department provides patient monitoring and care during the immediate post anesthesia period. Care may include primary as well as secondary recovery phases. In addition, PACU may provide patient care for over flow patients and specific procedures, such as therapeutic or diagnostic blocks for pain control, insertion of epidural or central catheters, or electroconvulsive therapy.

Post Anesthesia Care Unit Mapping Guidelines

If your cost center includes both pre operative and post operative care, another option might be the 03035 Pre-Op/PACU/Post-Op Combined department. If you have separate cost centers for different Post Anesthesia Care Units, map each one in a unique instance.

Post Anesthesia Care Unit Workload Volumes

Boarder Hours

The total time in hours Boarder Patients (patients who have completed Phase 2 recovery and have been identified for inpatient admission but still reside in the department) are cared for by department staff during the reporting period. The time starts with either a status change to inpatient or a maximum of 2 hours after a bed request has been submitted. Do not report boarder patients’ time under PACU minutes.

Boarder Patients

Total number of Boarder Patients cared for by department staff during the reporting period. A boarder patient has completed Phase 2 recovery and meets all the criteria to be admitted as an Inpatient, but a room is not available. Boarder patients typically wait 2-4 hours before the inpatient room becomes available.

Days of Operation per Week

The average number of days per week that the department is open for routine business.

The max number reported here is 7.
**Education and Orientation Hours**

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

**Hours of Operation per Week**

The average number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

**PACU Cases**

The total number of PACU cases. This may include surgical patients, patients referred from labor and delivery, radiology, the GI lab, Cath lab, and patients receiving blood transfusions or nerve blocks. Include patients seen through discrete visits, such as ambulatory, inpatient, or outpatient surgery.

**PACU Inpatient Cases**

The total number of inpatient PACU cases. Include inpatients seen through discrete visits.

This is a component of PACU Cases.

**PACU Minutes**

The total amount of PACU minutes (includes Phase I, Phase II and pre operative holding case minutes) measured by when the patient enters the department to when the patient leaves the department. Do not include the time spent by Boarder Patients.

**PACU Pediatric Cases**

The total number of pediatric PACU cases. Include patients seen through discrete visits. A pediatric case is one that is performed on a patient younger than 18 years of age.

This is a component of PACU Cases.

**PACU Pediatric Minutes**

The total elapsed time in minutes from the time a pediatric patient enters the department until the patient leaves. A pediatric patient is one that is younger than 18 years of age.

This is a component of PACU Minutes.
Pain Block Patient Cases
The number of pain block patients supported during the reporting period.

This is a component of PACU Cases.

Phase 1 Case Minutes
The total number of Phase I Post Anesthesia Care Unit (PACU) case minutes. Phase I PACU is a critical care area providing post anesthesia nursing care for patients immediately after operative and invasive procedures prior to discharge to the Phase II ambulatory setting, the inpatient surgical unit or the Intensive Care Unit for continued care.

This is a component of PACU Minutes. A patient may also move to Phase 2 and would be counted in that element as well.

Phase 1 Cases
Total number of Phase I Post Anesthesia Care Unit (PACU) cases. Phase I PACU is a critical care area providing post anesthesia nursing care for patients immediately after operative and invasive procedures prior to discharge to the Phase II ambulatory setting, the inpatient surgical unit or the Intensive Care Unit for continued care.

This is a component of PACU Cases. A patient may also move to Phase 2 and would be counted in that element as well.

Phase 2 Case Minutes
The total Phase II Post Anesthesia Care Unit (PACU) case minutes. Phase II PACU provides post anesthesia nursing care for patients immediately after operative procedures that utilized monitored anesthesia care (MAC), local anesthesia and for patients that have met the discharge criteria for Phase I. The primary nursing role during this phase is to focus on preparing the patient and the patient's caregiver for care in the home after discharge. Do not include the time Boarder Patients stay in the department, as the time would be counted in the element Boarder Hours.

This is a component of PACU Minutes. A patient may also move to Phase 1 and would be counted in that element as well.

Phase 2 Cases
The total number of Phase II Post Anesthesia Care Unit (PACU) cases. Phase II PACU provides post anesthesia nursing care for patients immediately after operative procedures that utilized monitored anesthesia care (MAC), local anesthesia and for patients that have met the discharge criteria for Phase I. The primary nursing role during this phase is to focus on preparing the patient and the patient's caregiver for care in the home after discharge, or an extended care environment. Do not include Boarder Patients as they would be counted in the element Boarder Patients.

This is a component of PACU Cases. A patient may have been counted in the Phase 1 element as well.
Pre Operative Holding Cases
The total pre-operative holding cases supported by department staff.

This is a subset of Recovery Room Cases.

Regional Block Cases
The number of patients supported that receive a regional block. The regional block is administered at an appropriate location to provide anesthesia for surgery.

This is a component of PACU Cases.

Post Anesthesia Care Unit Department Hours Elements

Paid Hours: Contract Labor
Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff
Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: LPN, LVN
Hours worked by licensed practical nurse, licensed vocational nurses providing patient care services in the department.

This is a subset of Worked Hours: Staff.

Worked Hours: Management
Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Patient Care Provider
Total hours worked by other patient care providers (e.g. LPN/LVN, nursing assistant, nursing technician, etc.) who provide basic care under the direct supervision of patient care personnel.

This is a subset of Worked Hours: Staff.
**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee’s normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Surgical Technician**

Total hours worked by certified and non-certified Surgical Technicians.

This is a subset of Worked Hours: Staff.

**Post Anesthesia Care Unit Expense Elements**

**Equipment Repair And Maintenance Expense**

Total expense to repair and maintain major equipment charged to this department. Include fee-for-service labor and parts expense, service contract costs, and other related costs.

This is a subset of Other Direct Operating Expense.
Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical and or surgical supplies and pharmaceuticals. Exclude organ acquisition expenses.

This is a subset of Other Direct Operating Expense.

Operating Lease Expense

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense that includes professional fees, department supplies, equipment rental fees, operating leases for equipment, dues, travel and small (non-capitalized) equipment. Exclude depreciation, building rent expense, capitalized lease costs and organ acquisition expenses.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

Post Anesthesia Care Unit Mandatory Elements
The following data elements are mandatory for this department:

- Days of Operation per Week
- Hours of Operation per Week
- Labor Expense
- Other Direct Operating Expense
- PACU Cases
- PACU Pediatric Cases
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Recovery Room Cases
- Worked Hours: Staff

**Post Anesthesia Care Unit Normalizations**

Include the hours, costs and volumes (where applicable) associated with the

- Personnel performing the functions of the department’s day to day managerial operations (Surgical)
- Post operative recovery (Phase 1 or Phase 2)
- Phase 1 Post operative recovery
- Phase 2 Post operative recovery (does not include boarders)

Exclude the hours costs and volumes (where applicable) associated with the

- Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program. (Surgical Services)
- Employee training programs (e.g. formal classroom training, lectures, textbooks, didactic training)
- Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Surgical)

• Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

• Post-procedure recovery for Endoscopy GI studies and related procedures (phase 1 and 2)

• Pre-Op Holding and Post-Procedure Recovery

• Pre-procedure assessment and patient preparation for Endoscopy GI studies and related procedures

• Purchasing - acquiring or buying, require vendors met their contracted or negotiated prices, tracking and validating goods and services. This normalization is applicable if you utilize the Procurement department (Excludes food and pharmaceuticals)

• Purchasing, Receiving, Warehousing and Inventory Control. This normalization is applicable if you utilize the Combined Procurement, Receiving and Warehousing

• Repair and Maintenance of Clinical Equipment/Rooms.

• Transport of patients not requiring clinical escort

**03030, Surgery Pre Op and Post Recovery Only**

This department includes all preoperative care and secondary post anesthetic recovery care. Preoperative care includes work performed prior to the day of surgery and day of surgery, such as preoperative orders, testing, or teaching. Postoperative care extends past discharge to include telephone follow up. This department does not include PACU or operating room support functions for patients undergoing outpatient surgery and other invasive procedures.

**Surgery Pre Op and Post Recovery Only Mapping Guidelines**

If your cost center includes pre operative care and all phases of post operative care, another option might be the 03035 Pre-Op/PACU/Post-Op Combined department. If your cost center does not perform pre operative functions, another option might be the 03020 Post Anesthesia Care Unit (PACU) Only department.
Surgical Services

Surgery Pre Op and Post Recovery Only Workload Volumes

Ambulatory Surgery Cases Supported

The total ambulatory or outpatient surgery cases supported by the department during the reporting period. A case may involve more than one surgical procedure as long as all of the procedures are performed during the same visit to the operating room. "Ambulatory" or "Outpatient" typically refers to patients who are not expected to stay greater than 24 hours (i.e. not admitted as inpatient). An ambulatory or outpatient case counted and reported in this element may also qualify to be counted in another subset element.

This is a component of Total Cases Supported.

Boarder Hours

The total time in hours Boarder Patients (patients who have completed Phase 2 recovery and have been identified for inpatient admission but still reside in the department) are cared for by department staff during the reporting period. The time starts with either a status change to inpatient or a maximum of 2 hours after a bed request has been submitted. Do not report boarder patients' time under PACU minutes.

Boarder Patients

Total number of Boarder Patients cared for by department staff during the reporting period. A boarder patient has completed Phase 2 recovery and meets all the criteria to be admitted as an Inpatient, but a room is not available. Boarder patients typically wait 2-4 hours before the inpatient room becomes available.

Cases Supported: Inpatient

Total of all inpatient cases supported by department staff during the reporting period including the Operating Room(s), Ambulatory Surgery, and Anesthesia departments.

This is a component of Total Cases Supported.

Cases Supported: Pediatric

The total number of pediatric cases supported by the department during the reporting period. A pediatric case is one that is performed on a patient younger than 18 years of age.

This is a component of Total Cases Supported.

Days of Operation per Week

The average number of days per week that the department is open for routine business.
The max number reported here is 7.

**Education and Orientation Hours**

Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

**Hours of Operation per Week**

The average number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

**Medical Cases Supported**

The total medical cases supported by department staff during the reporting period. Medical cases are often referred to as procedural cases or non-surgical cases.

This is a component of Total Cases Supported.

**Pain Block Patient Cases Supported**

The number of pain block patients supported during the reporting period.

This is a component of Total Cases Supported.

**Patient Observation Minutes**

The total minutes patients are under the care of department staff including both pre and post recovery.

**Phone Encounters**

The number of routine, pre-admission/pre-procedure encounters (evaluations with pre-procedure teaching) by a registered nurse performed via telephone.

**Pre Operative Holding Cases**

The total pre operative holding cases supported by department staff.

This is a component of Total Cases Supported.
Preoperative Visits

The total number of preoperative visits to this department. If preoperative visits occur in another department or another location (such as a community-based testing center), do not include these visits in ambulatory surgery preoperative visits.

Regional Block Cases Supported

The number of patients supported that receive a regional block. The regional block is administered at an appropriate location to provide anesthesis for surgery.

This is a component of Total Cases Supported.

Total Cases Supported

Total of all cases supported by department staff during the reporting period.

Surgery Pre Op and Post Recovery Only Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: LPN, LVN

Hours worked by licensed practical nurse, licensed vocational nurses providing patient care services in the department.
This is a subset of Worked Hours: Staff.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Patient Care Provider**

Total hours worked by other patient care providers (e.g. LPN/LVN, nursing assistant, nursing technician, etc.) who provide basic care under the direct supervision of patient care personnel.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.
**Worked Hours: Preadmission Testing Staff**

Total hours worked by technologist, technician, and medical assistant staff dedicated to preadmission testing activities.

This is a subset of Worked Hours: Staff.

**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Surgical Technician**

Total hours worked by certified and non-certified Surgical Technicians.

This is a subset of Worked Hours: Staff.

**Surgery Pre Op and Post Recovery Only Expense Elements**

**Equipment Repair And Maintenance Expense**

Total expense to repair and maintain major equipment charged to this department. Include fee-for-service labor and parts expense, service contract costs, and other related costs.

This is a subset of Other Direct Operating Expense.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.
Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical and or surgical supplies and pharmaceuticals. Exclude organ acquisition expenses.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

Operating Lease Expense

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense that includes professional fees, department supplies, equipment rental fees, operating leases for equipment, dues, travel and small (non-capitalized) equipment. Exclude depreciation, building rent expense, capitalized lease costs and organ acquisition expenses.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.
This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

**Surgery Pre Op and Post Recovery Only Mandatory Elements**

The following data elements are mandatory for this department:

- Cases Supported
- Cases Supported: Pediatric
- Days of Operation per Week
- Hours of Operation per Week
- Labor Expense
- Labor Expense: Physician Provider
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Physician Provider
- Paid Hours: Staff
- Physician Provider Professional Fee Expense
- Worked Hours: Physician Provider
- Worked Hours: Staff
Surgery Pre Op and Post Recovery Only Normalizations

Include the hours and costs associated with the following function:

- Personnel performing the functions of the department’s day to day managerial operations (Surgical)
- Preoperative care: including preop orders, testing, education

Exclude the hours costs and volumes (where applicable) associated with the

- Ambulatory Surgery Registrations-for hospital based Ambulatory Surgery departments
- Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
- Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
- Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Surgical)
- Post-procedure recovery for Cardiovascular studies and related procedures
- Post-procedure recovery for Endoscopy GI studies and related procedures (phase 1 and 2)
- Pre-procedure assessment and patient preparation for Cardiovascular studies and related procedures
- Pre-procedure assessment and patient preparation for Endoscopy GI studies and related procedures
- Procedure assessment, patient preparation and post-procedure recovery for Sleep disorder studies and related procedures
- Repair and Maintenance of Clinical Equipment/Rooms
- Surgical patient scheduling (e.g. scheduling the patients date and time of surgery)
- Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program. (Surgical Services)
- Employee training programs (e.g. formal classroom training, lectures, textbooks, didactic training)
- Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.
• Purchasing - acquiring or buying, require vendors met their contracted or negotiated prices, tracking and validating goods and services. This normalization is applicable if you utilize the Procurement department (Excludes food and pharmaceuticals)

• Purchasing, Receiving, Warehousing and Inventory Control. This normalization is applicable if you utilize the Combined Procurement, Receiving and Warehousing

• Transport of patients not requiring clinical escort

03035, Pre Op/PACU/Post-Op Combined

The Pre-Op/PACU/Post-Op Combined department provides patient monitoring and care during the pre operative, immediate post anesthesia, and secondary post anesthetic recovery care periods. Pre operative care includes but is not limited to: work performed prior to the day of surgery (such as pre operative orders, testing, or teaching) and on the day of surgery (such as pre operative holding, testing). Immediate post anesthesia care may include primary as well as secondary recovery phases. Post operative care extends past discharge to include telephone follow up. In addition, the department may provide patient care for over flow patients and specific procedures, such as therapeutic or diagnostic blocks for pain control, insertion of epidural or central catheters, or electroconvulsive therapy.

Pre Op/PACU/Post-Op Combined Mapping Guidelines

If you have a single cost center that represents all of the services as defined, map to this profile. If your cost center does not include pre operative and post operative care, another option might be the PACU Only department. If your cost center does not include the immediate post anesthesia care, another option might be the Surgery Pre Op and Post Recovery Only department.

Pre Op/PACU/Post-Op Combined Workload Volumes

Ambulatory Surgery Cases Supported

The total ambulatory or outpatient surgery cases supported by the department during the reporting period. A case may involve more than one surgical procedure as long as all of the procedures are performed during the same visit to the operating room. "Ambulatory" or "Outpatient" typically refers to patients who are not expected to stay greater than 24 hours (i.e. not admitted as inpatient). An ambulatory or outpatient case counted and reported in this element may also qualify to be counted in another subset element.

This is a component of Total Cases Supported.
Boarder Hours
The total time in hours Boarder Patients (patients who have completed Phase 2 recovery and have been identified for inpatient admission but still reside in the department) are cared for by department staff during the reporting period. The time starts with either a status change to inpatient or a maximum of 2 hours after a bed request has been submitted. Do not report boarder patients' time under PACU minutes.

Boarder Patients
Total number of Boarder Patients cared for by department staff during the reporting period. A boarder patient has completed Phase 2 recovery and meets all the criteria to be admitted as an Inpatient, but a room is not available. Boarder patients typically wait 2-4 hours before the inpatient room becomes available.

Cases Supported: Inpatient
Total of all inpatient cases supported by department staff during the reporting period including the Operating Room(s), Ambulatory Surgery, and Anesthesia departments.

This is a component of Total Cases Supported.

Cases Supported: Pediatric
The total number of pediatric cases supported by the department during the reporting period. A pediatric case is one that is performed on a patient younger than 18 years of age.

This is a component of Total Cases Supported.

Days of Operation per Week
The average number of days per week that the department is open for routine business.

The maximum number that can be reported is 7.

Education and Orientation Hours
Enter the total number of hours staff participated in education and orientation for the reporting period. The education and orientation hours captured here is separate from organizational orientation. Education and Orientation hours are for the purpose of continuing education and on the job training for staff only. This excludes contract labor.

Hours of Operation per Week
The average number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.
Medical Cases Supported

The total medical cases supported by department staff during the reporting period. Medical cases are often referred to as procedural cases or non-surgical cases.

This is a component of Total Cases Supported.

PACU Cases

The total number of PACU cases. This may include surgical patients, patients referred from labor and delivery, radiology, the GI lab, and the cath lab, and patients receiving blood transfusions or nerve blocks. Include patients seen through discrete visits, such as ambulatory, inpatient, or outpatient surgery.

PACU Inpatient Cases

The total number of inpatient PACU cases. Include inpatients seen through discrete visits.

This is a component of PACU Cases.

PACU Minutes

The total amount of PACU minutes (includes Phase I, Phase II and pre operative holding case minutes) measured by when the patient enters the department to when the patient leaves the department. Do not include the time spent by Boarder Patients.

PACU Pediatric Cases

The total number of pediatric PACU cases supported by the department during the reporting period. A pediatric case is one that is performed on a patient younger than 18 years of age.

This is a component of PACU Cases.

PACU Pediatric Minutes

The total elapsed time in minutes from the time a pediatric patient enters the department until the patient leaves. A pediatric patient is one that is younger than 18 years of age.

This is a component of PACU Minutes.

Pain Block Patient Cases Supported

The number of patients supported that receive pain blocks during the reporting period.

This is a component of Total Cases Supported.
Patient Observation Minutes

The total minutes patients are under the care of department staff including both pre and post recovery.

Phase 1 Case Minutes

The total number of Phase I Post Anesthesia Care Unit (PACU) case minutes. Phase I PACU is a critical care area providing post anesthesia nursing care for patients immediately after operative and invasive procedures prior to discharge to the Phase II ambulatory setting, the inpatient surgical unit or the Intensive Care Unit for continued care.

This is a component of PACU Minutes. A patient may also move to Phase 2 and would be counted in that element as well.

Phase 1 Cases

Total number of Phase I Post Anesthesia Care Unit (PACU) cases. Phase I PACU is a critical care area providing post anesthesia nursing care for patients immediately after operative and invasive procedures prior to discharge to the Phase II ambulatory setting, the inpatient surgical unit or the Intensive Care Unit for continued care.

This is a component of PACU Cases. A patient may also move to Phase 2 and would be counted in that element as well.

Phase 2 Case Minutes

The total Phase II Post Anesthesia Care Unit (PACU) case minutes. Phase II PACU provides post anesthesia nursing care for patients immediately after operative procedures that utilized monitored anesthesia care (MAC), local anesthesia and for patients that have met the discharge criteria for Phase I. The primary nursing role during this phase is to focus on preparing the patient and the patient's caregiver for care in the home after discharge. Do not include the time Boarder Patients stay in the department, as the time would be counted in the element Boarder Hours.

This is a component of PACU Minutes. A patient may also move to Phase 1 and would be counted in that element as well.

Phase 2 Cases

The total number of Phase II Post Anesthesia Care Unit (PACU) cases. Phase II PACU provides post anesthesia nursing care for patients immediately after operative procedures that utilized monitored anesthesia care (MAC), local anesthesia and for patients that have met the discharge criteria for Phase I. The primary nursing role during this phase is to focus on preparing the patient and the patient's caregiver for care in the home after discharge, or an extended care environment. Do not include Boarder Patients as they would be counted in the element Boarder Patients.

This is a component of PACU Cases. A patient may have been counted in the Phase 1 element as well.
**Phone Encounters**

The number of routine, pre-admission/pre-procedure encounters (evaluations with pre-procedure teaching) by a registered nurse performed via telephone.

**Pre Operative Holding Cases**

The total pre operative holding cases supported by department staff.

This is a component of Total Cases Supported.

**Preoperative Visits**

The total number of preoperative visits to this department. If preoperative visits occur in another department or another location (such as a community-based testing center), do not include these visits in ambulatory surgery preoperative visits.

**Regional Block Cases**

The number of patients supported that receive a regional block. The regional block is administered at an appropriate location to provide anesthesia for surgery.

This is a component of PACU Cases.

**Regional Block Minutes**

The total minutes (lapse time) that would begin with the Time Out and include the sedation of the patient, the procedure and the time the RN remains at the bedside post procedure providing 1:1 care in monitoring the patient and vital signs.

This is a component of PACU Minutes.

**Total Cases Supported**

Total of all cases supported by department staff during the reporting period.

**Pre Op/PACU/Post-Op Combined Department Hours Elements**

**Paid Hours: Contract Labor**

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.
**Paid Hours: Physician Provider**

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time-off hours. Exclude on-call or standby time.

**Worked Hours: LPN, LVN**

Hours worked by LPN, LVNs (Licensed Practical Nurses or Licensed Vocational Nurses) providing patient care services in the department.

This is a subset of Worked Hours: Staff.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Patient Care Provider**

Total hours worked by other patient care providers (e.g. LPN/LVN, nursing assistant, nursing technician, etc.) who provide basic care under the direct supervision of patient care personnel.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
**Worked Hours: Overtime**

Represents the sum of non-physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: Preadmission Testing Staff**

Total hours worked by technologist, technician, and medical assistant staff dedicated to preadmission testing activities.

This is a subset of Worked Hours: Staff.

**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) Including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Surgical Technician**

Total hours worked by certified and non-certified Surgical Technicians.

This is a subset of Worked Hours: Staff.
Pre Op/PACU/Post-Op Combined Expense Elements

Equipment Repair And Maintenance Expense

Total expense to repair and maintain major equipment charged to this department. Include fee for service labor and parts expense, service contract costs, and other related costs.

This is a subset of Other Direct Operating Expense.

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical and or surgical supplies and pharmaceuticals. Exclude organ acquisition expenses.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.
**Operating Lease Expense**

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense that includes professional fees, department supplies, equipment rental fees, operating leases for equipment, dues, travel and small (non-capitalized) equipment. Exclude depreciation, building rent expense, capitalized lease costs and organ acquisition expenses.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

**Pre Op/PACU/Post-Op Combined Mandatory Elements**

The following data elements are mandatory for this department:

- Cases Supported
- Cases Supported: Pediatric
- Days of Operation per Week
- Hours of Operation per Week
- Labor Expense
• Labor Expense: Physician Provider
• Other Direct Operating Expense
• PACU Cases
• PACU Pediatric Cases
• Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Physician Provider Professional Fee Expense
• Worked Hours: Physician Provider
• Worked Hours: Staff

Pre Op/PACU/Post-Op Combined Normalizations

Include the hours costs and volumes (where applicable) associated with the

• Personnel performing the functions of the department’s day to day managerial operations (Surgical)
• Phase 1 Post operative recovery
• Phase 2 Post operative recovery (does not include boarders)
• Preoperative care: including preop orders, testing, education
• Surgical Services procedure room cleaning between patients (e.g. pick up trash, disinfect surfaces, replace soiled linens)

Exclude the hours costs and volumes (where applicable) associated with the

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program. (Surgical Services)
• Ambulatory Surgery Registrations-for hospital based Ambulatory Surgery departments
• Employee training programs (e.g. formal classroom training, lectures, textbooks, didactic training)
• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
- Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

- Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Surgical)

- Phlebotomy, e.g., the puncturing of a vein for collecting blood specimens which are sent to the laboratory for analysis and testing. Does not include line draws.

- Post-procedure recovery for Cardiovascular studies and related procedures

- Post-procedure recovery for Endoscopy GI studies and related procedures (phase 1 and 2)

- Pre-procedure assessment and patient preparation for Cardiovascular studies and related procedures

- Pre-procedure assessment and patient preparation for Endoscopy GI studies and related procedures

- Procedure assessment, patient preparation and post-procedure recovery for Sleep disorder studies and related procedures

- Purchasing - acquiring or buying, require vendors met their contracted or negotiated prices, tracking and validating goods and services. This normalization is applicable if you utilize the Procurement department (Excludes food and pharmaceuticals)

- Purchasing, Receiving, Warehousing and Inventory Control. This normalization is applicable if you utilize the Combined Procurement, Receiving and Warehousing

- Repair and Maintenance of Clinical Equipment/Rooms

- Surgical patient scheduling (e.g. scheduling the patients date and time of surgery)

- Transport of patients not requiring clinical escort

03040, Ambulatory Surgery Center

The Ambulatory Surgery Center department may include functions related to the operating room, pre operative care, PACU, and post operative services for patients undergoing outpatient, ambulatory surgical procedures. This includes but is not limited to: intraoperative patient care and monitoring, perfusion services, and other ambulatory surgery support functions. It does not include anesthesia functions, Sterile Processing and/or Central Sterile Supply and Distribution functions.

Ambulatory Surgery Center Mapping Guidelines

If your cost center does not perform outpatient surgery, another option might be the 03030, Surgery Pre Op and Post Recovery Only department.
Ambulatory Surgery Center Workload Volumes

Days of Operation per Week
The average number of days per week that the department is open for routine business (i.e. has at least 50% of its "staff ready operating rooms" open for routine business).

The maximum number that can be reported is 7.

GI Endoscopy Cases
The total GI Endoscopy Cases performed in this department during the reporting period. Endoscopy is the examination of a body cavity by means of an endoscope, a tube like instrument with lenses and a light source attached. Do not include cases performed by another department or in a separate Endoscopy suite reported in ActionOI under the 04630, Endoscopy department.

This is a component of Operating Room Cases.

Hours of Operation per Week
The average number of hours per week that the department is open for routine business (i.e. has at least 50% of its "staff ready operating rooms" open for routine business).

The maximum number that can be reported is 168.

Operating Room Capacity
The total number of operating rooms designed and equipped for surgical operations, which are licensed by the state. Such rooms may support general surgery or specialized cases, such as open heart, eye surgery or cystoscopies.

Operating Room Cases
The total cases performed by department staff during the reporting period. A case may involve more than one surgical procedure as long as all of the procedures are performed during the same visit to the operating room. The value reported for cases should correspond with the value reported for Operating Room Minutes. Do not include incomplete cases if you are not able to accurately report the corresponding minutes for these cases.

Total of components may be greater than case total.
**Operating Room Minutes**

The total elapsed time in minutes from the time a patient enters the operating room until the time the patient leaves. This time is routinely recorded in the operating room log and should correspond with the value reported for Operating Room Cases.

**Operating Room Pediatric Cases**

The total number of pediatric cases performed by the department during the reporting period. A pediatric case is one that is performed on a patient younger than 18 years of age.

This is a component of Operating Room Cases.

**Operating Room Pediatric Minutes**

The total elapsed time in minutes from the time a pediatric patient enters the operating room until the time the patient leaves. A pediatric patient is one that is younger than 18 years of age.

This is a component of Operating Room Minutes.

**Operating Room Robotic Minutes**

The total elapsed time in minutes from the time a robotic surgery patient enters the operating room until the time the patient leaves. This time is routinely recorded in the operating room log.

This is a component of Operating Room Minutes.

**Ophthalmology Cases**

The total number of ophthalmology cases performed by the department during the reporting period. Ophthalmology cases includes but is not limited to laser eye surgery, cataract surgery, glaucoma surgery, refractive surgery and corneal surgery.

This is a component of Operating Room Cases.

**Orthopedic Cases**

The total orthopedic cases performed in the operating room during the reporting period. Orthopedics is the branch of surgery concerned with disorders of bones and joints and the muscles, tendons, and ligaments associated with them. Do not report Neuro Ortho Spine cases in this category.

This is a component of Operating Room Cases.
Recovery Room Cases

The total number of PACU cases. This may include surgical patients, patients referred from labor and delivery, radiology, the GI lab, and the cath lab, and patients receiving blood transfusions or nerve blocks. Include patients seen through discrete visits, such as ambulatory, inpatient, or outpatient surgery.

PACU Minutes

The total amount of PACU minutes (includes Phase I, Phase II and pre operative holding case minutes) measured by when the patient enters the department to when the patient leaves the department. Do not include the time spent by Boarder Patients.

Preoperative Visits

The total number of preoperative visits to this department. If preoperative visits occur in another department or another location (such as a community-based testing center), do not include these visits in ambulatory surgery preoperative visits.

Robotic Surgical Cases

The total number of robotic cases performed by the department during the reporting period.

This is a component of Operating Room Cases.

Staff Ready Operating Rooms

The total number of separate operating rooms designed and equipped for surgical operations which have staff available (in house). Such rooms may support general surgery or specialized cases, such as open heart, eye surgery or cystoscopies. Do not include rooms that are not ready for surgical use.

This is a subset of Operating Room Capacity.

Turnover Time

The average time (expressed in minutes) that the operating room(s) cannot be used due to necessary cleaning between sequentially scheduled cases (patient out to patient in). Do not include time where there is a planned break or gap between cases when calculating the average (i.e. no case schedule during a 4-hour planned break).

Ambulatory Surgery Center Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.
**Paid Hours: Physician Provider**

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

**Paid Hours: Staff**

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

**Robotic Supply Expense**

Total surgical supply expense for robotic supplies.

This is a subset of Medical Supply Expense.

**Suture Supply Expense**

Total expense for skin staples, sutures, etc.

This is a subset of Medical Supply Expense.

**Worked Hours: Anesthesia Technician**

Total hours worked by anesthesia technicians.

Total hours worked by anesthesia technicians.

**Worked Hours: LPN, LVN**

Hours worked by licensed practical nurse, licensed vocational nurses providing patient care services in the department.

This is a subset of Worked Hours: Staff.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.
This is a subset of Worked Hours: Staff.

**Worked Hours: Other Patient Care Provider**

Total hours worked by other patient care providers (e.g. LPN/LVN, nursing assistant, nursing technician, etc.) who provide basic care under the direct supervision of patient care personnel.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

**Worked Hours: Overtime**

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.
Worked Hours: RNFA, SA

Total hours worked by registered nurse first assistants and surgical assistants.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Worked Hours: Surgical Technician

Total hours worked by certified and non-certified Surgical Technicians.

This is a subset of Worked Hours: Staff.

Ambulatory Surgery Center Expense Elements

Anesthesia Supply Expense

Total anesthesia, pharmaceuticals, and anesthesia supplies expense used in surgery, labor and delivery or other areas.

This is a subset of Medical Supply Expense.

Endomechanical Supply Expense

Total expense for disposable instrumentation/suture for endoscopic procedures, endomechanical staples, etc.

This is a subset of Medical Supply Expense.

Equipment Repair And Maintenance Expense

Total expense to repair and maintain major equipment charged to this department. Include fee-for-service labor and parts expense, service contract costs, and other related costs.

This is a subset of Other Direct Operating Expense.

Implants Expense

Total surgical supply expense for replacement, substitutes, or aids to body parts. Examples of these expenses are joint replacements, screws, plates, wires, and pins. Pacemakers and implantable defibrillators should be reported on a Cardiac department.
This is a subset of Medical Supply Expense.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical and or surgical supplies and pharmaceuticals. Exclude organ acquisition expenses.

This is a subset of Other Direct Operating Expense.

**Robotic Supply Expense**

Total surgical supply expense for robotic supplies.

This is a subset of Medical Supply Expense.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

**Operating Lease Expense**

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.
This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense that includes professional fees, department supplies, equipment rental fees, operating leases for equipment, dues, travel and small (non-capitalized) equipment. Exclude depreciation, building rent expense, capitalized lease costs and organ acquisition expenses.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.

**Physician Provider Professional Fee Expense**

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

**Suture Supply Expense**

Total expense for skin staples, sutures, etc.

This is a subset of Medical Supply Expense.

**Ambulatory Surgery Center Mandatory Elements**

The following data elements are mandatory for this department:

- Days of Operation per Week
- Hours of Operation per Week
- Labor Expense
- Labor Expense: Physician Provider
• Operating Room Capacity
• Operating Room Cases
• Operating Room Minutes
• Operating Room Pediatric Minutes
• Other Direct Operating Expense
• Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Physician Provider Professional Fee Expense
• Worked Hours: Physician Provider
• Worked Hours: Staff

Ambulatory Surgery Center Normalizations

Include the hours costs and volumes (where applicable) associated with the

• Personnel performing the functions of the department’s day to day managerial operations (Surgical)
• Surgical Services procedure room cleaning between patients (e.g. pick up trash, disinfect surfaces, replace soiled linens)
• First Assistants (include RNFAs, Physician Assistants and other non-MDs functioning as First Assistants)

Exclude the hours costs and volumes (where applicable) associated with the

• Ambulatory Surgery Registrations—for hospital based Ambulatory Surgery departments
• Daily or terminal cleaning and wall washing for ancillary patient procedure areas
• Instrument Decontamination, Pack Assembly, Terminal Sterilization
• Medical records coding (e.g. the use of medical charts and documentation from health care professionals to generate billing codes to be invoiced to patients and insurance companies)
• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
- Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

- Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture.

- Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Surgical)

- Repair and Maintenance of Clinical Equipment/Rooms

- Surgical patient scheduling (e.g. scheduling the patients date and time of surgery)

- Surgical procedure scheduling (e.g. generating preference cards, assigning staff and surgical rooms based on the type of case)

- Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program. (Surgical Services)

- Anesthetic gases (e.g. nitrous oxide, sevoflurane, desflurane, isoflurane, and halothane)

- Purchasing - acquiring or buying, require vendors met their contracted or negotiated prices, tracking and validating goods and services. This normalization is applicable if you utilize the Procurement department (Excludes food and pharmaceuticals)

- Purchasing, Receiving, Warehousing and Inventory Control. This normalization is applicable if you utilize the Combined Procurement, Receiving and Warehousing

- Surgical Clinical Reviewer (SCR) for the National Surgical Quality Improvement Program (NSQIP)

### 03060, Anesthesia

This department provides anesthesia anywhere within the facility. May include but not limited to the operating room, ambulatory surgery, labor and delivery, emergency department, cardiac catheterization lab, and intensive care units. This includes peri-anesthetic care.

### Anesthesia Mapping Guidelines

If your cost center performs only monitoring or care during the immediate post anesthesia period or for specific procedures, another option might be the 03020 PACU 0r 03035 Pre Op/PACU/Post Op departments.
Anesthesia Workload Volumes

ASA Physical Status 1

Report the number of Anesthesia Cases with an ASA Physical Status Level 1 as defined by the American Society of Anesthesiology. Patients assigned to ASA PS Level 1 are defined as a normal healthy patient. Examples include a healthy individual, non-smoking and no or minimal alcohol use.

ASA Physical Status 2

Report the number of Anesthesia Cases with an ASA Physical Status Level 2 as defined by the American Society of Anesthesiology. Patients assigned to ASA PS Level 2 are defined as patients with mild systemic disease. Examples include but not limited to mild diseases only without substantive functional limitations, current smoker, obesity (30 < BMI < 40) or mild lung disease.

ASA Physical Status 3

Report the number of Anesthesia Cases with an ASA Physical Status Level 3 as defined by the American Society of Anesthesiology. Patients assigned to ASA PS Level 3 are defined as patients with severe systemic disease with substantive functional limitations. Examples include but not limited to poorly controlled diabetes or hypertension, COPD, morbid obesity (BMI greater than or equal to 40), active hepatitis, alcohol dependence or abuse, implanted pacemaker or undergoing regularly scheduled dialysis.

ASA Physical Status 4

Report the number of Anesthesia Cases with an ASA Physical Status Level 4 as defined by the American Society of Anesthesiology. Patients assigned to ASA PS Level 4 are patients with severe systemic disease that is a constant threat to life. Examples include but are not limited to recent Myocardial Infarction, CVA, TIA, or CAD/stents, ongoing cardiac ischemia or severe valve dysfunction or sepsis.

ASA Physical Status 5

Report the number of Anesthesia Cases with an ASA Physical Status Level 5 as defined by the American Society of Anesthesiology. Patients assigned to ASA PS Level 5 are moribund patients who are not expected to survive without the operation. Examples include but not limited to ruptured abdominal/thoracic aneurysm, massive trauma, intracranial bleed with mass effect, ischemic bowel in the face of significant cardiac pathology or multiple organ/system dysfunction.

ASA Physical Status 6

Report the number of Anesthesia Cases with an ASA Physical Status Level 6 as defined by the American Society of Anesthesiology. Patients assigned to ASA PS Level 6 declared brain-dead and whose organs are being removed for donor purposes.
Cases Attended

The total cases attended by anesthesia staff for all types of anesthesia, such as surgery, labor and delivery, special procedure, and nerve block.

Geriatric Cases Attended

Total number of Geriatric Cases attended. A Geriatric case is a case that is performed on a patient 65 years or older.

This is a component of Cases Attended.

Inpatient Cases Attended

The total number of anesthesia inpatient cases attended. An anesthesia inpatient is defined as an inpatient for whom an anesthesia procedure is performed. Each patient is counted once, regardless of the number of surgical procedures, amount of time involved or type of procedure.

This is a component of Cases Attended.

Pediatric Cases Attended

Number of Pediatric Cases attended. A pediatric case is one that is performed on a patient younger than 18 years of age.

This is a component of Cases Attended.

Days of Operation per Week

The average number of days per week that the department is open for routine business.

The max number reported here is 7.

Epidural Cases

Number of Epidural Cases. Including but not limited to OB and pain management cases. Include only cases performed by this department within the Operating Room.

This is a subset of Regional Anesthesia Cases.
General Anesthesia Cases

Number of cases performed under general anesthesia during the reporting period. General Anesthesia is a drug-induced loss of consciousness during which patients are not arousable, even by painful stimulation. The ability to independently maintain ventilatory support is often impaired. Patients often require assistance in maintaining a patent airway, and positive pressure ventilation may be required because of depressed spontaneous ventilation or drug-induced depression of neuromuscular function. Cardiovascular function may also be impaired.

This is a component of Cases Attended.

Hours of Operation per Week

The average number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

Local Anesthesia Cases

Number of cases performed under local anesthesia during the reporting period. For local anesthesia, the provider will inject a local anesthetic into a specific area of the body to numb that area by preventing the nerves from sending pain signals. Lidocaine is an example of a commonly used local anesthetic.

This is a component of Cases Attended.

Minutes Anesthesia (Total) Start to Finish

The total minutes (lapse time) the patient is sedated (includes conscious and unconscious sedation). This would include sedation given to the patient in pre-op along with the block. This time is routinely recorded in the anesthesia record. This number should not exceed Minutes Patient Enter to Leave.

This is a subset of Minutes Patient Enter To Leave.

Minutes Anesthesia (Unconscious) Start To Finish

The total minutes (lapse time) the anesthetic provider is in patient attendance for delivery of anesthetic. This time is routinely recorded in the anesthesia record. This number should not exceed Minutes Anesthesia (Total) Start To Finish.

This is a subset of Minutes Anesthesia (Total) Start To Finish.

Minutes Patient Enter To Leave

The total minutes that a member of the anesthesia team is responsible for the patient. This includes the time preparing the patient for the induction of any type of anesthesia until the time the care of the patient becomes the responsibility of the post anesthesia care team.
Non Operating Room Anesthesia (NORA) Cases

Number of Non Operating Room Anesthesia Cases. A Non Operating Room Anesthesia Case is one that provides sedation for patients apart from the operating suite. This can include but is not limited to radiology, endoscopy and hematology and or oncology patients who require sedation on a regular basis.

This is a component of Cases Attended.

Non Operating Room Regional Block Cases

Number of regional block placements performed outside of the operating room. A Non Operating Room Block Case is one that provides a regional block to patients apart from the operating suite.

This is a subset of Regional Blocked Cases.

Regional Anesthesia Cases

Number of cases performed under regional anesthesia during the reporting period. Regional Anesthesia is the delivery of anesthetic medication at a specific level of the spinal cord and/or to peripheral nerves, including epidurals and spinalis and other central neuraxial nerve blocks. It is used when loss of consciousness is not desired but sufficient analgesia and loss of voluntary and involuntary movement is required. Regional anesthesia can be used alone during surgery, in combination with general anesthesia during surgery or after surgery for pain control.

This is a component of Cases Attended.

Regional Block Cases

Number of patients that receive a regional block. The regional block is administered at an appropriate location to provide anesthesia for surgery.

Regional Block Minutes

The total minutes (lapse time) that would begin with the Time Out and include the sedation of the patient, the procedure and the time the RN remains at the bedside post procedure providing 1:1 care in monitoring the patient and vital signs.

Anesthesia Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.
Paid Hours: Physician Provider
Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff
Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Anesthesia Technician
Total hours worked by anesthesia technicians.

This is a subset of Worked Hours: Staff.

Worked Hours: LPN, LVN
Hours worked by licensed practical nurse, licensed vocational nurses providing patient care services in the department.

This is a subset of Worked Hours: Staff.

Worked Hours: Management
Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Patient Care Provider
Total hours worked by other patient care providers (e.g. LPN/LVN, nursing assistant, nursing technician, etc.) who provide basic care under the direct supervision of patient care personnel.

This is a subset of Worked Hours: Staff.
Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Physician Provider

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

Worked Hours: RN

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Anesthesia Expense Elements

Anesthesia Supply Expense

Total anesthesia, pharmaceuticals, and anesthesia supplies expense used in surgery, labor and delivery, or other areas.
This is a subset of Medical Supply Expense.

**Equipment Repair And Maintenance Expense**

Total expense to repair and maintain major equipment charged to this department. Include fee-for-service labor and parts expense, service contract costs, and other related costs.

This is a subset of Other Direct Operating Expense.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical and or surgical supplies and pharmaceuticals. Exclude organ acquisition expenses.

This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.
Operating Lease Expense

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

Other Direct Operating Expense

Total other direct operating expense that includes professional fees, department supplies, equipment rental fees, operating leases for equipment, dues, travel and small (non-capitalized) equipment. Exclude depreciation, building rent expense, capitalized lease costs and organ acquisition expenses.

Overtime Salary Expense

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.

Physician Provider Professional Fee Expense

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

Anesthesia Mandatory Elements

The following data elements are mandatory for this department:

- Labor Expense
- Labor Expense: Physician Provider
- Minutes Anesthesia (Unconscious) Start To Finish
- Other Direct Operating Expense
- Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Physician Provider Professional Fee Expense
• Worked Hours: Physician Provider
• Worked Hours: Staff

Anesthesia Normalizations

Include the hours and costs associated with the following function:

• Anesthetic gases (e.g. nitrous oxide, sevoflurane, desflurane, isoflurane, and halothane)
• Personnel performing the functions of the department’s day to day managerial operations (Surgical)

Exclude the hours costs and volumes (where applicable) associated with the

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program. (Surgical Services)
• Anesthesiology Training Program
• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Surgical)
• Repair and Maintenance of Clinical Equipment/Rooms
• Employee training programs (e.g. formal classroom training, lectures, textbooks, didactic training)
• Purchasing - acquiring or buying, require vendors met their contracted or negotiated prices, tracking and validating goods and services. This normalization is applicable if you utilize the Procurement department (Excludes food and pharmaceuticals)
• Purchasing, Receiving, Warehousing and Inventory Control. This normalization is applicable if you utilize the Combined Procurement, Receiving and Warehousing
• Transport of patients not requiring clinical escort
03070, Central Sterile Services

This department includes all instrument processing and sterile supply functions for departments within the facility. This includes surgery, labor and delivery, emergency departments, etc. Central Sterile Services includes decontamination, cleaning, assembling, wrapping/packaging, sterilization and distribution of items such as surgical instruments, trays, and packs. Additional responsibilities may include replenishment of par carts/exchange carts throughout the facility, cleaning mobile patient care equipment (such as IV pumps and suction machines), and storing sterile supplies awaiting use.

Central Sterile Services Mapping Guidelines

If your cost center does not perform the distribution functions, another option may be the 03071 Central Sterile Services without Distribution (CSS) department. If your cost center performs all of the defined functions for only Surgical Services (main O.R. and or Ambulatory Surgery) departments, you may map to this profile, however, be sure to answer the characteristic survey questions carefully.

Central Sterile Services Workload Volumes

Ambulatory Surgery Cases

The total ambulatory or outpatient surgery cases supported by the department during the reporting period. A case may involve more than one surgical procedure as long as all of the procedures are performed during the same visit to the operating room. "Ambulatory" or "Outpatient" typically refers to patients who are not expected to stay greater than 24 hours (i.e. not admitted as inpatient). An ambulatory or outpatient case counted and reported in this element may also qualify to be counted in another subset element.

This is a component of Total Cases Supported.

Areas Supported

The total number of sites the department supported and served during the reporting period. Include all separate locations such as an ambulatory operating room, an inpatient operating room, labor and delivery, an emergency department, as well as special procedural areas, clinics and or radiological areas.

Case Carts Assembled

The total separate case carts assembled for areas including but not limited to operating rooms, labor and delivery. If the department does not use the case cart system, the total cases supported by department staff may be reported.

Days of Operation per Week

The average number of days per week that the department is open for routine business.
The max number reported here is 7.

**Durable Medical Equipment Processed**

Enter the total number of pieces of durable medical (re-useable) equipment cleaned (not sterilized) by the department during the reporting period. Example: wheelchairs.

This is a component of Total Pieces of Equipment Processed.

**Ethylene Oxide (ETO) Sterilizer Loads**

Number of Ethylene Oxide (ETO) sterilizer loads. Ethylene Oxide (ETO) gas uses relatively low temperatures for sterilization. However, a lengthy aeration time must follow each cycle.

This is a subset of Loads Sterilized.

**Flexible Endoscopes Processed**

The total number of flexible endoscopes processed by the department for the reporting period. A flexible endoscope is a lighted optical instrument used to get a deep look inside the body for the purpose of examining an organ. This may include but is not limited to the examination of the throat or esophagus. Do not include endoscopes processed by another department (i.e. a GI Endoscopy department).

This is a component of Items Processed.

**Gas Plasma Sterilizer Loads**

Total gas plasma (hydrogen peroxide, ozone, etc) sterilization loads. A method for plasma sterilization includes exposing an item to be sterilized to plasma generated from a gas mixture. The exposure of the item to the plasma is carried out at a pressure of 0.1 to 10 torr and a chamber temperature of less than 63°C for a time period sufficient to sterilize items.

This is a subset of Loads Sterilized.

**GI Endoscopy Cases Supported**

The total number of flexible endoscopes processed by the department for the reporting period. A flexible endoscope is a lighted optical instrument used to get a deep look inside the body for the purpose of examining an organ. This may include but is not limited to the examination of the throat or esophagus. Do not include endoscopes processed by another department (e.g. GI Endoscopy department).

This is a component of Total Cases Supported.

**Hours of Operation per Week**

The average number of hours the department is open for operation during the week.
The maximum number that can be reported is 168.

**Interventional Radiology Cases**

The total Interventional Radiology Cases supported by the department during the reporting period. Interventional Radiology cases are minimally invasive, targeted treatments performed using imaging for guidance. These cases have less risk, less pain and less recovery time compared to open surgery. Interventional radiology includes both vascular intervention and non-vascular intervention.

This is a component of Total Cases Supported.

**Invasive Cardiology Cases**

The total Invasive Cardiology cases supported by the department during the reporting period. Invasive Cardiology cases are typically performed in the operating room, Cath Lab and or EP Lab department.

This is a component of Total Cases Supported.

**Items Issued**

The total items issued by the department during the reporting period. Issued refers to the distribution of the individually wrapped units (decontaminated, high level disinfected, and or sterilized by department staff) including trays, sets, and individual instruments along with mobile patient care equipment.

**Items Processed**

The total number of items processed by the department during the reporting period. Items refers to the total individually wrapped units decontaminated, high level disinfected, and sterilized by department staff including trays, sets, and individual instruments along with mobile patient care equipment. A unit (wrap, set, tray) is based on an item recipe or order from the customer of the department. A customer can be surgery, labor and delivery, or other clinical area that requires the "unit" based on professional determination from that department. This unit can be one instrument. When more than one instrument is in a tray, set, or wrap, the unit is one that includes several instruments or items as designated by the recipe. Do not count a unit one time after decontamination and a second time after disinfection or sterilization.

Refer to the CSSD Processing Intensity Score Worksheet for assistance in reporting this element.

**Items Sterilized**

These items are sterilized, not just decontaminated or disinfected.

This is a component of Items Processed.
**Labor and Delivery Packs Prepared**

The total number of labor and delivery packs (disposable and non-disposable items) prepared for labor and delivery.

**Loads Decontaminated**

The total complete decontamination loads performed by department decontamination equipment. Decontaminated loads are essentially washed loads, ready for further disinfection or sterilization. A cycle is one decontamination load of equipment regardless of the type and size of the machine or the amount of materials.

**Loads Disinfected (High Level)**

The total number of loads disinfected may include but not limited to pasteurization or other high level disinfectants.

**Loads Sterilized**

The total sterilizing loads performed by the department through any type of sterilization process or equipment. Sterilization includes but is not limited to Steam, Ethylene Oxide Gas, Gas Plasma, Ozone Gas or Hydrogen Peroxide. Do not include loads that are high level disinfected (i.e., using Pasteurization or Gluteraldehyde technology). A cycle is one sterilization load of the equipment regardless of the type and size of the machine or the amount of materials. Exclude loads for equipment testing repair services.

**Neonate Deliveries**

Total neonate deliveries (including stillbirths) supported by the department during the reporting period. Include multiple births as number of neonates delivered, (e.g., twins count as two).

This is a component of Total Cases Supported.

**Neonate Equipment Processed**

Total number of neonatal intensive care equipment that was disassembled, cleaned and then reassembled by the department during the reporting period.

This is a component of Total Pieces of Equipment Processed.

**Neuro Instrument Sets Processed**

Total number of kits completed for neuro surgeries on the back or head. These kits may contain instruments and implants that are sterilized, restocked, assembled, and packaged.

This is a component of Total Pieces of Equipment Processed.
Operating Room Case Carts Assembled
The total number of case carts prepared for use in the operating room.

This is a component of Case Carts Assembled.

Orthopedic Instrument Sets Processed
Total number of kits completed for orthopedic surgeries. These kits may contain plates, screws, and other instruments that are sterilized, restocked, assembled, and packaged.

This is a component of Total Pieces of Equipment Processed.

Processing Complexity Level 1
This value represents the time (in hours) spent performing processing activities for trays or items which typically take 15 minutes to perform. Refer to the CSSD Processing Complexity Worksheet (cell G3) for assistance in reporting this element.

Processing Complexity Level 2
This value represents the time (in hours) spent performing processing activities for trays or items which typically take 30 minutes to perform. Refer to the CSSD Processing Complexity Worksheet (cell G5) for assistance in reporting this element.

Processing Complexity Level 3
This value represents the time (in hours) spent performing processing activities for trays or items which typically take 40 minutes to perform. Refer to the CSSD Processing Complexity Worksheet (cell G7) for assistance in reporting this element.

Processing Complexity Level 4
This value represents the time (in hours) spent performing processing activities for trays or items which typically take 75 minutes to perform. Refer to the CSSD Processing Complexity Worksheet (cell G9) for assistance in reporting this element.

Routine Unit Supply Replenishing
The total routine unit supply carts and or case carts exchanged or replenished by the department during the reporting period. Include case carts that were prepared and delivered, and exchange carts that were replenished and delivered. If the department does not use a cart exchange supply system, leave this element blank.

Specialty Case Carts Assembled
The total number of carts prepared with custom or specialty supplies.
This is a component of Case Carts Assembled.

**Spine Instrument Sets Processed**

Total number of kits completed for spine surgeries (i.e. fusions). These kits may contain instruments and implants that are sterilized, restocked, assembled and packaged.

This is a component of Total Pieces of Equipment Processed.

**Steam Sterilizer Loads**

Total steam sterilizer loads. This process sterilizes items by using steam under pressure. An autoclave allows steam to flow around each article placed in the chamber. The vapor penetrates the articles being sterilized. Autoclaving is one of the most effective methods for destruction of all types of microorganisms. The amount of processing time and degree of temperature necessary for sterilization depend on the articles to be sterilized.

This is a subset of Loads Sterilized.

**Sterile Storage Inventory**

This includes all sterile processing commodities in stock and ready for use after sterilization. This includes instrument sets, individual instruments, and linen packs as well as disposable supplies and mobile patient equipment. Mobile patient equipment includes items such as IV pumps and suction machines. Disposable supplies include items such as bedpans, towel packs, needles, suture sets, and suction containers. This number should be a physical count.

**Sterile Processing Sites**

Total number of geographic sterile processing sites managed. Includes, but is not limited to, the main sterile processing site and secondary sites maintained in ambulatory surgery, the OR core, core extension, ASC core

**Total Cases Supported**

The total number of cases supported by this department during the reporting period. This includes cases for all ancillary areas supported by the department including, but not limited to: the operating room, ambulatory surgery, cath lab, EP Lab, interventional radiology, GI Endoscopy Lab, Labor and delivery, and the Emergency Room.

**Total Joint Instrument Sets Processed**

Total number of kits (sets, pans) completed for total joint surgeries. These kits may contain instruments and implants that are sterilized, restocked, assembled, and packaged.

This is a component of Total Pieces of Equipment Processed.
Total Pieces of Equipment Processed

Total pieces of equipment processed by the department during the reporting period. Refer to the CSSD Processing Complexity Worksheet (cell C11) for assistance in reporting this element.

Central Sterile Services Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Central Sterile Technician

Total hours worked by Central Sterile Technicians.

This is a subset of Worked Hours: Staff.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee’s normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).
This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Central Sterile Services Operational Metrics**

**Percent of Disposable Supplies Utilized**

Indicate the percentage of disposable supplies used *in lieu* of reusable sterile processing supplies. The value should be represented as whole numbers, i.e. 50% is entered as 50.

**Central Sterile Services Expense Elements**

**Equipment Repair And Maintenance Expense**

Total expense to repair and maintain major equipment charged to this department. Include fee-for-service labor and parts expense, service contract costs, and other related costs.

This is a subset of Other Direct Operating Expense.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical and or surgical supplies and pharmaceuticals. Exclude organ acquisition expenses.

This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.
**Operating Lease Expense**

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense that includes professional fees, department supplies, equipment rental fees, operating leases for equipment, dues, travel and small (non-capitalized) equipment. Exclude depreciation, building rent expense, capitalized lease costs and organ acquisition expenses.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.

**Central Sterile Services Mandatory Elements**

The following data elements are mandatory for this department:

- Areas Supported
- Days of Operation per Week
- Hours of Operation per Week
- Items Processed
- Labor Expense
- Loads Sterilized
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Total Cases Supported
- Worked Hours: Staff
Central Sterile Services Normalizations

Include the hours and costs associated with the following function:

- Instrument Decontamination, Pack Assembly, Terminal Sterilization
- Personnel performing the functions of the department’s day to day managerial operations (Surgical)
- Staff that maintain/repair flash sterilizers (e.g. testing, cleaning) or any sterilization equipment (e.g. disinfectors, washers).
- Sterile Processing (depending upon the type of department)

Exclude the hours and costs associated with the following function:

- Cleaning and processing of scopes or instruments used by the Endoscopy-GI Lab department
- Infection Control (e.g. functions specific to the collection, analysis, and interpretation of health data in order to track infection trends, plan appropriate interventions, measure outcomes, and report relevant data both internally and externally).
- Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Surgical)
- Repair and Maintenance of Clinical Equipment/Roofs
- Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program. (Surgical Services)
- Employee training programs (e.g. formal classroom training, lectures, textbooks, didactic training)
- Purchasing - acquiring or buying, require vendors met their contracted or negotiated prices, tracking and validating goods and services. This normalization is applicable if you utilize the Procurement department (Excludes food and pharmaceuticals)
- Purchasing, Receiving, Warehousing and Inventory Control. This normalization is applicable if you utilize the Combined Procurement, Receiving and Warehousing

03071, Central Sterile Services without Distribution

This department includes all instrument reprocessing and sterile supply functions for surgery, labor and delivery, emergency departments, and other special procedure areas. Sterile processing includes decontamination, cleaning, assembling, wrapping/packaging, and sterilization of items such as surgical instruments, trays, and packs. Additional responsibilities may include cleaning mobile patient care equipment such as IV pumps and suction machines. This department does not distribute supplies.
Central Sterile Services without Distribution Mapping Guidelines

If your cost center performs the distribution functions, another option may be the 03070 Central Sterile Services (CSSD) department. If your cost center performs all of the defined functions for only Surgical Services (main O.R. and or Ambulatory Surgery) departments, you may map to this profile, however, be sure to answer the characteristic survey questions carefully.

Central Sterile Services without Distribution Workload Volumes

Ambulatory Surgery Cases

The total ambulatory or outpatient surgery cases supported by the department during the reporting period. A case may involve more than one surgical procedure as long as all of the procedures are performed during the same visit to the operating room. "Ambulatory" or "Outpatient" typically refers to patients who are not expected to stay greater than 24 hours (i.e. not admitted as inpatient). An ambulatory or outpatient case counted and reported in this element may also qualify to be counted in another subset element.

This is a component of Total Cases Supported.

Areas Supported

The total number of sites the department supported and served during the reporting period. Include all separate locations such as an ambulatory operating room, an inpatient operating room, labor and delivery, an emergency department, as well as special procedural areas, clinics and or radiological areas.

Case Carts Assembled

The total separate case carts assembled for areas including but not limited to operating rooms, labor and delivery. If the department does not use the case cart system, the total cases supported by department staff may be reported.

Days of Operation per Week

The average number of days per week that the department is open for routine business.

The max number reported here is 7.

Durable Medical Equipment Processed

Enter the total number of pieces of durable medical (re-useable) equipment cleaned (not sterilized) by the department during the reporting period. Example: wheelchairs.

This is a component of Total Pieces of Equipment Processed.
Ethylene Oxide (ETO) Sterilizer Loads

Number of Ethylene Oxide (ETO) sterilizer loads. Ethylene Oxide (ETO) gas uses relatively low temperatures for sterilization. However, a lengthy aeration time must follow each cycle.

This is a subset of Loads Sterilized.

Flexible Endoscopes Processed

The total number of flexible endoscopes processed by the department for the reporting period. A flexible endoscope is a lighted optical instrument used to get a deep look inside the body for the purpose of examining an organ. This may include but is not limited to the examination of the throat or esophagus. Do not include endoscopes processed by another department (e.g. GI Endoscopy department).

This is a component of Items Processed.

Gas Plasma Sterilizer Loads

Total gas plasma (hydrogen peroxide, ozone, etc) sterilization loads. A method for plasma sterilization includes exposing an item to be sterilized to plasma generated from a gas mixture. The exposure of the item to the plasma is carried out at a pressure of 0.1 to 10 torr and a chamber temperature of less than 63° C. for a time period sufficient to sterilize items.

This is a subset of Loads Sterilized.

GI Endoscopy Cases

The total GI Endoscopy Cases supported by the department during the reporting period. Endoscopy is the examination of a body cavity by means of an endoscope, a tube like instrument with lenses and a light source attached. Include cases performed in the operating room and cases performed in a separate Endoscopy suite if supported by this department staff.

This is a component of Total Cases Supported.

Hours of Operation per Week

The average number of hours the department is open for operation during the week.

The maximum number that can be reported is 168.

Interventional Radiology Cases

The total Interventional Radiology Cases supported by the department during the reporting period. Interventional Radiology cases are minimally invasive, targeted treatments performed using imaging for guidance. These cases have less risk, less pain and less recovery time compared to open surgery. Interventional radiology includes both vascular intervention and non-vascular intervention.
This is a component of Total Cases Supported.

**Invasive Cardiology Cases**

The total Invasive Cardiology cases supported by the department during the reporting period. Invasive Cardiology cases are typically performed in the operating room, Cath Lab and or EP Lab department.

This is a component of Total Cases Supported.

**Items Processed**

The total number of items processed by the department during the reporting period. Items refers to the total individually wrapped units decontaminated, high level disinfected, and sterilized by department staff including trays, sets, and individual instruments along with mobile patient care equipment. A unit (wrap, set, tray) is based on an item recipe or order from the customer of the department. A customer can be surgery, labor and delivery, or other clinical area that requires the "unit" based on professional determination from that department. This unit can be one instrument. When more than one instrument is in a tray, set, or wrap, the unit is one that includes several instruments or items as designated by the recipe. Do not count a unit one time after decontamination and a second time after disinfection or sterilization.

Refer to the CSSD Processing Intensity Score Worksheet for assistance in reporting this element.

**Items Sterilized**

These items are sterilized, not just decontaminated or disinfected.

This is a component of Items Processed.

**Labor and Delivery Packs Prepared**

The total number of labor and delivery packs (disposable and non-disposable items) prepared for labor and delivery.

**Loads Decontaminated**

The total complete decontamination loads performed by department decontamination equipment. Decontaminated loads are essentially washed loads, ready for further disinfection or sterilization. A cycle is one decontamination load of equipment regardless of the type and size of the machine or the amount of materials.

**Loads Disinfected (High Level)**

The total number of loads disinfected may include but not limited to pasteurization or other high level disinfectants.
Loads Sterilized

The total sterilizing loads performed by the department through any type of sterilization process or equipment. Sterilization includes but is not limited to Steam, Ethylene Oxide Gas, Gas Plasma, Ozone Gas or Hydrogen Peroxide. Do not include loads that are high level disinfected (i.e., using Pasteurization or Gluteraldehyde technology). A cycle is one sterilization load of the equipment regardless of the type and size of the machine or the amount of materials. Exclude loads for equipment testing repair services.

Neonate Deliveries

Total neonate deliveries (including stillbirths) supported by the department during the reporting period. Include multiple births as number of neonates delivered, (e.g., twins count as two).

This is a component of Total Cases Supported.

Neonate Equipment Processed

Total number of neonatal intensive care equipment that was disassembled, cleaned and then reassembled by the department during the reporting period.

This is a component of Total Pieces of Equipment Processed.

Neuro Instrument Sets Processed

Total number of kits completed for neuro surgeries on the back or head. These kits may contain instruments and implants that are sterilized, restocked, assembled, and packaged.

This is a component of Total Pieces of Equipment Processed.

Operating Room Case Carts Assembled

The total number of case carts prepared for use in the operating room.

This is a component of Case Carts Assembled.

Orthopedic Instrument Sets Processed

Total number of kits completed for orthopedic surgeries. These kits may contain plates, screws, and other instruments that are sterilized, restocked, assembled, and packaged.

This is a component of Total Pieces of Equipment Processed.

Processing Complexity Level 1

This value represents the time (in hours) spent performing processing activities for trays or items which typically take 15 minutes to perform. Refer to the CSSD Processing Complexity Worksheet (cell G3) for assistance in reporting this element.
Processing Complexity Level 2
This value represents the time (in hours) spent performing processing activities for trays or items which typically take 30 minutes to perform. Refer to the CSSD Processing Complexity Worksheet (cell G5) for assistance in reporting this element.

Processing Complexity Level 3
This value represents the time (in hours) spent performing processing activities for trays or items which typically take 40 minutes to perform. Refer to the CSSD Processing Complexity Worksheet (cell G7) for assistance in reporting this element.

Processing Complexity Level 4
This value represents the time (in hours) spent performing processing activities for trays or items which typically take 75 minutes to perform. Refer to the CSSD Processing Complexity Worksheet (cell G9) for assistance in reporting this element.

Specialty Case Carts Assembled
The total number of carts prepared with custom or specialty supplies.

This is a component of Case Carts Assembled.

Spine Instrument Sets Processed
Total number of kits completed for spine surgeries (i.e. fusions). These kits may contain instruments and implants that are sterilized, restocked, assembled and packaged.

This is a component of Total Pieces of Equipment Processed.

Steam Sterilizer Loads
Total steam sterilizer loads. This process sterilizes items by using steam under pressure. An autoclave allows steam to flow around each article placed in the chamber. The vapor penetrates the articles being sterilized. Autoclaving is one of the most effective methods for destruction of all types of microorganisms. The amount of processing time and degree of temperature necessary for sterilization depend on the articles to be sterilized.

This is a subset of Loads Sterilized.

Sterile Processing Sites
Total number of geographic sterile processing sites managed. Includes, but is not limited to, the main sterile processing site and secondary sites maintained in ambulatory surgery, the OR core, core extension, ASC core.
Sterile Storage Inventory
This includes all sterile processing commodities in stock and ready for use after sterilization. This includes instrument sets, individual instruments, and linen packs as well as disposable supplies and mobile patient equipment. Mobile patient equipment includes items such as IV pumps and suction machines. Disposable supplies include items such as bedpans, towel packs, needles, suture sets, and suction containers. This number should be a physical count.

Total Cases Supported
The total number of cases supported by this department during the reporting period. This includes cases for all ancillary areas supported by the department including, but not limited to: the operating room, ambulatory surgery, cath lab, EP Lab, interventional radiology, GI Endoscopy Lab, Labor and delivery, and the Emergency Room.

Total Joint Instrument Sets Processed
Total number of kits (sets, pans) completed for total joint surgeries. These kits may contain instruments and implants that are sterilized, restocked, assembled, and packaged.

This is a component of Total Pieces of Equipment Processed.

Total Pieces of Equipment Processed
Total pieces of equipment processed by the department during the reporting period. Refer to the CSSD Processing Complexity Worksheet (cell C11) for assistance in reporting this element.

Central Sterile Services without Distribution Department Hours Elements

Paid Hours: Contract Labor
Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff
Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Central Sterile Technician
Total hours worked by Central Sterile Technicians.

This is a subset of Worked Hours: Staff.
Worked Hours: Management
Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff
Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime
Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Staff
Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Central Sterile Services without Distribution Operational Metrics

Percent of Disposable Supplies Utilized
Indicate the percentage of disposable supplies used in lieu of reusable sterile processing supplies. The value should be represented as whole numbers, i.e. 50% is entered as 50.

Central Sterile Services without Distribution Expense Elements

Equipment Repair And Maintenance Expense
Total expense to repair and maintain major equipment charged to this department. Include fee-for-service labor and parts expense, service contract costs, and other related costs.

This is a subset of Other Direct Operating Expense.
**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical and or surgical supplies and pharmaceuticals. Exclude organ acquisition expenses.

This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

**Operating Lease Expense**

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense that includes professional fees, department supplies, equipment rental fees, operating leases for equipment, dues, travel and small (non-capitalized) equipment. Exclude depreciation, building rent expense, capitalized lease costs and organ acquisition expenses.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non exempt employees paid at a premium rate. Include expense for incidental overtime and call back time; exclude expense for on call time.

This is a subset of Labor Expense.

**Central Sterile Services without Distribution Mandatory Elements**

The following data elements are mandatory for this department:

- Areas Supported
• Days of Operation per Week
• Hours of Operation per Week
• Items Processed
• Labor Expense
• Loads Sterilized
• Other Direct Operating Expense
• Paid Hours: Contract Labor
• Paid Hours: Staff
• Total Cases Supported
• Worked Hours: Staff

Central Sterile Services without Distribution Normalizations

Include the hours and costs associated with the following function:

• Instrument Decontamination, Pack Assembly, Terminal Sterilization
• Personnel performing the functions of the department's day to day managerial operations (Surgical)
• Staff that maintain/repair flash sterilizers (e.g. testing, cleaning) or any sterilization equipment (e.g. disinfectors, washers).
• Sterile Processing (depending upon the type of department)

Exclude the hours and costs associated with the following function:

• Cleaning and processing of scopes or instruments used by the Endoscopy-GI Lab department
• Infection Control (e.g. functions specific to the collection, analysis, and interpretation of health data in order to track infection trends, plan appropriate interventions, measure outcomes, and report relevant data both internally and externally).
• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Surgical)
• Repair and Maintenance of Clinical Equipment/Rooms
• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program. (Surgical Services)

• Employee training programs (e.g. formal classroom training, lectures, textbooks, didactic training)

• Purchasing - acquiring or buying, require vendors met their contracted or negotiated prices, tracking and validating goods and services. This normalization is applicable if you utilize the Procurement department (Excludes food and pharmaceuticals)

• Purchasing, Receiving, Warehousing and Inventory Control. This normalization is applicable if you utilize the Combined Procurement, Receiving and Warehousing

**03099, Surgical Services Administration**

This department performs the overall administrative and general support tasks for the entire Surgical Services series. These tasks and functions include but are not limited to: administrative and clerical support for the entire series results, library and surgical information systems specific to Surgical Services and the associated management of these support activities. It does not include administrative and support staff for Endoscopy G.I. Lab.

**Surgical Services Administration Mapping Guidelines**

If your cost center performs procedures or other direct patient care, another option might be G3000, Other Surgical Services department.

**Surgical Services Administration Workload Volumes**

**Operating Room Capacity**

The total number of operating rooms designed and equipped for surgical operations, which are licensed by the state. Such rooms may support general surgery or specialized cases, such as open heart, eye surgery or cystoscopies.

**Operating Room Minutes Supported**

The total elapsed time in minutes from the time a patient enters the operating room until the time the patient leaves that is supported by this department during the reporting period. This time is routinely recorded in the operating room log and should correspond with the value reported for Operating Room Cases.
Staff Ready Operating Rooms Supported

The total number of separate operating rooms designed and equipped for surgical operations which have staff available (in house). Such rooms may support general surgery or specialized cases, such as open heart, eye surgery or cystoscopies. Do not include rooms that are not ready for surgical use.

This is a subset of Operating Room Capacity.

Surgical Services Division Employees

Average individuals employed by the surgical services division.

Total Cases Supported

Total of all cases supported by department staff during the reporting period including the Operating Room(s), Surgery Pre Op, Post Anesthesia Care Unit, Post Recovery, Ambulatory Surgery, and Anesthesia departments.

Surgical Services Administration Department Hour Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time-off hours. Exclude on-call or standby time.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: RN

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

Worked Hours: Staff

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

Surgical Services Administration Expense Elements

Labor Expense

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical and or surgical supplies and pharmaceuticals. Exclude organ acquisition expenses.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

Operating Lease Expense

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.
This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense that includes professional fees, department supplies, equipment rental fees, operating leases for equipment, dues, travel and small (non-capitalized) equipment. Exclude depreciation, building rent expense, capitalized lease costs and organ acquisition expenses.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a component of Labor Expense.

**Surgical Services Administration Mandatory Elements**

The following data elements are mandatory for this department:

- Labor Expense
- Medical Supply Expense
- Operating Room Capacity
- Other Direct Operating Expense
- Paid Hours: Contract Labor
- Paid Hours: Staff
- Total Cases Supported
- Worked Hours: Staff

**Surgical Services Administration Normalizations**

Include the hours, costs and volumes (where applicable) associated with the

- Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Surgical)
- Surgical patient scheduling (e.g. scheduling the patients date and time of surgery)
• Surgical procedure scheduling (e.g. generating preference cards, assigning staff and surgical rooms based on the type of case)

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, residency program. (Surgical Services)

• Surgical Clinical Reviewer (SCR) for the National Surgical Quality Improvement Program (NSQIP)

Exclude the hours costs and volumes (where applicable) associated with the

• Administrative support and clerical staff supporting the departments within the series, e.g., inventory management, charge capture documentation verification, office coordination, outreach service to attract new business, residency program(Endoscopy)

• Ambulatory Surgery Registrations-for hospital based Ambulatory Surgery departments

• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)

• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)

• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Endoscopy)

• Personnel performing the functions of the department’s day to day managerial operations (Surgical)

• Purchasing - acquiring or buying, require vendors met their contracted or negotiated prices, tracking and validating goods and services. This normalization is applicable if you utilize the Procurement department (Excludes food and pharmaceuticals)

• Purchasing, Receiving, Warehousing and Inventory Control. This normalization is applicable if you utilize the Combined Procurement, Receiving and Warehousing

F3000, Surgical Services Functional Rollup Department

This department includes all surgery administration, operating room functions, PACU, central sterile supply, hospital based and freestanding ambulatory surgery, perfusion services, and anesthesia functions regardless of reporting relationship.
Surgical Services Functional Rollup Workload Volumes

**Ambulatory Surgery Cases**

The total ambulatory or outpatient surgery cases performed in the operating room during the reporting period. A case may involve more than one surgical procedure as long as all of the procedures are performed during the same visit to the operating room. "Ambulatory" or "Outpatient" typically refers to patients who are not expected to stay greater than 24 hours (i.e. not admitted as inpatient). An ambulatory or outpatient case counted and reported in this element may also qualify to be counted in another subset element.

This is a component of Operating Room Cases.

**Bariatric Cases**

The total bariatric surgery cases performed in the operating room during the reporting period. Bariatric surgery is defined as a surgical bariatric intervention for individuals who have a body mass index (BMI) of greater than 40 kg/m² or have a BMI greater than 35 kg/m² with significant comorbidities.

This is a component of Operating Room Cases.

**Bone Marrow Transplant Cases**

The total Bone Marrow Transplant cases performed in the operating room during the reporting period.

This is a component of Operating Room Cases.

**GI Endoscopy Cases**

The total GI Endoscopy Cases performed in this department during the reporting period. Endoscopy is the examination of a body cavity by means of an endoscope, a tube like instrument with lenses and a light source attached. Do not include cases performed by another department or in a separate Endoscopy suite reported in ActionOI under the 04630, Endoscopy department.

This is a component of Operating Room Cases.

**Heart Cases**

The total heart cases performed in the operating room during the reporting period. This would include procedures such as ventricular assisted device (VAD), total artificial heart (TAH) and transcatheter aortic valve replacement (TAVR). Do not include heart transplant cases as these cases are reported under Solid Organ Transplant Cases. Do not include heart cases performed by another department (i.e. Cath Lab, Invasive Cardiology) or in a separate cardiology suite.

This is a component of Operating Room Cases.
Hip Replacement Cases

The total hip replacement cases (excluding endoprosthesis due to hip fracture) performed in the operating room during the reporting period.

This is a subset of Major Joint Cases.

Items Processed

The total number of items processed by the department during the reporting period. Items refers to the total individually wrapped units decontaminated, high level disinfected, and sterilized by department staff including trays, sets, and individual instruments along with mobile patient care equipment. A unit (wrap, set, tray) is based on an item recipe or order from the customer of the department. A customer can be surgery, labor and delivery, or other clinical area that requires the "unit" based on professional determination from that department. This unit can be one instrument. When more than one instrument is in a tray, set, or wrap, the unit is one that includes several instruments or items as designated by the recipe. Do not count a unit one time after decontamination and a second time after disinfection or sterilization.

Refer to the CSSD Processing Intensity Score Worksheet for assistance in reporting this element.

Knee Replacement Cases

The total knee replacement cases (including uni or partial knee) performed in the operating room during the reporting period.

This is a subset of Major Joint Cases.

Major Joint Cases

The total major joint cases performed in the operating room during the reporting period. Major Joint cases may include, but are not limited to: knees, hips, shoulders, elbows and ankles.

This is a subset of Orthopedic Cases.

Neuro and Ortho Spine Cases

The total Neuro Ortho Spine cases performed in the operating room during the reporting period.

This is a component of Operating Room Cases.

Neurosurgery Cases

The total neurosurgery cases performed in the operating room during the reporting period. Neurosurgery is the surgical treatment of disorders of the nervous system. Do not include Neuro Ortho Spine Cases in this category.
This is a component of Operating Room Cases.

**Operating Room Capacity**

The total number of operating rooms designed and equipped for surgical operations, which are licensed by the state. Such rooms may support general surgery or specialized cases, such as open heart, eye surgery or cystoscopies.

**Operating Room Cases**

The total cases performed by department staff during the reporting period. A case may involve more than one surgical procedure as long as all of the procedures are performed during the same visit to the operating room. The value reported for cases should correspond with the value reported for Operating Room Minutes. Do not include incomplete cases if you are not able to accurately report the corresponding minutes for these cases.

Total of components may be greater than case total.

**Operating Room Emergency Cases**

The total emergency cases performed in the operating room during the reporting period. "Emergency" typically refers to an immediate threat and must be performed at the earliest opportunity to minimize risk to life, limb, and or sight. Do not include urgent cases (must be started within 3 hours) as they should be counted in Operating Room Urgent Cases.

This is a component of Operating Room Cases.

**Operating Room Minutes**

The total elapsed time in minutes from the time a patient enters the operating room until the time the patient leaves. This time is routinely recorded in the operating room log and should correspond with the value reported for Operating Room Cases.

**Operating Room Pediatric Cases**

The total number of pediatric cases performed by the department during the reporting period. A pediatric case is one that is performed on a patient younger than 18 years of age.

This is a component of Operating Room Cases.
Operating Room Pediatric Minutes

The total elapsed time in minutes from the time a pediatric patient enters the operating room until the time the patient leaves. A pediatric patient is one that is younger than 18 years of age.

This is a component of Operating Room Minutes.

Operating Room Perfusion Minutes

The total elapsed time in minutes a surgery patient receives perfusion treatment in the operating room during the reporting period. This time is routinely recorded in the operating room log.

This is a component of Operating Room Minutes.

Operating Room Robotic Minutes

The total elapsed time in minutes from the time a robotic surgery patient enters the operating room until the time the patient leaves. This time is routinely recorded in the operating room log.

This is a component of Operating Room Minutes.

Operating Room Trauma Cases

The total emergency cases identified as trauma performed in the operating room during the reporting period. "Trauma" typically refers to a serious or critical bodily injury, wound, or shock. Your facility is not required to be a designated trauma center to report this element.

This is a component of Operating Room Emergency Cases.

Operating Room Urgent Cases

The total urgent cases performed in the operating room during the reporting period. "Urgent" typically refers to a case that must be started within 3 hours to minimize risk to life, limb and or sight. Do not include emergency cases (must be started at the earliest opportunity or immediately) as they should be counted in Operating Room Emergency Cases.

This is a component of Operating Room Cases.

Ophthalmology Cases

The total number of ophthalmology cases performed by the department during the reporting period. Ophthalmology cases includes but is not limited to laser eye surgery, cataract surgery, glaucoma surgery, refractive surgery and corneal surgery.

This is a component of Operating Room Cases.
Orthopedic Cases

The total orthopedic cases performed in the operating room during the reporting period. Orthopedics is the branch of surgery concerned with disorders of bones and joints and the muscles, tendons, and ligaments associated with them. Do not report Neuro Ortho Spine cases in this category.

This is a component of Operating Room Cases.

Recovery Room Cases

The total number of PACU cases. This may include surgical patients, patients referred from labor and delivery, radiology, the GI lab, and the cath lab, and patients receiving blood transfusions or nerve blocks. Include patients seen through discrete visits, such as ambulatory, inpatient, or outpatient surgery.

PACU Minutes

The total amount of PACU minutes (includes Phase I, Phase II and pre operative holding case minutes) measured by when the patient enters the department to when the patient leaves the department. Do not include the time spent by Boarder Patients.

Patient Observation Minutes

The total minutes patients are under the care of department staff including both pre and post recovery.

Robotic Surgical Cases

The total number of robotic cases performed by the department during the reporting period.

This is a component of Operating Room Cases.

Solid Organ Transplant Cases

The total solid organ transplant cases (including heart transplant procedures) performed in the operating room during the reporting period. Do not include cases involving only organ retrieval procedures. Bone Marrow Transplant cases are not to be included in this element and should be reported separately under the element Bone Marrow Transplant Cases.

This is a component of Operating Room Cases.

TAVR Surgical Cases

The total number of transcatheter aortic valve replacement (TAVR) surgical cases performed during the reporting period.

This is a component of Heart Cases.
VAD/TAH Surgical Cases

The total number of ventricular assisted device (VAD) and total artificial heart (TAH) surgical cases performed during the reporting period.

This is a component of Heart Cases.

Surgical Services Functional Rollup Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.

Worked Hours: Anesthesia Technician

Total hours worked by anesthesia technicians.

This is a subset of Worked Hours: Staff.

Worked Hours: Central Sterile Technician

Total hours worked by Central Sterile Technicians.

This is a subset of Worked Hours: Staff.
Worked Hours: CRNA, PA, AA

Total hours worked by certified registered nurse anesthetists, registered nurse first assistants and physician assistants.

This is a subset of Worked Hours: Staff.

Worked Hours: LPN, LVN

Hours worked by licensed practical nurse, licensed vocational nurses providing patient care services in the department.

This is a subset of Worked Hours: Staff.

Worked Hours: Management

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Patient Care Provider

Total hours worked by other patient care providers (e.g. LPN/LVN, nursing assistant, nursing technician, etc.) who provide basic care under the direct supervision of patient care personnel.

This is a subset of Worked Hours: Staff.

Worked Hours: Other Support Staff

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.

Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.
**Worked Hours: Perfusionist**

Total hours worked by perfusionist staff on the payroll.

This is a subset of Worked Hours: Staff.

**Worked Hours: Physician Provider**

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

**Worked Hours: Preadmission Testing Staff**

Total hours worked by technologist, technician, and medical assistant staff dedicated to preadmission testing activities.

This is a subset of Worked Hours: Staff.

**Worked Hours: RN**

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

**Worked Hours: RNFA, SA**

Total hours worked by registered nurse first assistants and surgical assistants.

This is a subset of Worked Hours: Staff.

**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Surgical Technician**

Total hours worked by certified and non-certified Surgical Technicians.
This is a subset of Worked Hours: Staff.

**Surgical Services Functional Rollup Expense Elements**

**Anesthesia Supply Expense**
Total anesthesia, pharmaceuticals, and anesthesia supplies expense used in surgery, labor and delivery, or other areas.

This is a subset of Medical Supply Expense.

**Endomechanical Supply Expense**
Total expense for disposable instrumentation/suture for endoscopic procedures, endomechanical staples, etc.

This is a subset of Medical Supply Expense.

**Equipment Repair And Maintenance Expense**
Total expense to repair and maintain major equipment charged to this department. Include fee-for-service labor and parts expense, service contract costs, and other related costs.

This is a subset of Other Direct Operating Expense.

**Implants Expense**
Total surgical supply expense for replacement, substitutes, or aids to body parts. Including but not limited to joint replacements, screws, plates, wires, mesh and pins. Exclude organ acquisition expenses.

This is a subset of Medical Supply Expense.

**Labor Expense**
Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.

**Labor Expense: Perfusionist**
Total expense for perfusionists on the department's payroll.

This is a subset of Labor Expense.
Labor Expense: Physician Provider

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

Major Joint Implant Expense

Total surgical supply expense for major joint implants (replacement, substitutes, or aids to body parts) including, but not limited to the knee, hip, shoulder, elbow and or ankle.

This is a subset of Implant Expense.

Medical Supply Expense

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical and or surgical supplies and pharmaceuticals. Exclude organ acquisition expenses.

This is a subset of Other Direct Operating Expense.

Non Medical Supply Expense

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

Operating Lease Expense

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.

This is a subset of Other Direct Operating Expense.
**Other Direct Operating Expense**

Total other direct operating expense that includes professional fees, department supplies, equipment rental fees, operating leases for equipment, dues, travel and small (non-capitalized) equipment. Exclude depreciation, building rent expense, capitalized lease costs and organ acquisition expenses.

**Overtime Salary Expense**

Total expense for overtime hours accrued by surgical services staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.

**Perfusion Contract Expense**

Total expense for contract perfusionists.

This is a subset of Other Direct Operating Expense.

**Perfusion Supply Expense**

Total expense for medical supplies used for activities related to the perfusion procedure.

This is a subset of Medical Supply Expense.

**Physician Provider Professional Fee Expense**

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

**Robotic Supply Expense**

Total surgical supply expense for robotic supplies.

This is a subset of Medical Supply Expense.
Spine Implant Expense
Total surgical supply expense for spine implants (replacements, substitutes, or aids to body parts). Including but not limited to screws, plates, wires, mesh and pins.

This is a subset of Implant Expense.

Suture Supply Expense
Total expense for skin staples, sutures, etc.

This is a subset of Medical Supply Expense.

TAVR Implant Expense
Total surgical supply expense for transcatheter aortic valve (TAVR) implants.

This is a subset of Implant Expense.

VAD/TAH Implant Expense
Total surgical supply expense for ventricular assisted devices (VAD) and total artificial heart (TAH) implants.

This is a subset of Implant Expense.

Surgical Services Functional Rollup Mandatory Elements
The following data elements are mandatory for this department:

- Items Processed
- Labor Expense
- Labor Expense: Physician Provider
- Operating Room Capacity
- Operating Room Cases
- Operating Room Minutes
- Operating Room Pediatric Minutes
- Other Direct Operating Expense
• Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Physician Provider Professional Fee Expense
• Worked Hours: Physician Provider
• Worked Hours: Staff

G3000, Other Surgical Services

If you have a cost center in this series that does not appropriately map to any of the individual departments, map to this department.

Other Surgical Services Workload Volumes

Ambulatory Surgery Cases
The total ambulatory or outpatient surgery cases performed in the operating room during the reporting period. A case may involve more than one surgical procedure as long as all of the procedures are performed during the same visit to the operating room. "Ambulatory" or "Outpatient" typically refers to patients who are not expected to stay greater than 24 hours (i.e. not admitted as inpatient). An ambulatory or outpatient case counted and reported in this element may also qualify to be counted in another subset element.

This is a component of Operating Room Cases.

Bariatric Cases
The total bariatric surgery cases performed in the operating room during the reporting period. Bariatric surgery is defined as a surgical bariatric intervention for individuals who have a body mass index (BMI) of greater than 40 kg/m2 or have a BMI greater than 35 kg/m2 with significant comorbidities.

This is a component of Operating Room Cases.

Bone Marrow Transplant Cases
The total Bone Marrow Transplant cases performed in the operating room during the reporting period.

This is a component of Operating Room Cases.
GI Endoscopy Cases

The total GI Endoscopy Cases performed in this department during the reporting period. Endoscopy is the examination of a body cavity by means of an endoscope, a tube like instrument with lenses and a light source attached. Do not include cases performed by another department or in a separate Endoscopy suite reported in ActionOI under the 04630, Endoscopy department.

This is a component of Operating Room Cases.

Heart Cases

The total heart cases performed in the operating room during the reporting period. This would include procedures such as ventricular assisted device (VAD), total artificial heart (TAH) and transcatheter aortic valve replacement (TAVR). Do not include heart transplant cases as these cases are reported under Solid Organ Transplant Cases. Do not include heart cases performed by another department (i.e. Cath Lab, Invasive Cardiology) or in a separate cardiology suite.

This is a component of Operating Room Cases.

Hip Replacement Cases

The total hip replacement cases (excluding endoprothesis due to hip fracture) performed in the operating room during the reporting period.

This is a subset of Major Joint Cases.

Items Processed

The total number of items processed by the department during the reporting period. Items refers to the total individually wrapped units decontaminated, high level disinfected, and sterilized by department staff including trays, sets, and individual instruments along with mobile patient care equipment. A unit (wrap, set, tray) is based on an item recipe or order from the customer of the department. A customer can be surgery, labor and delivery, or other clinical area that requires the "unit" based on professional determination from that department. This unit can be one instrument. When more than one instrument is in a tray, set, or wrap, the unit is one that includes several instruments or items as designated by the recipe. Do not count a unit one time after decontamination and a second time after disinfection or sterilization.

Refer to the CSSD Processing Intensity Score Worksheet for assistance in reporting this element.

Knee Replacement Cases

The total knee replacement cases (including uni or partial knee) performed in the operating room during the reporting period.

This is a subset of Major Joint Cases.
Major Joint Cases

The total major joint cases performed in the operating room during the reporting period. Major Joint cases may include, but are not limited to: knees, hips, shoulders, elbows and ankles.

This is a subset of Orthopedic Cases.

Neuro and Ortho Spine Cases

The total Neuro Ortho Spine cases performed in the operating room during the reporting period.

This is a component of Operating Room Cases.

Neurosurgery Cases

The total neurosurgery cases performed in the operating room during the reporting period. Neurosurgery is the surgical treatment of disorders of the nervous system. Do not include Neuro Ortho Spine Cases in this category.

This is a component of Operating Room Cases.

Operating Room Capacity

The total number of operating rooms designed and equipped for surgical operations, which are licensed by the state. Such rooms may support general surgery or specialized cases, such as open heart, eye surgery or cystoscopies.

Operating Room Cases

The total cases performed by department staff during the reporting period. A case may involve more than one surgical procedure as long as all of the procedures are performed during the same visit to the operating room. The value reported for cases should correspond with the value reported for Operating Room Minutes. Do not include incomplete cases if you are not able to accurately report the corresponding minutes for these cases.

Total of components may be greater than case total.

Operating Room Emergency Cases

The total emergency cases performed in the operating room during the reporting period. "Emergency" typically refers to an immediate threat and must be performed at the earliest opportunity to minimize risk to life, limb, and or sight. Do not include urgent cases (must be started within 3 hours) as they should be counted in Operating Room Urgent Cases.

This is a component of Operating Room Cases.
Operating Room Minutes
The total elapsed time in minutes from the time a patient enters the operating room until the time the patient leaves. This time is routinely recorded in the operating room log and should correspond with the value reported for Operating Room Cases.

Operating Room Pediatric Cases
The total number of pediatric cases performed by the department during the reporting period. A pediatric case is one that is performed on a patient younger than 18 years of age.

This is a component of Operating Room Cases.

Operating Room Pediatric Minutes
The total elapsed time in minutes from the time a pediatric patient enters the operating room until the time the patient leaves. A pediatric patient is one that is younger than 18 years of age.

This is a component of Operating Room Minutes.

Operating Room Perfusion Minutes
The total elapsed time in minutes a surgery patient receives perfusion treatment in the operating room during the reporting period. This time is routinely recorded in the operating room log.

This is a component of Operating Room Minutes.

Operating Room Robotic Minutes
The total elapsed time in minutes from the time a robotic surgery patient enters the operating room until the time the patient leaves. This time is routinely recorded in the operating room log.

This is a component of Operating Room Minutes.

Operating Room Trauma Cases
The total emergency cases identified as trauma performed in the operating room during the reporting period. “Trauma” typically refers to a serious or critical bodily injury, wound, or shock. Your facility is not required to be a designated trauma center to report this element.

This is a component of Operating Room Emergency Cases.
Operating Room Urgent Cases
The total urgent cases performed in the operating room during the reporting period. "Urgent" typically refers to a case that must be started within 3 hours to minimize risk to life, limb and or sight. Do not include emergency cases (must be started at the earliest opportunity or immediately) as they should be counted in Operating Room Emergency Cases.

This is a component of Operating Room Cases.

Ophthalmology Cases
The total number of ophthalmology cases performed by the department during the reporting period. Ophthalmology cases includes but is not limited to laser eye surgery, cataract surgery, glaucoma surgery, refractive surgery and corneal surgery.

This is a component of Operating Room Cases.

Orthopedic Cases
The total orthopedic cases performed in the operating room during the reporting period. Orthopedics is the branch of surgery concerned with disorders of bones and joints and the muscles, tendons, and ligaments associated with them. Do not report Neuro Ortho Spine cases in this category.

This is a component of Operating Room Cases.

Recovery Room Cases
The total number of PACU cases. This may include surgical patients, patients referred from labor and delivery, radiology, the GI lab, and the cath lab, and patients receiving blood transfusions or nerve blocks. Include patients seen through discrete visits, such as ambulatory, inpatient, or outpatient surgery.

PACU Minutes
The total amount of PACU minutes (includes Phase I, Phase II and pre operative holding case minutes) measured by when the patient enters the department to when the patient leaves the department. Do not include the time spent by Boarder Patients.

Patient Observation Minutes
The total minutes patients are under the care of department staff including both pre and post recovery.

Robotic Surgical Cases
The total number of robotic cases performed by the department during the reporting period.

This is a component of Operating Room Cases.
Solid Organ Transplant Cases

The total solid organ transplant cases (including heart transplant procedures) performed in the operating room during the reporting period. Do not include cases involving only organ retrieval procedures. Bone Marrow Transplant cases are not to be included in this element and should be reported separately under the element Bone Marrow Transplant Cases.

This is a component of Operating Room Cases.

TAVR Surgical Cases

The total number of transcatheter aortic valve replacement (TAVR) surgical cases performed during the reporting period.

This is a component of Heart Cases.

VAD/TAH Surgical Cases

The total number of ventricular assisted device (VAD) and total artificial heart (TAH) surgical cases performed during the reporting period.

This is a component of Heart Cases.

Other Surgical Services Department Hours Elements

Paid Hours: Contract Labor

Total contract and registry staff hours paid by the department. Exclude contract hours for physicians providing clinical services, if applicable. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

Paid Hours: Physician Provider

Total hours paid to physician providers and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, nurse practitioners and CRNAs who work as advanced practitioners, other advanced practitioners or professionals and physicians in training. Include only physicians providers, advanced practitioners and physicians in training on the facility payroll who spend 80% their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. This is a mandatory field. You must enter a value of zero (0) or greater for report processing.

This is a subset of Paid Hours: Staff.

Paid Hours: Staff

Total hours paid. Include regular, premium, and paid time off hours. Exclude on call or standby time.
**Worked Hours: Anesthesia Technician**

Total hours worked by anesthesia technicians.

This is a subset of Worked Hours: Staff.

**Worked Hours: Central Sterile Technician**

Total hours worked by Central Sterile Technicians.

This is a subset of Worked Hours: Staff.

**Worked Hours: LPN, LVN**

Hours worked by licensed practical nurse, licensed vocational nurses providing patient care services in the department.

This is a subset of Worked Hours: Staff.

**Worked Hours: Management**

Total hours worked by management and supervisory staff with responsibility for operations and departmental budgets (i.e. Senior Executives, Directors, Managers, and Supervisors). Include regular hours and actual premium and overtime hours worked. Exclude on call or stand by hours.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Patient Care Provider**

Total hours worked by other patient care providers (e.g. LPN/LVN, nursing assistant, nursing technician, etc.) who provide basic care under the direct supervision of patient care personnel.

This is a subset of Worked Hours: Staff.

**Worked Hours: Other Support Staff**

Total hours worked by personnel not included in other skill mix categories. This includes clerical and administrative support staff.

This is a subset of Worked Hours: Staff.
Worked Hours: Overtime

Represents the sum of non physician worked hours that are paid on an overtime basis (hours worked over the employee's normal work schedule). Hours worked on an overtime basis while attending training or seminars would be included. Exclude premium hours (i.e., work 36 hours but get paid for 40 hours) or premiums for holiday pay or other shifts. The value should match what is reported to the U.S. Department of Labor under the Fair Labor Standards Act (FLSA) Section 3(s)(1)(B).

This is a subset of Worked Hours: Staff.

Worked Hours: Perfusionist

Total hours worked by perfusionist staff on the payroll.

This is a subset of Worked Hours: Staff.

Worked Hours: Physician Provider

Represents hours worked by physicians and other advanced practitioners on the payroll who provide clinical services. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advanced practitioners, and other advanced practitioners. Include only physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medication, ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line.

This is a subset of Worked Hours: Staff.

Worked Hours: Preadmission Testing Staff

Total hours worked by technologist, technician, and medical assistant staff dedicated to preadmission testing activities.

This is a subset of Worked Hours: Staff.

Worked Hours: RN

Total hours worked by RN (Registered Nurse) including but not limited to time spent providing patient care services.

This is a subset of Worked Hours: Staff.

Worked Hours: RNFA, SA

Total hours worked by registered nurse first assistants and surgical assistants.

This is a subset of Worked Hours: Staff.
**Worked Hours: Staff**

Total hours worked, include regular and overtime hours. Exclude on call stand by hours.

**Worked Hours: Surgical Technician**

Total hours worked by certified and non-certified Surgical Technicians.

This is a subset of Worked Hours: Staff.

**Other Surgical Services Expense Elements**

**Anesthesia Supply Expense**

Total anesthesia, pharmaceuticals, and anesthesia supplies expense used in surgery, labor and delivery, or other areas.

This is a subset of Medical Supply Expense.

**Endomechanical Supply Expense**

Total expense for disposable instrumentation/suture for endoscopic procedures, endomechanical staples, etc.

This is a subset of Medical Supply Expense.

**Equipment Repair And Maintenance Expense**

Total expense to repair and maintain major equipment charged to this department. Include fee-for-service labor and parts expense, service contract costs, and other related costs.

This is a subset of Other Direct Operating Expense.

**Implants Expense**

Total surgical supply expense for replacement, substitutes, or aids to body parts. Including but not limited to joint replacements, screws, plates, wires, mesh and pins. Exclude organ acquisition expenses.

This is a subset of Medical Supply Expense.

**Labor Expense**

Total expense for labor resources that corresponds to Paid Hours: Staff and Paid Hours: Contract Labor. Include on call or standby expense. Exclude benefits such as FICA.
**Labor Expense: Perfusionist**

Total expense for perfusionists on the department's payroll.

This is a subset of Labor Expense.

**Labor Expense: Physician Provider**

Total payroll expense corresponding to hours paid paid for physicians and advanced practitioners. Include licensed physicians, interns, residents, nurse practitioners and CRNAs who work as advance practitioners and other advanced practitioners. Include physicians and advanced practitioners on the facility payroll who spend 80% or more of their time in clinical or patient care activities such as but not limited to: ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications and ordering and interpreting tests. Also include medical directors that provide clinical expertise and guidance for a unit or service line. Do not include physicians who are paid on a contractual basis for providing professional services. Contract expense for physician and advance practitioners should be reported in the physician provider professional fee expense element. This is a mandatory data element. If you have reported physician provider hours on this department, you must report the corresponding labor expense here, otherwise enter zero (0).

This is a subset of Labor Expense.

**Major Joint Implant Expense**

Total surgical supply expense for major joint implants (replacement, substitutes, or aids to body parts) including, but not limited to the knee, hip, shoulder, elbow and or ankle.

This is a subset of Implant Expense.

**Medical Supply Expense**

Total expense for stocked and non-stocked medical supplies. Include all non-capitalized medical and or surgical supplies and pharmaceuticals. Exclude organ acquisition expenses.

This is a subset of Other Direct Operating Expense.

**Non Medical Supply Expense**

Total expense for the department non-medical operating supplies, e.g. office supplies and non-capitalized equipment.

This is a subset of Other Direct Operating Expense.

**Operating Lease Expense**

Total expense for operating leases charged to this department. This includes non-capitalized lease expense for equipment rentals.
This is a subset of Other Direct Operating Expense.

**Other Direct Operating Expense**

Total other direct operating expense that includes professional fees, department supplies, equipment rental fees, operating leases for equipment, dues, travel and small (non-capitalized) equipment. Exclude depreciation, building rent expense, capitalized lease costs and organ acquisition expenses.

**Overtime Salary Expense**

Total expense for overtime hours accrued by department staff. Include expense for all overtime hours for non-exempt employees paid at a premium rate. Include expense for incidental overtime and call-back time; exclude expense for on-call time.

This is a subset of Labor Expense.

**Perfusion Contract Expense**

Total expense for contract perfusionists.

This is a subset of Other Direct Operating Expense.

**Perfusion Supply Expense**

Total expense for medical supplies used for activities related to the perfusion procedure.

This is a subset of Medical Supply Expense.

**Physician Provider Professional Fee Expense**

Total expense for the period for physicians, advanced practitioners and physician groups which provide professional services to the organization. Include licensed physicians, interns, residents, nurse practitioners, CRNAs who work as advanced practitioners, and other advanced practitioners. Include physicians and advanced practitioners who are NOT paid through your payroll system and spend 80% or more of their time in clinical or patient care activities such as but not limited to ADT orders, ordering and performing referrals or consults, prescribing inpatient or outpatient medications, ordering and interpreting tests. This is a mandatory field.

This is a subset of Other Direct Operating Expense.

**Robotic Supply Expense**

Total surgical supply expense for robotic supplies.

This is a subset of Medical Supply Expense.
Spine Implant Expense
Total surgical supply expense for spine implants (replacements, substitutes, or aids to body parts). Including but not limited to screws, plates, wires, mesh and pins.

This is a subset of Implant Expense.

Suture Supply Expense
Total expense for skin staples, sutures, etc.

This is a subset of Medical Supply Expense.

TAVR Implant Expense
Total surgical supply expense for transcatheter aortic valve (TAVR) implants.

This is a subset of Implant Expense.

VAD/TAH Implant Expense
Total surgical supply expense for ventricular assisted devices (VAD) and total artificial heart (TAH) implants.

This is a subset of Implant Expense.

Other Surgical Services Mandatory Elements
The following data elements are mandatory for this department:

- Items Processed
- Labor Expense
- Labor Expense: Physician Provider
- Operating Room Capacity
- Other Direct Operating Expense
- Operating Room Cases
- Operating Room Minutes
- Operating Room Pediatric Minutes
• Paid Hours: Contract Labor
• Paid Hours: Physician Provider
• Paid Hours: Staff
• Physician Provider Professional Fee Expense
• Worked Hours: Physician Provider
• Worked Hours: Staff

Other Surgical Services Normalizations

Include the hours, costs and volumes (where applicable) associated with the

• First Assistants (include RNFAs, Physician Assistants and other non-MDs functioning as First Assistants)
• Personnel performing the functions of the department’s day to day managerial operations (Surgical)
• Surgical Services procedure room cleaning between patients (e.g. pick up trash, disinfect surfaces, replace soiled linens)

Exclude the hours costs and volumes (where applicable) associated with the

• Ambulatory Surgery Registrations-for hospital based Ambulatory Surgery departments
• Anesthesiology Training Program
• Daily or terminal cleaning and wall washing for ancillary patient procedure areas
• Medical records coding (e.g. the use of medical charts and documentation from health care professionals to generate billing codes to be invoiced to patients and insurance companies)
• Medical records transcription (e.g. lines produced internally or outsources; do not include transcription services from Laboratory and Imaging Services Departments)
• Outpatient Registrations for any ancillary services (e.g. cardiology, endoscopy, imaging, infusion, laboratory, pulmonary, radiation, rehabilitation, respiratory, surgical, vascular services)
• Patient billing - the processing of patient claims for reimbursement, submission of claims to payer. This does not include charge capture.
• Personnel performing the functions of administration and managerial operations oversight for the departments within the series (Surgical)
- Procedure assessment, patient preparation and post-procedure recovery for Sleep disorder studies and related procedures

- Repair and Maintenance of Clinical Equipment/Rooms

- Surgical patient scheduling, e.g., scheduling the patients date and time of surgery

- Surgical patient scheduling (e.g. scheduling the patients date and time of surgery)

- Surgical procedure scheduling (e.g. generating preference cards, assigning staff and surgical rooms based on the type of case)

- Purchasing - acquiring or buying, require vendors met their contracted or negotiated prices, tracking and validating goods and services. This normalization is applicable if you utilize the Procurement department (Excludes food and pharmaceuticals)

- Purchasing, Receiving, Warehousing and Inventory Control. This normalization is applicable if you utilize the Combined Procurement, Receiving and Warehousing

- Transport of patients not requiring clinical escort
Chapter 40. Glossary

This glossary defines commonly-used ActionOI terminology.

actual data

Departmental data that mirrors the hospital’s cost center structure.

affiliated health care organization

An institution that is associated with another institution in order to integrate activities, without merging into one organization. For example, VHC, UHC, or multi-hospital systems.

annual data

The sum of four sequential quarters. The quarters can come from two adjacent years. For example, Q1 + Q2 + Q3 + Q4 = annual data.

annual data flex period

For facilities that run reports on an annual data period, Standard Compare Groups use a flexible data period of +4 periods and -3 periods. Keep in mind that the flexible data period has no impact on the use of these compare groups for quarterly reporting.

annualized data

The available quarter multiplied by four, or the sum of available quarters (if less than four) divided by the number of available quarters times four quarters. Example: Q1 * 4 = annualized data.

benchmarking

A quality assurance process in which an organization sets goals and measures its performance compared with the competition for products, services, and practices offered.

better performer

The facilities in the compare group with the best ranking, based on the key performance indicators for the department.
business unit

An organization or organizational subset that is independent with regard to accounting or operational functions. A business unit may include a hospital, ambulatory surgery center, medical school, physician practice, day care center, or corporate entity.

calculated elements

Values that are computed using other values that are available in the system.

case mix index

A case mix is a way of measuring the mix of cases being treated by a particular health care provider. It is intended to reflect the patients' different needs for resources—distributing cases into categories that reflect differences in severity of illness and/or resource consumption. Case mix is generally established by estimating the relative frequency of various types of patients seen by the provider in question during a given time period. It may be measured by factors such as diagnosis, severity of illness, utilization of services, and provider characteristics. The Medicare case mix index (CMI) is based on the Medicare Hospital Inpatient Prospective Payment System for the corresponding federal fiscal year and represents the average DRG (Diagnosis Related Group) relative weight for all Medicare admissions.

CMI (All Patients) and CMI (Medicare Patients) are the total number of patients for each Diagnosis Related Group (DRG), multiplied by the Medicare Prospective Payment System (PPS) relative weight for the DRG, summed for all weighted DRGs and divided by total discharges. That is, CMI is the average DRG weight for all cases (All Patients) or all cases paid under PPS (Medicare Patients). This calculation excludes newborn nursery discharges.

CMI (All Patients) includes all discharged patients even though the Medicare Prospective Payment System excludes some psychiatric and rehabilitation patients. It excludes newborn discharges.

CMI (Medicare Patients) includes all discharged patients covered by the Medicare Prospective Payment System. It excludes patients on Medicare-exempt units.

CATS

Clinical Activity Time Standards. For more information, please refer to the AARC UNIFORM REPORTING MANUAL.

characteristic survey

Define how a department operates, using Yes or No responses to questions about characteristics. The survey's elements are related to the selected department, and are available for data entry. The questions' answers are the basis for creating groups of facilities used for comparison (or compare groups). ActionOI uses compare groups in the analysis phase to evaluate organizational performance compared to other, similar organizations.
characteristics
A facility’s organizational and operational data provided by answering the characteristics survey in ActionOI Data Collection. This data is used to determine what factors influence the numerics.

compare group
A group of selected facilities or a group of facilities that share characteristics. Use compare groups to create reports for benchmarking and to identify opportunities to improve outcomes.

compare group average
The average (or mean) of the values for indicators or elements in the comparison. If you select the Compare Group Average report column concurrently with a characteristic report measure, then the value for the Average column will be the percentage of Yes responses provided in the characteristics survey for the selected comparison.

component
A part or element of a larger whole, therefore if the item is a component of the element it may not add up to the total.

cost
Fixed or variable expenses for a particular department, including labor expenses, other direct operating expenses, and medical supply expenses.

customer
A group of users, and one or more facilities and/or offices under a single ActionOI contract.

data elements
The financial or operational data collected from a facility or affiliated organization (for example, patient days, worked hours, payroll, and other direct operating expenses).

data period
A defined period of accounting time that ActionOI uses to generate reports. Typically, this is either a quarter or a fiscal year.

data points
On worksheets, data points are values from cells. On graphs or charts, data points display as bars, lines, columns, pie slices, or other shapes.
**data set**

A file that contains a set of either expenses and volumes, or payroll hours and dollars.

**data sharing**

A feature that allows customers to share their ActionOI data with other customers. Cooperating customers can use data sharing to network regarding best practices and process-improvement opportunities.

**data sharing agreement**

A reciprocal contractual agreement between health care organizations. This agreement is required to view identifiable data listed by facility name. However, unidentified data can be viewed without a data sharing agreement. Facilities that have reciprocally agreed to share data with your organization will be listed by name in the database as a shared facility.

**data sharing partner**

All facilities owned by a customer that has agreed to share with you their data that has been submitted to ActionOI.

**department**

A functional area of a hospital. A department performs functions and has a staff, as well as related expenses and incomes. Because facilities can be organized in a variety of ways, ActionOI has three types of departments:

- **Facility departments** represent one or more cost centers for your facility.
- **Standard departments** provide a common functional map for all product customers.
- **Department series** are groupings of similar departments that can help you work with ActionOI.

**department element**

Those data elements relevant to a particular department.

**department series**

Groupings of standard departments that help you work with ActionOI. For example, **Inpatient Nursing Services** groups all facility departments which are identified to contain primarily nursing services.

**destination department**

A department where values are moved as part of normalization.
**diagnostic related group (DRG)**

A classification system that groups patients by common characteristics requiring treatment.

**direct costs**

The fixed and variable costs of all resources (goods, services, etc.) consumed in the department. Includes direct medical costs and direct non-medical costs (for example, transportation or child care).

**elements**

Each department has these: the data reported using ActionOI Data Collection. The data includes your organization’s payroll, financial, and statistical information systems, such as: revenue, expense, worked hours, paid hours, overtime hours, and statistics (for example, patient days and procedures from ActionOI).

**ESI (Emergency Severity Index)**

Emergency Severity Index is a five-level emergency department triage algorithm that provides clinically relevant stratification of patients into five groups from 1 (most urgent) to 5 (least urgent) on the basis of acuity and resource needs.

**facility**

A grouping of any number of departments all managed within the construct of one physical or logical business entity in a health care organization (for example, a hospital, general clinic, or skilled nursing facility). Medical and non-medical facilities are included.

**facility department**

The department you define to represent one or more cost centers for a particular functional area of your facility. These facility departments map to a single ActionOI standard department. For example, you could map your **West Burn ICU** and **East Burn Special Care** to a facility department that you name **Burn Care Units**. Then, you map **Burn Care Units** to the standard department **Burn Care Inpatient Unit**.

**facility entity**

A facility entity represents one patient care organization (e.g. hospital, long term care facility, skill nursing facility, etc) that is a stand-alone facility and does not report consolidated financial statements for multiple facilities within ActionOI.

**first assistant**

A First Assistant (if an RN goes through additional extensive education and training to deliver surgical care) directly assists the surgeon by controlling bleeding, using instruments/medical devices, handling and cutting tissue, and suturing during the procedure. The First Assistant may be involved with patient care before and after surgery.
flagship
A keystone hospital that provides shared services (e.g. Human Resources, Information Technology, Biomedical Engineering, etc) to other entities. The hospital has been identified in ActionOI as a Facility Entity and is not reporting consolidated financial statements.

gap %
The variance percentage of your facility's value from the specific opportunity percentile value. If the gap percentage is small, the facility is performing close to the selected opportunity percentile. If the percentage is high, the facility needs to make considerable improvements to meet the desired opportunity percentile.

geriatrics
The branch of medicine that focuses on health promotion and the prevention and treatment of disease and disability in people aged 65 and older.

health care organization
An organization or a facility that provides health care services (for example, ambulatory care centers, behavioral health institutions, home care organizations, hospitals, laboratories, and long-term care organizations). Synonym: health care institution.

health care system
A network of two or more facilities that operate under the same management and administration. The structure of health care systems varies, including nationwide and local networks.

highest characteristic match
Those facilities that answered the characteristics survey most like the host facility.

hospital
A medical facility whose primary function is to provide inpatient diagnostic and therapeutic services for a variety of medical conditions, both surgical and non-surgical. In addition, most hospitals provide some outpatient services, particularly emergency care. Hospitals can be classified by length of stay (short-term or long-term), as teaching or non-teaching, by major types of services (psychiatric, tuberculosis, general, and other specialties, such as maternity, pediatric, or ear, nose, and throat), and by type of ownership or control (federal, state, or local government; for-profit and non-profit).
**hospital sitters**

Individuals who sit with people who are hospitalized in situations where the patients are determined to be at risk to themselves or their treatment because they are agitated, delirious, or confused, unsteady on their feet, or on suicide watch. Hospital sitters (also called "patient observers") work under the direct supervision of nursing staff and call for assistance if problems arise (e.g., the patient attempts to remove an IV line or get out of bed) or medical assistance is required.

**host**

The name of the hospital or health care organization whose operational practices are being compared with other similar organizations.

**host average**

An aggregate value for a facility, based on the non-null data points for a specified number of time periods defined for a report.

**host percent rank**

A percentage representing your facility's percentile position in comparison to the selected compare group.

**host value**

Your facility's value for the selected time period and numeric or characteristic.

**import**

Transfer of data to ActionOI from another application such as Microsoft Excel.

**indicators**

Quantitative measures used to measure the performance of outcomes of one or more departments. Indicators are calculated using data elements. For example, the direct cost data element is used to calculate the direct cost per adjusted discharge indicator.

**indirect cost**

A cost that cannot be directly attributed to a particular department, but that is borne as part of an overall operation. For example, payroll expenses of senior management, utilities, and general legal expenses are indirect costs.

**infection control**

Infection Control is the protection of patients and health care workers by the prevention of infection in the health care setting in a cost-efficient manner.
inpatient
A patient who has been admitted at least one night to a hospital or other health facility such as a nursing home, rehabilitation, or a mental hospital.

legend
A box that shows identifying names and symbols for each data series (for example, a data series found in a graph or chart).

level of care
The degree of complexity of medical services provided by a health facility or required by a patient or case.

major teaching hospital
To qualify as a major teaching hospital, one of the following criteria must be met:

- 400 or more acute-care beds in service
- an intern/resident-per-bed ratio of at least 0.25, and
- either sponsorship of at least 10 Graduate Medical Education (GME) programs or involvement in at least 20 programs overall
  OR
- Involvement in at least 30 GME programs overall (regardless of bed size or intern-/resident-per-bed ratio)
  OR
- Intern/resident-per-bed ratio of at least 0.60 (regardless of bed size or GME program involvement)

managed care
Managed Health Care is a system of health care delivery that aims to control costs by assigning set fees for services, monitoring the need for procedures such as tests and surgical operations, and stressing preventive care. Managed health-care systems include health maintenance organizations, preferred provider organizations (PPOs), networks of doctors and hospitals that adhere to given guidelines and fees in return for receiving a certain number of patients; and point of service (POS) plans, which are similar to PPOs but allow patients to go outside the network for treatment, usually at a higher cost. The term is also used to describe more traditional health-insurance plans that require that more expensive procedures be reviewed and approved by a plan official before they are performed. In managed care, the doctor is often paid a set fee or is paid a set amount monthly for each patient, a scheme called capitation.

maximum
The largest value in a comparison.
metrics and measures

**Metric**: A metric represents the unique occurrence of a particular unit of measure used in ActionOI. A metric may exist in one or more standard departments within ActionOI.

**Example**: Salary Cost

**Measure**: A measure is an instance of a metric, an individual occurrence of a unit of measure in a particular standard department.

**Example**: Salary Cost in the Imaging Services Diagnostic Radiology department.

minimum

The smallest value in a comparison.

minor teaching hospital

To qualify as an ActionOI minor teaching hospital, your facility must have 200 or more acute-care beds in service and either an intern/resident-per-bed ratio of at least 0.03 or involvement in at least three Graduate Medical Education (GME) programs overall.

multi-hospital system

A network of two or more facilities that operate under the same management and administration. The structure of health care systems varies, including nationwide and local networks. Same as health care system.

norm

An average value for an aggregate set of data for a given period of time.

normalizations

The basis of functional comparison in ActionOI. They are the adjustments applied to your organization’s data in order to follow reporting guidelines. Normalizations enable apples-to-apples comparisons among dissimilar facilities.

In order to report data according to ActionOI guidelines, your revenue accounts, expense accounts, payroll data, and statistics may need to be normalized or moved from your organization’s departments into specific ActionOI areas. The Department Reference Manual (DRM) provides instructions on what to include and what to exclude when reporting data for each area. As these normalizations are made consistently across all ActionOI hospitals, departmental data that would not otherwise be comparable, is now ready for apples-to-apples comparisons.
normalized data
   Facility data adjusted to correspond to ActionOI-defined departments and data elements. Use normalized data for apples-to-apples comparisons among dissimilar facilities.

opportunity dollars
   The potential monetary savings if changes are made to make your facility’s value for this indicator the same as that of the opportunity percentile. For some indicators, a higher value is better (for example, revenue). For other indicators, a lower value is better (for example, labor expense). If the facility is operating as efficiently as possible, the opportunity $ will be represented as zero.

opportunity hours
   The potential hourly savings if changes are made to make your facility’s value for this indicator the same as that of the opportunity percentile. For some indicators, a higher value is better (for example, volunteer service hours). For other indicators, a lower value is better (for example, staff hours paid). If the facility is operating as efficiently as possible, the opportunity hours will be represented as zero.

opportunity percentile
   Variance divided by the current value.

organization area
   A custom mapping of ActionOI standard set of organizations. You can create organization areas to reflect the structure of your health care organization, so you can get more representative information from ActionOI reports. ActionOI saves organization area definitions separate from the ActionOI standard definitions.

payer
   The person or organization that pays a health care provider for health care services prior to or after the services have been provided.

payroll
   The number of hours that were paid for labor, which includes the hours worked, hours paid, and RN hours paid.

percentile
   Values that indicate the percentage of data points that fall below the displayed value. When creating a report, you can choose up to three desired percentiles to make comparisons.
**percentile better than median**

Because the median is the 50th percentile, opportunity cannot be calculated on a percentile higher than the 50th. When you are defining how you want to calculate opportunity, you choose in terms of *percent better than the median*. For example, 5% better than the median is going to calculate opportunity at the 45th percentile.

**personal compare groups**

A compare group that is created by the customer based on specific criteria (for example, department indicator values and/or facility characteristics).

**phlebotomy**

Phlebotomy is the puncture of a vein for the purpose of collecting blood.

**point-of-care testing (POCT)**

Point-of-care testing (POCT) is defined as diagnostic testing at or near the site of patient care. The driving notion behind POCT is to bring the test conveniently and immediately to the patient.

**procedure**

A service in the practice of clinical or diagnostic medicine (for example, an intervention involving drugs, devices, and provider skills and abilities).

**profiling**

An analytic tool that uses epidemiological methods to compare practice patterns of providers on the dimensions of cost, service use, or quality of care. The provider's pattern of practice is expressed as a rate aggregated over time for a defined population of patients.

**program coordinator**

This is the customer staff member who serves as the primary ActionOI administrator. Duties include data management (loading, submitting, auditing), administering system access, ensuring reports and information are available, and coordinating program training. The program coordinator is the primary contact for ActionOI-related communications and activities for both ActionOI and customer-facility staff.

**quality of care**

The degree to which health care is expected to increase the likelihood of desired health outcomes and is consistent with standards of health care.
relative value unit (RVU)

A The RVU is a numerical scale used to compare resources needed for procedures and services provided by the facility. RVUs must be multiplied by a dollar conversion factor to become payment amounts.

rollup

The process of creating a higher level summary by including information from specific subsets.

sample size

The number of cost centers in the selected comparison for the selected department.

services

Any work performed by a trained professional in exchange for pay or as part of a job that is concerned with diagnosis, treatment, or care that will benefit another person's health.

shared service

A shared service represents tasks and functions of a particular department that is providing services to themselves as well as to others on the consolidated financial statements of the System Entity.

standard compare groups

Compare groups that are defined by ActionOI and made available for use by all ActionOI users.

standard department

In generating reports, ActionOI uses standardized definitions of departments to allow facilities to compare data about similar functions when their actual functional and accounting structure may vary. After you upload files to ActionOI, the first step in Data Collection is to map your facility's cost centers to standard departments. For example, you could map your West Burn ICU and East Burn Special Care to a facility department that you name Burn Care Units. Then, you map Burn Care Units to the standard department Burn Care Inpatient Unit.

standard deviation

A measure of how widely values are dispersed from the average value.

standard elements

Every department has a required set of ActionOI-defined financial and operational information. The following are standard elements: worked hours, paid hours, overtime hours, salary cost, supply cost, direct cost, and department-specific workload units.
subset

A part of a larger group of related things and a set in which all elements are contained in another set, therefore if the item is a subset of an element it will add up to the total if all subsets are populated.

survey

An investigation in which information is systematically collected. A population survey can be conducted by face-to-face inquiry, by self-completed questionnaires, by telephone, by postal service, or in some other way. Each method has its advantages and disadvantages. The generalization of results depends upon the extent to which those surveyed are representative of the entire population.

system

An affiliation of facilities under one corporate identity. System identities are established contractually with IBM.

system entity

A system entity represents an entire organizational structure and includes all entities reported on the consolidated financial statements. This includes all sites of care -- ambulatory/outpatient centers, clinics, home health care, hospitals, long term care facilities, medical groups, skilled nursing facilities, joint venture, physician practices, day care facilities, fitness centers, and or insurance/health plans.

template

Use ActionOI templates as a foundation for formatting and generating reports for subsequent time periods. Templates provide an easy way to ensure that your design and report criteria is consistent from one report time period to another, so that when you are ready to create a report it would items such as the compare group, columns, and other reporting elements from the existing template. You can also change the report criteria without affecting the reporting template on which it was based by simply saving it as a new template.

trimming

To provide more statistically relevant values for reports, ActionOI excludes (trims) statistical outliers from a data set before running the relevant computations on the data. As of Q2, 2008, ActionOI trimming methodology is consistent with what is used for the 100 Top® program, specifically Interquartile Range (IQR). This trimming approach relies on the 25th and 75th percentiles, and constructs trim points around these values.

Like standard deviation, the interquartile range (IQR) is a measure of dispersion. Both can be used to identify outliers in a data set. The IQR method, however, is based on a data point's distance from the median rather than the mean, and is thus less influenced by skewed distributions and extreme data points.
UHC
The University Health System Consortium (UHC) is a member-driven alliance of the clinical enterprises of academic health centers (AHCs). UHC supports the research and education missions of AHCs by advancing and disseminating ideas and knowledge, fostering collaboration, and promoting health care opportunity improvements through clinical process improvement and operational benchmarking. http://www.uhc.edu/.

units of analysis (UOA)
The unit to which a performance measure is applied (for example, patients, clinician, group of clinicians, institution).

units of service (UOS)
Volume elements that are commonly used as the denominator of calculated indicators. For example, the volume of Patient Days in the indicator Medical Supply Expense / Patient Day or the volume of 100 Tests Billed in the indicator Labor Expense / 100 Tests Billed.

user
An individual who uses ActionOI. Also used to describe an ID used to log in to ActionOI.

VHA
VHA promotes operational benchmarking and quality improvement for single-hospital and multi-hospital systems across the United States. VHA was named Voluntary Hospitals of America, Inc. until 1994, when it was renamed VHA, Inc. to avoid misinterpretation of the term "voluntary." VHA has more than 1,750 members, representing 24 percent of the nation's community-owned hospitals, including a large number of the leading health care providers in 48 states and the District of Columbia. VHA is a cooperative organization founded and operated on the principle that the sharing and transfer of ideas, techniques, and experiences improves the quality and efficiency of delivering community-oriented health care. VHA also conducts research on the differences between non-profit and investor-owned health care organizations, resulting in a strong advocacy program for continued tax-exempt status of non-profit hospitals. http://www.vha.com/.

volume
Any element that indicates the number or size of something (for example, number of licensed beds, number of patient days or patient visits, number of billed tests).

x-axis
The horizontal axis for a graph, representing the baseline, or 0 value, for the side scale. Typically, the x-axis is the bottom horizontal line in a graph.
**y-axis**

The vertical axis for a graph, which can have a different meaning based on the scale. For example, with time scales, the y-axis represents the start date.

**z-axis**

The third-dimensional axis for a graph, adding depth to the horizontal (x) and the vertical (y) axes.
